Introduction to the Power Industry

12.5 Hours
Published: 2010
Module ID 49101-10

PAPERBACK  ISBN

• Downloadable instructor resources that include module tests, PowerPoints®️, and performance profile sheets are available at www.nccer.org/irc.

This module sets the stage for trainees entering the electrical energy production and distribution field. It describes the many ways in which electricity can be produced, from burning fossil fuels such as coal and natural gas, to harnessing nuclear energy, and using renewable energy sources such as wind, geothermal, and solar energy.

Power Industry Fundamentals
