## L1 Sprinkler Fitting

### Curriculum Notes
- **145 Hours**
  - Includes 72.5 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately.
- **Revised:** 2013, Third Edition to reflect NFPA 13
- **Downloadable instructor resources that include module tests, PowerPoints**, and performance profile sheets are available at [www.nccer.org/irc](http://www.nccer.org/irc).

### Modules
- **The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.**

<table>
<thead>
<tr>
<th>Module ID</th>
<th>Title</th>
<th>ISBN</th>
</tr>
</thead>
<tbody>
<tr>
<td>18101-13</td>
<td>Orientation to the Trade (Module ID 18101-13) Identifies sprinkler fitter career opportunities and typical work environments. Examines trade-specific safety hazards and safety barriers to install pressure gauges on alarm valves and accelerators, how to adjust an air maintenance device, and how to reset and troubleshoot dry-pipe systems.</td>
<td>978-0-13-378229-5</td>
</tr>
<tr>
<td>18102-13</td>
<td>Introduction to Components and Systems (Module ID 18102-13) Introduces testing laboratories and listing agencies. Provides an overview of the major types of sprinkler systems including wet pipe, dry pipe, preaction, and deluge systems. Defines sprinkler head types, orifice size, and K-factor. Underground and aboveground pipe and tubes are discussed, including hangers, bracing, and restraints. Also covers valves, alarms, and fire department connections.</td>
<td>978-0-13-378240-0</td>
</tr>
<tr>
<td>18103-13</td>
<td>Steel Pipe (Module ID 18103-13) Identifies steel piping materials along with tools used to cut and thread steel pipe. Describes methods for threading, cutting, and grooving pipe, including how to determine pipe length between fittings (takeouts). Discusses threaded, plain-end, and flanged fittings.</td>
<td>978-0-13-378246-2</td>
</tr>
<tr>
<td>18104-13</td>
<td>Copper Tube Systems (Module ID 18104-13) Introduces copper tubing and fittings along with cutting and bending tools. Describes soldering process and techniques for measuring, cutting, reaming, and cleaning. Brazing is described as brazing metals, flues, and brazing equipment. Support bracing for copper tube and grooved couplings for copper pipe are also discussed.</td>
<td>978-0-13-378245-3</td>
</tr>
<tr>
<td>18105-13</td>
<td>Underground Pipe (Module ID 18105-13) Details underground piping installations for various types of pipe. Explains thrust blocks and restraints. In-building risers, hydrants, yard valves, and hydrant houses are discussed as are testing, inspection, flushing, and chlorinating. The underground test certificate is also covered.</td>
<td>978-0-13-378244-6</td>
</tr>
<tr>
<td>18106-13</td>
<td>General Purpose Valves (Module ID 18106-13) Covers types of valves and valve applications, including service procedures for standard valves. Also covers installation of OS&amp;Y valves, butterfly grooved valves, and tamper switches. Outlines procedures for disassembling, servicing, and reassembling check valves.</td>
<td>978-0-13-378256-1</td>
</tr>
<tr>
<td>18107-13</td>
<td>Shop Drawings (Module ID 18107-13) Explains how to read drawings to identify materials, calculate square footage and number of sprinklers required, lay out sprinkler hanger locations, and identify sprinkler aricette sizes.</td>
<td>978-0-13-378257-8</td>
</tr>
</tbody>
</table>

Sprinkler Fitting Level 3

L3  SPRINKLER FITTING

LEVEL 3

Curriculum Notes
• 147.5 Hours
• Revised: 2013, Third Edition to reflect NFPA 13
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK  ISBN
Individual Modules: $24.99  see module list

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNS are for ordering individual modules only.

Deluge/Preaction Systems (40 Hours)
(Module ID 18301-13) Describes deluge and preaction systems and explains installation techniques and troubleshooting. Covers hydraulic and pneumatic release mechanisms, non-interlocked and interlocked preaction systems and Firecycle® Systems.

Standpipes (25 Hours)
(Module ID 18302-13) Describes standpipe classifications and explains flow capabilities of each type. Covers requirements for sizing and installation of standpipes. Discusses pressure-reducing valves under flow and no-flow conditions. Also covers LINK-SEAL® installations.

Water Supplies (15 Hours)
ISBN 978-0-13-378873-0
(Module ID 18303-13) Covers basic water chemistry and properties. Discusses methods of determining water supply requirements and considerations for supply systems. Discusses infrastructure, measurement of water supply capability, water supply appurtenances, fire department connections, and typical city water pits.

Fire Pumps (40 Hours)
(Module ID 18304-13) Covers fire pump categories and components. Describes fire pump controller requirements and fire pump performance and alignment. Explains pump and driver characteristics and performance curves as well as controllers, sensing lines, supervision, and starting methods. Outlines project requirements, installation, maintenance, and troubleshooting.

Application-Specific Sprinklers and Nozzles (27.5 Hours)
(Module ID 18305-13) Describes application-specific sprinkler types and requirements. Discusses area of coverage, positioning, and obstruction requirements and explains system selection.

Sprinkler Fitting Level 3

L4  SPRINKLER FITTING

LEVEL 4

Curriculum Notes
• 145 Hours
• Revised: 2013, Third Edition to reflect NFPA 13
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNS are for ordering individual modules only.

System Layout (45 Hours)
(Module ID 18401-13) Identifies basic hydraulic concepts and selection of hydraulic design methods. System configuration, design criteria, discharge characteristics, and types of pressure loss are explained. Explains how to perform fire sprinkler system hydraulic calculations.

Inspection, Testing, and Maintenance (17.5 Hours)
(Module ID 18402-13) Describes initial and periodic testing and inspection requirements, as well as maintenance and repair of wet-pipe systems, dry-pipe systems, preaction/deluge systems, and special systems.

Special Extinguishing Systems (42.5 Hours)
(Module ID 18403-13) Identifies the following extinguishing exposure systems: water spray, foam, carbon dioxide, Halon, auxiliary and local alarm. Limited water systems, fire extinguishers, and water mist suppression systems are also covered.

Introductory Skills for the Foreman (20 Hours)
(Module ID 18404-13) Introduces the role of foremanship and covers responsibilities, leadership, and safety. Also explains project documentation and reports related to materials tracking and labor tracking.

Procedures and Documentation (20 Hours)
(Module ID 18405-13) Explains the importance of proper documentation to ensure correct installation and avoid future rework and possible unintentional releases. Emphasizes the need to properly document the actual installation using written reports and photographs. Includes causes of and responses to water damage, and provides a case history of an unintentional release.
