

**Craft:** Pipeline Operations Level 2  
**Module:** CT63\_3-17  
**Module Title:** Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them within Allowable Limits on a Liquid Pipeline System (Field)

**Trainee Name:**

**Training Program Sponsor:**

**Instructor:**

**Rating Levels:** (1) Passed: performed task (2) Failed: did not perform task  
 Also, list the date the testing for each task was completed.

**Recognition:** When testing for the NCCER Training Program, be sure to record Performance testing results on the Registration of Training Modules form, and submit the results to the Training Program Sponsor.

2	Monitor pressures, flows, communications, and line integrity and maintain them within allowable limits on a liquid pipeline system (CT63_3-17).				
	Identify potential abnormal operating conditions (AOCs) that may occur during performance of this CT, and know the appropriate actions to take in response to them.				
	Utilize the appropriate personal protective equipment (PPE) according to relevant company procedures.				
	Verify that the flows, pressures, and product characteristics are within normal range.				
	Continuously monitor, by whatever means available (SCADA, pressure gauge, meter), the pressures and flow rates of the pipeline to look for any changes.				

**Craft:** Pipeline Operations Level 2

**Module Title:** Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them within Allowable Limits on a Liquid Pipeline System (Field)

OBJECTIVE	TASK	RATING	DATE	START TIME	END TIME
	If pressures, flows, and line balance are not within normal range, determine the cause of variation from normal and correct the situation if possible.				
	Complete appropriate documentation as required by operator's procedures.
