

Performance Profile Sheet (Page 1 of 2)

NCCER Training

Craft: Pipeline Operations Level 2
 Module: CT65_2-17
 Module Title: Shutdown of a Gas Pipeline

Trainee Name:

Training Program
 Sponsor:

Instructor:

Rating Levels: (1) Passed: performed task (2) Failed: did not perform task
 Also, list the date the testing for each task was completed.

Recognition: When testing for the NCCER Training Program, be sure to record Performance testing results on the Registration of Training Modules form, and submit the results to the Training Program Sponsor.

OBJECTIVE	TASK	RATING	DATE	START TIME	END TIME
1	Shut down a gas pipeline (CT65_2-17).				
	Identify potential abnormal operating conditions (AOCs) that may occur during performance of this CT, and know the appropriate actions to take in response to them.				
	Utilize the appropriate personal protective equipment (PPE) according to relevant company procedures.				
	Understand the desired pressure to keep on a non-running line in accordance with company policies.				
	Understand the desired pressure to keep on a static line in accordance with company policies.				

Performance Profile Sheet (Page 2 of 2)

NCCER Training

Craft: Pipeline Operations Level 2
Module: CT65_2-17
Module Title: Shutdown of a Gas Pipeline

OBJECTIVE	TASK	RATING	DATE	START TIME	END TIME
	<p>Shut down pump units or compressor units beginning at the origination point and proceeding downstream to the destination. Depending on the line profile, sufficient units at the source station and at the other stations may be kept operational. Then shut down in conjunction with valve closure at the delivery terminals or stations to satisfy the policies on maintaining minimum pressures on shutdown of the particular line.</p>				
	<p>The closure of isolation valves at intermediate delivery points should occur in conjunction with the shutdown of that station's units unless otherwise specified in company policy or procedure.</p>				
	<p>Complete appropriate documentation as required by operator's procedures.</p>
