The Standard for Developing Craft Professionals

NCCER CURRICULUM CATALOG

BUILT FOR INDUSTRY, BY INDUSTRY.
Standardized, competency-based curricula for construction professionals.
NCCER’s catalog is digital!

A compiled PDF of all crafts is available on the Instructor Portal at www.nccer.org/instructors. In addition, craft listings with modules for each level are available as downloadable PDFs on each of the individual craft webpages, found at www.nccer.org/crafts.

Stay up-to-date with all NCCER news by signing up for our mailing list at www.nccer.org/join-mailing-list
## Table of Contents

### CONSTRUCTION ESSENTIALS

- **Applied Construction Math** .......................................................... 10
- **Core** .................................................................................. 9
- **Tools for Success** ................................................................... 10

### CONSTRUCTION & MAINTENANCE

- **Boilermaking** ........................................................................ 11
- **Cabinetmaking** ..................................................................... 15
- **General Carpentry** ............................................................... 13
- **Carpentry** ............................................................................ 14
- **Concrete Construction** .......................................................... 17
- **Construction Craft Laborer** ..................................................... 19
- **Construction Technology** ....................................................... 21
- **Drywall** ............................................................................... 22
- **Electrical** ............................................................................ 23
- **Electronic Systems Technician** ............................................... 26
- **Heavy Equipment Operations** ................................................. 28
- **Heavy Highway Construction** ................................................ 30
- **HVAC** ................................................................................. 32
- **HVAC** ................................................................................ 33
- **Hydroblasting** ..................................................................... 30
- **Industrial Coating and Lining Application Specialist** ............. 36
- **Industrial Maintenance Electrical & Instrumentation** ............. 37
- **Industrial Maintenance Mechanic** ......................................... 40
- **Instrumentation** .................................................................. 42
- **Ironworking** ......................................................................... 45
- **Managing Electrical Hazards** ................................................. 24, 124
- **Masonry** .............................................................................. 47
- **Mechanical Insulating** ............................................................ 49
- **Millwright** ............................................................................ 51
- **Painting** ............................................................................... 54
- **Pipefitting** ............................................................................ 56
- **Pipelayer** ............................................................................. 58
- **Plumbing** ............................................................................. 59
- **Reinforcing Ironwork** ............................................................ 62
- **Roofing** ............................................................................... 63
- **Scaffolding** ........................................................................... 64
- **Sheet Metal** .......................................................................... 65
- **Site Layout** .......................................................................... 67
- **Sprinkler Fitting** ................................................................... 68
- **Welding** ................................................................................ 70

### CRANE, RIGGER, AND SIGNAL PERSON

- **Mobile Crane Operations** ....................................................... 73
- **Rigger/Signal Person** ............................................................. 75
- **Tower Crane Operator** ............................................................ 77

### GREEN/SUSTAINABLE

- **Alternative Energy** ............................................................... 78
- **Solar Photovoltaics** ............................................................... 79
- **Sustainable Construction Supervisor** .................................... 80
- **Weatherization** .................................................................... 81
- **Wind Energy** ......................................................................... 84
- **Your Role in the Green Environment** .................................... 10, 80

### MANAGEMENT

- **Fundamentals of Crew Leadership** ........................................ 85
- **Project Management** ............................................................. 86
- **Project Supervision** ............................................................... 87

### MARITIME

- **Maritime Industry Fundamentals** .......................................... 88
- **Maritime Aluminum Welding** ................................................ 89
- **Maritime Electrical** ............................................................... 90
- **Maritime Pipefitting** ............................................................. 92
- **Maritime Structural Fitter** ....................................................... 93
- **Maritime Welding** ................................................................. 95

### PIPELINE

- **Introduction to the Pipeline Industry** ...................................... 97
- **Pipeline Abnormal Operating Conditions** .............................. 98
- **Pipeline Corrosion Control** ..................................................... 107
- **Pipeline Electrical and Instrumentation** .................................. 99
- **Pipeline Field and Control Center Operations** ....................... 105
- **Pipeline Maintenance and Mechanical** .................................. 101

### POWER

- **Power Generation Maintenance Electrician** ......................... 110
- **Power Generation I&C Maintenance Technician** .................. 113
- **Power Generation Maintenance Mechanic** ............................ 116
- **Power Industry Fundamentals** ............................................... 109
- **Power Line Worker** ............................................................... 119
- **Power Line Worker: Distribution** .......................................... 120
- **Power Line Worker: Substation** ............................................. 121
- **Power Line Worker: Transmission** ........................................ 122

### SAFETY

- **Basic Safety (Construction Site Safety Orientation)** .............. 9, 124
- **Fall Protection Orientation** .................................................... 124
- **Field Safety** ........................................................................... 123
- **Safety Technology** ................................................................. 125
# HOW TO ORDER

**Module Orders**
Individual modules are printed on demand. Please allow two to three weeks for fulfillment and delivery. Modules are not returnable.

**Pricing**
All prices listed in this catalog reflect net pricing available to schools, government, business and industry accounts. No additional discounts are available. Prices are subject to change without notice.

**Shipping and Postage**
Shipping costs are based on a number of factors including weight, destination and type of service. All orders are subject to approximately 8%-10% shipping cost on total order. State and local taxes will be added where they apply.

**Billing**
Invoices are generated only after items have shipped. You may receive multiple invoices on one purchase order if items are backordered and/or not yet published. Drop shipments to other locations are accompanied by a packing slip. This is not an invoice and should not be paid. Only the “Bill to” account will be invoiced.

**Returns Policy**
If you are not entirely satisfied with any of our textbooks, you may return materials including paperback, loose-leaf and binder in saleable condition for a full refund, credit or replacement within 15 months of the original invoice date (12 months for high school accounts). All packages must be returned complete as sold. Individual modules are printed on demand.

**Payment Terms**
Net 30 days.

**Individual Ordering Information**
Orders from individuals are welcome but must be prepaid by credit card (VISA, MasterCard and Discover accepted), check or money order. Individual pricing is list price, not reflected in this catalog.

**Ordering and Customer Service**
Visit nccerconnect.com and click register. See orange section above for ordering information, you will need to provide the custom book ISBN.

Visit pearsonhighered.com/collections to create a custom book. A custom book ISBN will be created and sent to you via email within 48-72 hours of creating your book.

Visit nccerconnect.com and click register.

Contact your Pearson/NCCER executive director.

See orange section above for ordering information, you will need to provide the custom book ISBN.

NCCERconnect fosters learning within and beyond the classroom through a media rich eText and a course management system.

Learning no longer needs to take place between the front and back covers of the textbook. Students are online—on their smartphones, tablets and laptops—from the instant they roll out of bed until the minute they turn in each night. Every moment is an opportunity to connect, experience and learn.

**Highlights of this fully integrated learning program:**

- **Gradebook:** A robust gradebook allows you to see multiple views of your classes’ progress. Completely customizable and exportable, the gradebook can be adapted to meet your specific needs.
- **Multimedia Library:** Students and instructors can quickly search through resources and find supporting media.
- **Pearson eText:** Rich media options let students watch example videos as they read or do homework.
- **Course Management:** A full suite of course management features including email, document uploading, announcements, gradebook and instructor tools.

NCCERconnect is currently available with eText for the following crafts:

- Carpentry
- Construction Technology
- Core
- Electrical
- Electronic Systems Technician
- Fundamentals of Crew Leadership
- Heavy Equipment Operator
- HVAC
- Masonry
- Plumbing
- Welding

For the most up-to-date information, including ordering information, visit [www.nccer.org/onlinesolutions](http://www.nccer.org/onlinesolutions).

**Pearson Collections**

Select your ideal content, align it with your syllabus, then publish and share with your students.

**Search:** Collections, the Pearson custom library, includes all of our NCCER titles. You can freely mix and match between any craft areas.

**Create:** Select modules from any of our NCCER titles and add them to a customized book that meets your needs.

**Preview:** You can preview your Collection online at any time. Review the content and either make edits yourself or contact our team to help with the changes.

For more information on this service, visit [www.nccer.org/collections](http://www.nccer.org/collections).
NCCER’s Expanded Digital & Customer Service Offerings

Registry System
NCCER’s Registry System is a secure database maintained by NCCER to help manage an accredited organization’s training and assessment programs. Individuals can also use the Registry to review their credentials. Visit registry.nccer.org to log in and access the features like the easy to use dashboard and real-time records management.

Learn more about your role in the system by signing up for webinars available on nccer.org/registry.

Testing System
Focus more on building skills and less on paperwork with the NCCER Testing System.

Now available with all NCCER craft and pipeline tests, users are able to create, launch, score, store and submit module tests completely through the online system. These improvements have also eliminated the need for paper-based testing and record storage.

Pre-purchase craft and pipeline module tests and receive a volume-based discount. Besides providing reduced rates, pre-purchasing tests comes with great perks — tests do not expire, can be used across multiple crafts and may be purchased by credit card or purchase order.

Visit nccer.org/testing for more information about online training resources and to sign up for a free training webinar!

Even more on nccer.org...
NCCER’s website is a great resource for exploring available craft areas, learning more about credentials and finding NCCER accredited training and assessment programs all over the world.

The myNCCER button on the top right leads to a special dashboard for sponsor representatives, master trainers, craft instructors and anyone looking for more in-depth information on NCCER’s programs, systems and resources.
Product Design and Supplements

Each craft area comprises successive levels, and each level comprises individual units of study called modules. Modules can be treated as separate task-training units because each one contains objectives as well as knowledge and performance tests. Instructors may teach a single module or the entire craft level and even customize their own training programs by combining modules across various craft areas. Customization is easy and cost-effective.

Course Planning Tools

The following product supplements are available at no cost in the Program Resources - Crafts/Titles section at www.nccer.org:

- Competencies/Objective Lists — Includes all competencies and comprehensive learning objectives for each craft.
- Performance Profiles — Correlates to the performance tasks of NCCER curricula and can be used to provide record keeping where documentation of training is required.
- Equipment and Material Lists — Includes all of the equipment and materials required to teach each module.
- Course Maps — Tracks revised modules, records new module numbers and shows how modules may have been incorporated into revisions or indicates if they have been deleted.

Craft Identifiers

The first two digits of the Module Identification Number indicate the “parent” or source craft of that module. All NCCER Craft Identifiers are listed below.

<table>
<thead>
<tr>
<th>Module ID Numbers</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>29102</td>
<td>The two-digit prefix (29) indicates the craft identifier (Welding). The last three digits are the unique module identifiers. Titles older than 2018 will have an additional two-digit date suffix.</td>
</tr>
</tbody>

Build Your Future in Construction (Elective)
(Module ID 00100) Construction is an exciting, well-paying industry that offers an abundance of career opportunities. With a growing need for individuals who are ready to learn while getting paid, it provides a great fit for people of all backgrounds, skills, and strengths. Carpenter, pipefitter, welder, electrician, and crane operator are just a few of the construction professions in high demand. This module will help you understand the state of the industry, the job opportunities that currently exist, and the training options that will lead you on a path to your new construction career.

(Module ID 00101) Work at construction and industrial job sites can be hazardous. Most job-site incidents are caused by at-risk behavior, poor planning, lack of training, or failure to recognize the hazards. To help prevent incidents, every company must have a proactive safety program. Safety must be incorporated into all phases of the job and involve employees at every level, including management.

(Module ID 00102) Craft professionals rely on math to do their jobs accurately and efficiently. Plumbers calculate pipe lengths, plan drain slopes, and interpret dimensioned plans. Carpenters meet code requirements by using math to frame walls and ceilings properly. HVAC professionals develop ductwork and calculate airflow with practical geometry. Whichever craft lies in your future, math will play a role in it. This module reviews the math that you will need and sharpens the skills that you will be using in the exciting modules ahead.

(Module ID 00103) Every profession has its tools. A surgeon uses a scalpel, an instructor uses a whiteboard, and an accountant uses a calculator. The construction crafts require a broad array of hand tools. Even if you are familiar with some of the tools, all craftworkers need to learn how to select, maintain, and use them safely. A quality hand tool may cost more up front, but if it is properly used and maintained, it will last for years. A true craft professional invests wisely in hand tools, and uses, maintains, and stores them with the same wisdom.

(Module ID 00104) Power tools play an important role in the construction industry. Thousands of construction workers across the world use power tools every day to make holes, cut different types of materials, smooth rough surfaces, and shape a variety of products. Regardless of their specialization, all construction workers eventually use power tools on their job. This module provides an overview of the common types of power tools and how they function. It also describes the proper techniques required to ensure their safe and efficient operation.

(Module ID 00105) Various types of construction drawings are used to represent actual components of a building project. The drawings provide specific information about the locations of the parts of a structure, the types of materials to be used, and the correct layout of the building. Knowing the purposes of the different types of drawings and interpreting the drawings correctly is important for anyone who works in the construction trades. This module introduces common types of construction drawings, their basic components, standard drawing elements, and measurement tools that are typically used when working with construction drawings.

Enhanced your construction training with these supplemental Core companions. The following titles are excellent resources for your existing program. They can be used on a standalone basis or in combination with Core.

## Applied Construction Math

**A Novel Approach**

**PAPERBACK** ISBN 978-0-13-227298-8

Trainee Guide: $34.99

**Published: 2006**

**Applied Construction Math** features a story that students can relate to and math skills they never thought they could grasp. Its innovative style motivates students to follow the lessons by associating math with events they may encounter in their own lives. Students will see that learning math can be exciting as they follow along with Mr. Whyte and his construction class while they build the perfect house. Thirteen chapters teach basic math skills, including:

- Division
- Decimals/Percentages
- Reading Measurements
- Calculating Area
- Powers of Ten
- Linear Measure, Angles, Volumes, Pressure, and Slopes
- Solving for Unknowns
- Square Inches, Feet, and Yards
- Volume
Boilermaking

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Boilermaking** (10 Hours)
(Module ID 34101-10) Provides an overview of the boilermaker craft, including a description of career opportunities.

**Boilermaking Safety** (12.5 Hours)
(Module ID 34102-10) Covers safety issues specific to boilermakers on the job.

**Boilermaking Tools** (15 Hours)
(Module ID 34103-10) Introduces the hand and power tools used by boilermakers, and the associated safety concerns.

**Basic Materials** (10 Hours)
(Module ID 34104-10) Identifies materials used in the construction of boilers, including material properties, standards and codes, and material markings.

**Pipe Hangers and Supports** (25 Hours)
(Module ID 34203-11) Identifies pipe hangers and supports and explains how to interpret pipe support drawings and symbols. Explains how to select, store, handle, install, and maintain spring can supports.

**Drawings and Detail Sheets** (15 Hours)
(Module ID 34204-11) Explains how to read drawings and their symbols. Covers plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, piping and instrumentation drawings, isometric drawings, spool sheets, detail sheets, and orthographic drawings.

**Fasteners and Anchors** (5 Hours)
(Module ID 34205-11) Covers threaded and non-threaded fasteners and anchoring devices. Explains how to select fasteners and anchors for given applications. Describes how to install threaded, non-threaded, and insulated fasteners and anchors.

**Welding Symbols** (5 Hours)
(Module ID 34206-11) Explains how to read symbols on welding drawings, specifications, and welding procedure specifications. Describes the symbols for fillet welds, groove welds, miscellaneous other welds, and non-destructive tests.

**Oxyfuel Cutting** (17.5 Hours)
(Module ID 34105-10) Describes the safety requirements associated with oxyfuel cutting. Describes straight line, bevel, piercing, and washing techniques.

**Cutting and Fitting Gaskets** (12.5 Hours)
ISBN 978-0-13-213699-0
(Module ID 34106-10) Describes gasket materials used in mating flanges and procedures for laying out and cutting a flange gasket.

**Base Metal Preparation** (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for cutting and welding.

**Welding Basics** (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.

**Socket Weld Pipe Fabrication** (25 Hours)
(Module ID 34207-11) Describes different types of socket weld piping materials and fittings and how to read socket weld piping drawings. Explains how to determine pipe lengths between socket weld fittings, as well as how to mate socket weld fittings to pipe.

**Butt Weld Pipe Fabrication** (40 Hours)
(Module ID 34208-11) Covers preparing pipe ends for butt welding; determining pipe lengths between butt weld fittings; and using welding jigs to align pipe and butt weld fittings for welding. Explains how to select and install backing rings.

**Tube Weld Preparation and Fitting** (17.5 Hours)
(Module ID 34209-11) Describes methods used to gain access to boiler tubes needing repair, and to prepare boiler tubes for replacement. Explains how to fit-up a section of boiler tube. Describes welding procedures for making butt welds on standard carbon steel tubes and composite tubes.

**Air Carbon Arc Cutting and Gouging** (12.5 Hours)
ISBN 978-0-13-257796-0
(Module ID 34210-11) Describes air carbon arc cutting (CACA) equipment and processes. Explains how to select and install CACA electrodes, and how to prepare the work area and CACA equipment for safe operation. Provides instructions for using CACA equipment for washing and gouging activities.

---

**Curriculum Notes**
- **185 Hours**
- **Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately. For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- **Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.**

---

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Boiler Systems and Components** (22.5 Hours)
(Module ID 34201-10) Introduces boiler configurations and applications. Identifies boiler components and explains their functions.

**Identifying and Installing Valves** (20 Hours)
(Module ID 34202-11) Identifies valves found in boiler systems. Describes valve components and explains their functions. Explains how to select, store, handle, and install valves, and describes valve markings and nameplate information.

**Base Metal Preparation** (15 Hours)
(Module ID 34209-11) Describes methods used to gain access to boiler tubes needing repair, and to prepare boiler tubes for replacement. Explains how to fit-up a section of boiler tube. Describes welding procedures for making butt welds on standard carbon steel tubes and composite tubes.

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103-09; from Welding Level One, Fourth Edition)

Boiler Pressure Components (25 Hours)
(Module ID 34301-11) Describes the pressure components of a boiler system and their locations. Explains the procedures required to repair nonpressure components of a boiler.

Boiler Nonpressure Components (15 Hours)
(Module ID 34302-11) Describes the nonpressure components of a boiler system and their locations. Explains the procedures required to repair nonpressure components of a boiler.

Boiler Auxiliaries (25 Hours)
(Module ID 34306-11) Describes the air flow systems within a boiler system and the different fuels used to fire boiler system furnaces. Describes ash removal systems and the equipment used to protect the environment. Covers the feed water system into a boiler and the blow down from a boiler system.

Brick, Refractory, Insulation, and Lagging (BRIL) (5 Hours)
(Module ID 34305-11) Describes types of BRIL and explains their functions. Also addresses hazards associated with BRIL.

Advanced Tube Work (20 Hours)
(Module ID 34303-11) Explains the methods used to identify problem tubes and extract them. Also describes the methods used for replacing and plugging tubes.

Advanced Boilermaking Construction Drawings (20 Hours)
(Module ID 34402-12) Covers symbols and abbreviations used on piping and instrumentation drawings and piping arrangement drawings. Explains how to read and interpret different types of construction drawings. Explains how to sketch an isometric drawing from a plan view drawing, and how to calculate line lengths from isometric drawings.

Advanced Pipe Fabrication (50 Hours)
(Module ID 08402-07; from Pipefitting Level Four)

Stress Relieving (10 Hours)
(Module ID 34406-12) Covers metal distortion and ways to prevent it. Explains thermal growth in metals, and how to calculate thermal growth in given metals. Explains how misalignment creates stress in metals. Describes ways to relieve stress in piping that is experiencing distortion due to welding, thermal growth, or misalignment.

Quality Assurance (10 Hours)
(Module ID 34407-12) Covers codes governing welding and boilers. Describes weld imperfections and their causes. Identifies and explains different nondestructive and destructive testing methods. Explains how to make visual inspections of fillet welds. Describes welder qualification testing, and stresses the importance of quality workmanship.

Testing Piping Systems and Equipment (20 Hours)
(Module ID 34308-11) Lists protest requirements for boiler system piping systems and equipment. Describes service and flow tests, head pressure tests, and hydrostatic tests performed on boiler system piping systems and equipment.

Rigging (22.5 Hours)
(Module ID 15206-07; from Millwright Level Two)

Towers and Exchangers (25 Hours)
(Module ID 34307-11) Explains the functions of towers and exchangers and the basic distillation process. Describes various types of towers and exchangers and their components.

Advanced Exchangers (25 Hours)
(Module ID 34411-12) Identifies different types of heat exchangers and their components. Describes methods used to test exchangers, and how to pull exchanger bundles. Explains how to replace a flange and a nozzle on an exchanger.

Advanced Towers (25 Hours)
(Module ID 34412-12) Identifies different types of towers and their components. Explains how to remove and replace different types of packing used in towers. Describes methods used to make field repairs to tower trays. Explains how to remove a tower distributor for maintenance.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
General Carpentry

Building Materials and Fasteners (20 Hours)
(Module ID 27102) Introduces building materials used in construction, including lumber, engineered wood products, concrete materials, steel framing, and a variety of fasteners and anchors. Also describes material handling and storage techniques, and basic calculations used to determine needed framing and concrete quantities.

Construction Plans & Documents (20 Hours)
(Module ID 27113) Describes construction plans and documents used by carpenters, including drawings found in commercial and residential plans. Focuses on information included in civil, architectural, and structural drawings. Also covers the importance of specifications, and reviews building codes used by carpenters.

Principles of Site and Building Layout (20 Hours)
(Module ID 27110) Introduces site layout and building layout techniques. Explains the use of construction drawings and math to guarantee the accuracy of the building site.

Floor Systems (25 Hours)
ISBN 978-0-13-787628-0
(Module ID 27015) Introduces carpenters to drawings used to construct flooring systems. Defines framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials. Covers the installation of floor components including sill plates, beams, girders, joists, and subfloors.

Wall Systems (10 Hours)
(Module ID 27111) Describes basic wall systems and provides step-by-step instructions for laying out and framing both wood and steel components. Explains the process for laying out and framing walls. Includes instructions for assembling, erecting, and verifying plumb for wall systems.

Roof Framing (47.5 Hours)
(Module ID 27112) Describes the most common roof types and introduces basic roof framing components. Includes instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers stick-built and truss-built roofs, and includes the basics of roof sheathing installation.

Basic Stair Layout (12.5 Hours)
(Module ID 27110) Introduces stair types, basic stair system components, and common codes associated with stairway construction. Explains essential stairway construction techniques, including how to construct stringers, measure and calculate rise and run, and build concrete stairway forms.

Building Envelope Systems (12.5 Hours)
(Module ID 27109) Introduces the concepts of moisture and insulation control from the ground up. Describes types of building wrap, windows, skylights and doors, while providing instructions for installation.

## L1 CARPENTRY

**Level 1**

**Curriculum Notes**
- 237.5 Hours
- Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately.
- For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- Revised: 2013, Fifth Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation of the fourth edition is available. Please see NCCER’s online catalog for more information.

<tr>
<td>Orientation to the Trade (2.5 Hours)</td>
<td>ISBN 978-0-13-340299-5</td>
</tr>
</tbody>
</table>

### Module Descriptions

- **Orientation to the Trade**
  - Reviews the history of the trade, describes the apprentice program, identifies career opportunities for carpenters and construction workers, and lists the skills, responsibilities, and characteristics a worker should possess. Emphasizes the importance of safety in the construction industry.

- **Building Materials, Fasteners, and Adhesives**
  - Introduces the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Also describes the fasteners and adhesives used in construction work. Discusses the methods of squaring a building.

- **Hand and Power Tools**
  - Provides descriptions of hand tools and power tools used by carpenters. Emphasizes safe and proper operation, as well as care and maintenance.

- **Introduction to Construction Drawings, Specifications, and Layout**
  - Covers the techniques for reading and using construction drawings and specifications, with an emphasis on drawings and information relevant to the carpentry trade. Introduces quantity takeoffs.

## L2 CARPENTRY FRAMING & FINISHING

**Level 2**

**Curriculum Notes**
- 270 Hours
- Optional Residential Path: 170 Hours
- Optional Commercial Path: 150 Hours
- Revised: 2013, Fifth Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

</tbody>
</table>

### Module Descriptions

- **Commercial Drawings Elective for Residential Path**
  - Provides an overview of the role of the architect or engineer in residential construction, and describes the role of the contractor in the construction process.

- **Cold-Formed Steel Framing**
  - Describes the types and grades of steel framing materials, and includes instructions for selecting and installing metal framing for interior and exterior walls, loadbearing and nonbearing walls, partitions, and other applications.

- **Exterior Finishing Elective for Commercial Path**
  - Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

## Additional Information

- **Floor Systems** (25 Hours)
  - Module ID 27105-13: Covers framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials.

- **Wall Systems** (10 Hours)
  - Module ID 27111-13: Describes procedures for laying out and framing walls, including roughing-in door and window openings, constructing corners, partition Ts, and bracing walls. Includes the procedure to estimate the materials required to frame walls.

- **Ceiling Joist and Roof Framing** (47.5 Hours)
  - Module ID 27112-13: Describes the installation of framing for gable roofs, hip roofs, and valley intersections. Covers basic building code requirements related to roofing.

- **Basic Stair Layout** (12.5 Hours)
  - Module ID 27113-13: Introduces the basic concepts of stair layout and design.

- **Thermal and Moisture Protection** (7.5 Hours)
  - Module ID 27203-13: Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

- **Roofing Applications** Elective for Commercial Path (25 Hours)
  - Module ID 27202-13: Describes how to properly prepare the roof deck and install roofing for residential and commercial buildings.

- **Doors and Door Hardware** (20 Hours)
  - Module ID 27208-13: Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

*Continued on following page*
Carpentry Level 2 (continued)

**Drywall Installation** (15 Hours)
(Module ID 27206-13) Describes the various types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Contains detailed instructions for installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also discusses fire- and sound-rated walls.

**Drywall Finishing** (17.5 Hours)
ISBN 978-0-13-377913-4
(Module ID 27207-13) Describes the materials, tools, and methods used to finish and patch gypsum drywall. Also discussed automatic and manual taping and finishing tools.

**Suspended Ceilings** Elective for Residential Path
(15 Hours)
(Module ID 27209-13) Describes the materials, layout, and installation procedures for many types of suspended ceilings used in commercial construction, as well as ceiling tiles, drywall suspension systems, and pan-type ceilings.

**Window, Door, Floor, and Ceiling Trim**
(25 Hours)
(Module ID 27210-13) Describes the different types of trim used in finish work and focuses on the proper methods for selecting, cutting, and fastening trim to achieve a professional finished appearance.

**Rigging Practices** (15 Hours)
(Module ID 27308-14) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Includes types and bearing capacities of soils; procedures used in shoring, shielding, and sloping trenches and excavations; trenching safety requirements, including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

**Foundations and Slabs-On-Grade** (20 Hours)
(Module ID 27306-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

**Vertical Formwork** (22.5 Hours)
(Module ID 27309-14) Describes elevated decks and formwork systems and methods used in their construction. Covers joint, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

**Horizontal Formwork** (15 Hours)
(Module ID 27300-14) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and steels, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

**Cabinet Installation** (10 Hours)
(Module ID 27211-13) Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

---

**L3 CARPENTRY FORMS**

**Curriculum Notes**
- **160 Hours**
- **Revised:** 2014, Fifth Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation of the fourth edition is available. Please see NCCER’s online catalog for more information.

**PAPERBACK**

**DIGITAL**

|--------------------------|-----------------------|

**MODULES**
The modules listed below are all included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Properties of Concrete** (10 Hours)
(Module ID 27303-14) Describes the properties, characteristics, and uses of cement, aggregates, and other materials used in different types of concrete. Covers procedures for estimating concrete volume and testing freshly mixed concrete, as well as methods and materials for curing concrete.

**Handling and Placing Concrete** (20 Hours)
(Module ID 27305-14) Covers tools, equipment, and procedures for safely handling, placing, and finishing concrete. Describes joints made in concrete structures and the use of joint sealants.

**Rigging Equipment** (10 Hours)
ISBN 978-0-13-378675-0
(Module ID 38101-11; from Basic Rigger, Second Edition) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, and chains. Discusses attaching hardware such as shackles, eyebolts, and hooks, as well as rigging knots. Explains sling angles. Covers tuggers, jacks, hoists, and ratchet-lever hoists.

**Rigging Practices** (15 Hours)
(Module ID 38102-11; from Basic Rigger, Second Edition) Describes basic rigging and crane hazards as well as safety practices related to general rigging activities, working around power lines, and emergency response. Covers procedures for using slings and rigging pipes and valves.

**Trenching and Excavating** (15 Hours)
(Module ID 27306-14) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Discusses types and bearing capacities of soils; procedures used in shoring, shielding, and sloping trenches and excavations; trenching safety requirements, including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

**Reinforcing Concrete** (15 Hours)
(Module ID 27304-14) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

**Elevated Decks and Formwork** (20 Hours)
(Module ID 27306-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

**Tilt-Up Wall Systems** (17.5 Hours)
(Module ID 27310-14) Describes how tilt-up concrete construction is used and how tilt-up panels are formed, erected, and braced. Covers the installation of rabor and types of embeddings used to lift and brace the panels. Also covers methods used to create architectural and decorative treatments.
Carpentry Level 4

**LEVEL 4**

**Curriculum Notes**

- 182.5 Hours (162.5 Required, 20 Elective)
- Revised 2014, Fifth Edition
- Downloadable instructor resources that include module tests, PowerPoint® presentations, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

<table>
<thead>
<tr>
<th>Trainee Guide: $99.99</th>
</tr>
</thead>
</table>

**DIGITAL**

- NCCERconnect Access Card: $99.99

**Modules**

All of the modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Site Layout One: Differential Leveling**

Module ID 27401-14

Covers the principles, equipment, and methods used to perform differential leveling. Also covers the layout responsibilities of surveyors, field engineers, and carpenters; interpretation and use of site/plot plan drawings; use of laser instruments; and methods used for on-site communication.

**Advanced Roof Systems**

Module ID 27403-14

Covers commercial roofing materials and structures and describes the procedures for installing commercial roofing such as lap seam, standing seam, and built-up roofs.

**Advanced Wall Systems**

Module ID 27404-14

Covers installation of a variety of finishing materials, including concrete masonry units and brick. Also covers installation of curtain walls and fire-rated commercial construction.

**Advanced Stair Systems**

Module ID 27405-14

Provides extensive coverage of the materials and techniques used in finishing wooden staircases. Also covers a variety of stair systems used in commercial construction.

**Introduction to Construction Equipment**

Module ID 27404-14

Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactors, and forklift. An overview of general safety, operation, and maintenance procedures is provided.

**Introduction to Oxyfuel Cutting and Arc Welding**

Module ID 27407-14

Introduces the equipment, procedures, and safety practices used in cutting steel with oxyfuel equipment, as well as shielded metal arc welding, gas-tungsten arc welding, and gas metal arc welding. Labs include practice in cutting and welding techniques.

**Site Preparation**

Module ID 27409-14

Covers the planning process that precedes the start of work on a construction site, including environmental considerations, personnel issues, access roads, traffic control, permits, site safety, utilities, and crane-related concerns.

**Fundamentals of Crew Leadership**

Module ID 27401-14

Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

PAPERBACK ISBNS

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Concrete Construction (10 Hours)
(Module ID 23101) Introduces the role of concrete in construction and identifies basic concrete properties and characteristics. Provides an overview of the concrete construction process, identifies opportunities available to concrete craftworkers, and describes the purpose and structure of apprenticeship programs.

Concrete Safety (7.5 Hours)
(Module ID 23102) Describes the role of OSHA in the workplace and presents safety hazards unique to the concrete construction environment, including the control of silica dust. Identifies and describes the PPE concrete craftworkers commonly require.

Fall Protection Orientation (8 Hours)
(Module ID 75901; from Fall Protection Orientation) Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Concrete Tools and Equipment (12.5 Hours)
(Module ID 23104) Introduces trainees to a wide variety of both hand tools and powered equipment used in concrete construction, including spreaders, floats, trowels, saws, grinders, and mixing equipment. Tips for the safe use of tools and equipment are also provided.

Preparation for Placement (15 Hours)
(Module ID 23105) Provides an overview of common concrete construction tasks that take place before placement begins. Covers elevations and subordinate preparation, as well as basic form types, joints, and pre-placement inspections.

Reinforcing Concrete (15 Hours)
(Module ID 27304; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Curing and Protecting Concrete (7.5 Hours)
ISBN 978-0-13-686806-4
(Module ID 23108) Describes the essential concrete curing and protection process. Introduces various approaches to curing and the primary factors that significantly affect the resulting strength and durability of the placement.

Site Concrete (35 Hours)
(Module ID 23109; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flatwork decks, as well as shoring and reshoring systems.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27307; from Carpentry Level Three) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Horizontal Formwork (15 Hours)
(Module ID 27308; from Carpentry Level Three) Covers the applications and construction methods for forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

Paving (12.5 Hours, Elective)
(Module ID 36108; from Heavy Highway Level Two) Describes paving operations, paving equipment, recycling processes, and quality control requirements for both concrete and hot-mix asphalt paving.

L2 CONCRETE CONSTRUCTION

LEVEL 2

Curriculum Notes

• 147.5 Hours
• 177.5 hours with electives
• Published: 2020
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBNS

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Properties of Concrete (15 Hours)
(Module ID 23212) Presents the many possible components of concrete, including the desirable properties of the chosen aggregate and water. Includes a review of chemical and mineral admixtures, fibers, and special types of concrete. Also covers the basics of concrete testing.

Estimating Concrete Quantities (12.5 Hours)
(Module ID 23202) Reviews basic mathematical calculations for area and volume as well as metric conversions to prepare trainees for the module topic. A review of drawings and their interpretation is also provided, along with guidance for estimating the volume of concrete needed in placements of various shapes.

Tilt-Up Wall Systems (17.5 Hours, Elective)
(Module ID 27310; from Carpentry Level Three) Describes how tilt-up concrete construction is used and how tilt-up panels are formed, erected, and braced. Covers the installation of rebar and types of embedments used to lift and brace the panels. Also covers methods used to create architectural and decorative treatments.

Architectural Finishes (22.5 Hours)
(Module ID 23205) Identifies and describes various architectural finishes and how they are applied. Covers the application of floating and troweling, edging, jointing, and various surface finishes.

Industrial Floors (27.5 Hours)
(Module ID 23206) Presents this key segment of concrete flatwork and the characteristics of industrial floors while explaining how industrial-class floors are created, including placement considerations.

Continued on following page
**Superflat Floors** (20 Hours)
(Module ID 23207) Describes random-traffic and defined-traffic superflat floors and the flat and level characteristics that set them apart from other slabs. Provides insight into the finishing process and describes how various floor-measurement instruments are used to document the results.

**Surface Treatments** (15 Hours)
(Module ID 23208) Provides detailed coverage of the many methods used to prepare a concrete surface to meet a specific surface profile, from detergent scrubbing to rotomilling. Also identifies and describes how to apply shakes, protective sealants and coatings, and self-leveling toppings and underlayments.

**Troubleshooting and Quality Control** (15 Hours)
(Module ID 23220) Defines quality control and discusses fresh-concrete troubleshooting and problem resolution. Provides detailed coverage of concrete field tests and specimen preparation according to ASTM standards.

**Concrete Repair** (20 Hours)
(Module ID 23210) Provides an overview of the concrete repair process, focusing on repairing concrete with concrete. Explains how hidden concrete faults and embedments are located and how to properly prepare reinforced concrete for placement of the repair material. Coverage of pre-placement and post-placements inspections is also provided.
Introduction to Power Tools (10 Hours)
(Module ID 00104-15; from Core) Identifies and describes the operation of many power tools common in the construction environment. Provides instruction on proper use, as well as safety-handling guidelines and basic maintenance.

Introduction to Construction Drawings (10 Hours)
(Module ID 00105-15; from Core) Introduces the basic terms, components, and symbols of construction drawings, as well as the most common drawing types. Also covers the interpretation and use of drawing dimensions.

Introduction to Basic Rigging (7.5 Elective Hours)
(Module ID 00106-15; from Core) Provides basic information related to rigging and rigging hardware, such as slings, rigging hitches, and hoists. Emphasizes safe working habits in the vicinity of rigging operations.

Basic Communication Skills (7.5 Hours)
(Module ID 00107-15; from Core) Provides techniques for effective communication on the job. Includes examples that emphasize the importance of both written and verbal communication skills. Describes the importance of reading skills in the construction industry and discusses effective telephone and email communication skills.

Basic Employability Skills (7.5 Hours)
(Module ID 00108-15; from Core) Describes the opportunities offered by the construction trades. Discusses critical thinking and essential problem-solving skills. Also identifies and discusses positive social skills and presents information on computer systems and industry applications.

Introduction to Material Handling (5 Hours)
(Module ID 00109-15; from Core) Describes the hazards associated with handling materials and provides techniques to avoid both injury and property damage. Also introduces common material-handling equipment.

Orientation to the Trade (2.5 Hours)
(Module ID 27101-13; from Carpentry Level One) Reviews the history of the trade, describes the apprentice program, identifies career opportunities for carpenters and construction workers, and lists the skills, responsibilities, and characteristics a worker should possess. Emphasizes the importance of safety in the construction industry.

Building Materials, Fasteners, and Adhesives (20 Hours)
(Module ID 27102-13; from Carpentry Level One) Introduces the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Also describes the fasteners and adhesives used in construction work. Discusses the methods of squaring a building.

Properties of Concrete (10 Hours)
(Module ID 27303-14; from Carpentry Level Three) Describes the properties, characteristics, and uses of cement, aggregates, and other materials used in different types of concrete. Covers procedures for estimating concrete volume and testing freshly mixed concrete, as well as methods and materials for curing concrete.

Site Layout One: Differential Leveling (20 Hours)
(Module ID 27401-14; from Carpenter Level Four) Covers the principles, equipment, and methods used to perform differential leveling. Also covers the layout responsibilities of surveyors, field engineers, and carpenters; interpretation and use of site/plot plan drawings; use of laser instruments; and methods used for on-site communication.

Handling and Placing Concrete (20 Hours)
(Module ID 27305-14; from Carpentry Level Three) Covers tools, equipment, and procedures for safely handling, placing, and finishing concrete. Describes joints made in concrete structures and the use of joint sealants.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27307-14; from Carpentry Level Three) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Continued on following page
## Construction Craft Laborer Level 2

### Curriculum Notes
- **147.5 Hours**
- **Updated: 2015, Third Edition**

**PAPERBACK**  

### MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Reinforcing Concrete (15 Hours)**  
  (Module ID 27304-14; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

- **Vertical Formwork (22.5 Hours)**  
  (Module ID 27308-14; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

- **Horizontal Formwork (15 Hours)**  
  (Module ID 27309-14; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

- **Heavy Equipment, Forklift, and Crane Safety (5 Hours)**  
  (Module ID 75123-13; from Field Safety) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

- **Steel Erection (2.5 Hours)**  
  ISBN 978-0-13-340364-0  
  (Module ID 75110-13; from Field Safety) Covers common safety precautions related to steel-erection work, including controlled decking zones, hazardous materials and equipment precautions, tool safety, and appropriate personal protective equipment.

- **Electrical Safety (5 Hours)**  
  (Module ID 75121-13; from Field Safety) Describes the basic precautions necessary to avoid electrical shock, arc, and blast hazards. It also describes the lockout/tagout procedure.

- **Introduction to Construction Equipment (7.5 Hours)**  
  (Module ID 27406-14; from Carpentry Level Four) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactor, and forklift. An overview of general safety, operation, and maintenance procedures is provided.

- **Rough Terrain Forklifts (22.5 Hours)**  
  (Module ID 22206-13; from Heavy Equipment Operations Level Two) Covers the uses of forklifts on construction sites. Includes instructions for lifting, transporting, and placing various types of loads, as well as safety, operation, and maintenance procedures.

- **Oxyfuel Cutting (17.5 Hours)**  
  (Module ID 29102-15; from Welding Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

- **Elevated Masonry (15 Hours)**  
  (Module ID 28301-14; from Masonry Level Three) Describes how to work safely and efficiently on elevated structures. Explains how to maintain a safe work environment, ensure protection from falls, how to brace walls from outside forces, and how to identify common types of elevated walls. Stresses safety around equipment such as cranes and hoists.

- **Working from Elevations (5 Hours)**  
  (Module ID 75122-13; from Field Safety) Explains the use of fall-protection equipment. Covers safety precautions related to elevated work surfaces, including ladders, scaffolding, and aerial lifts.

- **Your Role in the Green Environment (LEED V4) (15 Hours)**  
  ISBN 978-0-13-294863-0  
  (Module ID 70101-15) Geared to entry-level craft workers, Your Role in the Green Environment provides pertinent information concerning the green environment, construction practices, and building rating systems. This edition has been updated to reflect LEED v4 with emphasis on standards for building design and construction. The updated content features contemporary issues such as net zero buildings and an expanded focus on issues relevant to international construction.
Ceiling Joist and Roof Framing (40 Hours)
(Module ID 27112-13; from Carpentry Level One) Describes types of roofs and provides instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers sickle-built and truss-built roofs. Includes the basics of roof sheathing installation.

Roofing Applications (25 Hours)
(Module ID 27202-13; from Carpentry Level Two) Describes how to properly prepare the roof deck and install roofing for residential and commercial buildings.

Wall Systems (20 Hours)
(Module ID 27111-13; from Carpentry Level One) Describes procedures for laying out and framing walls, including roughing-in door and window openings, constructing corners, partition Ts, and bracing walls. Includes the procedure to estimate the materials required to frame walls.

Exterior Finishing (35 Hours)
ISBN 978-0-13-340306-0
(Module ID 27110-13; from Carpentry Level One) Introduces types of stairs and common building code requirements related to stairs. Focuses on techniques for measuring and calculating rise, run, and stairwell openings, laying out stringers, and fabricating basic stairways.

Basic Stair Layout (12.5 Hours)
(Module ID 27204-13; from Carpentry Level Two) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

Electrical Safety (10 Hours)
(Module ID 26102-14; from Electrical Level One) Covers safety rules and regulations for electricians, including precautions for electrical hazards found on the job. Also covers the OSHA-mandated lockout/tagout procedure.

Residential Electrical Services (15 Hours)
(Module ID 26111-14; from Electrical Level One) Covers the electrical devices and wiring techniques common to residential construction and maintenance. Allows trainees to practice making service calculations. Stresses the applicable NEC® requirements.

Introduction to HVAC (7.5 Hours)
(Module ID 26111-14; from HVAC Level One) Covers the basic principles of heating, ventilating, and air conditioning, career opportunities in HVAC, and how apprenticeship programs are constructed. Basic safety principles, as well as trade licensure and EPA guidelines, are also introduced.

Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)
(Module ID 02111-12; from Plumbing Level One) Explains how DWV systems receive waste safely and effectively. Discusses how system components, such as pipe, drains, traps, and vents work. Reviews drain and vent sizing, grade, and waste treatment. Discusses how building sewers and sewer drains connect the DWV system to the public sewer system.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106-12; from Plumbing Level One) Introduces different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to the manufacturer’s instructions and applicable codes. Discusses pressure testing of plastic pipe once installed.

Copper Pipe and Fittings (12.5 Hours)
(Module ID 02107-12; from Plumbing Level One) Discusses sizing, labeling, and applications of copper pipe and fittings, and reviews the types of valves that can be used on copper pipe systems. Explains proper methods for cutting, joining, and installing copper pipe. Addresses insulation, pressure testing, seismic codes, and handling and storage requirements.

Cabinetmaking (35 Hours)
(Module ID 27501-15) This module expands on the knowledge and skills gained through the Carpentry Curriculum and provides the basic information needed to construct and apply finishes to custom cabinetry. It identifies and discusses various types of wood products, wood-joining techniques, power tools, cabinet doors, shelves, and hardware. Specific guidance is also provided for the installation of laminated countertops.

Cabinet Installation (10 Hours)
(Module ID 27211-13; from Carpentry Level Two) Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

Introduction to Construction Equipment (7.5 Hours)
(Module ID 27406-14; from Carpentry Level Four) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactor, and folklift. An overview of general safety, operation, and maintenance procedures is provided.

Continued on following page
MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (5 Hours)
(Module ID 45101-07) Reviews the history of the trade, shows examples of the work involved, describes the apprentice program, identifies career opportunities for construction workers, and lists the responsibilities and characteristics a worker should possess.

Construction Materials and Methods (12 Hours)
(Module ID 45102-07) Provides an overview of the materials and techniques used in building and finishing residential and commercial buildings, including wood- and steel-framed structures, masonry construction, and concrete-formed structures.

Thermal and Moisture Protection (7.5 Hours)
(Module ID 45103-07) Covers the selection and installation of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

Drywall Installation (25 Hours)
(Module ID 45104-07) Discusses types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Describes installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also covers fire- and sound-rated walls.

Drywall Finishing (25 Hours)
ISBN 978-0-13-604848-0
(Module ID 45105-07) Covers the materials, tools, and methods used to finish and patch gypsum drywall, including automatic and manual taping tools.
L1 ELECTRICAL

Curriculum Notes

• 187.5 Hours
• Includes 75 hours of Care, which is a prerequisite for Level 1 completion and must be purchased separately. For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
• Revised: 2020, Tenth Edition, to reflect 2020 NEC®
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
• A Spanish translation of the 2008 Hardcover Trainee Guide: $94.99
• Paperback Trainee Guide: $94.99

Cable Tray (7.5 Hours)
(Module ID 26207-20) Discusses various types of cable tray, supports, and associated fittings. Explains how to determine the loads on a cable tray and calculate fill per NEC® requirements.
Conductor Terminations and Splices (7.5 Hours)
(Module ID 26208-20) Explains how to prepare cable ends for terminations and splices. Describes how to train cable at termination points and describes crimping techniques.
Grounding and Bonding (15 Hours)
ISBN 978-0-13-689735-4
(Module ID 26209-20) Explains the grounding and bonding requirements of NEC Article 250. Covers how to size the main and system bonding jumpers and the grounding electrode conductor for various AC systems.
Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26210-20) Describes the operating principles of circuit breakers and fuses, and explains how to select and install overcurrent devices.

Control Systems and Fundamental Concepts (12.5 Hours)
ISBN 978-0-13-689762-0
(Module ID 26211-20) Describes the operating principles of contactors and relays, including both mechanical and solid-state devices. Explains how to select and install relays and troubleshoot control circuits.

Conductor Selection and Calculations (15 Hours)
(Module ID 26302-20) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.
Practical Applications of Lighting (12.5 Hours)
(Module ID 26303-20) Describes various luminaires and the types of luminaires suited for various applications. Covers dimming, lighting controls, and energy management systems.
Hazardous Locations (15 Hours)
(Module ID 26304-20) Presents the NEC® requirements for equipment installed in hazardous locations.
Overcurrent Protection (25 Hours)
(Module ID 26305-20) Explains how to size and select circuit breakers and fuses for various applications. Covers short circuit calculations and troubleshooting.
Distribution Equipment (12.5 Hours)
(Module ID 26306-20) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. Covers ground fault relay testing.

Transformers (12.5 Hours)
(Module ID 26307-20) Describes the construction, operation, and applications of various transformers. Covers transformer connections and grounding requirements.
Commercial Electrical Services (10 Hours)
(Module ID 26308-20) Covers the components, installation considerations, and NEC® requirements for commercial services.
Motor Calculations (12.5 Hours)
(Module ID 26309-20) Covers the calculations required to size the conductors and overcurrent protection required for motor applications.
Voice, Data, & Video (10 Hours)
(Module ID 26310-20) Covers the installation, termination, and testing of these systems.
Motor Controls (12.5 Hours)
(Module ID 26311-20) Provides information on selecting, sizing, and installing motor controllers, as well as control circuit pilot devices and basic relay logic.

Conductor Terminations and Splices (7.5 Hours)
(Module ID 26211-20) Explains the grounding and bonding requirements of NEC Article 250. Covers how to size the main and system bonding jumpers and the grounding electrode conductor for various AC systems.
Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26210-20) Describes the operating principles of circuit breakers and fuses, and explains how to select and install overcurrent devices.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Load Calculations — Branch and Feeder Circuits
(17.5 Hours)
(Module ID 26301-20) Explains how to calculate branch circuit and feeder loads for residential and commercial applications. Covers various derating factors.

Load Calculations — Feeders & Services
(20 Hours)
(Module ID 26401-20) Covers basic calculations for commercial and residential applications, including raceway fill, conductor derating, and voltage drop.

Health Care Facilities
(10 Hours)
(Module ID 26402-20) Covers the installation, alarm system, and backup system requirements of electrical systems in health care facilities, including the requirements for life safety and critical circuits.

Standby and Emergency Systems
(10 Hours)
(Module ID 26403-20) Explains the NEC® installation requirements for electric generators and storage batteries used during such emergency situations.

Basic Electronic Theory
(10 Hours)
(Module ID 26404-20) Explains the function and operation of basic electronic devices, including semiconductors, diodes, rectifiers, and transistors.

Fire Alarm Systems
(15 Hours)
(Module ID 26405-20) Explores the technologies, codes, and wiring approaches used to assemble a fire alarm system. Examines installation and troubleshooting techniques.

Specialty Transformers
(10 Hours)
(Module ID 26406-20) Covers various types of transformers, and provides information on selecting, sizing, and installing them.

Managing Electrical Hazards

12.5 Hours
Revised: 2021, Fifth Edition
Module ID 26501-21

PAPERBACK
Trainee Guide: $29.99

- A copy of NFPA 70E®, Standard for Electrical Safety in the Workplace, 2021 Edition, is required material for this course. To order, contact NFPA at www.nfpa.org or 1-800-344-3555.

Describes how to assess and eliminate shock, arc blast, and arc flash hazards using the practical safe working requirements detailed in NFPA 70E: Standard for Electrical Safety in the Workplace®. Where it is not possible to eliminate a hazard, an energized electrical work permit must be completed, and workers must be protected by appropriate safety procedures and personal protective equipment.

Advanced Electrical Topics

Much of the technology in emerging fields—such as wireless, integrated, and voice and data systems—has evolved greatly since the publication of Advanced Electrical Topics Volumes One and Two. Because of this, NCCER and Pearson suggest that those teaching a five-year electrical apprenticeship program use the following compilation of modules drawn from EST and Instrumentation.

(Module ID 26410-20) Discusses applications and operating principles of various control system components, such as solid-state relays, reduced-voltage starters, and adjustable-frequency drives. Covers basic troubleshooting procedures.

(Module ID 26407-20) Discusses applications and operating principles of various control system components, such as solid-state relays, reduced-voltage starters, and adjustable-frequency drives. Covers basic troubleshooting procedures.

(Module ID 26410-20) Covers motor care procedures, including cleaning, testing, and preventive maintenance. Describes basic troubleshooting procedures.

(Module ID 26411-20) Identifies types of medium-voltage cable and describes how to make various splices and terminations. Covers hi-pot testing.

(Module ID 26412-20) Discusses the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

(Module ID 26413-20) Covers general knowledge of HVAC systems and their controls. Also covers electrical troubleshooting and NEC® requirements.

(Module ID 26414-20) Covers general knowledge of HVAC systems and their controls. Also covers electrical troubleshooting and NEC® requirements.

(Module ID 26415-20) Identifies types of medium-voltage cable and describes how to make various splices and terminations. Covers hi-pot testing.

(Module ID 26416-20) Discusses the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

(Module ID 26417-20) Discusses the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

(Module ID 26418-20) Discusses the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

(Module ID 26419-20) Discusses the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

(Module ID 26420-20) Discusses the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.
Electronic Systems Technician

Limited-Energy Cabling (20 Hours)
(Module ID 33108) Covers the makeup, identification, and applications of conductors and cables used in limited-energy applications. Describes the tools, materials, and procedures for pulling limited-energy cable through conduit and raceways.

Limited-Energy Cable Selection (10 Hours)
(Module ID 33208) Provides an overview of the types of cable used for limited-energy installations. Also covers methods used to select the proper size and type of cable for a typical low-voltage installation.

Limited-Energy Cable Termination (25 Hours)
ISBN 978-0-13-690834-0
(Module ID 33209) Provides information and instructions for selecting, installing, and testing connectors and other terminating devices on cables used in limited-energy work, including telecommunications, video, audio, and fiber optic installations.

Limited-Energy Network Installations (25 Hours)
ISBN 978-0-13-681292-0
(Module ID 33301) Details procedures for connecting computers and other devices using both wired and wireless network connections. Describes components and architecture of ethernet, LAN, and powerline carrier networks.

Audio Systems (30 Hours)
(Module ID 33401) Introduces and explains audio system components, including input sources, amplifiers, signal processing equipment, and output equipment. Describes power requirements, cabling options, system configuration, and basic design considerations. Reviews common test equipment used for installation and troubleshooting.

Video Systems (40 Hours)
ISBN 978-0-13-684402-0
(Module ID 33402) Describes the types of equipment used in various video systems and equipment, including both analog and digital video, video signaling, display devices, HDTV, reality technologies, and videoprocessing and distribution.

Broadband (25 Hours)
ISBN 978-0-13-684350-4
(Module ID 33403) Explains the history of broadband and explores the primary delivery methods, including telephone lines, DSL, ADSL, BPL, cable and fiber optic systems, satellite, cellular, Wi-Fi®, and emerging technologies such as low earth orbit satellites.

Media Management Systems (25 Hours)
(Module ID 33404) Explains the basic principles behind shared media resources and their access via computer networks, wireless systems, and hardwired applications. Describes media types for both analog and digital platforms. Explores cabling options including fiber optic interfaces.

Telecommunications Systems (20 Hours)
(Module ID 33303) Introduces wireless communications and discusses current technologies transforming the market to include 5G, various residential and wireless networks, and a variety of mobile devices. Covers updated technologies and their implications. Emphasizes growing relevance of network security.

Site Survey, Project Planning, and Documentation (15 Hours)
(Module ID 33304) Explains planning a job from start to finish, including how to perform site surveys for new and retrofit construction projects. Covers drawings, specifications, and current software applications used on the construction site.

Wireless Communication (15 Hours)
(Module ID 33305) Describes rack systems and best practices for assembling electronic system enclosures, including power sequencing, grounding, bonding, weight distribution, and heat dissipation. Explains electrical power distribution and load calculations for equipment housed within racks.

Residential and Commercial Networks (15 Hours)
ISBN 978-0-13-684446-4
(Module ID 33306) Covers basic steps in the commission process including development of the plan and user-required training approach. Describes customer satisfaction levels and meeting expectations during the cut-over phase of a project.

System Commissioning and User Training (20 Hours)
ISBN 978-0-13-681276-0
(Module ID 33307) Introduces tasks involved in the maintenance and repair of limited-energy systems and equipment. Presents a systematic approach to system and component-level troubleshooting and methods of identifying common repair types.

Continued on following page

**Fire Alarm Systems** (40 Hours)
(Module ID 33408) Covers the basics of fire alarm systems, including devices, circuits, system design and installation guidelines, power requirements, control unit programming, testing, and troubleshooting. Explores integration of fire alarms with other systems. Examines both residential and commercial fire alarm applications, emphasizing NEC® requirements and those found in NFPA 72...

**Nurse Call and Signaling Systems** (15 Hours)
(Module ID 33409) Presents an overview of nurse call and signaling systems as found in hospitals and other healthcare facilities. Covers basic emergency call and duress system requirements based on facility type. Identifies installation requirements based on UL and other building code specifications.

**Closed Circuit Television (CCTV)** (30 Hours)
(Module ID 33410) Describes the installation and configuration of closed circuit TV systems for small, medium, and large facilities. Explains various equipment and concepts, including cameras, lenses, remote positioning, video recording, cloud storage, and transmission. Covers the roles of the internet and digital technologies. Introduces test and troubleshooting equipment.

**Access Control Systems** (35 Hours)
(Module ID 33411) Introduces access control systems and applications including, door security and locking devices, card and biometric readers, and current ingress/egress technologies. Emphasizes installation practices as well as building and electrical codes.

**EST and Internet of Things (IoT)** (10 Hours)
(Module ID 33412) Introduces the history, development, and application of integrated Internet of Things (IoT) technologies as well as their influences on contemporary electronics. Addresses the increased need for component integration and introduces basic IoT devices involved today’s systems. Presents an outlook on the future of IoT and its increased demand for ESTs.

Electronic Systems Technician Level 4 (continued)
Heavy Equipment Operations

Orientation to the Trade (5 Hours)
(Module ID 22101) Provides an overview of heavy equipment terminology, operations, operator responsibilities, career opportunities, and basic principles of safety.

Heavy Equipment Safety (10 Hours)
(Module ID 22102) Provides a comprehensive overview of safety requirements on job sites with emphasis on OSHA, MSHA, and NIOSH requirements. Presents basic requirements for personal protection, safe equipment operations and maintenance, and HAZCOM.

Identification of Heavy Equipment (5 Hours)
(Module ID 22103) Instructs trainees in the care and use of the different types of hand and power tools they will use on the job. Gives trainees the information they need to select the appropriate tools for different tasks, and reviews tool maintenance and safety issues.

Basic Operational Techniques (27.5 Hours)
(Module ID 22104) Covers prestart checks of a machine's hardware (frame, body panels, tires or tracks, and safety equipment), drive train components, hydraulic system components, electrical components, and controls. Reviews machine safety issues. Explains how to safely start, move, steer, stop, and shut down different types of machines.

On-Road Dump Trucks (20 Hours)
ISBN 978-0-13-340319-0
(Module ID 22201-13) Covers uses, inspection, startup, shutdown, operator maintenance, and operation of dump trucks used to carry loads on public highways. Includes operation of dump trucks in normal and emergency situations.

Excavation Math (17.5 Hours)
(Module ID 22207-13) Covers basic math skills required for site excavation work. Includes methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements on a job.

Interpreting Civil Drawings (20 Hours)
(Module ID 22209-13) Explains how to read site plans to calculate cut and fill requirements. Provides instruction and practice in interpreting both roadway and construction site drawings used for excavation and grading work.

Site Work (20 Hours)
(Module ID 22210-13) Expands on information covered in Level 1 in relation to setting and interpreting grade stakes. Also provides information and instructions on controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.

Utility Tractors (17.5 Hours)
(Module ID 22105) Covers operation of general utility tractors in the construction industry. Describes duties and responsibilities of the operator, safety rules for operation, the attachment of implements, and basic preventive maintenance practices.

Introduction to Earthmoving (12.5 Hours)
ISBN 978-0-13-663924-4
(Module ID 22201) Provides a broad introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.

Grades (15 Hours)
(Module ID 22106) Introduces the concept of preparing graded surfaces using heavy equipment. Covers identification of construction stakes and interpretation of marks on each type of stake. Describes the process for grading slopes.

Vertical-Mast Sit-Down Counterbalance Forklifts (7.5 Hours)
(Module ID 22107) Covers operation of vertical-mast Sit-Down Counterbalance (SDC) forklifts, commonly known as conventional forklifts. Describes duties and responsibilities of the operator, safety rules for operation, and distinguishing features. Includes operation for both indoor and outdoor environments.

Soils (10 Hours)
(Module ID 22308-13) Describes soil classification systems and explains how shrink and swell factors affect equipment selection. Discusses how soil conditions affect equipment performance and explains techniques for working with various types of soils.

Skid Steers (22.5 Hours)
(Module ID 22212-13) Describes the many uses of skid steers and the attachments available for these machines. Covers safety practices, as well as inspection, startup, shutdown, and operation of skid steers.

Loaders (17.5 Hours)
(Module ID 22209-13) Covers the uses of wheel and track loaders, as well as operator maintenance, loader safety, and operating procedures. Includes procedures for using loaders in excavation, grading, and demolition work.

Scrapers (17.5 Hours)
(Module ID 22204-13) Describes the types of scrapers used in site preparation, as well as the safe practices associated with the operation of scrapers. Covers operator inspection and maintenance requirements, along with startup, shutdown, and operating techniques.
Heavy Equipment Operations Level 3

Curriculum Notes
- 215 Hours
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

DIGITAL ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Finishing and Grading** (25 Hours)
(Module ID 22307-14) Provides training on common types of equipment and instruments used for finish grading; materials and methods used to stabilize soils and control soil erosion; and finishing and grading methods used for various applications.

**Compaction Equipment** (25 Hours)
(Module ID 22203-14) Provides training on common types of compaction equipment; the primary instruments, controls, and attachments of a roller; safety guidelines associated with compaction equipment; and prestart inspections, preventive maintenance, and proper operating procedures. Presents factors involved in work activities associated with a roller.

**Backhoes** (30 Hours)
(Module ID 22303-14) Identifies and describes the common uses, types, components, instruments, controls, and attachments of backhoes. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with backhoes.

**Off-Road Dump Trucks** (30 Hours)
(Module ID 22310-14) Identifies and describes the common uses, types, and components of off-road dump trucks. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Covers basic startup, driving maneuvers, loading, and dumping procedures for off-road dump trucks.

**Dozers** (30 Hours)
ISBN 978-0-13-382759-0
(Module ID 22302-14) Identifies and describes the common uses, types, and components of dozers. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with dozers.

**Excavators** (35 Hours)
(Module ID 22304-14) Identifies and describes the common types, uses, and components of excavators. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with excavators.

**Motor Graders** (40 Hours)
(Module ID 22305-14) Identifies and describes the common uses and types of motor graders. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with motor graders.
Heavy Highway Construction

L1 HEAVY HIGHWAY CONSTRUCTION

LEVEL 1

MODULES

- Identification of Equipment Used in Heavy Highway Construction (10 Hours)
  ISBN 978-0-13-448579-9 (Module ID 36111-17) Describes the types of heavy equipment, utility equipment, and cranes used in the construction of bridges and highways. Trainees will be expected to recognize the equipment and describe its use.

- Equipment and Roads (10 Hours)
  ISBN 978-0-13-448577-5 (Module ID 36110-17) Reviews the safety hazards and precautions associated with construction of highways and bridges. It also emphasizes the importance of following safety procedures in order to prevent accidents and injuries associated with working in hazardous places/conditions.

- Work-Zone Safety (5 Hours)

- Site Work (20 Hours)
  ISBN 978-0-13-340326-8 (Module ID 22210-13; from Heavy Equipment Operations Level Two) Expands on information covered in Level 1 in relation to setting and interpreting grade stakes. Also provides information and instructions on controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.

- Excavation Math (17.5 Hours)
  ISBN 978-0-13-340323-7 (Module ID 22207-13; from Heavy Equipment Operations Level Two) Covers basic math skills required for site excavation work. Includes methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements on a job.

- Soils (10 Hours)
  ISBN 978-0-13-340325-1 (Module ID 22209-13; from Heavy Equipment Operations Level Two) Provides a broad introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.

- Field Safety (20 Hours)
  ISBN 978-0-13-340361-9 (Module ID 75104-13; from Heavy Equipment Operations Level Two) Introduces the signs, signals, and barricades found on various job sites, and covers highway work-zone safety requirements.

- Mobile Crane Operations, Level One (25 Hours)
  ISBN 978-0-13-498801-6 (Module ID 21106; from Mobile Crane Operations, Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

- Rigging Practices (25 Hours)

- Crane Safety and Emergency Procedures (10 Hours)

- Crane Communications (10 Hours)
  ISBN 978-0-13-498816-0 (Module ID 21102 from Mobile Crane Operations, Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

- Crane Safety and Emergency Procedures (10 Hours)

- Trenching and Excavating (15 Hours)
  ISBN 978-0-13-378678-1 (Module ID 27306-14; from Carpentry Level Three) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shaping, shoring, and sloping trenches and excavations; trenching safety requirements; including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

- Plant Operations (75 Hours)
  ISBN 978-0-13-448584-3 (Module ID 36107-17) Explains the operation of plants used to manufacture concrete and asphalt paving and describes the different types aggregates.

- Trenching and Excavating (15 Hours)
  ISBN 978-0-13-378687-1 (Module ID 27306-14; from Carpentry Level Three) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shaping, shoring, and sloping trenches and excavations; trenching safety requirements; including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

- Plant Operations (75 Hours)
  ISBN 978-0-13-448584-3 (Module ID 36107-17) Explains the operation of plants used to manufacture concrete and asphalt paving and describes the different types aggregates.

- Trenching and Excavating (15 Hours)
  ISBN 978-0-13-378687-1 (Module ID 27306-14; from Carpentry Level Three) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shaping, shoring, and sloping trenches and excavations; trenching safety requirements; including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

- Plant Operations (75 Hours)
  ISBN 978-0-13-448584-3 (Module ID 36107-17) Explains the operation of plants used to manufacture concrete and asphalt paving and describes the different types aggregates.

- Trenching and Excavating (15 Hours)
  ISBN 978-0-13-378687-1 (Module ID 27306-14; from Carpentry Level Three) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shaping, shoring, and sloping trenches and excavations; trenching safety requirements; including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

- Plant Operations (75 Hours)
  ISBN 978-0-13-448584-3 (Module ID 36107-17) Explains the operation of plants used to manufacture concrete and asphalt paving and describes the different types aggregates.

- Trenching and Excavating (15 Hours)
  ISBN 978-0-13-378687-1 (Module ID 27306-14; from Carpentry Level Three) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shaping, shoring, and sloping trenches and excavations; trenching safety requirements; including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

- Plant Operations (75 Hours)
  ISBN 978-0-13-448584-3 (Module ID 36107-17) Explains the operation of plants used to manufacture concrete and asphalt paving and describes the different types aggregates.
**Paving (12.5 Hours)**
(Module ID 36108-17) Describes paving operations, paving equipment, recycling processes, and quality control requirements for both concrete and hot-mix asphalt paving.

**Horizontal Formwork (15 Hours)**
(Module ID 27309-14; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

**Vertical Formwork (22.5 Hours)**
(Module ID 27308-14; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

**Reinforcing Concrete (15 Hours)**
(Module ID 36112-17) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

**Working with Concrete (15 Hours)**
(Module ID 36112-17) Introduces the trainees to the safety concerns associated with concrete, as well as concrete testing, concrete admixtures, and the proper procedure for placing concrete.

**Trade Drawings One (12.5 Hours)**
ISBN 978-0-13-215103-0
(Module ID 30108-11; from Ironworking Level One) Identifies the materials used in steel-framed buildings. Explains how to read basic structural blueprints.

**Structural Ironworking One (7.5 Hours)**
(Module ID 30109-11; from Ironworking Level One) Identifies the types of construction that utilize structural steel, the components of the structures, and the process involved in erecting a steel structure. Explains the principles of structural stresses and the requirements of bolted connections.

**Bridge Construction (20 Hours)**
(Module ID 36201-17) Describes the common types of bridges, along with the components that make up the substructure and superstructure of a bridge. The module also discusses the types of materials used in bridge construction, presents basic surveying equipment and practices, and explains how to interpret bridge drawings.

**Bridge Foundations (10 Hours)**
(Module ID 36202-17) Describes the types of footings used to support bridges, as well as various types of piles and pile-driving methods. Safety practices associated with pile driving on land and in marine environments are also covered, along with environmental protection issues.

**Bridge Formwork (22.5 Hours)**
(Module ID 36203-17) Describes the forms used to fabricate concrete walls, columns, footings, pile caps, and other bridge structures. This module covers site-built and manufactured forming systems and includes instructions for cleaning and storing forms.

---

**Hydroblasting**

**20 Hours**
Revised: 2012, Second Edition
Module ID 43101-12

**PAPERBACK**

Trainee Guide: $29.99
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

Includes the newest waterjet safety technologies, methods, and equipment. Also provides expanded information on shrouds, shielding, checking, and grounding.
Trade Mathematics (10 Hours)
(Module ID 03102) Explains how to solve HVACR trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

Basic Electricity (15 Hours)
(Module ID 03106) Introduces the concept of power generation and distribution, common electrical components, AC and DC circuits, electrical safety as it relates to the HVACR field, and reading and interpreting wiring diagrams.

Introduction to Heating (15 Hours)
(Module ID 03108) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service. Introduces temperature measurement calculations.

Introduction to Cooling (30 Hours)
(Module ID 03107) Explains the fundamental operating concepts of the refrigeration cycle and introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Discusses major components of cooling systems as well as their controls, including temperature switches.

Air Distribution Systems (15 Hours)
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

HVAC

**LEVEL 1**

**Curriculum Notes**
- 195 Hours
- Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately. For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- Updated in 2018.
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Introduction to HVAC** (7.5 Hours)
    - Module ID 03101) Covers the basic principles of heating, ventilating, and air conditioning, career opportunities in HVAC, and how apprenticeship programs are constructed. Basic safety principles, as well as trade licensure and EPA guidelines, are also introduced.

- **Basic Electricity** (12.5 Hours)
    - Module ID 03106) Introduces the concept of power generation and distribution, common electrical components, AC and DC circuits, and electrical safety as it relates to the HVAC field. Introduces reading and interpreting wiring diagrams.

- **Trade Mathematics** (10 Hours)
    - Module ID 03107) Explains the fundamental operating concepts of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC systems. Also introduces the essential pressure-temperature relationships of refrigerants. Introduces basic system design principles for simple systems.

- **Introduction to Air Distribution Systems** (15 Hours)
    - Module ID 03108) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

- **Trade Pipes** (20 Hours)
    - Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

- **Refrigerants and Oils** (15 Hours)
    - Module ID 03302) Covers the operating principles, applications, charging, and service procedures. Also presents the identification and application of various types of plastic piping, along with their common assembly and installation practices.

- **Basic Copper and Plastic Piping Practices** (10 Hours)
    - Module ID 03303) Explains how to identify types of copper tubing and fittings used in the HVACR industry and how they are mechanically joined. Also presents the identification and application of various types of plastic piping, along with their common assembly and installation practices.

- **Soldering and Brazing** (10 Hours)
    - Module ID 03104) Introduces the equipment, techniques, and materials used to safely join copper tubing through both soldering and brazing. Covers the required personal protective equipment, preparation, and work processes in detail. Also provides the procedures for brazing copper to dissimilar materials.

- **Basic Carbon Steel Piping Practices** (10 Hours)
    - Module ID 03105) Explains how to identify various carbon steel piping materials and fittings. Covers the joining and installation of threaded and grooved carbon steel piping systems, including detailed descriptions of threading and grooving techniques.

- **Leak Detection, Evacuation, Recovery, and Charging** (30 Hours)
    - Module ID 03206) Covers refrigerant handling and equipment servicing procedures for HVAC systems in an environmentally safe manner.

- **Metering Devices** (12.5 Hours)
    - Module ID 03303) Covers the operating principles, applications, installation, and adjustment of fixed and adjustable expansion devices used in air conditioning equipment.

- **Heat Pumps** (20 Hours)
    - Module ID 03211) Covers the principles of reverse cycle heating. Describes the operation of heat pumps and explains how to analyze heat pump control circuits. Includes heat pump installation and service procedures.

Continued on following page
## HVAC Level 2 (continued)

**Basic Maintenance (20 Hours)**
(Module ID 03215) Covers information related to maintenance-oriented materials, as well as guidelines for the inspection and periodic maintenance of various systems and accessories. Also covers the application of gaskets and seals, as well as the adjustment of different types of belt drives. Includes information on inspection and maintenance requirements for selected equipment.

**Chimneys, Vents, and Flues (5 Hours)**
(Module ID 03202) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

### Sheet Metal Duct Systems (10 Hours)
(Module ID 03213) Covers layout, fabrication, installation, and insulation of sheet metal ductwork. Also includes selection and installation of registers, diffusers, dampers, and other duct accessories.

### Fiberglass and Flexible Duct Systems (7.5 Hours)
(Module ID 03214) Covers the layout, fabrication, installation, and joining of fiberglass ductwork and fittings. Describes the proper methods for attaching and supporting flex duct.

### Commercial Airside Systems (12.5 Hours)
(Module ID 03201) Describes the systems, equipment, and operating sequences commercial airside system configurations such as constant volume single-zone and multi-zone, WIT, VAV, and dual-duct VAV.

### Commercial Hydronic Systems (15 Hours)
(Module ID 03305) Reviews basic properties of water and describes how water pressure is related to the movement of water through piping systems. Describes various types and components of commercial hot-water heating and chilled-water cooling systems, and examines how those systems function.

### Steam Systems (10 Hours)
(Module ID 03306) Focuses on the use of steam for storing and moving energy in HVAC systems. Reviews the fundamentals of water that relate to steam and describes the basic steam system cycle. Discusses a steam system’s operational components—steam boilers and their accessories and controls; steam system loads, including heat exchangers/converters; and terminal devices. Steam system valves and piping are covered in detail, including common types of piping arrangements; the components of a condensate return/feedwater system; steam and condensate pipe sizing; and pressure-reducing valves and thermostatic valves.

### Retail Refrigeration System (15 Hours)
(Module ID 03304) Covers the applications, principles, and troubleshooting of retail refrigeration systems.

### Customer Relations (5 Hours)
(Module ID 03316) Presents the importance of establishing good relations with customers and provides guidance on how to achieve that goal. Focuses on ways for a technician to make a good first impression and describes how to communicate in a positive manner with customers. The elements of a service call and dealing with different types of problem customers are also covered.

---

**L3 HVAC LEVEL 3 Curriculum Notes**

- 167.5 Hours
- Updated in 2018.
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoint® presentations, and performance profile sheets are available at www.nccer.org/irt.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only:

### Fasteners, Hardware, and Wiring Terminations (70 Hours)
(Module ID 03313) Covers a variety of fasteners, hardware, and wiring terminations used in HVAC systems including the installation of these components.

### Control Circuit and Motor Troubleshooting (20 Hours)
(Module ID 03314) Provides information and skills to troubleshoot control circuits and electric motors found in heating and cooling equipment.

### Troubleshooting Cooling (20 Hours)
(Module ID 03210) Provides guidance related to troubleshooting cooling systems.

### Troubleshooting Heat Pumps (12.5 Hours)
ISBN 978-0-13-546186-0
(Module ID 03311) Provides a thorough review of the heat pump operating cycle, and presents troubleshooting procedures for components.

### Troubleshooting Gas Heating (15 Hours)
(Module ID 03209) Covers information and skills needed to troubleshoot gas-fired furnaces and boilers.

### Troubleshooting Oil Heating (15 Hours)
ISBN 978-0-13-546199-0
(Module ID 03310) Describes the construction and operation of oil-fired heating systems and their components. Includes servicing and testing of oil furnaces and procedures for isolating and correcting oil furnace malfunctions.

### Troubleshooting Accessories (7.5 Hours)
(Module ID 03312) Delivers information and skills needed to troubleshoot various air treatment accessories used with heating and cooling equipment.

### Zoning, Ductless, and Variable Refrigerant Flow Systems (15 Hours)
(Module ID 03315) Introduces the information and skills needed to troubleshoot and repair zoned, ductless, and variable refrigerant flow systems.

Continued on following page
HVAC Level 4

**Curriculum Notes**
- 157.5 Hours
- Updated in 2018.
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoints®; and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK ISBN**

**DIGITAL ISBN**
- Energy Conservation Equipment (7.5 Hours) ISBN 978-0-13-546214-0
- System Startup and Shutdown (15 Hours) ISBN 978-0-13-546217-1
- Construction Drawings and Specifications (12.5 Hours) ISBN 978-0-13-546209-6

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Water Treatment** (10 Hours)
ISBN 978-0-13-546229-4
(Module ID 03008) Explains water problems encountered in heating and cooling systems and identifies water treatment methods and equipment. Covers basic water testing procedures and chemistry.

**Indoor Air Quality** (12.5 Hours)
(Module ID 03403) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

**Energy Conservation Equipment** (7.5 Hours)
ISBN 978-0-13-546214-0
(Module ID 03404) Covers heat recovery/reclaim devices, as well as other energy recovery equipment used to reduce energy consumption in HVAC systems.

**Building Management Systems** (12.5 Hours)
(Module ID 03405) Explains how computers and microprocessors are used to manage zoned HVAC systems. Provides coverage of various network protocols and systems controllers, and introduces trainees to the various means of connection and system interface.

**System Air Balancing** (15 Hours)
(Module ID 03402) Covers air properties and gas laws, as well as the use of psychrometric charts. Describes the tools, instruments, and procedures used to balance an air distribution system.

**System Startup and Shutdown** (15 Hours)
(Module ID 03406) Presents the procedures for the startup and shutdown of hot water, steam heating, chilled water, and air handling systems. Also covers the start-up and shutdown of typical cooling towers and packaged HVAC units. The procedures for both short- and long-term shutdowns are included.

**Construction Drawings and Specifications** (12.5 Hours)
(Module ID 03401) Teaches how to interpret drawings used in commercial construction, including mechanical drawings, specifications, shop drawings, and as-builts. Explains how to perform takeoff procedures for equipment, fittings, ductwork, and other components.

**Heating and Cooling System Design** (22.5 Hours)
(Module ID 03407) Identifies factors that affect heating and cooling loads. Explains the process by which heating and cooling loads are calculated, and how load calculations are used in the selection of heating and cooling equipment. Covers basic types of duct systems and their selection, sizing, and installation requirements.

**Commercial/Industrial Refrigeration Systems** (20 Hours)
(Module ID 03408) Expands on the study of product and process refrigeration equipment by describing systems used in cold storage and food processing applications, as well as transportation refrigeration. Various types of defrost systems are covered in detail.

**Alternative and Specialized Heating and Cooling Systems** (10 Hours)
(Module ID 03409) Describes alternative devices used to reduce energy consumption, including wood, coal, and pellet-fired systems, waste-oil heaters, geothermal heat pumps, solar heating, in-floor radiant heating, and direct-fired makeup units. Also introduces application-specific computer room environmental and air turnover systems.

**Fundamentals of Crew Leadership** (22.5 Hours)
(Module ID 46101) While this module has been designed to assist the recently promoted crew leader, it is beneficial for anyone in management. The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
## INDUSTRIAL COATING AND LINING APPLICATION SPECIALIST

### LEVEL 1

**Basic Safety** (15 Hours)

(Module ID 00104-04; from Core, Third Edition) Explains the safety obligations of workers, supervisors, and managers to ensure a safe workplace. Discusses the causes and results of accidents and the dangers of rationalizing risk. Reviews the role of company policies and OSHA regulations in maintaining a safe workplace. Introduces common job-site hazards and protections such as lockout/tagout, personal protective equipment (PPE), and HazCom.

**Surface Preparation** (100 Hours)

(Module ID 69102-09) Explains reasons for surface preparation, standards of preparation, and methods of preparing surfaces. Describes the use of basic equipment as well as cleaning procedures.

**Coating Application** (105 Hours)

(Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

**Health and Safety, Debris Management, Containment, and Ventilation** (47.5 Hours)

(Module ID 69105-09) Teaches proper health and safety procedures for operators applying coatings in an industrial workplace. The use of personal protection equipment, debris management, and proper containment and ventilation procedures are discussed.

### LEVEL 2

**Basic Rigging** (20 Hours)

(Module ID 00106-04; from Core, Third Edition) Explains how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site. Describes inspection techniques and load-handling safety practices. Also reviews American National Standards Institute (ANSI) hand signals.

**Surface Preparation Two** (80 Hours)

(Module ID 69205-10) Explains how to identify the surface condition of common substrates. Provides specific training in surface-preparation equipment. Describes inspection and documentation of test equipment, and processes.

**Industrial Coatings Two** (100 Hours)

(Module ID 69207-10) Teaches the elements of corrosion in concrete and metals and describes the chemistry of corrosion.

**Work Planning and Quality Control** (25 Hours)

(Module ID 69203-10) Explains how to follow and execute a work plan. Covers area and ratio calculations and explains how to determine VOC ratios when adding thinners. Explains the effects of pressure, volume, and temperature on surface preparation and application.

**Containment** (60 Hours)

(Module ID 69204-10) Describes the types of containment appropriate to various coating and surface preparation applications, including standards and verification. Also covers containment erection and repair.

**Industrial Coating Safety** (30 Hours)

(Module ID 69201-10) Describes safety standards and regulations, access control, and personal safety equipment and training requirements. Covers safety decision-making procedures.

**Surface Preparation Two** (80 Hours)

(Module ID 69205-10) Explains how to identify the surface condition of common substrates. Provides specific training in surface-preparation equipment. Describes inspection and documentation of test equipment, and processes.

**Industrial Coatings Two** (100 Hours)

(Module ID 69207-10) Teaches the setup, maintenance, and disassembly of conventional air spray, airless spray, air-assisted airless spray, and HVLP spraying equipment, including testing and documentation. Also covers overcoating and explains how to use wet and dry film thickness gauges.
Industrial Maintenance Electrical & Instrumentation Technician

**LEVEL 1**

**MODULES**

- **197.5 Hours**
- **Includes:** 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately. For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- **Revised:** 2007, Third Edition
- **Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**Orientation to the Trade** (2.5 Hours)

- (Module ID 40101-08) Introduces the history of the trade, and provides an overview of the industrial maintenance craft. Describes apprenticeship and training programs, as well as career opportunities. Also describes the responsibilities and characteristics of successful workers.

**Tools of the Trade** (5 Hours)

- (Module ID 40102-07) Introduces the hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

**Fasteners and Anchors** (5 Hours)

- (Module ID 40103-07) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

**Oxyfuel Cutting** (17.5 Hours)

- (Module ID 40104-07) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

**Gaskets and Packing** (10 Hours)

- (Module ID 40105-07) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

**Craft-Related Mathematics** (15 Hours)

- (Module ID 40106-07) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

**Construction Drawings** (12.5 Hours)

- (Module ID 40107-07) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

**Industrial Safety for E&I Technicians** (12.5 Hours)

- (Module ID 40201-08) Covers safety rules and regulations for electrical workers, precautions for electrical hazards on the job, and the OSHA-mandated lockout/tagout procedure.

**Introduction to the National Electrical Code®** (5 Hours)

- (Module ID 40202-08) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an easy-to-follow procedure.

**Electrical Theory** (15 Hours)

- (Module ID 40203-08) Introduces electrical concepts used in Ohm’s law as applied to DC series circuits. Includes atomic theory, electromotive force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

**Pumps and Drivers** (5 Hours)

- (Module ID 40108-07) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

**Valves** (5 Hours)

- (Module ID 40109-07) Identifies different types of valves and describes their installation, storage, and handling.

**Introduction to Test Instruments** (7.5 Hours)

- (Module ID 40110-07) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

**Material Handling and Hand Rigging** (15 Hours)

- (Module ID 40111-07) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

**Mobile and Support Equipment** (10 Hours)

- (Module ID 40112-07) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

**Lubrication** (12.5 Hours)

- (Module ID 40113-07) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

**Mobile and Support Equipment** (10 Hours)

- (Module ID 40112-07) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

**Lubrication** (12.5 Hours)

- (Module ID 40113-07) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

**Material Handling and Hand Rigging** (15 Hours)

- (Module ID 40111-07) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

**Mobile and Support Equipment** (10 Hours)

- (Module ID 40112-07) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

**Lubrication** (12.5 Hours)

- (Module ID 40113-07) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

**Mobile and Support Equipment** (10 Hours)

- (Module ID 40112-07) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

**Lubrication** (12.5 Hours)

- (Module ID 40113-07) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

**INDUSTRIAL MAINTENANCE ELECTRICAL & INSTRUMENTATION TECHNICIAN**

**LEVEL 2**

**Curriculum Notes**

- **160 Hours**
- **Revised:** 2008, Third Edition
- **Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK  ISBN 978-0-13-614390-1**

Trainee Guide: $59.99

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Alternating Current** (20 Hours)

- (Module ID 40204-08) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

**E&I Test Equipment** (10 Hours)

- (Module ID 40205-08) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

**Flow, Pressure, Level, and Temperature** (15 Hours)

- (Module ID 40206-08) Presents devices used to measure flow, pressure, level, and temperature, along with their principles of operation.
Industrial Maintenance Electrical & Instrumentation Technician Level 2 (continued)

Process Mathematics (15 Hours)
(Module ID 40303-09) Explains how to identify and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

Hand Bending (10 Hours)
(Module ID 40304-09) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Hand Bending (10 Hours)
(Module ID 40302-09) Introduces the principles of electronics and semiconductor theory, components, and applications.

Conductor Terminations and Splices (10 Hours)
ISBN 978-0-13-604695-0
(Module ID 40301-09) Covers the methods used to terminate and splice conductors of all types and sizes, including preparing and taping conductors.

Conductor Selection and Calculation (15 Hours)
(Module ID 40307-09) Covers the types of conductors used in wiring systems, including insulation, current-carrying capacity, and temperature ratings.

Conductors and Cables (10 Hours)
(Module ID 40307-09) Explains the principles of electronics and semiconductor theory, components, and applications.

Layout and Installation of Tubing and Piping Systems (22.5 Hours)
(Module ID 40310-09) Covers bends in conduit up to six inches. Focuses on mechanical, hydraulic, and electrical benders.

Conductor Selection and Calculation (15 Hours)
(Module ID 40307-09) Covers the types of conductors used in wiring systems, including insulation, current-carrying capacity, and temperature ratings.

Layout and Installation of Tubing and Piping Systems (22.5 Hours)
(Module ID 40310-09) Covers bends in conduit up to six inches. Focuses on mechanical, hydraulic, and electrical benders.

Conductor Terminations and Splices (10 Hours)
(Module ID 40313-09) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.

Conductor Terminations and Splices (10 Hours)
(Module ID 40313-09) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.

Conductor Terminations and Splices (10 Hours)
(Module ID 40313-09) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.
Industrial Maintenance Electrical & Instrumentation Technician Level 4

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Standby and Emergency Systems** (12.5 Hours)
(Module ID 40401-09) Explains the installation, utilization, and maintenance requirements for standby and emergency electrical systems.

**Basic Process Control Elements, Transducers, and Transmitters** (15 Hours)
(Module ID 40402-09) Discusses sensing and transmitting devices used in an instrumentation loop, along with the process variables measured by the detectors or sensors. Gives examples of technical manuals and specification sheets. Explains how control devices are selected, and how to draw basic control loop diagrams that include a measuring element, a transducer, and a transmitter.

**Instrumentation Calibration and Configuration** (10 Hours)
(Module ID 40403-09) Introduces methods of instrumentation calibration, including the three- and five-point methods. Covers components that require calibration in pneumatic, analog, and smart loops, as well as methods used to calibrate these components.

**Pneumatic Control Valves, Actuators, and Positioners** (40 Hours)
(Module ID 40404-09) Covers the construction, operation, and uses of control valves, actuators, and positioners that are driven, and in some cases controlled by, compressed air. Explains the installation and maintenance of these devices, and includes alignment and troubleshooting procedures.

**Performing Loop Checks** (7.5 Hours)
(Module ID 40405-09) Covers loop check steps, including verifying mechanical installation, validating that the loop has correct tag numbers, performing loop checks, and proving the loop.

**Troubleshooting and Commissioning a Loop** (10 Hours)
(Module ID 40406-09) Teaches troubleshooting techniques used to locate problems in control loops, and how to isolate a loop in order to troubleshoot it. Covers commissioning of a loop once it is repaired, loop checked, and calibrated.

**Process Control Loops and Tuning** (20 Hours)
(Module ID 40407-09) Describes control loops, devices, and terms. Introduces formulas and their applications to PID control. Offers a theory-based approach to PID control and its application in industrial process control. Addresses open, closed, and visual loop tuning.

**Data Networks** (15 Hours)
(Module ID 40408-09) Introduces terms associated with data network devices and computers used in industrial facilities. Explains how data network devices and computers are interconnected for communication purposes. Describes how open connectivity is used in industrial data networks, and explores the hardware devices used in a data highway system.

**Programmable Logic Controllers** (17.5 Hours)
(Module ID 40409-09) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

**Distributed Control Systems** (17.5 Hours)
ISBN 978-0-13-609137-0
(Module ID 40410-09) Describes how DCS was developed by combining the technologies of single loop control, direct digital control, and supervisory control. Covers DCS hardware requirements, how control loops are implemented into a DCS, types of data transmission used in DCS, communication protocols, and human interfaces.
Tools of the Trade (5 Hours)
ISBN 978-0-13-614584-4
(Module ID 32102-07) Introduces hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

Fasteners and Anchors (5 Hours)
(Module ID 32103-07) Covers the hardware and systems used in industrial maintenance. Covers anchors and supports, their applications, and how to install them safely.

Oxyfuel Cutting (17.5 Hours)
(Module ID 32104-07) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 32105-07) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 32106-07) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 32107-07) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Introduction to Piping Components (5 Hours)
(Module ID 32202-07) Introduces chemical, compressed air, fuel oil, steam, and water systems. Explains how to identify piping systems according to color codes.

Copper and Plastic Piping Practices (5 Hours)
(Module ID 32203-07) Covers the selection, preparation, joining, and support of copper and plastic piping and fittings.

Introduction to Ferrous Metal Piping Practices (5 Hours)
(Module ID 32204-07) Covers iron and steel pipe and fittings and provides step-by-step instructions for cutting, threading, and joining ferrous piping.

Identify, Install, and Maintain Valves (10 Hours)
(Module ID 32205-07) Explains how to remove and install threaded and flanged valves, how to replace valve stem O-ring and bonnet gaskets, and how to re-pack a valve stuffing box. Also discusses the purpose of valve packing.

Introduction to Test Instruments (7.5 Hours)
(Module ID 32110-07) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobos, meters, voltage testers, and automated diagnostic tools.

Mobile and Support Equipment (10 Hours)
(Module ID 32111-07) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Lubrication (10 Hours)
(Module ID 32112-07) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

Introduction to Bearings (15 Hours)
(Module ID 32113-07) Introduces the uses and classifications of bearings and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Hydraulic and Pneumatic Testing (10 Hours)
(Module ID 32206-07) Describes non-destructive and pressure testing of systems and equipment.

Introduction to Bearings (15 Hours)
(Module ID 32208-07) Introduces plain, ball, roller, thrust, guide, flanged, pillow block, and taper bearings. Discusses bearing materials and designations.

Low-Pressure Steam Systems (10 Hours)
(Module ID 32209-07) Introduces the components and functions of basic steam systems, including boilers, steam traps, and blowdown recovery systems.

High-Pressure Steam Systems and Auxiliaries (20 Hours)
(Module ID 32209-07) Explains the functioning of high-pressure steam systems used in industry.

Continued on following page
Distillation Towers and Vessels (20 Hours)
(Module ID 32210-07) Introduces the various types and functioning of distillation towers and vessels, including recovery vessels and condensate processing.

Heaters, Furnaces, Heat Exchangers, Cooling Towers, and Fin Fans (30 Hours)
(Module ID 32211-07) Introduces equipment used to transfer and remove heat from systems in process.

Introduction to Tube Work (10 Hours)
(Module ID 32212-07) Covers the basics of working with heat exchanger and furnace tubing and tube sheets.

Precision Measuring Tools (20 Hours)
ISBN 978-0-13-604662-0
(Module ID 32302-08) Explains how to select, inspect, use and care for levels, feeler gauges, calipers, micrometers, height gauges and surface plates, dial indicators, protractors, parallels and gauge blocks, trammels, and pyrometers.

Installing Bearings (20 Hours)
(Module ID 32303-08) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

Installing Couplings (15 Hours)
(Module ID 32304-08) Identifies various types of couplings, and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

Installing Baseplates and Prealignment (30 Hours)
(Module ID 32305-08) Explains how to lay out and install baseplates and soleplates. Describes how to field-verify a plate installation. Covers precision leveling procedures and performing clearance installation. Also describes basic steps for setting motors and pumps.

Troubleshooting and Repairing Gearboxes (20 Hours)
(Module ID 32306-08) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment based on reverse dial indicator measurements.

Troubleshooting and Repairing Belt and Chain Drives (15 Hours)
(Module ID 32307-08) Covers types of misalignment, aligning couplings using a straightedge and feeler gauge, adjusting parallel and angular alignment, using a dial indicator, and eliminating coupling stress.

Installing Belt and Chain Drives (10 Hours)
(Module ID 32308-08) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Installing Mechanical Seals (20 Hours)
(Module ID 32309-08) Covers the function and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting and installing mechanical seals.

Compressors and Pneumatic Systems (35 Hours)
(Module ID 32403-09) Describes the theory and practice of compressing and transporting gases. Explains the types and principles of compressors and compressed air treatment equipment, as well as compressed air use and safety.

Reverse Alignment (30 Hours)
(Module ID 32404-09) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment based on reverse dial indicator measurements.

Installing Mechanical Seals (20 Hours)
(Module ID 32309-08) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Installing Mechanical Seals (20 Hours)
ISBN 978-0-13-604690-0
(Module ID 32306-08) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment based on reverse dial indicator measurements.

Troubleshooting and Repairing Gearboxes (20 Hours)
(Module ID 32406-09) Describes types and operation of gearboxes, and gearbox diagnostics. Explains how to troubleshoot, remove, and disassemble gearboxes, how to identify gear wear patterns, and how to install and maintain gearboxes.

Advanced Topics

Advanced Towers and Vessels (15 Hours)
(Module ID 32501-09) Introduces the basics of reactor and refinery processes, including cat crackers, vacuum, and distillation. Also teaches the use of hydraulic torquing and tensioning equipment.

Troubleshooting and Repairing Conveyors (12.5 Hours)
(Module ID 32502-09) Describes maintaining and repairing belt, roller, chain, screw, and pneumatic conveyors.
Instrumentation

Hand and Power Tools for Instrumentation (12.5 Hours)
ISBN 978-0-13-378834-1
(Module ID 12114-14) Explains how to identify, inspect, use, and maintain the various hand and power tools used by instrument fitters and technicians.

Craft-Related Mathematics (10 Hours)
(Module ID 12119-14) Covers basic concepts of the metric system and the conversion of English units to metric units. Also reviews basic algebra, geometric figures, and calculations associated with triangles.

Instrument Drawings and Documents Part One (7.5 Hours)
(Module ID 12107-14) Identifies and describes the types of drawings used in instrumentation work and familiarizes trainees with basic instrument symbols, lines, and abbreviations used on drawings.

Inspect, Handle, and Store Instrumentation Materials (2.5 Hours)
(Module ID 12304-14) Covers the methods used in receiving, inspecting, handling, and storing project-related instrumentation equipment.

Electrical Systems for Instrumentation (12.5 Hours)
(Module ID 12116-14) Covers basic electrical concepts and terms, DC circuit calculations, electrical measuring instruments, and electrical wiring.

Temperature, Pressure, Level, and Flow (15 Hours)
(Module ID 12110-15) Examines the characteristics of temperature, pressure, level, and flow, and describes the units of measure for each variable. Introduces common devices used to measure these process variables and the basic principles of operation for each device.

Instrument Fitter’s Math (15 Hours)
(Module ID 12301-15) Discusses the application of right triangles in bending and installing tubing and conduit as it applies to instrumentation. Shows how to use a scientific calculator in applying instrumentation piping and layout math.

Instrument Drawings and Documents, Part Two (17.5 Hours)
(Module ID 12202-15) Covers reading and interpreting piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthogonals to enable the identification of types of instrumentation and the specifications for installation.

Fasteners (7.5 Hours)
(Module ID 12106-14) Explains how to properly identify, select, and install threaded and non-threaded fasteners and anchors used in instrumentation work.

Gaskets, O-Rings, and Packing (10 Hours)
(Module ID 12108-14) Teaches how to recognize, select, and properly install gaskets, packing, and O-rings. Covers the various materials used in gaskets and O-rings, along with their applications and limitations.

Lubricants, Sealants, and Cleaners (7.5 Hours)
ISBN 978-0-13-378844-0
(Module ID 12109-14) Covers the proper use, storage, handling, and safety practices associated with various lubricants, cutting fluids, sealants, and cleaners. Includes coverage of the tools and materials used in applying lubricants and cleaning products.

Tubing (75 Hours)
(Module ID 12114-14) Introduces types of tubing, tubing materials, fittings, and tools. Covers proper storage and handling, cutting, deburring, reaming, bending, and joining of tubing.

Steel Piping Practices (10 Hours)
(Module ID 12117-14) Covers both carbon steel and stainless steel piping measuring 2” as it applies to instrumentation work. Includes instructions for calculating pipe cut length, cutting, deburring, reaming, and threading pipe.

Hoses (7.5 Hours)
(Module ID 12113-14) Describes different types of hoses and related fittings, along with proper storage and handling. Includes instructions for cutting hoses and installing standard reusable fittings.

Test Equipment (10 Hours)
(Module ID 33205-10; from Electronic Systems Technician Level Two) Covers the selection, inspection, use, and maintenance of basic test equipment used in low-voltage work. Also covers specialized test equipment such as signal generators, wattmeters, cable testers, and RF analyzers.

Panel-Mounted Instruments (10 Hours)
(Module ID 12215-15) Explains the selection of instruments to be panel-mounted, locating the instruments using drawings, and procedures for installing the instruments in the panels.

Installing Field-Mounted Instruments (25 Hours)
(Module ID 12213-15) Covers selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

To Order Call: 1-800-922-0579
Stay Connected: www.nccer.org/instructors
©NCCER
Raceways for Instrumentation (17.5 Hours)
(Module ID 12214-15) Introduces raceways. Also covers identification and selection of conduit, raceways, wireways, cable trays, fittings, and NEC® requirements for installation.

Clean, Purge, and Test Tubing and Piping Systems (10 Hours)
(Module ID 12303-15) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in instrumentation.

Clean, Purge, and Test Tubing and Piping Systems (20 Hours)
(Module ID 12308-15) Covers protective measures applied in instrumentation installations, including heat tracing, chemical treatment, and insulation.

Layout and Installation of Tubing and Piping Systems (35 Hours)
(Module ID 12302-15) Introduces piping and tubing layout procedures. Explains the steps in creating a hand-sketched isometric drawing that can be applied in the piping and tubing installation. Introduces methods and procedures used to measure, cut, and bend and support piping and tubing.

Detectors, Secondary Elements, Transducers, and Transmitters (25 Hours)
(Module ID 12305-16) Describes various types of series and parallel circuits; resistance, inductance, and capacitance in AC circuits; DC power supplies; analog and digital signals; and common applications of electrical and electronic circuitry.

Relays and Timers (10 Hours)
(Module ID 12208-16) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

Switches and Photoelectric Devices (10 Hours)
(Module ID 12209-16) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

Courseware
The following ISBNs are for ordering individual modules only.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Control Valves, Actuators, and Positioners (15 Hours)
(Module ID 12207-16) Covers the construction and operation of various piping-system valves and actuators. Discusses the application and operation of valve positioners. Presents valve selection criteria and explains how to interpret valve and actuator markings and nameplate information.

Process Control Theory (15 Hours)
ISBN 978-0-13-448291-0
(Module ID 12204-16) Describes the principles of process control and how various types of control loops are applied. Discusses ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

Controllers (10 Hours)
(Module ID 12206-16) Covers the theory of operation and the application of common process controllers, including both pneumatic and electronic devices.

Proving, Commissioning, and Troubleshooting a Loop (17.5 Hours)
(Module ID 12401-16) Examines the three stages in readying a loop for operation: checking, proving, and commissioning. Examines the key ideas behind each step and stresses the differences. Explores troubleshooting techniques and methodologies, with an emphasis on their use during the three stages of readying a loop.

Tuning Loops (15 Hours)
ISBN 978-0-13-448303-0
(Module ID 12404-16) Introduces the techniques used in tuning loops employing PID control. Includes basic tuning theory and formulas. Examines open, closed, and visual loop tuning methods.

Continued on following page
Instrumentation Level 4 (continued)

**Digital Logic Circuits** (15 Hours)
ISBN 978-0-13-448305-4
(Module ID 12401-16) Introduces the basic ideas of digital electronics. Presents gates, combination logic, and truth tables. Addresses memory devices, counters, and arithmetic circuits as well as the numbering systems commonly used in digital systems.

**Programmable Logic Controllers** (12.5 Hours)
(Module ID 12406-16) Introduces PLCs and their uses in industrial control. Includes hardware components, applications, communications, number systems, and programming methods.

**Distributed Control Systems** (15 Hours)
(Module ID 12407-16) Surveys DCS technologies, including an overview of their development. Discusses key components, fieldbuses, servers, and human-machine interfaces. Also introduces maintenance and the increasingly important aspect of DCS security.

**Analyzers and Monitors** (30 Hours)
(Module ID 12409-16) Introduces the key concepts of chemistry, with an emphasis on their application in instrumentation. Explains crucial physical and chemical properties of matter. Discusses the different analytical methods used in industry to assess processes. Includes pH, conductivity, ORP, gas analysis, and particulate counts. Explores specific instruments and techniques.

Ironworking

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to the Trade (5 Hours)
ISBN 978-0-13-213800-0
(Module ID 30101-11) Discusses the historical development of the ironworking trade. Explains personal qualities that contribute to successful employment. Describes the organization and purpose of apprenticeship training, and the safety obligations of the employer and employee.

Trade Safety (12.5 Hours)
(Module ID 30102-11) Describes the consequences of on-the-job accidents and the responsibilities of OSHA. Identifies potential ironworker health and safety hazards and safe work practices around cranes. Explains the safe use of personnel lifts. Discusses the safe use and operation of aerial platforms, hoists, and fall protection systems.

Tools and Equipment of the Trade (10 Hours)
(Module ID 30103-11) Identifies safety tools and equipment. Describes the proper use of hand and power tools. Identifies power sources for ironworking tools.

Fastening (5 Hours)
(Module ID 30104-11) Explains how to recognize A-325 and A-490 bolts, washers, and nuts. Describes how to correctly tension bolts and explains procedures for calibrated wrench and turn-of-nut tightening methods.

Mobile Construction Cranes (10 Hours)
(Module ID 30105-11) Identifies common lifting equipment and construction cranes. Describes how to use crane manuals, perform record keeping, and follow safety requirements. Provides procedures for assembling construction cranes.

Rigging Equipment (10 Hours)
(Module ID 30106-11) Describes the use and inspection of equipment and hardware used in rigging. Describes slings and explains how to determine sling capacities and angles. Covers the selection and inspection of rigging equipment, including block and tackles, chain hoists, come-alongs, jacks, and toggles.

Rigging Practices (15 Hours)
(Module ID 30107-11) Describes the site and environmental hazards associated with rigging. Explains how to attach rigging hardware for routine lifts and identify the components of a lift plan. Describes how to perform sling tension calculations and determine the weight of beams and basic weight estimation.

Trade Drawings One (12.5 Hours)
ISBN 978-0-13-215103-0
(Module ID 30108-11) Identifies the materials used in steel-framed buildings. Explains how to read basic structural blueprints.

Structural Ironworking One (7.5 Hours)
(Module ID 30109-11) Identifies the types of construction that utilize structural steel, the components of the structure, and the process involved in erecting a steel structure. Explains the principles of structural stresses and the requirements of bolted connections.

Position Arc Welding (20 Hours)
(Module ID 30202-11) Identifies and explains weld joints, weld positions, and open V-butt welds. Describes how to prepare arc welding equipment and how to make flat welds, horizontal welds, vertical welds, and overhead welds.

Forklifts (17.5 Hours)
(Module ID 30203-11) Identifies the basic components of forklifts and the corresponding hand signals. Explains safe practices and how to perform inspections. Covers how to read load charts and how to operate forklifts.

Oxyfuel Cutting (17.5 Hours)
(Module ID 30112-09; from Welding Level One, Fourth Edition) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

Introduction to Arc Welding (22.5 Hours)
(Module ID 30113-11) Identifies welding equipment and processes. Describes safety precautions associated with arc welding. Explains how to identify weld joints, their dimensions, and applications from welding symbols and drawings. Describes how to set up and use SMAW equipment and explains the governing welding codes.

Bar Joists and Girders (5 Hours)
(Module ID 30114-11) Explains how to recognize types of bar joists and how they are designated. Describes the proper procedures for rigging and storing steel joists. Explains the use of joist girders in steel joist construction systems and the proper erection procedures for bar joists. Includes OSHA Subpart R.

Metal Decking (10 Hours)
(Module ID 30114-11) Identifies decking types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and job-site safety. Discusses the effects of deck penetrations and damage. Includes OSHA Subpart R.

Field Fabrication (15 Hours)
(Module ID 30115-11) Identifies the safety hazards associated with field fabrication. Describes how to use common layout tools. Explains how to fabricate angle iron, channel, T-shapes, and W-shapes to given dimensions.

To Order Call: 1-800-922-0579

## MASONRY

### L1 MASONRY LEVEL 1

#### Curriculum Notes
- 197.5 Hours
- Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately. For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- Revised: 2013, Fourth Edition
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation of the third edition is available. Please see NCCER’s online catalog for more information.

### MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### Introduction to Masonry (12.5 Hours)
(Module ID 28101-13) Covers basic masonry materials, tools, techniques, and safety precautions. Explains how to mix mortar by hand and lay masonry units. Also describes the skills, attitudes, and abilities of successful masons.

#### Masonry Safety (15 Hours)
(Module ID 28106-13) Describes how to identify the common causes of accidents and the hazards associated with masonry tools, equipment, mortar, and concrete. Focuses on the use of personal protective equipment, working safely from elevated surfaces, properly using masonry tools and equipment, and handling masonry materials safely.

#### Masonry Tools & Equipment (15 Hours)
(Module ID 28102-13) Describes a variety of hand tools, measuring tools, mortar equipment, power tools and equipment, and lifting equipment that masons use on the job, and explains how to use these tools correctly and safely. Provides instructions for assembling and disassembling scaffolds.

### HARDCOVER ISBN
- PAPERBACK ISBN
- DIGITAL

### L2 MASONRY LEVEL 2

#### Curriculum Notes
- 152.5 Hours
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

#### MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### Residential Plans and Drawing Interpretation (12.5 Hours)
(Module ID 28201-14) Explains how to work with residential plans and construction drawings and convert that information into action on the job. Describes the organization and format of plans, dimensioning and scaling, and estimating materials quantities from information on the plans.

#### Residential Masonry (25 Hours)
(Module ID 28202-14) Covers the construction techniques for residential and small structure foundations, steps, patios, decks, chimneys, and fireplaces. Describes work activities that the mason must perform, as well as those that tie into the masonry work.

#### Advanced Laying Techniques (20 Hours)
(Module ID 28204-14) Introduces types of metal components, including metal rods, joint reinforcements, plates, anchors, fasteners, and hollow metal frames for doors and windows, and explains how they are installed.

#### Masonry Openings and Metalwork (20 Hours)
(Module ID 28205-14) Describes materials and techniques used to apply insulation and methods of moisture control as they relate to the mason’s trade. Includes hot- and cold-weather considerations.

#### Measurements, Drawings, and Specifications (10 Hours)
(Module ID 28103-13) Reviews the calculation of distances and areas common in masonry work; describes the information found on residential construction drawings; and explains the role of specifications, standards, and codes.

#### Mortar (10 Hours)
(Module ID 28104-13) Describes the types and properties of mortar and the materials used in the mixture, including admixtures; provides instructions for mixing mortar by machine; and describes how to properly apply and store mortar.

#### Masonry Units and Installation Techniques (60 Hours)
(Module ID 28105-13) Covers characteristics of block and brick; how to set up, lay out, and bond block and brick; how to cut block and brick; how to lay and tool block and brick; and how to clean block and brick once they have been laid. Describes masonry reinforcements and accessories used to lay block and brick professionally and safely.

#### Residential Plans and Drawing Interpretation (12.5 Hours)
(Module ID 28201-14) Explains how to work with residential plans and construction drawings and convert that information into action on the job. Describes the organization and format of plans, dimensioning and scaling, and estimating materials quantities from information on the plans.

#### Masonry Safety (15 Hours)
(Module ID 28106-13) Describes how to identify the common causes of accidents and the hazards associated with masonry tools, equipment, mortar, and concrete. Focuses on the use of personal protective equipment, working safely from elevated surfaces, properly using masonry tools and equipment, and handling masonry materials safely.

#### Masonry Tools & Equipment (15 Hours)
(Module ID 28102-13) Describes a variety of hand tools, measuring tools, mortar equipment, power tools and equipment, and lifting equipment that masons use on the job, and explains how to use these tools correctly and safely. Provides instructions for assembling and disassembling scaffolds.

DIGITAL

NCCERconnect Access Card: $99.99
ISBN: 978-0-13-684941-4
NCCERconnect + Trainee Guide: 978-0-13-787914-4

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Elevated Masonry (15 Hours)
(Module ID 28301-14) Describes how to work safely and efficiently on elevated structures. Explains how to maintain a safe work environment, ensure protection from falls, how to brace walls from outside forces, and how to identify common types of elevated walls. Stresses safety around equipment such as cranes and hoists.

Specialized Materials and Techniques (60 Hours)
(Module ID 28302-14) Introduces unique types of masonry situations that won’t be encountered on every job, including sound-barrier walls, arches, and the use of acid brick, refractory brick, and glass block. Describes the handling and construction of these materials, and introduces the intricacies of each.

Repair and Restoration (20 Hours)
(Module ID 28303-14) Details techniques for identifying and repairing common masonry problems of weathering, settling, stain, etc. Explains tuckpointing, the removal of efflorescence and stains, and crack repair. Includes sections on how to repair foundation walls, water intrusion, and localized problems, as well as fireplace and chimney repair.

Commercial Drawings (25 Hours)
(Module ID 28304-14) Explains how to read and identify drawings for commercial structures using previous experience from structural drawings as a baseline. Describes requirements for these drawings, as well as how to interpret and create plans for architectural, structural, and shop drawings.

Estimating (25 Hours)
(Module ID 28305-14) Describes how to estimate building materials, such as brick, block, grout, mortar, joint reinforcement, and masonry ties. Details multiple methods for estimating, as well as how to estimate for masonry elements such as openings and lintels.

Site Layout — Distance Measurement and Leveling (20 Hours)
(Module ID 28306-14) Covers the techniques needed to produce and read site plans and topographic maps. Describes the use of measuring devices such as tapes, range poles, plumb bobs, total stations, leveling instruments, and field notes. Also discusses the construction of batter boards and how to ensure correct measurements.

Stone Masonry (15 Hours)
(Module ID 28308-14) Focuses on the application of natural stone in masonry construction. Describes types of stone and how stone is cut, finished, and stored. Discusses equipment and tools for handling stone. Details how to estimate and install stone using anchors and mortars and explains how to install stone veneers.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
Mechanical Insulating

L1 MECHANICAL INSULATING

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (5 Hours)
(Module ID 19101-18) Provides an overview of the insulation industry, including how and why insulation is used, safety factors related to insulation, and common insulation-specific tools.

Material Handling, Storage, and Distribution (2.5 Hours)
(Module ID 19104-18) Covers receiving, stacking, and storage of insulation materials, as well as material movement on the jobsite.

Characteristics of Pipe (5 Hours)
ISBN 978-0-13-448318-4
(Module ID 19105-18) Provides an overview of different pipe types and their uses, pipe sizing methodology, and the relationship between pipe sizes and insulation sizes.

Flexible Foam Insulation (25 Hours)
(Module ID 19201) Covers proper tool use and procedures for installing flexible foam insulation, including how to cut and install flexible foam insulation on pipe fittings, valves, flanges, equipment, and air ducts.

Air Duct Systems (7.5 Hours)
(Module ID 19302) Covers the identification of various duct systems and their associated components.

Blanket Insulation for Ducts (7.5 Hours)
(Module ID 19202) Covers fiberglass blanket insulation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

Board Insulation for Ducts (20 Hours)
ISBN 978-0-13-489875-0
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

Cements and Fabric Finishes (10 Hours)
(Module ID 19208) Covers the proper use of finishing tools, cleanup and protection procedures, and the limitations of cements, fabric finishes, and mastics.

Insulation Adhesives (5 Hours)
(Module ID 19304) Covers the identification, application, and use of adhesives.

Chilled and Hot Water Heating Systems
(Module ID 19210) Covers chilled and hot water heating and dual temperature systems, including the types of pipe and equipment common to each type of system. Explains the types of insulation required by each type of system.

Installing Fiberglass Pipe Insulation
(Module ID 19106-18) Describes the characteristics of fiberglass pipe insulation and the characteristics of ASJ jacketing.

Insulating Pipe Fittings, Valves, and Flanges
(Module ID 19107-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.

Material Handling, Storage, and Distribution (2.5 Hours)
(Module ID 19104-18) Covers receiving, stacking, and storage of insulation materials, as well as material movement on the jobsite.

Characteristics of Pipe (5 Hours)
ISBN 978-0-13-448318-4
(Module ID 19105-18) Provides an overview of different pipe types and their uses, pipe sizing methodology, and the relationship between pipe sizes and insulation sizes.

Flexible Foam Insulation (25 Hours)
(Module ID 19201) Covers proper tool use and procedures for installing flexible foam insulation, including how to cut and install flexible foam insulation on pipe fittings, valves, flanges, equipment, and air ducts.

Air Duct Systems (7.5 Hours)
(Module ID 19302) Covers the identification of various duct systems and their associated components.

Blanket Insulation for Ducts (7.5 Hours)
(Module ID 19202) Covers fiberglass blanket insulation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

Board Insulation for Ducts (20 Hours)
ISBN 978-0-13-489875-0
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

Cements and Fabric Finishes (10 Hours)
(Module ID 19208) Covers the proper use of finishing tools, cleanup and protection procedures, and the limitations of cements, fabric finishes, and mastics.

Insulation Adhesives (5 Hours)
(Module ID 19304) Covers the identification, application, and use of adhesives.

Chilled and Hot Water Heating Systems (5 Hours)
(Module ID 19210-18) Covers chilled and hot water heating and dual temperature systems, including the types of pipe and equipment common to each type of system. Explains the types of insulation required by each type of system.

Installing Fiberglass Pipe Insulation (30 Hours)
(Module ID 19106-18) Describes the characteristics of fiberglass pipe insulation and the characteristics of ASJ jacketing.

Insulating Pipe Fittings, Valves, and Flanges (40 Hours)
(Module ID 19107-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.

Vapor Retarders and Insulation Coatings (10 Hours)
(Module ID 19211) Addresses the need to avoid the intrusion of water vapor into porous insulation and vapor retardant materials available to mechanical insulators. Trainees will also learn how to apply vapor-retardant mastics and membranes for common insulating scenarios.

Steam and Process Water Systems (10 Hours)
(Module ID 19305) Covers the identification of steam and condensate piping and describes steam and process water systems and their components.

Calcium Silicate/Expanded Perlite Pipe Insulation (20 Hours)
ISBN 978-0-13-498762-0
(Module ID 19204) Discusses the safe handling and storage of calcium silicate pipe insulation, how to make accurate cuts, and how to install single- and double-layered calcium silicate pipe insulation.

Rigid Foam and Cellular Glass Insulation (12.5 Hours)
(Module ID 19206) Covers the proper use of tools; handling and storage of rigid foam insulation; measuring, cutting, installing, and sealing rigid foam plastic and cellular glass insulation; cryogenic installation; expansion joints; contraction joints; and vapor stops.

Continued on following page
Industrial Boiler Systems (7.5 Hours)
(Module ID 19306) Describes boilers and related equipment, and their insulation requirements.

Mineral Wool Insulation (12.5 Hours)
(Module ID 19205) Describes how to measure, cut, and score mineral wool insulation. Discusses attachments used on mineral wool, installation methods, sealing requirements, and how to use pin welding equipment.

Jacketing Systems (12.5 Hours)
(Module ID 19313) Describes the purposes and the types of insulation jacketing available for mechanical systems. This module also explains how to work with various kinds of organic, polymeric, and other types of jacket not made from rigid sheet metal.

Jacketing Fabrication — Pipe and Fittings (42.5 Hours)
(Module ID 19310) Covers the identification and applications of pipes and pipe fittings and describes types of pipe and fitting jacketing, along with layout installation procedures and securements.

Jacketing Fabrication — Vessels and Equipment (25 Hours)
(Module ID 19311) Covers the identification of vessel and equipment jacketing, along with layout, fabrication, installation procedures, and securements.

Removable and Reusable Flexible Insulation Covers (12.5 Hours)
(Module ID 19314) Provides a detailed introduction to removable and reusable flexible insulation covers, and explains the construction and installation of commercially-fabricated and kit insulation covers.

Specialized Insulation Systems (5 Hours)
(Module ID 19308) Describes special-application insulation systems, including low-temperature and prefabricated panels; refractory insulation; soft pads and pre-shaped removable covers; preinsulated systems; spray, foam, and pour-in-place insulation; fire stops; noise and sound control systems; and cryogenic applications.

Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating.
Millwright

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to the Millwright Craft** (5 Hours)
(Module ID 15101) Presents the history of the trade and discusses career paths for millwrights. Describes environments and types of work associated with the millwright trade.

**Millwright Hand Tools** (17.5 Hours)
(Module ID 15102) Introduces hand tools used by millwrights. Explains hand tool safety and covers the methods for selecting, inspecting, using, and maintaining these tools.

**Fasteners and Anchors** (12.5 Hours)
(Module ID 15103) Identifies fasteners and anchors used by millwrights, including their applications and installation procedures.

**Precision Measuring Tools** (20 Hours)
(Module ID 15302) Explains how to select, inspect, use, and care for measuring tools of the millwright craft. Now includes tools such as keyseat rules, telescoping gauges, ultrasonic thickness detector and hardness tester.

**Basic Layout** (20 Hours)
(Module ID 15104) Discusses the tools used in layout. Explains how to lay out baselines using the arc method and 3-4-5 method.

**Reading Mechanical Drawings** (20 Hours)
(Module ID 15203) Explains orthographic projection, isometric, and schematic drawings used to show piping, hydraulic, and pneumatic systems.

**Field Sketching** (10 Hours)
ISBN 978-0-13-765400-0
(Module ID 15202) Elective - Teaches the basic skills needed to make a good field sketch to convey information about how parts should be made or assembled.

**Setting Baseplates and Soleplates** (20 Hours)
(Module ID 15207) Describes how to set a machine baseplate and soleplate while guaranteeing alignment with other equipment.

**Rigging Practices** (15 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Teaches use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches.

**Oxyfuel Cutting** (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment.

**Gaskets and Packing** (15 Hours)
(Module ID 15107) Describes gaskets and packing and their applications, while also providing instructions for laying out, cutting, and installing gaskets.

**O-Rings and Non-Mechanical Seals** (7.5 Hours)
(Module ID 15304) Enhanced coverage of dynamic and static seals, including their applications, tools used, installation procedures, and removal. Also covers lip, cup, oil, and labyrinth seals.

**Introduction to Bearings** (15 Hours)
(Module ID 15209) Describes the types and applications of bearings, including plain, roller, ball, thrust, and guide bearings, as well as pillow block, flanged, and takeup bearings. Also explains bearing designation systems.

**Removing and Installing Bearings** (22.5 Hours)
(Module ID 15206) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

**Plasma Arc Cutting** (7.5 Hours)
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, shifting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

**Craft-Related Algebra and Trigonometry** (30 Hours)
(Module ID 15301) Explains right-triangle trigonometry and its use in the trade. Also covers interpolation, equilateral and isosceles triangles, and the law of acute triangles.
## Millwright Level 3

### Curriculum Notes

- 160 Hours
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK ISBN**

---

### Modules

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Advanced Trade Math (20 Hours)**

(Module ID 15301-08) Explains right triangle trigonometry and its use in the trade. Also covers interpolation, equilateral and isosceles triangles, and the laws of acute triangles.

**Precision Measuring Tools (20 Hours)**

(Module ID 15302-08) Explains how to select, inspect, use and care for levels, calipers, micrometers, height gauges and surface plates, dial indicators, protractors, parallels and gauge blocks, trammels, and pyrometers.

**Installing Packing (10 Hours)**

(Module ID 15303-08) Explains the types of packing and packing materials found in a typical stuffing box. Covers how to remove packing and how to install compression packing and lip-type packing.

**Installing Seals (5 Hours)**

(Module ID 15304-08) Covers the applications, removal, and installation procedures for dynamic and static seals, and lip, cup, oil, and labyrinth seals.

**Installing Mechanical Seals (20 Hours)**

(Module ID 15305-08) Covers the function and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting, and installing mechanical seals.

**Removing and Installing Bearings (20 Hours)**

(Module ID 15306-08) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

**Couplings (15 Hours)**

(Module ID 15307-08) Identifies types of couplings and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

**Fabricating Shims (5 Hours)**

(Module ID 15308-08) Describes types of shim stock and materials and explains the procedures for fabricating shims.

**Alignment Fixtures and Specialty Jigs (10 Hours)**

(Module ID 15309-08) Explains the applications and fabrication procedures for angle iron, chain, complex reverse-indicator, Christmas tree, and piano wire jigs.

**Prealignment for Equipment Installation (15 Hours)**

(Module ID 15310-08) Explains how to level equipment using jack bolts, wedges, and shims. Covers precision leveling procedures and performing clearance installation. Also describes basic steps for setting motors and pumps.

**Troubleshooting and Repairing Conveyors (10 Hours)**

(Module ID 15301-08) Describes conveyor systems and their troubleshooting and maintenance procedures associated with gearboxes, compressors, and pumps.

**Troubleshooting and Repairing Hydraulic Equipment (10 Hours)**

(Module ID 15408-08) Explains repair and maintenance of hydraulic system components. Describes troubleshooting processes and methods, including pressure sensors and flow sensors.

**Basic Hydraulic Systems (10 Hours)**

(Module ID 15409-08) Describes principles and types of hydraulic equipment and related safety procedures. Describes applications of hydraulic equipment.

**Troubleshooting and Repairing Pneumatic Equipment (7.5 Hours)**

(Module ID 15410-08) Explains inspecting, troubleshooting, assembling, and disassembling pumps. Explains installing pumps, and preparing them for startup. Discusses shutdown, repair, and removal of pumps from the system.

**Troubleshooting and Repairing Gearboxes (10 Hours)**

(Module ID 15411-08) Describes types and operation of gearboxes, and gearbox diagnostics. Explains how to troubleshoot, remove, and disassemble gearboxes; how to identify gear wear patterns; and how to install and maintain gearboxes.

### Modules

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Conventional Alignment (30 Hours)**

(Module ID 15403-08) Explains the procedures involved in aligning shafts, first with a straightedge and feeler gauges, then with dial indicators.

**Pumps (20 Hours)**

(Module ID 15404-08) Describes common pumps and their principles of operation. Explains centrifugal, rotary, reciprocating and metering pumps. Describes net positive suction head and cavitation.

**Troubleshooting and Repairing Pumps (7.5 Hours)**

(Module ID 15405-08) Describes inspecting, troubleshooting, assembling, and disassembling pumps. Explains installing pumps, and preparing them for startup. Discusses shutdown, repair, and removal of pumps from the system.

**Compressors and Compressor Maintenance (20 Hours)**

(Module ID 15406-08) Introduces compressors and the troubleshooting and maintenance procedures associated with compressors.

**Basic Pneumatic Systems (7.5 Hours)**

(Module ID 15407-08) Explains pneumatic system components and compressed-air treatment. Introduces equipment auxiliary and special-application equipment used with compressors and with tools.

---

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Reverse Alignment** (30 Hours)
(Module ID 15501-09) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment, based on reverse dial indicator measurements.

**Laser Alignment** (25 Hours)
(Module ID 15502-09) Using one example system, describes the principles of using laser alignment systems to perform alignments.

**Advanced Blueprint Reading** (25 Hours)
ISBN 978-0-13-610494-0
(Module ID 15503-09) Describes the use of drawing sets to obtain information about a system. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

**Optical Alignment** (25 Hours)
(Module ID 15504-09) Explains how to use theodolites, optical levels, auto levels, and total stations to place and align equipment.

**Turbines** (20 Hours)
ISBN 978-0-13-610496-4
(Module ID 15505-09) Describes types of turbines and their components. Describes the operation and common applications of particular types, including gas, steam, and water turbines.

**Maintaining and Repairing Turbine Components** (15 Hours)
(Module ID 15506-09) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.

**Installing Electric Motors** (10 Hours)
(Module ID 15507-09) Describes different types of electric motors, and presents basic guidelines for the installation of motors.

**Preventive and Predictive Maintenance**
(10 Hours)
(Module ID 15508-09) Explains preventive and predictive maintenance programs. Provides information on nondestructive testing, and introduces the basic techniques for NDE. Lubricant analysis, and acoustic, infrared, and vibration testing are also discussed.

**Vibration Analysis** (5 Hours)
(Module ID 15509-09) Explains the causes of vibration and the procedures and types of equipment used in vibration analysis. Describes the equipment used for vibration testing and monitoring. Describes field machine balancing.
Safety (10 Hours)
(Module ID 07102) Provides an overview of construction site hazards and safety precautions for those in the painting trade. Covers methods of rigging and care of ladders, scaffolds, swing devices, and other equipment.

Ladders, Scaffolds, Lifts, and Fall Protection (10 Hours)
(Module ID 07103) Covers methods of erecting, using and maintaining ladders, scaffolds, and lifts. Discusses fall protection equipment and safety practices used when working on ladders, scaffolds, and lifts.

Identifying Surface/Substrate Materials and Conditions (5 Hours)
(Module ID 07104) Explains how to identify types of surfaces used in construction including wood, metal, masonry/concrete, plaster/drywall and synthetic substrates. Also discusses how to identify new, aged, or previously coated surface conditions of substrates and coatings.

Protecting Adjacent Surfaces (5 Hours)
(Module ID 07105) Describes the tools, materials, and methods used for protecting adjacent surfaces and areas prior to surface preparation, paint spraying, etc.

Chemical Cleaning and Stripping (7.5 Hours)
(Module ID 07203) Describes chemical cleaners and strippers and how they are used to clean and/or remove unwanted material from substrates.

Low-Pressure Water Cleaning (7.5 Hours)
(Module ID 07204) Covers the design and function of low-pressure washing equipment, including procedures for the safe operation and maintenance of typical equipment.

Abrasive Blasting (7.5 Hours)
(Module ID 07205) Covers the basic design and function of abrasive blasting equipment, including general procedures for its use, related industry standards, and safety and health considerations.

Drywall Finishing and Patching (25 Hours)
(Module ID 07206) Covers the materials and procedures used for drywall finishing and patching. Emphasizes techniques for finishing and patching drywall, including the use and care of tools, equipment and supplies, and safety.

Stains (7.5 Hours)
(Module ID 07207) Describes the different classes and/or kinds of stains, including their composition, selection for use, and application considerations.

Clear Finishes (7.5 Hours)
(Module ID 07208) Introduces the composition, uses, and application of clear finishes, including varnishes, lacquers, shellacs, and urethanes.

Wood Finishing (22.5 Hours)
(Module ID 07209) Presents the science and technology of wood and wood products. Provides procedures and techniques for wood surface preparation and the application of clear finishes to various kinds of wood.

Coatings Two (10 Hours)
(Module ID 07210) Introduces the unique properties of high-performance coatings. Includes safety and health considerations, surface preparation, application, testing, and inspection.

Spray Painting (Conventional, Airless and HVLP) (32.5 Hours)
(Module ID 07211) Covers the design and function of conventional, airless, and HVLP spraying equipment, including procedures for the safe operation and maintenance of typical equipment.

Basic Surface Preparation (15 Hours)
(Module ID 07106) Describes the tools, materials, and methods used for cleaning, repairing, and penetrating surfaces/substrates in preparation for coating. Describes basic methods used for surface preparation of wood, metal, plaster/drywall, cementitious, and synthetic surfaces/substrates.

Sealants and Repair/Fillers (5 Hours)
(Module ID 07107) Describes the characteristics of common sealants and fillers. Covers guidelines for selecting sealants/fillers and the tools and methods used to apply them to substrates.

Introduction to Paints and Coatings (10 Hours)
(Module ID 07108) Describes the basic ingredients and film-forming processes common to all paints and coatings. Covers paint systems and functional categories of paints and coatings. Focuses on water-based alkyd paints and coatings.

Brushing and Rolling Paints and Coatings (15 Hours)
(Module ID 07109) Covers the types and selection of brushes, rollers, pads, mitts, and related accessories used for applying paints and coatings. Includes techniques used for brushing and rolling paints and coatings on interior and exterior surfaces. Also recommends maintenance and storage methods.

Continued on following page
## Coatings Three (15 Hours)
ISBN 978-0-13-875105-0
(Module ID 07303) Describes unique properties, safety and health considerations, surface preparation, application, and testing, and inspection of high-performance coatings used primarily to protect substrates for commercial or light industrial applications.

## Color and Tinting (10 Hours)
(Module ID 07304) Presents the theory and definition of color. Describes procedures for mixing, tinting, and matching colors. The use of the color wheel and the Munsell, Federal Standard 595B, and other color systems are also explained.

## Decorative (Faux) Finishes (22.5 Hours)
ISBN 978-0-13-875121-0
(Module ID 07305) Describes techniques for glazing, antiquing, stippling, motting, gilding, marbling, and graining decorative finishes.

## Wallcovering (40 Hours)
(Module ID 07306) Covers the wallcovering process from start to finish. Includes equipment and materials, estimating methods, surface preparation, adhesives and installation, and failures and remedies.

## Graphics (12.5 Hours)
(Module ID 07307) Describes types of graphics and their uses, methods of transferring graphic patterns to a surface, building code regulations, and other factors in the use of graphics.

## Texturing (10 Hours)
(Module ID 07308) Explains the characteristics of various texturing materials, surface preparation procedures, and techniques for producing different patterns.

## Spraying with Special Devices (20 Hours)
(Module ID 07309) Covers the design and function of texture, cold roof coating, electrostatic, and plural component spraying equipment. Includes procedures for the safe operation and maintenance of typical equipment.

---

The Painting Level 4 curriculum has been discontinued. The Industrial Coating and Application Specialist curriculum may be used instead.
Pipefitting

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Pipefitting Craft (5 Hours)
(Module ID 08101) Provides an overview of work performed by the pipefitter, as well as the responsibilities, career opportunities, safety principles associated with the pipefitting trade, and the types of pipes and tools pipefitters will encounter.

Pipefitting Hand Tools (20 Hours)
(Module ID 08102) Covers hand tool safety as well as procedures for selecting, inspecting, using, and maintaining hand tools used by pipefitters. Introduces the most common hand tools used in pipefitting, including pipe wrenches, pipe stands, pipe vises, levels, pipe fabrication tools, pipe bending tools, and pipe joining tools.

Pipefitting Power Tools (15 Hours)
(Module ID 08103) Covers the safe operation of power tools used to cut, grind, thread, and shape all types of materials, and includes procedures for selecting, inspecting, using, and maintaining power tools used by pipefitters. Provides guidelines for using electrical and pneumatic tools, including pipe threading machines.

Pipefitting Trade Math (15 Hours)
(Module ID 08204) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Pipefitting Trade Math (15 Hours)
(Module ID 08204) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Identifying and Installing Valves (20 Hours)
(Module ID 08205) Describes the materials used in threaded piping systems. Explains how to determine pipe lengths between threaded pipe fittings, prepare the pipe and fittings for fit-up, and assemble the piping system. Includes how to calculate simple and rolling offsets.

Socket-Weld Pipe Fabrication (25 Hours)
(Module ID 08206) Describes the fittings and materials involved in socket-welds, interpreting drawings, determining pipe lengths between fittings, aligning pipe and fittings, and cutting out a socket weld to save the structure.

Butt-Weld Pipe Fabrication (37.5 Hours)
(Module ID 08207) Describes materials, fittings, drawings, calculating takeouts, determining pipe lengths between fittings, beveling pipe, aligning components for welding, performing alignments, and cutting a butt weld to save the structure.

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trains in performing cutting techniques that include straight line, piercing, bevelling, welding, and gouging.

Ladders and Scaffolds (12.5 Hours)
(Module ID 08105) Describes hazards and safety procedures governing the use of step ladders, extension ladders, fixed scaffolds, and rolling scaffolds. Includes general procedures for scaffold assembly and use.

Motorized Equipment One (10 Hours)
(Module ID 08106) Explains the safety factors, operator maintenance, and operating procedures associated with motorized equipment used on job sites. Covers electrical generators, air compressors, aerial lifts, forklifts, trenchers, backhoes, mobile cranes, and portable equipment including welding machines, pumps, and compactors.

Excavations (10 Hours)
(Module ID 08208) Explains soil and trenching hazards involved in excavations, as well as the use of shoring and shielding systems per OSHA standards, sloping requirements by soil type, and combined systems for trench reinforcement. Covers how to determine grade and elevation, how to use a laser level, and how to backfill.

Underground Pipe Installation (20 Hours)
(Module ID 08209) Explains pipe installation procedures and guidelines, including the procedures for cast iron, ductile iron, concrete, carbon steel, fiberglass, and thermoplastic pipe. Includes an introduction to horizontal directional drilling for pipe installation, and the use of a weak link for plastic pipe.

PAPERBACK
Trainee Guide: $99.99

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Basic Rigging (7.5 Hours)
(Module ID 00106) A common activity at nearly every construction site is the movement of material and equipment from one place to another using various types of lifting gear. The procedures involved in performing this task are known as rigging. Not every worker will participate in rigging operations, but nearly all will be exposed to it at one time or another. This module provides an overview of the various types of rigging equipment, common hitches used during a rigging operation, and the related Emergency Stop hand signal.

Rigging Practices (15 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and jacking equipment.

Standards and Specifications (10 Hours)
(Module ID 08303) Discusses the meaning and importance of operating within the standards outlined and specifications. Explains commonly used codes, welding procedure specifications, and the identification of pipe and components.

Advanced Trade Math (25 Hours)
(Module ID 08304) Covers the role of trigonometry in pipefitting, including the use of trigonometric functions, triangle calculations, determining angles, interpolation, and calculating takeouts and add angles.

Motorized Equipment Two (10 Hours)
(Module ID 08305) Discusses the safe and proper use of scissors lifts, telescoping boom lifts, cable lifts, drain cleaners, and hydraulic torque tools.

Introduction to Aboveground Pipe Installation (25 Hours)
(Module ID 08306) Identifies various types of pipe, flanges, gaskets, and bolts. Covers the fabrication of gaskets, assembling and installing flanged and grooved pipe, fabricating and installing pipe spools, and installing pipe sleeves and floor penetrations.

Field Routing and Vessel Trim (15 Hours)
ISBN 978-0-13-748742-4
(Module ID 08307) Explains how to secure the work area and determine field run specifications, load weights for erection equipment, and support needs. Provides details on evaluating the run, assembling the field run, installing test blinds, working with instruments, and how to erect vessel trim.

Pipe Hangers and Supports (25 Hours)
(Module ID 08308) Explains the roles of pipe hangers and supports, with details on clevises, saddles, U-bolts, clamps, turnbuckles, rods, welded beam attachments, spring can supports, travel stops, and snubbers.

Testing Piping Systems and Equipment (20 Hours)
(Module ID 08309) Discusses the importance of safety and following procedures with testing and inspections. Topics include pretest requirements, visual weld inspections, service flow tests, hard pressure tests, hydrostatic tests, and steam blow tests.

Pipefitting Level 4

L4 PIPEFITTING

Curriculum Notes

• 175 Hours (required); 197.5 Hours (with Fundamentals of Crew Leadership elective)
• Revised: 2021, Fourth Edition
• Downloadable instructor resources that include module tests, PowerPoint®️, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $99.99

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Advanced Blueprint Reading (50 Hours)
(Module ID 08401) Introduces drawings used by pipefitters in the shop and in the field. Explains how to read and interpret P&IDs, general arrangement drawings, isometric drawings, and spool sheets. Discusses symbols, coordinates, control points, elevations, and step-by-step instructions for following a line of pipe through a set of drawings.

Advanced Pipe Fabrication (50 Hours)
(Module ID 08402) Explains the use of ordinate tables and trigonometry in creating fittings and pipe assemblies for process applications. Details are provided on calculating piping offsets, fabricating miter turns, laying out and fabricating saddles and supports made out of pipe, and laying out ladders, veyes, ninety-degree intersections, and supports without using references.

In-Line Specialties (20 Hours)
(Module ID 08405) Provides methods of safely working with specialty devices used in pipelines, including: snubbers, ball joints, bleed rings, drip legs, steam traps, expansion joints, filters, strainers, flowmeters, level measurement devices, flow pressure switches, rupture discs, thermowells, and desuperheaters.

Hot Taps (10 Hours)
(Module ID 08407) Provides details on environmental and other concerns associated with hot tapping. Discusses the installation of fittings, the operation of hot tap machines, working with line stop plugs, and identifying and mitigating known and potential hazards.

Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader's role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
Pipelayer

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Job Site Safety (17.5 Hours)
(Module ID 24101) Describes the safe use, care, and maintenance of pipelayer hand and power tools. Discusses methods for operating and maintaining dewatering equipment, generators, and compressors. Contains an introduction to drilling and tapping machines.

Rigging and Delivering Pipe and Associated Structures (7.5 Hours)
(Module ID 24102) Describes the safe use, care, and maintenance of pipelayer hand and power tools. Discusses methods for operating and maintaining dewatering equipment, generators, and compressors. Contains an introduction to drilling and tapping machines.

Tools and Equipment (22.5 Hours)
ISBN 978-0-13-015305-0
(Module ID 24102) Describes the safe use, care, and maintenance of pipelayer hand and power tools. Discusses methods for operating and maintaining dewatering equipment, generators, and compressors. Contains an introduction to drilling and tapping machines.

Cutting Pipe (12.5 Hours)
(Module ID 24104) Discusses practical methods for safely cutting common pipe materials. Describes pipe materials and standard sizes for thermoplastic, concrete, ductile iron, and corrugated steel pipe.

Gaskets, Joints, and Fittings (20 Hours)
(Module ID 24105) Describes methods for joining PVC, ductile iron, and concrete pipe, including O-ring pipe, slip joints, mechanical joints, and restraint joints. Discusses methods for joining pipe to pipe, pipe to appurtenances, and pipe to manhole connections, including transition couplings.

Introduction to Elevations (5 Hours)
(Module ID 24106) Discusses the use, care, and maintenance of the optical level, transit, and the pipe laser. Contains a brief introduction to elevations as it relates to the setup of these instruments. Describes common causes and solutions to laser problems in the field.

Trench Safety (7.5 Hours)
(Module ID 24107) Discusses soil behavior as it relates to trench failures, including common indications of an unstable trench. Introduces typical shoring, shielding, and sloping methods. Identifies characteristics that may make a trench a confined space and describes the safety measures needed to work in the trench.

Foundation Stabilization, Bedding, and Dewatering (7.5 Hours)
ISBN 978-0-13-015312-8
(Module ID 24108) Discusses methods for preparing the trench for pipe installation, including stabilization, bedding, and initial backfill. Describes effective methods for dewatering a trench and includes a section on troubleshooting dewatering equipment.

Testing Pipe (12.5 Hours)
(Module ID 24109) Discusses methods for preparing pressure and gravity systems for testing, including cleaning and inspecting pipe systems. Describes methods for testing pressure and gravity systems, including vacuum testing of concrete manholes.
Tools of the Plumbing Trade (10 Hours)
(Module ID 02103) Introduces trainees in the care and use of the different types of hand and power tools they will use on the job. Gives trainees the information they need to select the appropriate tools for different tasks, and reviews tool maintenance and safety issues.

Introduction to Plumbing Math (12.5 Hours)
(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrates how they apply to on-the-job situations. Teaches trainees how to measure pipe using fitting tables and framing squares and how to calculate 45-degree offsets.

Introduction to Plumbing Drawings (17.5 Hours)
(Module ID 02105) Introduces trainees to the different types of plumbing drawings they will encounter on the job and discusses how to interpret and apply them when laying out and installing plumbing systems. Discusses the symbols used in plumbing and mechanical drawings and reviews isometric, oblique, orthographic, as well as schematic drawings. Requires trainees to render plumbing drawings and to recognize how code requirements apply to plumbing drawings.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106) Discusses the proper applications of code-approved fittings used in plumbing installations. The different types of fittings and the materials used in them. Also discusses pressure testing of plastic pipe once installed.

Copper Tube and Fittings (12.5 Hours)
(Module ID 02107) Discusses the proper applications of code-approved fittings used in plumbing installations. Also discusses how to measure, cut, join, and support plastic pipe according to manufacturer's instructions and applicable codes. Also discusses pressure testing of plastic pipe once installed.

Cast-Iron Pipe and Fittings (12.5 Hours)
(Module ID 02108) Introduces trainees to hub-and-spigot and no-hub cast-iron pipe and fittings and their applications in DWV systems. Reviews material properties, storage and handling requirements, and fittings and valves. Covers joining methods, installation, and testing.
Structural Penetrations, Insulation, and Fire-Stopping (15 Hours)
(Module ID 02203-13) Introduces methods for adjusting structural members, insulating pipe, and installing fire-stopping. Covers reinforcement techniques for modified structural members; how to measure, cut, and install fiberglass and flexible foam insulation; and how to identify walls, floors, and ceilings that require fire-stopping.

Installing and Testing DWV Piping (30 Hours)
(Module ID 02206-13) Explains how to locate, install, connect, and test a complete drain, waste, and vent (DWV) system. Discusses how to develop material takeoffs, set up and use levels, locate building sewers and building drains, locate fixtures, and test a DWV system.

Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205-13) Covers the proper techniques for locating, installing, and connecting roof, floor, and area drains and floor sinks according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.

Installing and Testing Water Supply Piping (20 Hours)
ISBN 978-0-13-340281-0
(Module ID 02207-13) Reviews types of valves, their components, and applications. Also covers valve servicing.

Applied Math (17.5 Hours)
(Module ID 02301-14) Reviews math concepts, including weights and measures, area and volume, temperature, pressure, and force. Describes the six simple machines: inclined planes, levers, pulleys, wedges, screws, and wheels and axles.

Sizing and Protecting the Water Supply System (30 Hours)
(Module ID 02312-14) Teaches techniques for sizing water supply systems, including calculating system requirements and demand, developed lengths, and pressure drops. Reviews the factors that can reduce efficiency of water supply piping. Introduces different backflow prevention devices and explains how they work, where they are used, and how they are installed in water supply systems.

Installing Fixtures and Valves (20 Hours)
(Module ID 02209-13) Discusses gas-fired, electric, tankless, heat pump, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Basic Electricity (10 Hours)
(Module ID 02210-13) Introduces electrical safety and the principles of electricity including voltage, current, resistance, and power. Includes important electrical formulas, circuitry, and common plumbing-related electrical applications.

Fuel Gas and Fuel Oil Systems (20 Hours)
(Module ID 02211-13) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.

Potable Water Supply Treatment (15 Hours)
(Module ID 02303-14) Explains how to disinfect, filter, and soften water supply systems. Discusses how to troubleshoot water supply problems, flush out visible contaminants from a plumbing system, and disinfect a potable water plumbing system.

Types of Venting (20 Hours)
(Module ID 02305-14) Reviews the different types of vents that can be installed in a DWV system and explains how they work. Teaches design and installation techniques.

Sizing DWV and Storm Systems (20 Hours)
(Module ID 02306-14) Explains how to calculate drainage fixture units for waste systems. Reviews how to size drain, waste, and vent (DWV) systems; storm drainage systems; and roof storage and drainage systems.

Continued on following page
Sewage Pumps and Sump Pumps (12.5 Hours)
(Module ID 02308-14) Discusses the installation, diagnosis, and repair of pumps, controls, and sumps in sewage and storm water removal systems.

Corrosive-Resistant Waste Piping (7.5 Hours)
(Module ID 02309-14) Discusses corrosive wastes and reviews related safety issues and hazard communications. Explains how to determine when corrosive-resistant waste piping needs to be installed, as well as how to correctly select and properly connect different types of piping.

Compressed Air (10 Hours)
(Module ID 02403-14) Builds on trainees’ previous experience with pumps, storage tanks, controls, and pipes and fittings by teaching how to assemble those components into systems that boost water pressure and provide hot water.

Service Plumbing (27.5 Hours)
ISBN 978-0-13-378279-0
(Module ID 02311-14) Covers the troubleshooting and repair of fixtures, valves, and faucets in accordance with code and safety guidelines. Explains how to diagnose and repair water supply and drainage piping, water heaters, and other appliances and fixtures. Describes the effects of corrosion, freezing, and hard water on plumbing systems.

L4 PLUMBING

Curriculum Notes
• 145 Hours
• Revised: 2014, Fourth Edition
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

DIGITAL ISBN
NCCERconnect +

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Business Principles for Plumbers (15 Hours)
(Module ID 02401-14) Introduces the basic types of business accounting and project estimating. Reviews the qualities of good business leaders and covers communication, delegating, and problem-solving skills for successful plumbing businesses. Also covers the basics of business organization and project estimating.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers the basics of leadership skills and explains different leadership styles, communication, delegating, and problem solving. Includes safety and the crew leader’s role in safety as discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Water Pressure Booster and Recirculation Systems (12.5 Hours)
(Module ID 02402-14) Builds on trainees’ previous experience with pumps, storage tanks, controls, and pipes and fittings by teaching how to assemble those components into systems that boost water pressure and provide hot water.

Indirect and Special Waste (17.5 Hours)
(Module ID 02404-14) Describes the code requirements and installation procedures for systems that protect against contamination from indirect and special waste.

Hydronic and Solar Heating Systems (17.5 Hours)
(Module ID 02405-14) Introduces the basic types of hydronic and solar heating systems and describes their components and accessories. Reviews installation and periodic servicing of hydronic and solar heating systems.

Codes (12.5 Hours)
(Module ID 02406-14) Discusses the different codes used by plumbers throughout the country and explains how these codes are written, adopted, modified, and implemented.

Private Water Supply Well Systems (10 Hours)
(Module ID 02407-14) Describes the operation of pumps and well components. Reviews the qualities of good wells and how to assemble and disassemble pumps and components.

Private Waste-Disposal Systems (10 Hours)
(Module ID 02409-14) Describes the types of private waste-disposal systems, discusses the maintenance and installation of these systems, and explains how to determine the local code requirements for these systems. Covers code enforcement and sewage system planning and layout.

Swimming Pools and Hot Tubs (7.5 Hours)
(Module ID 02410-14) Introduces trainees to plumbing systems in swimming pools, hot tubs, and spas.

Plumbing for Mobile Homes and Travel Trailer Parks (17.5 Hours)
(Module ID 02411-14) Describes the location and layout of plumbing systems for mobile home and travel trailer parks. Reviews how to design and lay out a system, how to connect water and sewer lines to a mobile home, and how to estimate materials for the park.

Introduction to Medical Gas and Vacuum Systems (15 Hours)
(Module ID 02412-14) Introduces trainees to the plumbing systems for medical gas and vacuum systems used in health care facilities. Covers the system requirements and professional qualifications required by code, describes common types of medical gas and vacuum systems, and introduces the safety requirements for installing, testing, and servicing these systems.
Reinforcing Ironwork

LEVEL 1

Curriculum Notes
- 192.5 Hours
- Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately.
- For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- Published: 2005
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation is available. Please see NCCER’s online catalog for more information.

PAPERBACK
Trainee Guide: $69.99
978-0-13-228220-8

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Concrete Reinforcement (40 Hours)
ISBN 978-0-13-228987-0
(Module ID 39101-05) Describes the selection and use of rebar, bar supports, and welded-wire fabric. Presents general procedures for cutting, bending, splicing, and tying rebar, and placement of steel in various types of footings, columns, walls, and slabs.

Concrete Reinforcement Safety (15 Hours)
(Module ID 39102-05) Focuses on safety topics of particular concern to the reinforcing ironworker, including rebar-related hazards, fall protection, use of positioning devices, PPE, excavations, and lifting/carrying techniques.

Rigging Equipment (10 Hours)
ISBN 978-0-13-228989-4
(Module ID 39103-05) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, and attaching hardware such as shackles, eyebolts, and hooks, as well as rigging knots.

LEVEL 2

Curriculum Notes
- 118.5 Hours
- Published: 2005
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $99.99
978-0-13-227294-0

MODULES
Reinforcing Ironwork Level Two comprises modules from NCCER’s Carpentry and Ironworking curricula. The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Foundations and Flatwork (15 Hours)
(Module ID 27204-01) Covers the construction of forms for continuous, stepped continuous, pier and grade beam concrete footings. Describes the edge forms used for continuous concrete slabs and similar structures. Forming forms, parts of forms and procedures for constructing basic footing and edge forms are included.

Concrete Forms (32.5 Hours)
(Module ID 27205-01) Covers the applications and construction methods for various types of job-built forms, including wall, column, slab-and-beam, and stair forms. Instructor’s Guide includes instruction sheets for construction of various forms.

Handling and Placing Concrete (22.5 Hours)
(Module ID 27207-01) Covers the tools, equipment and procedures required for handling, placing, and finishing concrete at the job site. Describes joints made in concrete structures, the use of joint sealants, and form removal procedures. Safety procedures for handling, placing, and finishing concrete are emphasized.

Manufactured Forms (22.5 Hours)
(Module ID 27206-01) Covers the types of manufactured forms and form hardware systems used in the construction of walls, columns, deck and roof slabs, beams and girders, culverts, and highways. Includes information on flying forms, slipforms, shoring, and architectural finishes.

Metal Decking (10 Hours)
(Module ID 30116) Identifies decking types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and placing concrete safely. Explains the effects of deck penetrations and damage.

Introductory Skills for the Crew Leader (16 Hours)
Trainee
(Module ID MT101) Teaches leadership skills required to supervise personnel. Discusses principles of project planning, scheduling, estimating, and management. Presents several case studies for student participation.
Roofing

**L1** ROOFING

**Curriculum Notes**

• 178 Hours
• Includes 75 hours of Care, which is a prerequisite for Level 1 completion and must be purchased separately.
• For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
• Revised: 2021, Second Edition, in conjunction with NRCA®
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

ISBN

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Roofing** (2.5 Hours)
(Module ID 16101) Introduces the roofing craft and describes types of roofs and roof systems. Overviews basic concepts of safety, describes apprenticeship programs, and lists skills, responsibilities, and characteristics a worker should possess.

**Roofing Safety** (7.5 Hours)
ISBN 978-0-13-749109-4
(Module ID 16102) Discusses the best safety practices for roofing and educates about potential dangers on the job. Reviews risk mitigation, hazard control, safety-related resources, fall protection, and ladder safety.

**Fall Protection Orientation** (8 Hours)
(Module ID 75901) Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment, safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

**Drawings in Roofing** (10 Hours)
(Module ID 16103) Describes types of construction documents and explains how to navigate a drawing set to find roofing information. Explains the role of the project manual and specifications. Introduces the concept of building information modeling (BIM).

**Introduction to Steep-Slope Roofing** (12.5 Hours)
(Module ID 16105) Introduces steep-slope roof systems and discusses common types of decks and underlayments. Describes types and styles of steep-slope roof systems. Explains the purpose of various types of flashings.

**Wood Roof Systems** (12.5 Hours)
(Module ID 16203) Outlines the components, tools, and installation methods used for wood roof systems. Distinguishes between wood shingles and wood shakes. Identifies common mistakes in the installation of wood roof systems and introduces basic repair methods.

**Slate Roof Systems** (12.5 Hours)
(Module ID 16204) Discusses slate roof system components, styles, tools, and safety considerations. Details appropriate procedures for the installation and repair of these systems.

**Metal Roof Systems** (15 Hours)
(Module ID 16205) Describes the various types of metal roofs, including architectural, structural, and metal shingle systems. Discusses the seam types, methods, and tools used in metal roof installation. Details the proper tools and techniques used for the installation of these features.

**Thermoplastic Roof Systems** (10 Hours)
(Module ID 16206) Describes types of thermoplastic roof systems and outlines their installation and repair. Identifies types of field membranes, pre-manufactured flashing accessories, attachment components, and related tools.

**EPDM Roof Systems** (10 Hours)
(Module ID 16207) Describes types of EPDM roof systems and their components. Identifies field membrane types, pre-manufactured flashing accessories, attachment methods, and components of EPDM roof systems. Describes installation and repair of these systems.

**Built-Up Roof Systems** (15 Hours)
ISBN 978-0-13-749149-0
(Module ID 16208) Introduces types of built-up roof (BUR) systems and their components. Outlines basic installation and repair methods associated with BUR system, as well as related tools.

**Modified Bitumen Roof Systems** (15 Hours)
ISBN 978-0-13-749152-0
(Module ID 16209) Describes types and characteristics of modified bitumen (mod-bit) roof systems. Discusses the components, installation procedure, basic repair methods, and tools used for mod-bit systems.

**Liquid-Applied Roofing** (12.5 Hours)
(Module ID 16210) Describes liquid-applied roofing products and explains the difference between roof coatings and liquid-applied roof membranes. Outlines procedures and tools used to install and repair liquid-applied roofing.

**Rooftop Service and Repair** (15 Hours)
(Module ID 16212) Introduces service and repair in the roofing industry and related career opportunities for roofers. Describes the general process of repair as well as specific repairs for specific steep- and low-slope roof systems.

**Introduction to Low-Slope Roofing** (10 Hours)
(Module ID 16106) Introduces important concepts about low-slope roof systems and their design, components, and installation. Outlines common types of roof decks, insulation, and cover boards. Describes attachment methods and reviews types of flashings.

**Substrates, Decks, and Roof Insulation** (12.5 Hours)
(Module ID 16104) Overviews common types of roof decks and insulation and related considerations. Explains basic principles of heat transfer, vapor movement, and deck movement and how roofs are designed to accommodate them. Describes general procedures for installing vapor retarders, insulation, cover boards, and tapered insulation.

**Sheet Metal in Roofing** (25 Hours)
(Module ID 16107) Describes the properties of different types of metal that impact the way sheet metal is used in construction. Overviews the tools used to measure, layout, and install sheet-metal components in roof systems. Outlines commonly used sheet-metal roofing components and basic procedures used to prepare and install them.

**Rigging Practices** (15 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting materials.

**L2** ROOFING

**LEVEL 2**

**Curriculum Notes**

• 145 Hours
• Revised: 2022, Second Edition, in conjunction with NRCA®
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

ISBN

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Asphalt Shingle Roof Systems** (15 Hours)
(Module ID 16201) Discusses asphalt shingles as well as the tools and procedures used in the application of these systems. Describes appropriate attachment techniques and safety precautions involved in asphalt shingles installation and repair.

**Clay and Concrete Tile Roof Systems** (12.5 Hours)
(Module ID 16202) Introduces tile roof systems as well as the components and tools unique to their installation. Describes tile roof application procedures, safety considerations, and flashing techniques. Discusses tile repair methods.

**Slate Roof Systems** (12.5 Hours)
(Module ID 16203) Discusses slate roof system components, styles, tools, and safety considerations. Details appropriate procedures for the installation and repair of these systems.

**Metal Roof Systems** (15 Hours)
(Module ID 16205) Describes the various types of metal roofs, including architectural, structural, and metal shingle systems. Discusses the seam types, methods, and tools used in metal roof installation. Details the proper tools and techniques used for the installation of these features.

**EPDM Roof Systems** (10 Hours)
(Module ID 16207) Describes types of EPDM roof systems and their components. Identifies field membrane types, pre-manufactured flashing accessories, attachment methods, and components of EPDM roof systems. Describes installation and repair of these systems.

**Built-Up Roof Systems** (15 Hours)
ISBN 978-0-13-749149-0
(Module ID 16208) Introduces types of built-up roof (BUR) systems and their components. Outlines basic installation and repair methods associated with BUR system, as well as related tools.

**Modified Bitumen Roof Systems** (15 Hours)
ISBN 978-0-13-749152-0
(Module ID 16209) Describes types and characteristics of modified bitumen (mod-bit) roof systems. Discusses the components, installation procedure, basic repair methods, and tools used for mod-bit systems.

**Liquid-Applied Roofing** (12.5 Hours)
(Module ID 16210) Describes liquid-applied roofing products and explains the difference between roof coatings and liquid-applied roof membranes. Outlines procedures and tools used to install and repair liquid-applied roofing.

**Rooftop Service and Repair** (15 Hours)
(Module ID 16212) Introduces service and repair in the roofing industry and related career opportunities for roofers. Describes the general process of repair as well as specific repairs for specific steep- and low-slope roof systems.
# Scaffolding

## Modules

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to the Trade (7.5 Hours)**  
(Module ID 31101-15) Introduces the scaffolding program, describes the duties of a scaffolder, and identifies scaffold types and scaffolding terms.

**Trade Safety (7.5 Hours)**  
(Module ID 31102-15) Provides a comprehensive overview of the safety regulations and guidelines in the scaffolding industry.

**Trade Tools and Equipment (7.5 Hours)**  
(Module ID 31103-15) Covers the safe use and applications of hand and power tools used in the trade.

**Trade Math (7.5 Hours)**  
(Module ID 31104-15) Explains and gives examples of math calculations of scaffold loads, including area loads, concentrated loads, live loads, cantilevered loads, and wind loads.

**Supported Scaffolds (32.5 Hours)**  
ISBN 978-0-13-378899-0  
(Module ID 31105-15) Identifies the equipment used with supported scaffolds. Describes the procedures for erecting supported scaffolds.

**Mobile Scaffolds (10 Hours)**  
(Module ID 31106-15) Identifies the different types of powered and manually propelled mobile scaffolds and describes their erection and operation.

**Suspension Scaffolds (7.5 Hours)**  
(Module ID 31107-15) Identifies the types of equipment used with suspension scaffolds. Describes the rigging of suspension scaffolds.
Sheet Metal

NATE CERTIFICATION
NCCER is an officially recognized training provider for North American Technician Excellence (NATE), an independent, third-party certification body for HVAC/R technicians. NATE-certified technicians can use module completions through NCCER-accredited training providers for the continuing education hours required for recertification through NATE. For details and lists of available NATE-recognized training, visit www.natex.org. For more information regarding NATE recertification, please contact NCCER Customer Service at 1-888-622-3720.

Sheet Metal Tools and Equipment (10 Hours)
(Module ID 04102) Describes the hand and power tools used in the sheet metal craft, including layout tools and cutting, bending, and forming machines. Includes safety and maintenance guidelines.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Parallel Line Development (27.5 Hours)
(Module ID 04105) Covers the steps involved in using the parallel line development method to lay out fittings. Includes step-by-step procedures for selected fittings.

Installation of Ductwork (15 Hours)
(Module ID 04106) Addresses ductwork assembly, use of different types of sealants, using lifts, and installation of ductwork. Describes the types of fasteners (screws, nuts, bolts, and rivets), and supports used in an air distribution system. Discusses proper spacing of hangers, load ratings, and installation of hangers and support systems.

Installation of Air Distribution Accessories (12.5 Hours)
(Module ID 04107) Describes how air distribution accessories such as louvers, dampers, and access doors function as part of an air distribution system. Includes installation guidelines and checklists.

Construction and Sheet Metal Drawings (17.5 Hours)
ISBN 978-0-13-663047-0
(Module ID 04102) Reviews how to read and interpret section, elevation, and detail drawings. Also covers the drawings used by a variety of crafts. Includes practice using drawings with a large drawing package.

Radial Line Development (20 Hours)
(Module ID 04202) Introduces parallel line development principles used to determine layouts for sheet metal fittings. Includes practice layout and fabrication tasks that allow trainees to develop and demonstrate their skills.

Triangulation (40 Hours)
(Module ID 04306) Describes the principles of triangulation and how it can be used to measure duct run fittings. Provides a variety of tasks to practice developing, laying out, and fabricating selected duct run fittings.

Sheet Metal Duct Fabrication Standards (7.5 Hours)
(Module ID 04204) Explains how to determine the requirements for a duct system, including operating pressures, metal gauges, connectors, reinforcements, tie rods, and seams. Also reviews how to use standards, codes, and ordinances to design a duct system.

Bend Allowances (7.5 Hours)
(Module ID 04206) Provides instruction and practice in determining proper bend allowances in sheet metal. Also reviews the interplay of different factors that affect the amount of bend allowance needed and the methods for calculating allowance.

Soldering (15 Hours)
(Module ID 04207) Identifies soldering tools, materials, and techniques. Also provides a wide range of soldering tasks for practice.

Air Distribution Systems (15 Hours)
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Sheet Metal Level 3

## L3 SHEET METAL

### CURRICULUM NOTES
- 145 Hours
- Updated: 2019
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoint®️, and performance profile sheets are available at www.nccer.org/irc.

### MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### COMMERCIAL AIRSIDE SYSTEMS (12.5 Hours)
(Module ID 03201) Describes the systems, equipment, and operating sequences commercial airside system configurations such as constant volume single-zone and multi-zone, VVT, VAV, and dual-duct VAV.

#### SHOP PRODUCTION AND ORGANIZATION (25 Hours)
(Module ID 04404) Reviews the codes and specifications pertaining to fume and exhaust system design for safe workspaces. Provides instruction in selecting the appropriate materials for fume or exhaust system components and to identify the different types of hoods and applications for each.

#### WELDING AND BRAZING (25 Hours)
(Module ID 04403) Reviews the techniques and proper operation of equipment used for welding and brazing. Emphasizes safety and awareness of hazards involved. Trainees practice welds in a variety of positions and perform a basic braise.

#### OXYFUEL CUTTING (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

#### AERIAL SHOP METAL JOB SPECIFICATIONS (20 Hours)
(Module ID 04405) Explains how to balance an air distribution system so that the right amount of air is correctly distributed at the proper velocities and returned to the heating and cooling units. Reviews the tools and techniques used for adjusting fans, volume dampers, registers, and grilles. Provides proper techniques for duct leakage testing.

#### FUNDAMENTALS OF CREW LEADERSHIP (25 Hours)
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Discusses how to plan the job and schedule the crew.

#### SHEET METAL BUSINESS AND TECHNOLOGY (7.5 Hours)
(Module ID 04407) Covers advancements in software and technology as it pertains to sheet metal workflow. Covers tools to enhance design, estimation, fabrication, installation, and project documentation.

#### BOARD INSULATION FOR DUCTS (20 Hours)
ISBN 978-0-13-498775-0
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

#### PRINCIPLES OF AIRFLOW (25 Hours)
(Module ID 04403) Reviews the basic principles of airflow and reviews how airflow is affected by duct size, shape, and fittings. Also reviews the components of an air distribution system.

#### USING CONSTRUCTION DRAWINGS IN SHEET METAL (30 Hours)
(Module ID 04308) Covers equipment schedules, material takeoffs, and craft scheduling. Explains how to put knowledge of construction drawings and documents to work as a sheet metal fabricator or installer.

#### SHEET METAL JOB SPECIFICATIONS (20 Hours)
(Module ID 04405) Explains how to balance an air distribution system so that the right amount of air is correctly distributed at the proper velocities and returned to the heating and cooling units. Reviews the tools and techniques used for adjusting fans, volume dampers, registers, and grilles. Provides proper techniques for duct leakage testing.

#### BLANKET INSULATION FOR DUCTS (7.5 Hours)
ISBN 978-0-13-498775-0
(Module ID 19202) Covers fiberglass blanket installation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

#### AIR TESTING AND BALANCING (30 Hours)
(Module ID 04402) Describes the use of project specifications and submittals. Covers how specifications and submittals are applied when working on a specific job. Covers the coordination of crafts.

#### ARCHITECTURAL SHEET METAL (25 Hours)
(Module ID 04307) Teaches how to lay out and fabricate sheet metal components of a roof drainage system, including flashing, gutters, and downsputs.

#### SHOP PRODUCTION AND ORGANIZATION (25 Hours)
(Module ID 04401) Introduces the production, organization, planning, and control functions that occur in a sheet metal shop. Emphasizes optimization of processes and accurate estimating for competitive bidding. Discusses project planning techniques, principles of efficient shop layout and materials flow, as well as the roles and relationships of shop personnel.
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Site Layout** (10 Hours)
(Module ID 78201-04) Provides an overview of the site layout trade and related tasks. Covers the use of the builder’s level and leveling rods, as well as the equipment and procedures for making distance measurements by taping ( chaining). Also covers the elements of professional conduct, safety, and communications. Briefly describes the aspects of an apprenticeship program and the career path and professional opportunities related to the site layout trade.

**Surveying Math** (30 Hours)
(Module ID 78202-04) Expands on the Core module, Introduction to Construction Math, with emphasis on the metric system, including how to convert between English and metric system units. Covers basic concepts for working with formulas and equations, as well as basic geometry and right-angle trigonometry.

**Survey Equipment Use and Care Two, EDMIs and Total Stations** (10 Hours)
(Module ID 78202-04) Covers the use of electronic surveying instruments and total stations.

**Control Setup** (30 Hours)
(Module ID 78202-04) Contains information and instructions for setting up, running, recording, and closing a horizontal traverse and a level loop. Also covers primary and secondary control plans, as well as vertical control for multilevel structures.

**Boundary and Topography Surveys** (10 Hours)
(Module ID 78204-04) Contains information and instructions for gathering, recording, and plotting profile and cross-section leveling data. Includes plot and site plans to identify rights-of-way, utilities, setbacks, boundaries, and tie-in locations.

**Data Collection and Basic Computer Skills** (10 Hours)
(Module ID 78205-04) Expands on the Core module, Introduction to Construction Drawings, and provides techniques for reading and using drawings and specifications. Emphasis is placed on drawings and types of information that are relevant to the site layout trade.

**Concrete Properties and Quality Control** (15 Hours)
(Module ID 78206-04) Expands on the Core module, Introduction to Construction Math, with emphasis on the metric system, including how to convert between English and metric system units. Covers basic concepts for working with formulas and equations, as well as basic geometry and right-angle trigonometry.

**Means and Methods** (40 Hours)
ISBN 978-0-13-160027-0
(Module ID 78207-04) Provides extensive coverage of soils and their classifications and explains how various soils behave in excavations. Covers the safety procedures and equipment used when working in or near trenches. Provides layout procedures for footings, piers, building corners, columns, walls, embeddings, and stairs.
Sprinkler Fitting

L1  SPRINKLER FITTING

Curriculum Notes

- 155 Hours
- Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately.
- For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- Revised: 2021, Fourth Edition to reflect NFPA 13
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN
Trainee Guide: $69.99 978-0-13-747549-0

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- Occupational Overview: The Sprinkler Industry (5 Hours)
  (Module ID 18101) Describes the basic types of sprinkler systems, the tools used to install them, and the codes and standards that apply to these systems. Covers the apprenticeship requirements for sprinkler fitters, employer and employee responsibilities, and career paths in the sprinkler industry.

- Introduction to Components and Systems (10 Hours)
  (Module ID 18102) Provides an overview of the four main types of sprinkler systems. Describes testing laboratories and listing requirements. Covers sprinkler characteristics, including thermal response, spray pattern and coverage area, orientation, K-factors, and temperature ratings. Describes various types of piping, valves, and pumps.

- Steel Pipe and Fittings (20 Hours)
  (Module ID 18103) Describes the steel pipe used in sprinkler systems, including pipe types, schedules, and sizes. Covers common methods of end preparation, including cutting, reaming, grooving, and threading pipe. Describes various types of grooved, threaded, flanged, and plain-end fittings, along with the installation methods and applications of each type.

- Copper Tubing and Fittings (10 Hours)
  (Module ID 18105) Copper tubing and fittings are introduced along with cutting and bending tools. The soldering process is described, including techniques for measuring, cutting, reaming, and cleaning tubing. Brazing is described, as are brazing metals, fluxes, and brazing equipment. Also covers grooved couplings and compression connections.

- Underground Pipe (12.5 Hours)
  (Module ID 18106) Describes the installation of underground piping systems. Covers ductile iron and PVC piping and components, including risers, backflow preventer assemblies, hydrants, and restraints. Also covers trench safety requirements, backfilling, and testing.

- Sprinkler Fitting (5 Hours)
  (Module ID 18202) This module explains the valves used to start, stop, direct, and regulate water flow in sprinkler systems. It covers the operation, applications, and basic maintenance of various valves, including indicating control valves, trim valves, check valves, hose valves, pressure control valves, and air venting valves.

- Math for Sprinkler Fitters (20 Hours)
  (Module ID 18203) This module reviews basic mathematical principles and explains how to apply them to various sprinkler fitting calculations, including floor areas, pitch, offsets, sprinkler spacing, pressure, and volume.

- Shop Drawings (20 Hours)
  (Module ID 18204) This module covers the shop drawings used in sprinkler fitting. It describes the symbols used for various sprinkler system components and explains how to use a shop drawing to identify the types and locations of piping and components. It also provides an overview of Building Information Modeling (BIM).

- Standard Spray Sprinklers (20 Hours)
  (Module ID 18205) This module describes the characteristics of standard spray sprinklers. It also covers types of construction, NFPA 13 light and ordinary hazard occupancy classifications, and installation considerations.

- Wet Pipe Sprinkler Systems (25 Hours)
  (Module ID 18206) This module describes the operation and installation of wet pipe sprinkler systems. It covers various system controls and switches and explains how they operate. It also describes how to complete a Contractor's Material and Test Certificate for Aboveground Piping and provides an overview of basic system troubleshooting procedures.

- Dry Pipe Sprinkler Systems (25 Hours)
  (Module ID 18207) This module describes the operation and installation of dry pipe sprinkler systems. It covers differential and mechanical dry pipe valves and trim, including switches, gauges, air sources, accelerators, and drains. It also provides an overview of basic system troubleshooting and acceptance testing procedures, including the completion of a Contractor's Material and Test Certificate for Aboveground Piping for a dry pipe sprinkler system.

</tr>
<tr>
<td>(Module ID 18403-13) Identifies the following extinguishing exposure systems: water spray, foam, carbon dioxide, Halon, auxiliary and local alarm. Limited water systems, fire extinguishers, and water mist suppression systems are also covered.</td>
<td></td>
</tr>
<tr>
<td><strong>Fire Pumps</strong> (40 Hours)</td>
<td>ISBN 978-0-13-378887-7</td>
</tr>
<tr>
<td>(Module ID 18404-13) Covers fire pump categories and components. Describes fire pump controller requirements and fire pump performance and alignment. Explains pump and driver characteristics and performance curves as well as controllers, sensing lines, supervision, and starting methods. Outlines project requirements, installation, maintenance, and troubleshooting.</td>
<td></td>
</tr>
<tr>
<td><strong>Application-Specific Sprinklers and Nozzles</strong> (27.5 Hours)</td>
<td>ISBN 978-0-13-378885-4</td>
</tr>
<tr>
<td>(Module ID 18405-13) Describes application-specific sprinkler types and requirements. Discusses area of coverage, positioning, and obstruction requirements and explains system selection.</td>
<td></td>
</tr>
<tr>
<td>(Module ID 18404-13) Introduces the role of foremanship and covers responsibilities, leadership, and safety. Also explains project documentation and reports related to materials tracking and labor tracking.</td>
<td></td>
</tr>
<tr>
<td><strong>Procedures and Documentation</strong> (20 Hours)</td>
<td>ISBN 978-0-13-378887-7</td>
</tr>
<tr>
<td>(Module ID 18405-13) Explains the importance of proper documentation to ensure correct installation and avoid future rework and possible unintentional releases. Emphasizes the need to properly document the actual installation using written reports and photographs. Includes causes of and responses to water damage, and provides a case history of an unintentional release.</td>
<td></td>

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Welding Safety (5 Hours)
(Module ID 29101) Covers safety equipment, protective clothing, and procedures applicable to the cutting and welding of metals.

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slotting, squaring, and bevelling metals. Explains how to store equipment and clean the work area.

Air-Carbon Arc Cutting and Gouging (10 Hours)
(Module ID 29104) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc washing and gouging activities.

Base Metal Preparation (12.5 Hours)
(Module ID 29105) Describes how to clean and prepare all types of base metals for cutting or welding. Identifies and explains joint design and base metal preparation for all welding tasks.

Weld Quality (10 Hours)
(Module ID 29106) Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

SMAW – Equipment and Setup (5 Hours)
(Module ID 29107) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

SMAW Electrodes (2.5 Hours)
ISBN 978-0-13-792468-4
(Module ID 29108) Describes electrode characteristics and different types of filler metals. Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Explains proper storage and control of filler metals and identifies the use of codes.

SMAW – Beads and Fillet Welds (100 Hours)
(Module ID 29109) Describes the preparation and setup of arc welding equipment and the process of striking an arc. Explains how to detect and correct arc blow. Describes how to make stringer, weave, overlapping beads, and fillet welds.

SMAW – Open-Root Groove Welds – Plate (60 Hours)
(Module ID 29112) Introduces various types of groove welds and describes how to prepare for groove welding. Describes the technique required to produce various open V-groove welds.

Joint Fit-Up and Alignment (5 Hours)
(Module ID 29110) Describes job code specifications. Explains how to use fit-up gauges and measuring devices to check fit-up and alignment and use plate and pipe fit-up and alignment tools to properly prepare joints. Explains how to check for joint misalignment and poor fit.

SMAW – Groove Welds with Backing (50 Hours)
(Module ID 29111) Introduces groove welds and explains how to set up welding equipment for making groove welds. Describes how to make groove welds with backing. Provides procedures for making flat, horizontal, vertical, and overhead groove welds.

SMAW – Open-Root Groove Welds – Plate (60 Hours)
(Module ID 29112) Introduces various types of groove welds and describes how to prepare for groove welding. Describes the technique required to produce various open V-groove welds.

Continued on following page
Welding Level 2

**Curriculum Notes**
- 227.5 Hours
- Revised: 2015, Fifth Edition
- Sequenced in accordance with the American Welding Society’s (AWS) S.E.N.S.E school requirements. When combined with NCCER Welding Level 1, the content aligns with the key indicators specified in AWS E62.0:2008 Level 1-Entry Welder.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Welding Symbols (5 Hours)**
(Module ID 29201-15) Identifies and explains the different types of fillet weld, groove weld, and non-destructive examination symbols. Explains how to read welding symbols on drawings, specifications, and Welding Procedure Specifications (WPS).

**Reading Welding Detail Drawings (10 Hours)**
(Module ID 29202-15) Identifies and explains welding detail drawings. Describes lines, fills, object views, and dimensioning on drawings. Explains how to use notes on drawings and the bill of materials. Explains how to sketch and draw basic welding drawings.

**Physical Characteristics and Mechanical Properties of Metals (7.5 Hours)**
(Module ID 29203-15) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

**Preheating and Postheating of Metals (5 Hours)**
(Module ID 29204-15) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

**SMAW – Open-Root Pipe Welds (100 Hours)**
(Module ID 29301-16) Explains how to set up SMAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. Provides procedures for making open-root V-groove welds with SMAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

**GMAW – Pipe (60 Hours)**
(Module ID 29302-16) Explains how to set up GMAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. Provides procedures for making open-root V-groove welds with SMAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

**GTAW – Equipment and Filler Metals (10 Hours)**
(Module ID 29305-16) Explains how to set up and use GTAW and FCAW. Explains how to select and use different filler metals and shielding gases. Describes how to make multipass fillet and V-groove welds on carbon steel plate in various positions.

**GTAW – Carbon Steel Pipe (80 Hours)**
(Module ID 29304-16) Explains how to set up GTAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. Provides procedures for making open-root V-groove welds with GTAW equipment on pipe in the 2G, 5G, and 6G positions.

**GTAW – Low Alloy and Stainless Steel Pipe (70 Hours)**
(Module ID 29305-16) Explains how to set up GTAW equipment for open-root V-groove welds on low-alloy and stainless steel pipe, and explains how to prepare for and make open-root V-groove welds on low-alloy and stainless steel pipe. Provides procedures for making open-root V-groove welds with GTAW equipment on pipe in the 2G, 5G, and 6G positions.
Welding Level 3 (continued)

**SMAW — Stainless Steel Plate and Pipe Groove Welds** (100 Elective Hours)

(Module ID 29306-16) Explains stainless steel metallurgy; how to select SMAW electrodes for stainless steel welds; and how to weld different types of stainless steels. Covers safety issues associated with welding on stainless steels; how to prepare weld coupons; and how to set up SMAW equipment for welding stainless steel. Provides procedures for making open-root V-groove welds with SMAW equipment on stainless steel plate in the 1G, 2G, 3G, and 4G positions. Includes procedures for making open-root V-groove welds with SMAW equipment on stainless steel pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

**PAPERBACK**

**DIGITAL**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**GMAW — Aluminum Pipe** (50 Hours)

**GTAW — Aluminum Plate** (30 Hours)

(Module ID 29402-16) Covers the setup of GTAW equipment for welding aluminum plate. Explains how to clean and prepare aluminum plate coupons for welding, and how to select the aluminum filler metals and shielding gases used in the GTAW process. Explains GTAW techniques used in aluminum welding. Provides GTAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

**GMAW — Aluminum Pipe** (50 Hours)

(Module ID 29403-16) Covers the setup of GTAW equipment for welding aluminum pipe. Explains how to clean and prepare aluminum pipe coupons for welding. Addresses GTAW techniques used to make V-groove and modified U-groove welds on aluminum pipe with and without backing. Provides GTAW procedures on how to make V-groove or modified U-groove welds on aluminum pipe in the 2G, 5G, and 6G positions.

**Soldering and Brazing** (12.5 Hours)

(Module ID 29405-16) Introduces the equipment, techniques, and materials used to safely join copper tubing through both brazing and soldering processes. Covers the required PPE, preparation, and work processes in detail. Also presents procedures for brazing copper to dissimilar materials such as steel.

**GMAW — Aluminum Plate** (30 Hours)

(Module ID 29401-16) Covers the setup of GMAW equipment for welding aluminum plate. Explains aluminum metallurgy and the characteristics of aluminum welding; how to clean and prepare aluminum plate coupons for welding; and problems often encountered in aluminum welds. Explains GMAW techniques used in aluminum welding. Provides GMAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.
Mobile Crane Operations

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (5 Hours)
(Module ID 21101) Provides an overview of the entire course and highlights the duties and responsibilities of a mobile crane operator. Discusses ASME B30.5 and 29 CFR 1926, Subpart CC, as well as crane operator certification.

Basic Principles of Cranes (15 Hours)
(Module ID 21102) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

Rigging Practices (15 Hours)
(Module ID 38102; from Basic Rigger) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

Computer Aids/Operator Aids (20 Hours)
(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

Wire Rope (25 Hours)
(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Mobile Crane Maintenance and Inspections (25 Hours)
(Module ID 21203) Covers the types of inspections typically performed on mobile cranes. Describes service requirements for crane maintenance.

Crane Communications (10 Hours)
(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Safety and Emergency Procedures (25 Hours)
(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

Operating a Crane (25 Hours)
(Module ID 21101) Provides an overview of the entire course and highlights the duties and responsibilities of a mobile crane operator. Discusses ASME B30.5 and 29 CFR 1926, Subpart CC, as well as crane operator certification.

Computer Aids/Operator Aids (20 Hours)
(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

Wire Rope (25 Hours)
(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Mobile Crane Maintenance and Inspections (25 Hours)
(Module ID 21203) Covers the types of inspections typically performed on mobile cranes. Describes service requirements for crane maintenance.

Crane Communications (10 Hours)
(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Safety and Emergency Procedures (25 Hours)
(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

Operating a Crane (25 Hours)
(Module ID 21101) Provides an overview of the entire course and highlights the duties and responsibilities of a mobile crane operator. Discusses ASME B30.5 and 29 CFR 1926, Subpart CC, as well as crane operator certification.

Computer Aids/Operator Aids (20 Hours)
(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

Wire Rope (25 Hours)
(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Mobile Crane Maintenance and Inspections (25 Hours)
(Module ID 21203) Covers the types of inspections typically performed on mobile cranes. Describes service requirements for crane maintenance.

Crane Communications (10 Hours)
(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Safety and Emergency Procedures (25 Hours)
(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

Operating a Crane (25 Hours)
(Module ID 21101) Provides an overview of the entire course and highlights the duties and responsibilities of a mobile crane operator. Discusses ASME B30.5 and 29 CFR 1926, Subpart CC, as well as crane operator certification.

Computer Aids/Operator Aids (20 Hours)
(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

Wire Rope (25 Hours)
(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Mobile Crane Maintenance and Inspections (25 Hours)
(Module ID 21203) Covers the types of inspections typically performed on mobile cranes. Describes service requirements for crane maintenance.

Crane Communications (10 Hours)
(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Safety and Emergency Procedures (25 Hours)
(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

Operating a Crane (25 Hours)

(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Mobile Crane Maintenance and Inspections (25 Hours)
(Module ID 21203) Covers the types of inspections typically performed on mobile cranes. Describes service requirements for crane maintenance.
Mobile Crane Operations Level 3

L3 MOBILE CRANE OPERATIONS

Curriculum Notes
- 145 Hours
- Updated in 2018.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Load Charts** (35 Hours)
(Module ID 21301) Discusses the importance of load charts and charts that apply to different configurations. Includes on-rubber, on-outrigger, jib, and deduction charts, as well as range diagrams and operational notes. Covers parts of line and capacity calculations.

**Lift Planning** (30 Hours)
(Module ID 21304) Discusses lift plan implementation, including reference information, calculations, single- and multiple-crane lifting, critical lifts, and engineering considerations.

**Telescopic Boom Attachment Setup and Assembly** (20 Hours)
(Module ID 21302) Covers the setup and stowing of swing-away extensions and various jibs, as well as the assembly of intermediate boom sections, on telescopic cranes. Includes the description and operating characteristics of manual and power luffing jibs.

**Lattice Boom Assembly and Disassembly** (20 Hours)
(Module ID 21306) Identifies lattice-boom components and provides pre-/post-assembly considerations. Provides step-by-step guidance in the assembly and disassembly of lattice booms.

**Hoisting Personnel** (20 Hours)
(Module ID 21305) Examines ASME B30.23 and 29 CFR 1926.550(g) requirements while presenting advanced operation techniques for hoisting personnel.

**Advanced Operational Techniques** (20 Hours)
(Module ID 21303) Covers multi-crane lifts, critical lifts, blind lifts, and demolition. Includes sections on how to use magnet and vacuum lifting devices and how to operate a mobile crane in cold weather.
Rigger/Signal Person

**Basic Rigger**

The following ISBNs are for ordering individual modules only.

**Rigging Practices (15 Hours)**
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

**Crane Safety and Emergency Procedures (25 Hours)**
(Module ID 21106; from Mobile Crane Operations Level Two) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

**Basic Principles of Cranes (15 Hours)**
(Module ID 21102; from Mobile Crane Operations Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

---

**Intermediate Rigger**

The following ISBNs are for ordering individual modules only.

**Intermediate Rigging (17.5 Hours)**
(Module ID 38201) Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

**Load Dynamics (17.5 Hours)**
(Module ID 21206; from Mobile Crane Operations Level Two) Covers leverage, forward and backward stability, operational quadrants, submerged lifts, non-centered lifts, and other forces that affect stability.

**Wire Rope (25 Hours)**
(Module ID 21204; from Mobile Crane Operations Level Two) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

---

**Crane Communications (10 Hours)**
(Module ID 53101) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

---

**Telescopic Boom Attachment Setup and Assembly (20 Hours)**
(Module ID 21302; from Mobile Crane Operations Level Three) Covers the setup and stowing of swing-away extensions and various jibs, as well as the assembly of intermediate boom sections, on telescopic cranes. Includes the description and operating characteristics of manual and power luffing jibs.

**Lattice Boom Assembly and Disassembly (25 Hours)**
(Module ID 21306; from Mobile Crane Operations Level Three) Identifies lattice-boom components and provides pre/post-assembly considerations. Provides step-by-step guidance in the assembly and disassembly of lattice booms.

---

Continued on following page
### Advanced Rigger

**Curriculum Notes**
- 95 Hours
- Updated in 2018.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK  ISBN**

### Modules
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### Advanced Rigging (20 Hours)
(Module ID 38301) Explains how load weight and center of gravity affect lifting and crane stability. Load calculations for multi-crane lifts are presented, along with the application of equalizer beams. The movement of loads up an inclined plane and the line pull required are examined in detail. The module concludes with guidance in the rigging and handling of rebar bundles.

#### Load Charts (35 Hours)
(Module ID 21301; from Mobile Crane Operations Level One) Discusses the importance of load charts and charts that apply to different configurations. Includes on-rubber, on-outrigger, jib, and deduction charts, as well as range diagrams and operational notes. Covers parts of line and capacity calculations.

#### Lift Planning (20 Hours)
(Module ID 21304; from Mobile Crane Operations Level Three) Discusses lift plan implementation, including reference information, calculations, single- and multiple-crane lifting, critical lifts, and engineering considerations.

#### Hoisting Personnel (20 Hours)
(Module ID 21305; from Mobile Crane Operations Level Three) Examines ASME B30.23 and 29 CFR 1926.550(g) requirements while presenting advanced operation techniques for hoisting personnel.

#### Crane Safety and Emergency Procedures (25 Hours)
(Module ID 21106; from Mobile Crane Operations Level One) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

#### Crane Communications (10 Hours)
(Module ID 53101) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

#### Basic Principles of Cranes (15 Hours)
(Module ID 21102; from Mobile Crane Operations Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

LEVEL 1
CURRICULUM NOTES

- **180 Hours**
- **Includes 75 hours of Core**, which is a prerequisite for Level 1 completion and must be purchased separately.
- For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- **Published: 2010**
- **Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets** are available at www.nccer.org/irc.

**PAPERBACK**
Trainee Guide: $69.99  
ISBN: 978-0-13-213720-1

---

**MODULES**

- **Orientation to the Trade** (5 Hours)  
  (Module ID 48101-10) Provides an overview of the tower crane industry and highlights the duties and responsibilities of a tower crane operator. Discusses ASME and OSHA standards, as well as career opportunities and operator requirements.

- **Basic Principles of Tower Cranes** (20 Hours)  
  (Module ID 48102-10) Identifies the three main types of tower cranes and their components, including operator aids and base support systems. Explains the basic scientific principles associated with tower crane operation. Discusses the factors that affect lifting capacities.

- **Tower Crane Safety** (15 Hours)  
  (Module ID 48103-10) Introduces various safety aspects of tower crane operation, including equipment inspection, rigging, swing paths, and site hazard identification.

- **Rigging Practices** (15 Hours)  
  (Module ID 48104-10) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, lifting beams, and attaching hardware such as shackles, eyebolts, and hooks. Explains sling capacities and sling angles.

- **Load Charts** (15 Hours)  
  (Module ID 48105-10) Explains how to use load charts to calculate safe lifting capacities for self-erecting, luffing boom, and hammerhead tower cranes. Also covers parts of line and counterweight configurations.

- **Communications** (10 Hours)  
  (Module ID 48106-10) Covers the fundamentals of the communication process, including verbal and nonverbal methods of communication. Also presents the ASME B30.3 hand signals, including the appropriate operator action when the signal is given.

- **Operating a Tower Crane** (25 Hours)  
  ISBN 978-0-13-213826-0  
  (Module ID 48107-10) Describes the basic functions of a tower crane, as well as standard procedures for starting up and shutting down self-erecting, luffing boom, and hammerhead tower cranes. Provides an opportunity for trainees to become familiar with the actual operation of a tower crane and the functions of its controls.
**Alternative Energy**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Alternative Energy** (25 Hours)
(Module ID 74101-11) Identifies the need for alternative energy development. Discusses the contributions and potential of individual alternative energy sources. Also covers the present U.S. electrical grid and issues affecting specific alternative energy source tie-in and reliability.

**Biomass and Biofuels** (22.5 Hours)
(Module ID 74102-11) Defines potential sources of biomass and biofuels and discusses their advantages and disadvantages for energy production. Discusses the future of biomass as well as biomass energy applications.

**Nuclear Power** (25 Hours)
(Module ID 74103-11) Describes nuclear power and its sources. Discusses the advantages and disadvantages of nuclear power, the future of nuclear energy, and nuclear power generation.

**Solar Power** (25 Hours)
(Module ID 74104-11) Describes solar photovoltaic (PV) power and how it is harnessed. Identifies the advantages and disadvantages of solar energy. Discusses the past, present, and future of solar energy, as well as solar PV applications.

**Wind Power** (22.5 Hours)
ISBN 978-0-13-272939-0
(Module ID 74105-11) Describes wind power and how it is harnessed. Identifies the advantages and disadvantages of wind energy. Discusses the past, present, and future of wind energy, as well as wind energy applications.

---

**Curriculum Notes**

- *Introduction to the Power Industry* is a prerequisite for completion and must be purchased separately.
  - 132.5 Hours
  - Published: 2011
  - Endorsed by the Florida Energy Workforce Consortium in support of the 17th Career Cluster developed for Energy.

  *Alternative Energy* investigates the viability and value of fossil fuel alternatives, such as biomass/biofuel, nuclear, solar, and wind.

  - The intended audience is secondary and post-secondary programs, as well any programs designed to articulate into a green career track.

  *Introduction to Alternative Energy* (Module ID 74101-11) has been approved for 25 general continuing education hours under GBCI’s Credential Maintenance Program.

  This craft requires additional instructor qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.

**Downloadable instructor resources** that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

Trainee Guide: $69.99

Solar Photovoltaics

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Solar Photovoltaics**

(40 Hours) Trainee S22
(Module ID S7101-11) Covers the basic concepts of PV systems and their components, along with general sizing and electrical/mechanical design requirements. Provides an overview of performance analysis and troubleshooting. Successful completion of this module will help prepare trainees for the North American Board of Certified Energy Practitioners (NABCEP) PV Entry Level Exam.

**Site Assessment**

(10 Hours)
ISBN 978-0-13-266202-4
(Module ID S7102-11) Explains how to determine customer needs, assess site-specific safety hazards, conduct a site survey, and identify a suitable location for the PV array and other system components. Also explains how to acquire and interpret site solar radiation and temperature data.

**System Design**

(25 Hours)
(Module ID S7103-11) Describes system design considerations, including array configurations, component selection, and wire sizing. Covers bonding, grounding, and the selection of overcurrent protection and disconnects.

**System Installation and Inspection**

(60 Hours)
(Module ID S7104-11) Explains how to use the information from the site assessment and system design documents to safely install a photovoltaic array and other system components.

**Maintenance and Troubleshooting**

(10 Hours)
(Module ID S7105-11) Covers basic system performance monitoring and troubleshooting procedures, including record-keeping requirements.

---

**Curriculum Notes**

- 220 Hours
- Includes 75 hours of Core, which is a prerequisite for Level 1 completion and must be purchased separately. For more information, please refer to page 9 of the full Curriculum Catalog or visit www.nccer.org/catalog.
- Published: 2011
- Developed using NABCEP’s PV Task Analysis and aligned with NABCEP’s PV Installer Certification.
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.
- Introduction to Solar Photovoltaics (Module ID S7101-10) has been approved for 40 general continuing education hours under GBCI’s Credential Maintenance Program.
- NCCER is a recognized accrediting body for institutions to become providers of the NABCEP Entry Level Exam.
- This craft requires additional instructor qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.

Sustainable Construction

Sustainable Construction Supervisor

Sustainable Construction Supervisor provides front-line supervisors with sustainable construction management techniques as they relate to targeted construction-phase LEED points for their projects. Topics include project sustainability goals, Green building materials and technologies, Green building methods and processes, and more.

This module has been endorsed and approved by GBCI for 20 general and LEED-specific continuing education hours for credential maintenance.

A related assessment certification exam, developed by NCCER and endorsed by GBCI, is available. For more information, contact NCCER Customer Service at 1-888-622-3720.

This craft requires additional instructor qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.

Your Role in the Green Environment

Provides pertinent information concerning the green environment, construction practices, and building rating systems. Updated to reflect LEED v4.1 with emphasis on standards for building design and construction.

For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.
As energy efficiency is becoming a priority for homeowners across America, many are turning to the weatherization industry to assist in their efforts. NCCER’s Weatherization program offers training that exceeds the existing standards for weatherization technicians, crew chiefs, and building auditors. This program combines existing NCCER curricula with new building science modules that address the specific needs of this industry. Dual credentials are available within this program. Note: Instructors wishing to teach NCCER’s Weatherization program must meet specific qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720.

### Introduction to Weatherization

<table>
<thead>
<tr>

**PAPERBACK**

**TRAINEE GUIDE**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Wood and Masonry Construction Methods** (12.5 Hours)

(Module ID 33102-10; from Electronic Systems Technician Level One) Reviews the materials and techniques used in constructing and finishing residential and commercial buildings, including wood frame, brick and block, and post and beam. Covers common drills, bits, and techniques used to drill through wood and masonry. Also describes types of fasteners used with these materials.

**Thermal & Moisture Protection** (7.5 Hours)

(Module ID 27203-07; from Carpentry Level Two, Fourth Edition) Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

**Carpentry Level Two, Fourth Edition**

(Module ID 27201-07; from Carpentry Level Two, Fourth Edition) Describes how to read and interpret a set of commercial drawings and specifications.

**Insulating Pipes, Ducts, and Water Heaters** (10 Hours)

(Module ID 33101-10) Explains how to insulate water pipes and water heaters, and explains how to make simple duct system repairs, seal air leaks in a duct system, and insulate ducts to reduce heat loss.

**Introduction to Supervisory Skills** (15 Hours)

(Module ID 03109-07; from HVAC Level One, Third Edition) Describes the skills that must be learned for the craftsperon who plans to move into leadership roles. Introduces human resource criteria and concepts for the first time in the series.

**Introduction to Heating** (15 Hours)

(Module ID 03108-07; from HVAC Level One, Third Edition) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

**Chimneys, Vents, and Flues** (5 Hours)

(Module ID 03202-07; from HVAC Level Two, Third Edition) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

**Sealing the Building Envelope** (25 Hours)

(Module ID 59102-10) Describes how to correct heat losses and gains by applying insulating materials to uninsulated areas of the building envelope. Describes how to reduce air infiltration by applying caulks and other materials. Also explains how to patch drywall and install weatherstripping.

**Introduction to Supervisory Skills** (15 Hours)

(Module ID 03109-07; from HVAC Level One, Third Edition) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

**Air Quality Equipment** (5 Hours)

(Module ID 03204-07; from HVAC Level Two, Third Edition) Covers principles, processes, and devices used to control humidity and air cleanliness, as well as devices used to conserve energy in HVAC systems.

**Indoor Air Quality (15 Hours)**

(Module ID 03403-09; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

**Diagnostics and Management Practices** (30 Hours)

(Module ID 59201-10) Explains how to interpret energy audit reports and how to prioritize and schedule air sealing. Describes how to perform the following tests: blower door, pressure pan, burner efficiency, carbon monoxide, draft, and spillage. Also covers lead-safe work practices and how to perform quality inspections on completed work.

Trainee Guide: $99.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Trade Mathematics (10 Hours)
(Module ID 03102-07; from HVAC Level One, Third Edition) Explains how to solve HVAC/R trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

Introduction to Cooling (30 Hours)
(Module ID 03107-07; from HVAC Level One, Third Edition) Explains the fundamental operating concepts of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC/R systems. Also introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Introduces basic control concepts for simple systems.

Introduction to Heating (15 Hours)
(Module ID 03108-07; from HVAC Level One, Third Edition) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

Chimneys, Vents, and Flues (5 Hours)
(Module ID 03202-07; from HVAC Level Two, Third Edition) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

Introduction to Hydronic Systems (10 Hours)
ISBN 978-0-13-266312-0
(Module ID 03203-07; from HVAC Level Two, Third Edition) Introduces hot water heating systems, focusing on safe operation of the low-pressure boilers and piping systems in residential applications.

Heating and Cooling System Design (25 Hours)
(Module ID 03407-09; from HVAC Level Four, Third Edition) Identifies factors that affect heating and cooling loads. Explains the process by which heating and cooling loads are calculated, and how load calculations are used in the selection of heating and cooling equipment. Covers basic types of duct systems and their selection, sizing, and installation requirements.

Energy Conservation Equipment (10 Hours)
(Module ID 03404-09; from HVAC Level Four, Third Edition) Covers heat recovery/reclaim devices, as well as other energy recovery equipment used to reduce energy consumption in HVAC systems.

Indoor Air Quality (15 Hours)
(Module ID 03403-09; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

Alternative Heating and Cooling Systems (10 Hours)
(Module ID 03409-09; from HVAC Level Four, Third Edition) Describes alternative devices used to reduce energy consumption, including wood, coal, and pellet-fired systems, waste-oil heaters, geothermal heat pumps, solar heating, in-floor radiant heating, and direct-fired makeup units. Also introduces application-specific computer room environmental and air turnover systems.

Performing a Building Audit (42.5 hours)
(Module ID 59202-10) Explains how to interview homeowners and educate them about saving energy in their homes. Explains how to inspect and evaluate the building envelope and HVAC systems. Describes how to perform the following tests: blower door, pressure pan, burner efficiency, carbon monoxide, draft, and spillage. Also covers lead-safe work practices, baseload energy use, and the purpose of the forms and reports a building auditor is responsible for completing.
## Wind Energy

**Introduction to Electrical Circuits (7.5 Hours)**
(Module ID 26103-11; from Electrical Level One, Seventh Edition)
Introduces electrical concepts used in Ohm’s law applied to DC series circuits. Covers atomic theory, electromagnetic force, resistance, and electric power equations.

**Electrical Theory (7.5 Hours)**
ISBN 978-0-13-257811-0
(Module ID 26104-11; from Electrical Level One, Seventh Edition)
Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

**Electrical Test Equipment (5 Hours)**
(Module ID 26112-11; from Electrical Level One, Seventh Edition)
Covers proper selection, inspection, and use of common electrical test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment. Also covers safety precautions and meter category ratings.

**Electrical Wiring (10 Hours)**
(Module ID 58104-11)
Describes types and applications of conductors as well as their installation techniques. Also describes the technique and components used for terminating and splicing conductors.

**Climbing Wind Towers (40 Hours)**
(Module ID 58103-11)
Covers all aspects of climbing wind turbine lattice towers and tubular towers. Discusses proper climbing equipment and equipment inspection, environmental hazards, proper climbing techniques, and common wind turbine safe climbing guidelines.

**Wind Turbine Power Distribution Systems (12.5 Hours)**
(Module ID 58107-11)
Discusses the basics of power generation and the generators used in wind turbines. Reviews how power is distributed and controlled during various modes of wind turbine operation. Simple one-line diagrams are also covered.

**Fasteners and Torquing (20 Hours)**
(Module ID 58108-11)
Provides comprehensive coverage of wind turbine fasteners and their required characteristics. Covers torque theory, torquing, tensioning, and hydraulic torquing equipment. Presents the use and care of all significant torquing and tensioning tools. The use of taps and dies is also introduced.

**Introduction to Bearings (15 Hours)**
(Module ID 32207-07; from Industrial Maintenance Mechanic Level Two)
Introduces plain, ball, thrust, guide, flanged, pillow block, and taper bearings. Discusses bearing materials and designations.

**Lubrication (12.5 Hours)**
(Module ID 58109-11)
Explores basic lubrication theory and related equipment. Includes the different applications and types of lubricants used in the wind turbine environment. Reviews OSHA’s hazard communication program and the EPA’s hazardous waste control program. Includes in-depth coverage of material safety data sheets.

**Introduction to Hydraulic Systems (10 Hours)**
(Module ID 58110-11)
Covers all aspects of common hydraulic systems, including fluids, system components, and pumps. Presents the principles of hydraulic system operation and the related components. Simple hydraulic system maintenance is also introduced.

---

Fundamentals of Crew Leadership

The Management Learning Series provides companies with the tools to develop qualified management personnel. From Fundamentals of Crew Leadership to Project Supervision to Project Management, these programs provide an answer to the management shortage crisis impacting companies today and expected to continue for the foreseeable future.

Fundamentals of Crew Leadership

PAPERBACK  ISBN

22.5 Hours
Module ID 46101

• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

While this module has been designed to assist the recently promoted crew leader, it is beneficial for anyone in management. The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Stay Connected:
To Order Call: 1-800-922-0579  www.nccer.org/instructors ©NCCER
Project Management

Interpersonal Skills (12.5 Hours)
(Module ID 44103) Discusses the values and expectations of the workforce, building relationships, and satisfying stakeholders. Describes the principles of effective communication, applying management skills, and using relationship skills to create a leadership environment. Discusses behavioral and non-discriminatory interviewing, and professional development of personnel. Covers issues surrounding disabled workers, sexual harassment, gender and minority discrimination, child labor laws, antitrust laws, and copyright infringement.

Issues and Resolutions (15 Hours)
(Module ID 44104) Describes the key elements of successful negotiations and negotiating techniques. Explains how to recognize nonverbal signals, use negotiating tools, and apply conflict resolution strategies. Identifies symptoms and barriers to solving project-related problems and applying problem-solving techniques, brainstorming, and identifying root cause consequences.

Construction Documents (10 Hours)
(Module ID 44105) Emphasizes the importance of documentation and explains the types of documents, drawings, and specifications used on a project, and the best practices regarding revisions, obsolete drawings, and safeguarding drawing sets. Explains methods of obtaining work in the industry and types of contracts and insurance requirements. Describes the change order process and the documents required to close out a project.

Construction Planning (10 Hours)
(Module ID 44106) Discusses the importance of formal job planning and creating a performance-based work environment. Discusses the Work Breakdown Structure (WBS) as the foundation that identifies deliverables, tasks, and time. Introduces the basics of quality control and defines the roles and responsibilities of an effective team and how to allocate resources.

Estimating and Cost Control (15 Hours)
(Module ID 44107) Emphasizes the importance of accurate estimating and summarizes the estimating process and the steps in developing an estimate, and the difference between parametric estimating and analogous estimating. Defines the purpose of a cost control methodology, explains how to perform simple cost analysis, and covers the project manager’s role in controlling cost and tracking rework cost.

Scheduling (15 Hours)
(Module ID 44108) Explains the basics of scheduling from simple to-do lists through bar charts, network diagrams, and methods of managing resources. Discusses the importance of formal schedules, job planning, and establishing priorities. Describes alternative scheduling methods.

Resource Control (10 Hours)
(Module ID 44109) Identifies resources that must be controlled, factors that affect production control, and production control standards. Explains the project manager's role in the process. Defines production and productivity, and describes how to evaluate and improve production control and productivity.

Quality Control (5 Hours)
(Module ID 44110) Defines quality control and quality assurance, and stresses management’s concerns about quality. Explains project quality management and how to develop an effective quality control plan. Discusses how to identify, assess, and measure weaknesses to avoid rework.

Continuous Improvement (5 Hours)
(Module ID 44111) Describes the project manager’s role in creating a culture of continuous improvement. Explains the fundamentals of a continuous improvement program and how to identify the critical problems and processes that require improvement, implement a continuous improvement process, and measure results. Emphasizes the importance of satisfying internal and external stakeholders.
MODULES

The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Job (5 Hours)
(Module ID MT201-01) Introduces the history of the construction industry and construction organization. Covers the phases of a construction project and the role and duties of the supervisor.

Human Relations and Problem Solving
(20 Hours)
(Module ID MT202-01) Focuses on the communication process and developing effective communication and leadership skills. Compares problem solving to decision making. Discusses potential human relations difficulties and how to resolve them.

Safety (7.5 Hours)
ISBN 978-0-13-103668-0
(Module ID MT203-01) Describes the supervisor’s role in job-site safety, the true cost of accidents, and how to train and involve all employees in job-site safety. Includes OSHA safety inspections.

Quality Control (5 Hours)
(Module ID MT204-01) Defines different types of quality control. Explains how to incorporate quality and safety through effective communication, document control, and inspections.

Contract and Construction Documents (5 Hours)
(Module ID MT205-01) Teaches how to understand and interpret construction drawings, technical specifications, and as-built drawings. Includes different types of bidding, contracts, change orders, closeout documents, and more.

Resource Control and Cost Awareness (15 Hours)
(Module ID MT208-01) Explains how to measure job-site productivity and how to increase it. Discusses resources, materials, tools, equipment, labor, quality, and cost and resource control. Introduces cost awareness and types of reports.

Planning and Scheduling (17.5 Hours)
(Module ID MT207-01) Introduces stages of planning, how to implement a plan, and how to coordinate with other contractors. Includes planning resources, materials, equipment, tools, and labor. Discusses short- and long-term schedules.

Sustainable Construction Supervisor

Sustainable Construction Supervisor has been developed to instruct construction managers on sustainable construction management, the LEED rating system as it would apply to oversight of their projects and crews, and how to supervise and train their subcontractors and crews so that LEED points aren’t unintentionally sacrificed. This module is published in full color and is competency-based. An assessment is also available.
250,000. That’s not just a number needed to fill the jobs created by workers leaving the building and plant construction industry. It’s the number of men and women leaving jobs in shipbuilding, shipyards, ship repair facilities, and offshore rigs – the maritime industry. This industry is facing a skilled workforce crisis due to an aging workforce and dwindling pool of workers from which to draw. In partnership with the NMEC (National Maritime Education Council), NCCER has developed the first ever standardized and nationally recognized Maritime curricula. This program includes training material in Maritime ‘Core’ and Pipefitter, and Structural Fitter, and will soon be followed by assessments to certify journey-level skills.

Introduction to the Maritime Industry

12.5 Hours
Published: 2013
Module ID 84101-13

PAPERBACK ISBN

- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

Introduces the facilities, methods, and processes used in the shipbuilding and repair industry. Describes the impact the industry has on the U.S. economy and explores the various craft opportunities available to workers. Provides an overview of the safety practices specific to the industry.

Curriculum Notes

- 97.5 Hours
- Published: 2013
- The Trainee Guide is shrinkwrapped with Core and the Introduction to the Maritime Industry module.
- Either 2009 or 2015 Core can be used for the Maritime Industry Fundamentals package.
- These hours are a prerequisite for Level One completion of the Maritime programs.
- Basic Rigging (Module ID 00106-09) or Introduction to Basic Rigging (Module ID 00106) is required to complete Maritime Industry Fundamentals.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN
Trainee Guide 978-0-13-456850-8
Maritime Aluminum Welding

Joint Fit-up and Alignment (5 hours)
(Module ID 29110) Describes job code specifications. Explains how to use fit-up gauges and measuring devices to check fit-up and alignment and use plate and pipe fit-up and alignment tools to properly prepare joints. Explains how to check for joint misalignment and poor fit.

Welding Symbols (5 hours)
(Module ID 29201) Identifies and explains the different types of fillet weld, groove weld, and non-destructive examination symbols. Explains how to read welding symbols on drawings, specifications and Welding Procedure Specifications (WPS).

Reading Welding Detail Drawings (10 hours)
(Module ID 29202) Identifies and explains welding detail drawings. Describes lines, fills, object views, and dimensioning on drawings. Explains how to use notes on drawings and the bill of materials. Explains how to sketch and draw basic welding drawings.

Physical Characteristics/Mechanical Properties of Metal (7.5 hours)
(Module ID 29203) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

Preheating and Postheating of Metals (5 hours)
(Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

GMAW & FCAW - Equipment and Filler Metals (10 hours)
(Module ID 29205) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

GTAW - Equipment and Filler Metals (10 hours)
(Module ID 29207) Explains GTAW safety. Identifies and explains the use of GTAW equipment, filler metals, and shielding gases. Covers the setup of GTAW equipment.

GMAW - Aluminum Plate (30 hours)
(Module ID 29401) Covers the setup of GMAW equipment for welding aluminum plate. Explains aluminum metallurgy and the characteristics of aluminum welding; how to clean and prepare aluminum plate coupons for welding; and problems often encountered in aluminum welds. Explains GMAW techniques used in aluminum welding. Provides GMAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

GTAW - Aluminum Plate (30 hours)
(Module ID 29402) Covers the setup of GTAW equipment for welding aluminum plate. Explains how to clean and prepare aluminum plate coupons for welding, and how to select the aluminum filler metals and shielding gases used in the GTAW process. Explains GTAW techniques used in aluminum welding. Provides GTAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

GMAW - Aluminum Pipe (50 hours)
(Module ID 29403) Covers the setup of GMAW equipment for welding aluminum pipe. Explains how to clean and prepare aluminum pipe coupons for welding. Addresses GTAW techniques used to make V-groove and modified U-groove welds on aluminum pipe with and without backing. Provides GTAW procedures on how to make V-groove or modified U-groove welds on aluminum pipe in the 2G, 3G, and 4G positions.

GMAW - Aluminum Pipe (50 hours)
(Module ID 29404) Covers the setup of GMAW equipment for welding aluminum pipe. Addresses GMAW techniques used to make V-groove welds on aluminum pipe with and without backing. Explains how to clean and prepare aluminum pipe coupons for welding. Provides GMAW procedures on how to make V-groove welds on aluminum pipe in the 2G, 3G, and 4G positions.

**Orientation to the Electrical Trade (2.5 Hours)**
(Module ID 26101-17) Provides an overview of the electrical trade and discusses the career paths available to electricians.

**Electrical Safety (10 Hours)**
(Module ID 26102-17) Covers safety rules and regulations for electricians. Teaches the necessary precautions to take for various electrical hazards found on the job. Also covers the OSHA-mandated lockout/tagout procedure.

**Electrical Theory (7.5 Hours)**
(Module ID 26104-17) Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

**Introduction to Electrical Circuits (7.5 Hours)**
(Module ID 26103-17) Offers a general introduction to the electrical concepts used in Ohm’s law applied to DC circuits. Includes atomic theory, electromotive force, resistance, and electric power equations.

**Basic Electrical Construction Drawings (7.5 Hours)**
(Module ID 26110-17) Focuses on electrical prints, drawings, and symbols. Teaches the types of information that can be found on schematics, one-lines, and wiring diagrams.

**Alternating Current (17.5 Hours)**
(Module ID 26201-17) Focuses on forces that are characteristic of alternating-current systems and the application of Ohm’s law to AC circuits.

**Grounding and Bonding (15 Hours)**
(Module ID 26209-17) Focuses on the purpose of grounding and bonding electrical systems. Thoroughly covers NEC® requirements.

**Conductors and Cables (10 Hours)**
(Module ID 26109-17) Focuses on the types and applications of conductors and covers proper wiring techniques. Stresses the appropriate NEC® requirements.

**Conductor Terminations and Splices (7.5 Hours)**
(Module ID 26206-17) Covers the transportation, storage, and setup of cable reels; methods of rigging; and procedures for complete cable pulls in raceways and cable trays.

**Conductor Installations (10 Hours)**
(Module ID 26205-17) Driven by the NEC®. Explains how to select and size pull boxes, junction boxes, and handle boxes.

**Electric Lighting (15 Hours)**
(Module ID 26203-17) Introduces the basic principles of human vision and the characteristics of light. Focuses on the handling and installation of various types of lamps and lighting fixtures.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Rigging Practices** (15 Hours)
(Module ID 38102) Presents basic rigging, which refers to the preparation of a load for movement, as well as the preparation of hardware and other components used to connect the load to the crane. Rigging must be completed safely and effectively, resulting in a reliable connection to the load. An understanding of rigging fundamentals is essential to safely operate cranes and move/position heavy equipment, components, and structures.

**Distribution Equipment** (12.5 Hours)
(Module ID 26306-17) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. This module also includes electrical drawings of distribution equipment.

**Motors: Theory and Application** (20 Hours)
(Module ID 26202-17) Covers AC and DC motors, including the main components, circuits, and connections.

**Motor Controls** (12.5 Hours)
(Module ID 26311-17) Provides information on selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

**Transformers** (12.5 Hours)
ISBN 978-0-13-480527-6
(Module ID 26307-17) Discusses transformer types, construction, connections, protection, and grounding.

**Specialty Transformers** (10 Hours)
(Module ID 26406-17) Covers various types of transformers and their applications. Also provides information on selecting, sizing, and installing these devices.

**Hazardous Locations** (15 Hours)
(Module ID 26304-17) Covers the NEC® requirements for equipment installed in various hazardous locations.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Control Systems and Fundamental Concepts** (12.5 Hours)
(Module ID 26211-17) Gives basic descriptions of various types of contactors and relays along with their practical applications.

**Advanced Controls** (20 Hours)
(Module ID 26407-17) Discusses applications and operating principles of solid-state controls, reduced-voltage starters, and adjustable frequency drives. Also covers basic troubleshooting procedures.

**Basic Electronic Theory** (10 Hours)
(Module ID 26404-17) Explains the function and operation of basic electronic devices, including semiconductors, diodes, rectifiers, and transistors.

**Fire Alarm Systems** (15 Hours)
ISBN 978-0-13-480547-4
(Module ID 26405-17) Covers fire alarm control units, Digital Alarm Communicator Systems (DACS), wiring for alarm initiating and notification devices, and alarm system maintenance.

**Standby and Emergency Systems** (10 Hours)
(Module ID 26402-17) Explains the NEC® requirements for electric generators and storage batteries.

**Fundamentals of Crew Leadership** (22.5 Hours)
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Job-site safety and the crew leader’s role in safety are also discussed. Explains details and procedures for project planning, scheduling, and estimating.
Maritime Pipefitting

L1 MARITIME PIPEFITTING

Orientation to the Maritime Pipefitting Trade
(5 Hours)
(Module ID 85101-13) Provides an overview of the maritime pipefitting trade and its career opportunities. Trade safety principles are introduced, as well as the responsibilities and characteristics of a good pipefitter.

Maritime Pipefitting Trade Math
(15 Hours)
ISBN 978-0-13-340591-0
(Module ID 85102-13) Explains how to solve a wide variety of maritime pipefitting math problems, including those related to common geometrical figures. The process of determining lengths in pipe offsets for general and rolling offsets is also presented.

Pipefitting Hand Tools
(20 Hours)
(Module ID 85103-13) Covers hand tool safety, as well as procedures for selecting, inspecting, using, and maintaining pipefitting hand tools. Includes pipe wrenches, pipe stands, pipe vises, levels, and pipe fabrication tools and aids.

Butt Weld Pipe Fabrication
(37.5 Hours)
(Module ID 85202-13) Describes the pipe fittings used for maritime butt welded piping systems and how to determine the lengths of pipe between points of connection. Explains how to prepare and fit both pipe and fittings, and how to select backing rings when required.

Socket Weld Pipe Fabrication
(25 Hours)
(Module ID 85203-13) Describes the pipe fittings used for maritime socket welded piping systems and how to determine the lengths of pipe between points of connection. Explains how to prepare and fit both pipe and fittings.

Brazing
(12.5 Hours)
(Module ID 85204-13) Describes the procedures for preparing various types of pipe and tubing for brazing, as well as the brazing process. Discusses the selection of brazing filler metals for various applications.

Threaded Pipe Fabrication
(15 Hours)
(Module ID 85205-13) Describes the pipe fittings used for maritime threaded piping systems and how to determine the lengths of pipe between points of connection. Explains how to prepare and fit both pipe and fittings, and how to assemble threaded pipe components.

Pipefitting Power Tools
(15 Hours)
(Module ID 85104-13) Covers power tool safety and procedures for selecting, inspecting, using, and maintaining power tools that are common in the maritime environment. Procedures for threading pipe are provided in a step-by-step format. Guidelines for both electrical and pneumatic tools are provided.

Oxyfuel Cutting
(17.5 Hours)
(Module ID 85105-13) Describes the procedures and safety requirements related to oxyfuel cutting. Detailed instructions for setting up, lighting, and using oxyfuel cutting torches is provided. Common techniques, such as straight line cutting, beveling, washing, and gouging are reviewed. Oxyfuel gas supply arrangements from both cylinders and manifolds are also presented.

Ladders and Scaffolds
(12.5 Hours)
(Module ID 85106-13) Explains how to identify various types of ladder and scaffold systems and describes their safe use. The pre-use inspection requirements for both ladders and scaffolds are presented.

Quad Weld Pipe Fabrication
(25 Hours)
(Module ID 85206-13) Introduces various types of fiberglass and plastic pipe and their maritime applications. Explains how fiberglass and plastic piping materials are measured, cut, and joined.

Identifying Valves, Flanges, and Gaskets
(20 Hours)
ISBN 978-0-13-340603-0
(Module ID 85207-13) Describes and identifies various types of valves, flanges, and gaskets used in the maritime environment. Factors related to valve selection as well as their storage, handling, and installation are presented. The various flange styles and related gasket materials are described, as well as their common installation procedures.

Drawings and Detail Sheets
(20 Hours)
(Module ID 85208-13) Identifies the types and parts of drawings commonly used by maritime pipefitters. Explains how to interpret the information contained in pipe drawings to create the desired piping system.

Quad Brazing
(17.5 Hours)
ISBN 978-0-13-340605-4
(Module ID 85209-13) Identifies the types and parts of drawings commonly used by maritime pipefitters. Explains how to interpret the information contained in pipe drawings to create the desired piping system.

Pipefitting Hand Tools
(20 Hours)
(Module ID 85103-13) Covers hand tool safety, as well as procedures for selecting, inspecting, using, and maintaining pipefitting hand tools. Includes pipe wrenches, pipe stands, pipe vises, levels, and pipe fabrication tools and aids.

Pipefitting Power Tools
(15 Hours)
(Module ID 85104-13) Covers power tool safety and procedures for selecting, inspecting, using, and maintaining power tools that are common in the maritime environment. Procedures for threading pipe are provided in a step-by-step format. Guidelines for both electrical and pneumatic tools are provided.

Oxyfuel Cutting
(17.5 Hours)
(Module ID 85105-13) Describes the procedures and safety requirements related to oxyfuel cutting. Detailed instructions for setting up, lighting, and using oxyfuel cutting torches is provided. Common techniques, such as straight line cutting, beveling, washing, and gouging are reviewed. Oxyfuel gas supply arrangements from both cylinders and manifolds are also presented.

Ladders and Scaffolds
(12.5 Hours)
(Module ID 85106-13) Explains how to identify various types of ladder and scaffold systems and describes their safe use. The pre-use inspection requirements for both ladders and scaffolds are presented.

Quad Weld Pipe Fabrication
(25 Hours)
(Module ID 85206-13) Introduces various types of fiberglass and plastic pipe and their maritime applications. Explains how fiberglass and plastic piping materials are measured, cut, and joined.

Identifying Valves, Flanges, and Gaskets
(20 Hours)
ISBN 978-0-13-340603-0
(Module ID 85207-13) Describes and identifies various types of valves, flanges, and gaskets used in the maritime environment. Factors related to valve selection as well as their storage, handling, and installation are presented. The various flange styles and related gasket materials are described, as well as their common installation procedures.

Drawings and Detail Sheets
(20 Hours)
(Module ID 85208-13) Identifies the types and parts of drawings commonly used by maritime pipefitters. Explains how to interpret the information contained in pipe drawings to create the desired piping system.

Pipefitting Hand Tools
(20 Hours)
(Module ID 85103-13) Covers hand tool safety, as well as procedures for selecting, inspecting, using, and maintaining pipefitting hand tools. Includes pipe wrenches, pipe stands, pipe vises, levels, and pipe fabrication tools and aids.

Pipefitting Power Tools
(15 Hours)
(Module ID 85104-13) Covers power tool safety and procedures for selecting, inspecting, using, and maintaining power tools that are common in the maritime environment. Procedures for threading pipe are provided in a step-by-step format. Guidelines for both electrical and pneumatic tools are provided.

Oxyfuel Cutting
(17.5 Hours)
(Module ID 85105-13) Describes the procedures and safety requirements related to oxyfuel cutting. Detailed instructions for setting up, lighting, and using oxyfuel cutting torches is provided. Common techniques, such as straight line cutting, beveling, washing, and gouging are reviewed. Oxyfuel gas supply arrangements from both cylinders and manifolds are also presented.

Ladders and Scaffolds
(12.5 Hours)
(Module ID 85106-13) Explains how to identify various types of ladder and scaffold systems and describes their safe use. The pre-use inspection requirements for both ladders and scaffolds are presented.
Maritime Structural Fitter

### L1 MARITIME STRUCTURAL FITTER

**LEVEL 1**

**Maritime Structural Fitter**

**Curriculum Notes**

- 237.5 Hours
- *Includes 97.5 hours of Maritime Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2014
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

- **Trainee Guide:** $69.99
- **ISBN:** 978-0-13-294864-7

**Modules**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Welding Safety** (2.5 Hours) ISBN 978-0-13-610524-8
  - (Module ID 29101-09; from Welding Level One, Fourth Edition)
  - Covers safety equipment, protective clothing, and procedures applicable to the cutting and welding of metals.

- **Oxyfuel Cutting** (17.5 Hours) ISBN 978-0-13-610528-2
  - (Module ID 29102-09; from Welding Level One, Fourth Edition)
  - Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

- **Base Metal Preparation** (12.5 Hours) ISBN 978-0-13-610531-2
  - (Module ID 29105-09; from Welding Level One, Fourth Edition)
  - Describes how to clean and prepare all types of base metals for cutting or welding. Identifies and explains joint design and base metal preparation for all welding tasks.

  - (Module ID 29106-09; from Welding Level One, Fourth Edition)
  - Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

- **Shielded Metal Arc Welding — Electrodes** (2.5 Hours) ISBN 978-0-13-610534-3
  - (Module ID 29108-09; from Welding Level One, Fourth Edition)
  - Describes electrode characteristics and different types of filler metals. Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Explains proper storage and control of filler metals and identifies the use of codes.

- **Intermediate Fitting** (30 Hours) ISBN 978-0-13-610535-0
  - (Module ID 29109-09; from Welding Level One, Fourth Edition)
  - Introduces fitting aids used to fit up and align plate joints. Incorporates hands-on tasks through which the beginning fitter will learn how to perform basic layout, alignment, and fit-up tasks.

- **Tack Welding** (5 Hours) ISBN 978-0-13-610536-7
  - (Module ID 29101-14)
  - Describes how to set up welding equipment, strike an arc, and make tack welds in order to maintain proper alignment of parts in anticipation of finish welding. Covers the machines, tools, and techniques used to make tack welds in various positions.

- **Fire Watch** (5 Hours) ISBN 978-0-13-610537-4
  - (Module ID 29107-14)
  - Prepares a worker to perform fire watch duties in support of welding and flame cutting activities. Describes the classes of fires and the methods used to extinguish them, as well as the responsibilities of a person assigned as a fire watch.

  - (Module ID 29102-14)
  - Introduces layout tools, fitting tools, and fitting aids used to fit up and align plate joints. Incorporates hands-on tasks through which the beginning fitter will learn how to perform basic layout, alignment, and fit-up tasks.

- (Module ID 86202-14)
  - Covers interpretation of fabrication and installation drawings, sketching of isometric and orthographic drawings, and interpretation of welding symbols.

- **Fitting Two** (140 Hours) ISBN 978-0-13-378729-0
  - (Module ID 86203-14)
  - Explains selection and application of gaskets and packings, fit-up tasks, and inspection of finished work. Also covers structural accessories, proper measurement techniques, and creating a materials list.

Maritime Structural Fitter Level 3

**L3 • MARITIME STRUCTURAL FITTER • LEVEL 3**

**Curriculum Notes**
- 237.5 Hours
- Published: 2016
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**
Trainee Guide: $99.99  
978-0-13-375044-7

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Advanced Structural Print Reading** (40 Hours)  
ISBN 978-0-13-414487-0  
(Module ID 86301-15) Focuses on learning to interpret ship construction drawings, ranging from the highest level general arrangement drawing to the lowest level piece-part drawing. Includes a set of drawings.

**Fitting Three** (80 Hours)  
(Module ID 86302-15) Provides an overview of the ship construction process, from the lowest subassembly to the erection of the vessel itself. Illustrates laying out the locations of equipment and structural members, installing the equipment and structural members, and the use of leveling and alignment equipment.

**GMAW and FCAW – Equipment and Filler Metals** (10 Hours)  
(Module ID 29205-09; from Welding Level Two, Fourth Edition) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

**GMAW and FCAW – Plate** (80 Hours)  
ISBN 978-0-13-214487-0  
(Module ID 29206-09; from Welding Level Two, Fourth Edition) Explains how to set up and use FCAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

**Physical Characteristics and Mechanical Properties of Metals** (7.5 Hours)  
(Module ID 29203-09; from Welding Level Two, Fourth Edition) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

**Fundamentals of Crew Leadership** (20 Hours)  
ISBN 978-0-13-414493-1  
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
Curriculum Notes

- 272.5 Hours

- Published: 2019
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
ISBN
Trainee Guide: $69.99
978-0-13-560371-0

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Welding Safety (5 Hours)
(Module ID 29101)
Covers safety equipment, protective clothing, and procedures applicable to the cutting and welding of metals.

Reading Welding Detail Drawings (10 Hours)
(Module ID 29202)
Identifies and explains welding detail drawings. Describes lines, fills, object views, and dimensioning on drawings. Explains how to use notes on drawings and the bill of materials. Explains how to sketch and draw basic welding drawings.

SMAW - Groove Welds with Backing (50 Hours)
(Module ID 29111)
Introduces groove welds and explains how to set up welding equipment for making grove welds. Describes how to make groove welds with backing. Provides procedures for making flat, horizontal, vertical, and overhead groove welds.

SMAW - Open-Root Groove Welds (60 Hours)
(Module ID 29112)
Introduces various types of groove welds and describes how to prepare for groove welding. Describes the techniques required to produce various open V-groove welds.

GMAW & FCAW - Equipment and Filler Metals (10 Hours)
(Module ID 29205)
Describes general safety procedures for GMAW and FCAW. Explains GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

Maritime Welding

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102)
Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, beads, washing, and gouging.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103)
Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Air Carbon Arc Cutting and Gouging (10 Hours)
(Module ID 29104)
Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc washing and gouging activities.

Base Metal Preparation (12.5 Hours)
(Module ID 29105)
Describes how to clean and prepare all types of base metals for cutting or welding. Identifies and explains joint design and base metal preparation for all welding tasks.

Weld Quality (10 Hours)
(Module ID 29106)
Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

SMAW - Equipment and Setup (5 Hours)
(Module ID 29107)
Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

SMAW Electrodes (2.5 Hours)
(Module ID 29108)
Describes electrode characteristics and different types of filler metals. Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Explains proper storage and control of filler metals and identifies the use of codes.

SMAW - Beads and Fillet Welds (100 Hours)
ISBN 978-0-13-418025-0
(Module ID 29109)
Describes the preparation and setup of arc welding equipment and the process of striking an arc. Explains how to detect and correct arc blow. Describes how to make stringer, weave, overlapping beads, and fillet welds.

Joint Fit-up and Alignment (5 Hours)
(Module ID 29110)
Describes job code specifications. Explains how to use fit-up gauges and measuring devices to check fit-up and alignment and use plate and pipe fit-up and alignment tools to properly prepare joints. Explains how to check for joint misalignment and poor fit.

Maritime Welding Level 2 (continued)

**Physical Characteristics/Mechanical Properties of Metal (7.5 Hours)**
(Module ID 29203) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQR). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

**Preheating and Postheating of Metals (5 Hours)**
(Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **SMAW - Open-Root Pipe Welds (100 Hours)**
  (Module ID 29301) This module explains how to set up SMAW equipment for open-root V-groove welds, and how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with SMAW equipment in the 1G-ROTATED, 2G, 5G, and 6G positions.

- **GMAW - Pipe (60 Hours)**
  (Module ID 29302) This module explains how to set up GMAW equipment for open-root V-groove welds, and how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with GMAW equipment in the 1G-ROTATED, 2G, 5G, and 6G positions.

- **FCAW - Pipe (60 Hours)**
  (Module ID 29303) This module explains how to set up FCAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with FCAW equipment in the 1G-ROTATED, 2G, 5G, and 6G positions.

- **GTAW - Carbon Steel Pipe (80 Hours)**
  (Module ID 29304) This module explains how to set up GTAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with GTAW equipment in the 1G-ROTATED, 2G, 5G, and 6G positions.

- **GMAW - Stainless Steel Plate and Pipe Groove Welds (100 Hours)**
  (Module ID 29306) This module explains how to set up SMAW equipment on stainless steel plate in the 1G, 2G, 3G, and 4G positions, and procedures for making open-root V-groove welds with SMAW equipment in the 1G-ROTATED, 2G, 5G, and 6G positions.

- **GTAW - Low Alloy and Stainless Steel Pipe (70 Hours)**
  (Module ID 29305) This module explains how to set up GTAW equipment for open-root V-groove welds on low-alloy and stainless steel pipe, and how to prepare for and make open-root V-groove welds on low-alloy and stainless steel pipe. It provides procedures for making open-root V-groove welds with GTAW equipment in the 2G, 5G, and 6G positions.

- **SMAW - Stainless Steel Plate and Pipe Groove Welds (100 Hours)**
  (Module ID 29306) This module explains how to set up SMAW equipment on stainless steel plate in the 1G, 2G, 3G, and 4G positions, and procedures for making open-root V-groove welds with SMAW equipment in the 1G-ROTATED, 2G, 5G, and 6G positions.

- **Preheating and Postheating of Metals (5 Hours)**
  (Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.
**Introduction to the Pipeline Industry**

**Introduction to the Pipeline Industry (15 Hours)**
(Module ID 66101-02) Introduces the pipeline industry, including pipeline products and flow paths, maps and drawings used in the industry, and basic pipeline operations. Also covers hydraulics, pipeline equipment, electrical power systems, and corrosion control. Regulations, documentation, and pipeline industry occupations are also described.

**Tools of the Trade (7.5 Hours)**
(Module ID 62104-02) Explains use and care of hand and power tools used in the pipeline industry. Describes the use of welding equipment and meters and testers. Also discusses nondestructive testing and the use of hydraulic cranes and heavy excavating equipment.

**Pipeline Documentation (5 Hours)**
ISBN 978-0-13-415138-0  
(Module ID 62105-02) Identifies alignment sheets used in the pipeline industry including maps, P&IDs, and electrical drawings. Also describes the types of documentation and document management required in the industry.

**Basic Pipeline Pneumatics and Equipment (10 Hours)**
(Module ID 67102-02) Introduces the basics of pneumatic equipment. Topics include pneumatic safety and the physical characteristics of gas. A discussion of compressors, valves, meters, and other pipeline equipment and an overview on pipeline design are also included.

**Basic Pipeline Hydraulics and Equipment (10 Hours)**
(Module ID 60102-02) Explains pipeline hydraulics safety, basic principles of hydraulic systems, hydraulic properties of petroleum products, pipeline design factors, and basic pipeline equipment.

**Pipeline Communications (7.5 Hours)**
(Module ID 60103-02) Introduces channels of communications that must exist in pipeline operations, including internal communications with scheduling, operations, and maintenance; and external communications with contractors, the general public, regulatory agencies, and local, state, and federal government.

**Pipeline Operations (40 Hours)**
(Module ID 64106-02) Describes pipeline system hydraulics and ASME ratings and standards. Discusses station control systems and recognizing and responding to AOCs. Also covers pigging operations and proving process meters.

**Release Identification and Response (5 Hours)**
(Module ID 62103-02) Describes company environmental manuals and the DNR and EPA regulations. Explains the NRC and Coast Guard responsibilities and spill prevention. Covers soil contamination, release reporting and containment, hydrostatic testing, flaring/venting, and trash handling.

---

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.
Abnormal Operating Conditions

Abnormal Operating Conditions Field and Gas

5 Hours
Revised: 2017, Third Edition
Module ID AOCFG-17

Trainee
ISBN 978-0-13-472784-4
Print: $24.99
Digital also available through VitalSource:
• For information on how to order through VitalSource, visit www.nccer.org/pipeline-program.

Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Abnormal Operating Conditions Control Center

5 Hours
Revised: 2017, Third Edition
Module ID AOCCC-17

Trainee
ISBN 978-0-13-472782-0
Print: $24.99
Digital also available through VitalSource:
• For information on how to order through VitalSource, visit www.nccer.org/pipeline-program.

Introduces the abnormal operating conditions that can occur on a pipeline or in a pipeline facility. Explains how to recognize and react to abnormal operating conditions from the control center and the necessary documentation and notifications that must be completed when responding to these conditions.
Pipeline Electrical and Instrumentation

**L1 PIPELINE ELECTRICAL AND INSTRUMENTATION**

**LEVEL 1**

*Volume 1: 272.5 Hours*

*Volume 2: 240 Hours*

*Revised: 2017, Third Edition*

*Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.*

**PAPERBACK ISBN**

**VOLUME 1**

- Trainee Guide: $104.99
  
- Trainee Guide: $104.99

**VOLUME 2**

- Trainee Guide: $104.99

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### VOLUME 1

**Pipeline E&I Safety (15 Hours)**
(Module ID 64102-02) Describes the types and uses of personal protective equipment and covers hazard communications. Covers lockout/tagout and MSDS requirements; safety rules, regulations, and tools; and worksite hazards.

**Trade Math (40 Hours)**
(Module ID 64103-02) Presents instrumentation formulas and equations. Explains how to calculate load and ampacity, and perform pipeline-specific E&I calculations. Also provides a description of conductors.

**Electrical Theory (40 Hours)**
(Module ID 64104-02) Introduces the electrical concepts used in Ohm’s law as applied to DC series circuits. Discusses atomic theory, electromotive force, resistance, and electric power equations. Also introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

**Tools of the Trade (15 Hours)**
(Module ID 64105-02) Identifies hand tools used in the pipeline E&I trade. Also explains trade-specific power tools, test equipment, and communication equipment.

### VOLUME 2

**Pipeline E&I Drawings (30 Hours)**
(Module ID 64107-02) Identifies drawing classifications and written specifications. Describes the uses of electrical drawings and piping and instrumentation drawings. Also covers special drawings and documentation as well as pipeline maps and alignment sheets.

**Understanding the National Electrical Code® (7.5 Hours)**
(Module ID 64108-02) Provides a map for using the NEC®. Introduces the layout and the types of information found within the code book. Presents an easy-to-follow procedure for finding information in the NEC®.

**Fasteners and Anchors (7.5 Hours)**
(Module ID 64109-02) Introduces hardware and systems used to mount and support boxes, receptacles, and other electrical components. Covers types of anchors and supports, their applications, and their safe installation.

**Electrical Installations in Classified Areas (40 Hours)**
(Module ID 64201-02) Explains the NEC®, electrical code requirements, NEC® requirements, equipment grounding, and how to bond service equipment. Includes discussion of effective grounding methods, grounding at more than one building, and systems over 1,000 volts. Describes how to test grounding and measure earth resistance, three-point testing, and explosion-proof enclosures. Explains safe work practices in classified areas, including barriers, PPE, monitoring requirements, and gas detectors.

**Use of Meters and Test Equipment (15 Hours)**
(Module ID 64202-02) Explains general, personal, and test equipment for E&I safety. Covers measuring current, voltage, and resistance and the types of meters used. Includes specialty instruments such as calibrators, simulators, and gauges. Includes sections on oscilloscope operation, waveform characteristics, and measurement techniques.

**Grounding (30 Hours)**
(Module ID 64203-02) Explains grounding basics, system types, NEC® requirements, equipment grounding, and how to bond service equipment. Includes discussion of effective grounding paths, conductors, separately derived systems, grounding at more than one building, and systems over 1,000 volts. Describes how to test grounding and measure earth resistance, three-point testing, and tank grounding.

**Process Control Theory (40 Hours)**
(Module ID 64204-02) Explains process characteristics and control systems. Describes control loop components and control loops and modes. Discusses types of control applications, including temperature, pressure, flow, and level control.

**Supervisory Control Systems (15 Hours)**
(Module ID 64205-02) Explains supervisory control systems. PLCs, HMIs, and RTUs. Describes data highways and protocols, including data transfer methods, and SCADA-related communications, including transfer media, wireless radios, and Ethernet, and transmission and interface methods.

**Transformers (25 Hours)**
(Module ID 64301-02) Describes power systems and explains transformer construction, taps, installation requirements, and connections. Describes power distribution, instruments, control, and isolation transformer types. Also covers transformer maintenance and testing.

**Switchgear and MCCs (25 Hours)**
(Module ID 64302-02) Explains power factor and medium versus low-voltage cable and MCCs. Discusses types of switchgear and cables, feeders, busbars, and bracing. Includes testing and maintenance on switchgear and MCCs and associated components.

**Low-Voltage and Standby Power (25 Hours)**
(Module ID 64303-02) Explains pipeline system standby generators, batteries, chargers, inverters, converters, and rotary and static UPSs. Also addresses the maintenance and testing of each.

**Prime Movers (22.5 Hours)**
(Module ID 64304-02) Describes power quality and types of defects, power systems, protection, and conditioning equipment. Discusses types of electrical noise and related problems, and possible solutions. Describes static electricity and its effect, system verification testing, and equipment maintenance.

**Facility Auxiliary Systems (22.5 Hours)**
(Module ID 64306-02) Involves information on pipeline facility buildings and related systems, including fire, security, vapor recovery, injection, water treatment, cathodic protection, and blending systems.

**SCADA (30 Hours)**
ISBN 978-0-13-103147-0
(Module ID 64307-02) Explains pipeline operations systems, including control, communications, SCADA, and PLCs. Explains redundant systems and control system troubleshooting.

**PAPERBACK**

Trainee Guide: $104.99

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Abnormal Operating Conditions - Field and Gas**

- Field and Gas (5 Hours)
  - (Module ID AOCFG-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Describes appropriate responses to AOCs and the necessary documentation and notifications that must be completed when responding to these conditions.

**Inspect, Test, and Calibrate Pressure Switches**

- Pressure Switches (7.5 Hours)
  - (Module ID CT25_1-17)

**Inspect, Test and Calibrate Pressure Transmitters**

- Pressure Transmitters (7.5 Hours)
  - (Module ID CT25_2-17)

**Verify or Set Protection Parameters for Programmable Controllers and/or Other Instrumentation Control Loops**

- Programmable Controllers (15 Hours)
  - (Module ID CT26_0-17)

**Test Overfill Protective Devices**

- Overfill Protective Devices (5 Hours)
  - (Module ID CT30_0-17)

**Inspect and Calibrate Overfill Protective Devices**

- Overfill Protective Devices (7.5 Hours)
  - (Module ID CT31_0-17)

**Inspect, Test, and Maintain Flow Computer for Hazardous Liquid Leak Detection**

- Flow Computer (7.5 Hours)
  - (Module ID CT44_3-17)

**Inspect, Testing, and Perform Corrective and Preventative Maintenance of Tank Gauging for Hazardous Liquid Leak Detection**

- Tank Gauging (7.5 Hours)
  - (Module ID CT44_4-17)

**Prove Flow Meters for Hazardous Liquid Leak Detection**

- Flow Meters (5 Hours)
  - (Module ID CT44_5-17)

**Maintain Flow Meters for Hazardous Liquid Leak Detection**

- Flow Meters (7.5 Hours)
  - (Module ID CT44_6-17)

**Inspect, Test and Maintain Gravitometers/Densitometers for Hazardous Liquid Leak Detection**

- Gravitometers/Densitometers (7.5 Hours)
  - (Module ID CT44_7-17)

**Inspect, Test and Maintain Temperature Transmitters for Hazardous Liquid Leak Detection**

- Temperature Transmitters (7.5 Hours)
  - (Module ID CT44_8-17)

**Maintain Fixed Gas Detection Equipment**

- Gas Detection Equipment (25 Hours)
  - (Module ID CT55_0-17)
Pipeline Maintenance and Mechanical

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**VOLUME 1**
  (Module ID 63103-02) Introduces hand and power tools used to maintain and install pipeline equipment. Discusses tool safety and procedures for selecting, inspecting, using, and maintaining the tools.
- **Piping and Mechanical Blueprint Reading** (15 Hours) ISBN 978-0-13-038337-2
  (Module ID 63104-02) Explains how to read plot plans, P&IDs, piping isometric drawings, detail sheets, and machine drawings. Describes common components and symbols used in various drawings.
  (Module ID 63105-02) Introduces a variety of tubing, tubing materials, tools, and work practices used in the pipeline industry. Identifies the materials used in threaded piping systems. Describes the types and uses of screwed fittings.
- **Fasteners** (10 Hours) ISBN 978-0-13-038339-6
  (Module ID 63106-02) Covers installation procedures for threaded, nonthreaded, and insulation fasteners used in the pipeline industry.
- **Installing Seals and Gaskets** (10 Hours) ISBN 978-0-13-038341-9
  (Module ID 63109-02) Covers the applications, removal procedures, and installation procedures for dynamic and static seals and O-rings. Also identifies gaskets and gasket materials and explains the procedures for laying out, cutting, and installing gaskets.
  (Module ID 63201-02) Discusses pneumatic system safety, characteristics of gases and how they are compressed, pneumatic transmission of energy, and compressor operation.
  (Module ID 63202-02) Discusses hydraulic system safety and the basic principles of hydraulics, including Pascal's law and Bernoulli's principle. Explains the function of fluids, parts, pumps, and motors.
- **Specialty and Precision Tools** (15 Hours) ISBN 978-0-13-038353-2
  (Module ID 63203-02) Introduces specialty tools and precision measuring tools and explains how to select, inspect, use, and care for these tools.
- **Introduction to Metering Devices and Provers** (10 Hours) ISBN 978-0-13-038357-0
  (Module ID 63206-02) Identifies and explains the use of pipeline meters including positive displacement, turbine, ultrasonic, mass-flow, vortex, and orifice. Identifies and explains the use of provers including tank provers, traditional pipe provers, and small volume pipe provers.
- **Introduction to Pumps** (10 Hours) ISBN 978-0-13-038358-7
  (Module ID 63207-02) Identifies main-line and feeder line pumps including centrifugal, rotary, reciprocating, and metering pumps. Explains net positive suction head and cavitation. Outlines general procedures for pump installation.
- **Introduction to Gas Compressors** (10 Hours) ISBN 978-0-13-038359-4
  (Module ID 63208-02) Identifies gas compressors used in the transmission of gas through pipelines. Also explains the function and operation of compressors and identifies the auxiliary equipment used with compressors.
- **Identify Types of Valve Actuators/Operators** (15 Hours) ISBN 978-0-13-038342-6
  (Module ID 63209-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuators.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuators.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuators.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuators.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuors.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuors.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuors.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuors.
- **Identifying Types of Valve Actuators/Operators** (10 Hours) ISBN 978-0-13-038340-8
  (Module ID 63210-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handling, installation, and preventive maintenance procedures for these actuors.
Vibration Analysis (5 Hours)
(Module ID 63303-02) Covers common causes of vibration and how to minimize them. Includes vibration monitoring techniques, vibration analysis techniques, vibration test equipment, and how to field balance machines.

Maintain, Troubleshoot, and Repair Pumps (10 Hours)
(Module ID 63304-02) Identifies the preventive maintenance requirements, inspection requirements, and common troubleshooting techniques for pumps used in the pipeline industry. Also gives general guidelines for preparing a pump for shutdown, removing a pump from a pipeline system, disassembling a pump, installing the pump after the pump has been reassembled, and preparing the pump for startup and operational check after maintenance or repair has been completed.

Maintain, Troubleshoot, and Repair Gas Compressors (15 Hours)
(Module ID 63305-02) Identifies the lubrication system components, preventive maintenance requirements, and common troubleshooting techniques for a gas compressor. Also gives general guidelines for preparing a gas compressor for shutdown and repair, isolating a gas compressor from a pipeline system, repairing rotary and reciprocating gas compressors, and preparing a gas compressor for startup and operational check after maintenance has been completed.

Inspect Navicable Waterway Crossing (5 Hours)
(Module ID CT16_1-17)

Routine Inspection of Breakout Tanks (API 653 Monthly or DOT Annual) (7.5 Hours)
(Module ID CT27_1-17)

Provide Security for Pipeline Facilities (2.5 Hours)
ISBN 978-0-13-471763-0
(Module ID CT28_0-17)

Observation of Excavation Activities (5 Hours)
(Module ID CT32_0-17)

Inspect Existing Pipe Following Movement (5 Hours)
(Module ID CT37_0-17)

Install or Repair Support Structures on Existing Aboveground Components (5 Hours)
(Module ID CT38_0-17)

Visually Inspect Pipe and Pipe Components Prior to Installation (5 Hours)
(Module ID CT38_1-17)

Backfilling a Trench Following Maintenance (5 Hours)
(Module ID CT39_0-17)

Conduct Vegetation Survey (5 Hours)
(Module ID CT52_1-17)

Conduct a Leak Survey with a CGD (5 Hours)
(Module ID CT52_2-17)

Conduct a Leak Survey with a Flame Ionization Unit (5 Hours)
(Module ID CT59_3-17)

Vault Maintenance (10 Hours)
(Module ID CT59_0-17)

Cold Cutting (10 Hours)
(Module ID CTCC-17)

Flange Bolting (15 Hours)
(Module ID CTFB-17)

Mud Plugging (5 Hours)
ISBN 978-0-13-471789-0
(Module ID CTMP-17)

Tubing (7.5 Hours)
(Module ID CTTB-17)

Threaded Pipe Fabrication (15 Hours)
(Module ID CTTP-17)

Pipeline Field and Control Center Operations

L1  PIPELINE FIELD AND CONTROL CENTER OPERATIONS

LEVEL 1

Curriculum Notes

• 115 Hours
• Revised: 2017, Third Edition
• Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK  ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Quality Control and Measurement (20 Hours)
(Module ID 67106-02) Focuses on the importance of quality control and accurate measurement as they affect safety, customer service, and the company’s reputation. Topics include taking samples, performing product testing, and product testing and measurement tools.

Product Batch and Pig Tracking (10 Hours)
(Module ID 60104-02) Describes how to track pipeline product line inventories; handle scheduled pipeline shipments; identify product interface changes; and launch, receive, and track pigs through the pipeline and facility.

Field Quality Control (15 Hours)
(Module ID 60107-02) Introduces field quality control procedures including activation of tank mixing devices, collection of product samples, product testing, pipeline switching, product blending operations, and injection of appropriate additives.

Abnormal Operating Conditions - Field and Gas (5 Hours)
ISBN 978-0-13-472784-4
(Module ID AOCFG-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Purge Gas from a Pipeline (5 Hours)
(Module ID CT50_0-17)

Purge Air from a Gas Pipeline (5 Hours)
(Module ID CT51_0-17)

Test Remotely Controlled Shutdown Devices (5 Hours)
(Module ID CT54_0-17)

Perform Incremental Pressure Increases to Uprate the MAOP (5 Hours)
(Module ID CT56_0-17)

Operate Odorant Equipment (5 Hours)
(Module ID CT57_0-17)

Monitor Odorant Level (5 Hours)
(Module ID CT58_0-17)

Start-up of a Liquid Pipeline (Field) (5 Hours)
ISBN 978-0-13-472800-1
(Module ID CT63_1-17)

Field Measurement (20 Hours)
ISBN 978-0-13-038232-0
(Module ID 60108-02) Introduces techniques used in field measurement of products in the pipeline, including measurement components, types of meters, measurement of custody transfers and receipts, verification of meter accuracy, water draw calibration techniques, and utilization of tank strapping.

Field Measurement and Quality Control (20 Hours)
(Module ID 65107-02) Explains how to activate tank mixing devices, perform product testing, and perform pipeline grade changes and tank capacity operations. Also explains how to use and inject appropriate additives, identify types of meters, maintain accurate measurement on all custody receipts, and the processes and techniques used to prove meters.

SCADA (30 Hours)
ISBN 978-0-13-103147-0
(Module ID 64307-02) Explains pipeline operations systems, including control, communications, SCADA, and PLCs. Explains redundant systems and control system troubleshooting.

ShUTDOWN OF A LIQUID PIPELINE (CONTROL CENTER/GAS/LIQUID)

Introduction to the Power Industry

This module sets the stage for trainees entering the electrical energy production and distribution field. It describes the many ways in which electricity can be produced, from burning fossil fuels such as coal and natural gas, to harnessing nuclear energy, and using renewable energy sources such as wind, geothermal, and solar energy.

Curriculum Notes

- 97.5 Hours
- Published: 2010
- The Trainee Guide is shrinkwrapped with Core and the Introduction to the Power Industry module.
- Prerequisites for Power Generation, Power Line Worker, and Wind Turbine Maintenance Technician programs.
- Basic Rigging (Module ID 00106-09 or 00106-15) is required to complete Power Industry Fundamentals.
- Either 2009 or 2015 Core can be used for the Power Industry Fundamentals package.

Power Generation Maintenance Electrician

L1 POWER GENERATION MAINTENANCE ELECTRICIAN

Curriculum Notes

- 232.5 Hours
- Includes 97.5 hours of Power Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $69.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Tools of the Trade (5 Hours)
(Module ID 40103-07; from Industrial Maintenance E&I Technician Level One) Introduces the hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

Fasteners and Anchors (5 Hours)
(Module ID 40103-07; from Industrial Maintenance E&I Technician Level One) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

Oxyfuel Cutting (17.5 Hours)
(Module ID 40104-07; from Industrial Maintenance E&I Technician Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 40105-07; from Industrial Maintenance E&I Technician Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 40106-07; from Industrial Maintenance E&I Technician Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 40107-07; from Industrial Maintenance E&I Technician Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Pumps and Drivers (5 Hours)
(Module ID 40108-07; from Industrial Maintenance E&I Technician Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Material Handling and Hand Rigging (15 Hours)
(Module ID 40110-07; from Industrial Maintenance E&I Technician Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

Mobile and Support Equipment (10 Hours)
(Module ID 40112-07; from Industrial Maintenance E&I Technician Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Introduction to Test Instruments (7.5 Hours)
(Module ID 40114-07; from Industrial Maintenance E&I Technician Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

SMAW Equipment and Setup (5 Hours)
ISBN 978-0-13-614623-0
(Module ID 40115-07; from Industrial Maintenance E&I Technician Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

PAPERBACK
Trainee Guide: $69.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Industrial Safety for E&I Technicians (12.5 Hours)
(Module ID 40201-08; from Industrial Maintenance E&I Technician Level Two) Covers safety rules and regulations for electrical workers, precautions for electrical hazards on the job, and the OSHA-mandated lockout/tagout procedure.

Managing Electrical Hazards (12.5 Hours)
(Module ID 26501-09; from Electrical, First Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

Introduction to the National Electrical Code® (5 Hours)
(Module ID 40202-08; from Industrial Maintenance E&I Technician Level Two) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an easy-to-follow procedure.

Electrical Theory (15 Hours)
(Module ID 40203-08; from Industrial Maintenance E&I Technician Level Two) Introduces electrical concepts used in Ohm’s law as applied to DC series circuits. Includes atomic theory, electromotive force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Continued on following page
Conductors and Cables (10 Hours)
(Module ID 40212-08; from Industrial Maintenance E&I Technician Level Two) Focuses on the types and applications of conductors and electrical cabling and covers proper wiring techniques. Stresses the applicable NEC® requirements.

Conductor Terminations and Splices (10 Hours)
(Module ID 40213-08; from Industrial Maintenance E&I Technician Level Two) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.

Motor Controls (15 Hours)
(Module ID 40304-09; from Industrial Maintenance E&I Technician Level Three) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Hydraulic Controls (15 Hours)
(Module ID 40311-09; from Industrial Maintenance E&I Technician Level Three) Introduces hydraulic principles and fluids, functions and controls of system devices, hydraulic symbols, and drawings. Covers safety considerations for hydraulic systems, as well as troubleshooting.

Grounding and Bonding (15 Hours)
(Module ID 26209-08; from Electrical Level Two, Sixth Edition) Focuses on the purpose of grounding and bonding electrical systems. Thoroughly covers NEC® requirements.

Hand Bending (10 Hours)
(Module ID 40208-08; from Industrial Maintenance E&I Technician Level Two) Introduces conduit bending and installation. Covers the techniques for using hand-operated and step conduit benders, as well as cutting, reaming, and threading conduit.

Machine Bending of Conduit (15 Hours)
(Module ID 40310-09; from Industrial Maintenance E&I Technician Level Three) Covers bends in conduit up to six inches. Focuses on mechanical, hydraulic, and electrical benders.

Electric Lighting (15 Hours)
(Module ID 26203-08; from Electrical Level Two, Sixth Edition) Introduces principles of human vision and the characteristics of light. Focuses on the handling and installation of various types of lamps and lighting fixtures.

Practical Applications of Lighting (12.5 Hours)
(Module ID 26303-08; from Electrical Level Three, Sixth Edition) Describes specific types of incandescent, fluorescent, and HID lamps, as well as ballasts. Also covers troubleshooting and various types of lighting controls.

Hazardous Locations (10 Hours)
(Module ID 40301-09; from Industrial Maintenance E&I Technician Level Three) Covers all classes of hazardous locations, including seals, components, and equipment approved for use in various hazardous locations.

Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26210-08; from Electrical Level Two, Sixth Edition) Describes fuses and circuit breakers along with their practical applications. Also covers sizing.

Transformer Applications (7.5 Hours)
(Module ID 40306-09; from Industrial Maintenance E&I Technician Level Three) Discusses transformer types, construction, connections, protection, and grounding along with capacitors and rectifiers.

Distribution Equipment (17.5 Hours)
(Module ID 40305-09; from Industrial Maintenance E&I Technician Level Three) Explains distribution equipment, including grounding, switchboard and ground fault maintenance, transformers, and electrical drawing identification.

continued on following page
Power Plant Electrical Systems (12.5 Hours)
(Module ID 50301-11) Describes how the electrical power to operate a power station is developed and distributed in normal, shutdown, and emergency situations. Covers equipment used in power stations, including circuit breakers, switchgear, and motor control centers.

Conductor Selection and Calculations (15 Hours)
(Module ID 40307-09; from Industrial Maintenance E&I Technician Level Three) Covers the types of conductors used in wiring systems, including insulation, current-carrying capacity, and temperature ratings.

Load Calculations — Branch and Feeder Circuits (17.5 Hours)
(Module ID 26301-08; from Electrical Level Three, Sixth Edition) Explains how to calculate branch circuit and feeder loads for residential and commercial applications.

Motor Calculations (12.5 Hours)
(Module ID 26309-08; from Electrical Level Three, Sixth Edition) Covers calculation requirements for size conductors and overcurrent protection for motor applications.

Overcurrent Protection (25 Hours)
 ISBN 978-0-13-609294-0
(Module ID 26305-08; from Electrical Level Three, Sixth Edition) Explains how to size and select circuit breakers and fuses for various applications. Also covers short circuit calculations and troubleshooting.

Motors: Theory and Application (20 Hours)
(Module ID 26202-08; from Electrical Level Two, Sixth Edition) Covers AC and DC motors, including the main components, circuits, and connections.

Motor-Operated Valves (15 Hours)
(Module ID 40313-09; from Industrial Maintenance E&I Technician Level Three) Covers motor-driven valves, ranging from small, servo-mechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

Specialty Transformers (10 Hours)
 ISBN 978-0-13-609319-0
(Module ID 26406-08; from Electrical Level Four, Sixth Edition) Covers various types of transformers and their applications. Also provides information on selecting, sizing, and installing these devices.

Advanced Controls (20 Hours)
(Module ID 26407-08; from Electrical Level Four, Sixth Edition) Discusses applications and operating principles of solid-state controls, reduced-voltage starters, and adjustable frequency drives. Also covers basic troubleshooting procedures.

Generator Maintenance (20 Hours)
(Module ID 26410-08; from Electrical Level Four, Sixth Edition) Covers motor cleaning, testing, and preventive maintenance. Also describes basic troubleshooting procedures.

Switchgear and Breaker Maintenance (25 Hours)
(Module ID 50402-11) Reviews the safety practices associated with power station electrical work. Explains how medium-voltage and low-voltage sources are developed and used in the power station, and how the station power system functions in a blackout or shutdown situation. Also describes the circuit breakers, switchgear, and motor control centers used in power stations, and provides instructions for maintenance of these devices.

Preventive and Predictive Maintenance (10 Hours)
(Module ID 26401-09; from Industrial Maintenance Mechanic Level Four) Explains preventive and predictive maintenance and non-destructive testing, and introduces the basic techniques for testing. Also describes lubricant analysis, and acoustic, infrared, and vibration testing.

Medium Voltage Terminations/Splices (10 Hours)
(Module ID 26411-08; from Electrical Level Four, Sixth Edition) Offers an overview of the NEC® and cable manufacturers’ requirements for medium-voltage terminations and splices.

Fire Alarm Systems (15 Hours)
(Module ID 26405-08; from Electrical Level Four, Sixth Edition) Covers fire alarm control units, Digital Alarm Communicator Systems (DACS), wiring for alarm initiating and notification devices, and alarm system maintenance.

Heat Tracing and Freeze Protection (10 Hours)
(Module ID 26409-08; from Electrical Level Four, Sixth Edition) Covers heat tracing systems along with their applications and installation requirements.

Standby and Emergency Systems (12.5 Hours)
(Module ID 40401-09; from Industrial Maintenance E&I Technician Level Four) Explains the installation, utilization, and maintenance requirements for standby and emergency electrical systems.
Oxyfuel Cutting (17.5 Hours)
(Module ID 40104-07; from Industrial Maintenance E&I Technician Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 40105-07; from Industrial Maintenance E&I Technician Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 40106-07; from Industrial Maintenance E&I Technician Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 40107-07; from Industrial Maintenance E&I Technician Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Pumps and Drives (5 Hours)
(Module ID 40108-07; from Industrial Maintenance E&I Technician Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Introduction to Test Instruments (7.5 Hours)
(Module ID 40110-07; from Industrial Maintenance E&I Technician Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, stroboscopes, voltage testers, and automated diagnostic tools.

Material Handling and Hand Rigging (15 Hours)
(Module ID 40111-07; from Industrial Maintenance E&I Technician Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Mobile and Support Equipment (10 Hours)
ISBN 978-0-13-614623-0
(Module ID 40112-07; from Industrial Maintenance E&I Technician Level One) Introduces the safety procedures and methods of operation for motorized support equipment, including fork lifts, mast lifts, compressors, and generators.

Lubrication (12.5 Hours)
(Module ID 40113-07; from Industrial Maintenance E&I Technician Level One) Introduces lubrication equipment and safety, and describes the procedures for selecting lubricants, additives, lubrication equipment, and lubricating charts.

SMAW Equipment and Setup (5 Hours)
(Module ID 29107-07; from Welding Level One, Fourth Edition) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

Power Industry Fundamentals, Level Two: A prerequisite for Level One completion and must be purchased separately.

- 222.5 Hours
- Includes 97.5 hours of Power Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources that include module tests, PowerPoints®; and performance profile sheets are available at www.nccer.org/irc.
Power Generation I&C Maintenance Technician Level 2 (continued)

Alternating Current (20 Hours)
(Module ID 40204-08; from Industrial Maintenance E&I Technician Level Two) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Drawings (10 Hours)
(Module ID 40303-09; from Industrial Maintenance E&I Technician Level Three) Explains how to read and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

E&I Test Equipment (10 Hours)
(Module ID 40205-08; from Industrial Maintenance E&I Technician Level Two) Focuses on an proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Conductors and Cables (10 Hours)
(Module ID 40212-08; from Industrial Maintenance E&I Technician Level Two) Focuses on the types and applications of conductors and electrical cabling and covers proper wiring techniques. Stresses the applicable NEC® requirements.

Conductor Terminations and Splices (10 Hours)
(Module ID 40213-08; from Industrial Maintenance E&I Technician Level Two) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and tapering conductors.

Motor Controls (15 Hours)
(Module ID 40304-09; from Industrial Maintenance E&I Technician Level Three) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Hydraulic Controls (15 Hours)
(Module ID 40311-09; from Industrial Maintenance E&I Technician Level Three) Introduces hydraulic principles and fluids, functions and controls of system devices, hydraulic symbols, and drawings. Covers safety considerations for hydraulic systems, as well as troubleshooting.

Pneumatic Controls (15 Hours)
ISBN 978-0-13-604739-1
(Module ID 40312-09; from Industrial Maintenance E&I Technician Level Three) Describes principles of atmospheric and compressed air gases, and how compressors transmit and treat compressed (pneumatic) air. Covers pneumatic system symbols, drawings, and system safety. Addresses the functions and control of pneumatic system components and provides guidelines for troubleshooting.

Programmable Logic Controllers (17.5 Hours)
(Module ID 40409-09; from Industrial Maintenance E&I Technician Level Four) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

Flow, Pressure, Level and Temperature
(15 Hours)
(Module ID 40206-08; from Industrial Maintenance E&I Technician Level Two) Presents devices used to measure flow, pressure, level, and temperature, along with their principles of operation.

Instrument Drawings and Documents, Part One (15 Hours)
(Module ID 40211-08; from Industrial Maintenance E&I Technician Level Two) Introduces instrument symbols, abbreviations, and drawings and documents, including instrument indexes, installation detail drawings, location drawings, and control loops.

Electrical Systems for Instrumentation
(22.5 Hours)
(Module ID 12104-01; from Instrumentation Level One, Second Edition) Covers basic electrical concepts and terms, DC circuit calculations, electrical measuring instruments, and electrical wiring.

Relays and Timers
(7.5 Hours)
(Module ID 12208-03; from Instrumentation Level Two, Second Edition) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

Switches and Photoelectric Devices
(5 Hours)
(Module ID 12209-03; from Instrumentation Level Two, Second Edition) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

Tubing
(15 Hours)
ISBN 978-0-13-604710-0
(Module ID 40209-08; from Industrial Maintenance E&I Technician Level Two) Introduces a variety of tubing, tubing materials, tools, and work practices. Covers proper storage and handling, cutting, deburring, reaming, bending, and flaring of tubing.

Clean, Purge, and Test Tubing and Piping Systems
(7.5 Hours)
(Module ID 40210-09; from Industrial Maintenance E&I Technician Level Two) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in industrial maintenance.

Layout and Installation of Tubing and Piping Systems
(22.5 Hours)
(Module ID 40309-09; from Industrial Maintenance E&I Technician Level Three) Introduces piping and tubing layout procedures. Explains the steps for creating a hand sketched isometric drawing that can be applied to a piping and tubing installation. Introduces methods and procedures used to measure, cut, bend, and support piping and tubing.

Electronic Components
(10 Hours)
(Module ID 40302-09; from Industrial Maintenance E&I Technician Level Three) Introduces the principles of electronics and semiconductor theory, components, and applications.

Panel-Mounted Instruments
(7.5 Hours)
(Module ID 12212-03; from Instrumentation Level Two, Second Edition) Explains the selection of instruments to be panel-mounted, locating the instruments using drawings, and procedures for installing the instruments in the panels.

Continued on following page
Installing Field-Mounted Instruments (25 Hours)
(Module ID 12213-03; from Instrumentation Level Two, Second Edition) Covers selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

Grounding and Shielding of Instrumentation Wiring (10 Hours)
(Module ID 12306-03; from Instrumentation Level Three, Second Edition) Teaches the basic concepts of grounding and shielding, including wire and cable identification. Defines various types of noise that can be induced into instrumentation wiring and describes the methods used to reduce or eliminate it.

Pneumatic Control Valves, Actuators and Positioners (40 Hours)
(Module ID 40404-09; from Industrial Maintenance E&I Technician Level Four) Covers the construction, operation, and uses of control valves, actuators, and positioners that are driven, and in some cases controlled by, compressed air. Explains the installation and maintenance of these devices, and includes alignment and troubleshooting procedures.

Performing Loop Checks (7.5 Hours)
(Module ID 40405-09; from Industrial Maintenance E&I Technician Level Four) Covers loop check steps, including verifying mechanical installation, validating that the loop has correct tag numbers, performing loop checks, and proving the loop.

Troubleshooting and Comissioning a Loop (10 Hours)
(Module ID 40406-09; from Industrial Maintenance E&I Technician Level Four) Teaches troubleshooting techniques used to locate problems in control loops, and how to isolate a loop in order to troubleshoot it. Covers commissioning of a loop once it is repaired, loop checked, and calibrated.

Process Control Theory (20 Hours)
(Module ID 12204-03; from Instrumentation Level Two, Second Edition) Describes the principles of process control and how various types of control loops are applied. Discusses ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

Process Control Loops and Tuning (20 Hours)
(Module ID 40407-09; from Industrial Maintenance E&I Technician Level Four) Describes control loops, devices, and terms. Introduces formulas and their applications to PID control. Offers a theory-based approach to PID control and its application in industrial process control. Addresses open, closed, and visual loop tuning.

Data Networks (15 Hours)
(Module ID 40408-09; from Industrial Maintenance E&I Technician Level Four) Introduces terms associated with data network devices and computers used in industrial facilities. Explains how the hardware devices used in a data highway system.

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Tools of the Trade (5 Hours)**
ISBN 978-0-13-614584-4 (Module ID 32102-07; from Industrial Maintenance Mechanic Level One) Introduces hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

**Gaskets and Packing (10 Hours)**
ISBN 978-0-13-614588-2 (Module ID 32105-07; from Industrial Maintenance Mechanic Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

**Construction Drawings (12.5 Hours)**
ISBN 978-0-13-614590-5 (Module ID 32107-07; from Industrial Maintenance Mechanic Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

**Pumps and Drivers (5 Hours)**
ISBN 978-0-13-614591-2 (Module ID 32108-07; from Industrial Maintenance Mechanic Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

**Valves (5 Hours)**
ISBN 978-0-13-614592-9 (Module ID 32109-07; from Industrial Maintenance Mechanic Level One) Identifies different types of valves and describes their installation as well as valve storage and handling.

**Basic Layout (20 Hours)**

**Advanced Trade Math (30 Hours)**

**Precision Measuring Tools (20 Hours)**
ISBN 978-0-13-604682-0 (Module ID 32302-08; from Industrial Maintenance Mechanic Level Three) Explains how to select, inspect, use and care for levels, feeler gauges, calipers, micrometers, height gauges and surface plates, dial indicators, protractors, parallels and gauge blocks, trammels, and pyrometers.

**Introduction to Test Instruments (7.5 Hours)**
ISBN 978-0-13-614593-6 (Module ID 32110-07; from Industrial Maintenance Mechanic Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, probe meters, voltage testers, and automated diagnostic tools.

**Material Handling and Hand Rigging (15 Hours)**
ISBN 978-0-13-614594-3 (Module ID 32111-07; from Industrial Maintenance Mechanic Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

**Mobile and Support Equipment (10 Hours)**
ISBN 978-0-13-614560-8 (Module ID 32112-07; from Industrial Maintenance Mechanic Level One) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, personnel lifts, compressors, and generators.

**Lubrication (12.5 Hours)**

**SMAW Equipment and Setup (5 Hours)**

**Introduction to Bearings (15 Hours)**

**Installing Bearings (20 Hours)**
ISBN 978-0-13-604683-7 (Module ID 32303-08; from Industrial Maintenance Mechanic Level Three) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

**Installing Couplings (15 Hours)**
Power Generation Maintenance Mechanic Level 2 (continued)

Installing Mechanical Seals (20 Hours)
(Module ID 32308-08; from Industrial Maintenance Mechanic Level Three) Covers the function and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting and installing mechanical seals.

Conventional Alignment (30 Hours)
(Module ID 32306-08; from Industrial Maintenance Mechanic Level Three) Covers types of misalignment, aligning couplings using a straightedge and feeler gauge, adjusting parallel and angular alignment, using a dial indicator, and eliminating coupling stress.

Reverse Alignment (30 Hours)
(Module ID 32404-09; from Industrial Maintenance Mechanic Level Four) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment based on reverse dial indicator measurements.

Laser Alignment (25 Hours)
ISBN 978-0-13-610449-0
(Module ID 32405-09; from Industrial Maintenance Mechanic Level Four) Using one example system, describes the principles of using laser alignment systems to perform alignments.

Installing Belt and Chain Drives (10 Hours)
(Module ID 32307-08; from Industrial Maintenance Mechanic Level Three) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Introduction to Piping Components (5 Hours)
(Module ID 32202-07; from Industrial Maintenance Mechanic Level Two) Introduces chemical, compressed air, fuel oil, steam, and water systems. Explains how to identify piping systems according to color codes.

Heaters, Furnaces, Heat Exchangers, Cooling Towers and Fin Fans (30 Hours)
(Module ID 32211-07; from Industrial Maintenance Mechanic Level Two) Introduces equipment used to transfer and remove heat from systems in process.

Hydrostatic and Pneumatic Testing (10 Hours)
(Module ID 32206-07; from Industrial Maintenance Mechanic Level Two) Describes non-destructive and pressure testing of systems and equipment.

Installing Fans and Blowers (10 Hours)
(Module ID 15312-08; from Millwright Level Three) Explains how to install axial-flow fans, centrifugal fans, and roots-type and screw-type blowers.

Conveyors (5 Hours)
(Module ID 15401-08; from Millwright Level Four) Describes conveyor systems and their principles of operation.

Troubleshooting and Repairing Conveyors (12.5 Hours)
(Module ID 15402-08; from Millwright Level Four) Describes maintaining and repairing belt, roller, chain, screw, and pneumatic conveyors.

Copper and Plastic Piping Practices (5 Hours)
(Module ID 32203-07; from Industrial Maintenance Mechanic Level Two) Covers the selection, preparation, joining, and support of copper and plastic piping and fittings.

Introduction to Ferrous Metal Piping Practices (5 Hours)
ISBN 978-0-13-604620-0
(Module ID 32204-07; from Industrial Maintenance Mechanic Level Two) Covers iron and steel pipe and fittings and provides step-by-step instructions for cutting, threading, and joining ferrous piping.

Identify, Install and Maintain Valves (10 Hours)
(Module ID 32205-07; from Industrial Maintenance Mechanic Level Two) Explains how to remove and install threaded and flanged valves, how to replace valve stem O-ring and bonnet gaskets, and how to repackage a valve stuffing box. Also discusses the purpose of valve packing.

Basic Hydraulic Systems (10 Hours)
(Module ID 15409-08; from Millwright Level Four) Describes principles and types of hydraulic equipment and related safety procedures. Describes applications of hydraulic equipment.

Troubleshooting and Repairing Hydraulic Equipment (7.5 Hours)
(Module ID 15410-08; from Millwright Level Four) Explains inspecting hydraulic systems, diagnosing problems, and repairing these systems. Shows how to read hydraulic schematic symbols.

Motor-Operated Valves (15 Hours)
(Module ID 40313-09; from Industrial Maintenance E&I Technician Level Three) Covers motor-driven valves, ranging from small, servomechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

Advanced Blueprint Reading (25 Hours)
(Module ID 32402-09; from Industrial Maintenance Mechanic Level Four) Describes the use of drawing sets to obtain system information. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

Continued on following page
Power Generation Maintenance Mechanic Level 4

MODULES

- **Vibration and Balancing** (12.5 Hours)
  (Module ID 52401-10) Reviews machine basics and explains the causes of machine vibrations. Reviews the basics of vibration analysis and covers the devices used to detect and analyze vibration signatures. Explains how and why vibration analysis is used as part of predictive maintenance programs. Describes field machine balancing.
- **Preventive and Predictive Maintenance** (10 Hours)
  (Module ID 32401-09; from Industrial Maintenance Mechanic Level Four) Describes the theory and practice of compressing and transporting gases. Explains the types and principles of compressors and compressed air treatment equipment, as well as compressed air use and safety.
- **Fuel Preparation and Delivery Equipment** (25 Hours)
  (Module ID 15505-09; from Millwright Level Five) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.
- **Introduction to Tube Work** (10 Hours)
  (Module ID 32305-08; from Industrial Maintenance Mechanic Level Three) Explains how to lay out and install baseplates and soleplates. Describes how to field-verify a plate installation. Covers precision leveling procedures and performing clearance installation. Also describes basic steps for setting motors and pumps.
- **Compressors and Pneumatic Systems** (35 Hours)
  (Module ID 32403-09; from Industrial Maintenance Mechanic Level Four) Explains how to inspect, troubleshoot, disassemble, and install a pump. Also describes the process of preparing for startup.
- **Troubleshooting and Repairing Gearboxes** (20 Hours)
  (Module ID 32408-09; from Industrial Maintenance Mechanic Level Four) Describes types and operation of gearboxes, and gear oil diagnostics. Explains how to troubleshoot, remove, and disassemble gearboxes, how to identify gear wear patterns, and how to install and maintain gearboxes.
- **Setting Baseplates and Pre-alignment** (30 Hours)
  (Module ID 32305-08; from Industrial Maintenance Mechanic Level Three) Explains how to lay out and install baseplates and soleplates. Describes how to field-verify a plate installation. Covers precision leveling procedures and performing clearance installation. Also describes basic steps for setting motors and pumps.
- **Turbines** (20 Hours)
  (Module ID 15506-09; from Millwright Level Five) Describes types of turbines and their components. Describes the operation and common applications of particular types, including gas, steam, and water turbines.
- **Maintaining and Repairing Turbine Components** (15 Hours)
  (Module ID 15506-09; from Millwright Level Five) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.
To address the need for one standardized and nationally recognized Power Line Worker curriculum, NCCER has developed the Power Line Worker Level One. Common to transmission, distribution, and substation, Power Line Worker Level One addresses the fundamental aspects of power line work to include safety, electrical theory, climbing techniques, aerial framing and rigging, and operating utility service equipment. After Level One, the training program diverges into the three specialty areas (transmission, distribution, and substation) for two additional years of skills training.

Climbing Wooden Poles (80 Hours)
(Module ID 49105-11) Describes how to safely climb a wooden utility pole. Covers climbing equipment, inspection of equipment, pole inspection, climbing techniques, and pole-top rescue.

Climbing Structures Other Than Wood (40 Hours)
(Module ID 49106-11) Explains the equipment, safety practices, and climbing techniques required to climb towers. Hazards associated with the environment, such as snakes, birds, insects, and weather hazards, are also covered.

Tools of the Trade (70 Hours)
(Module ID 49107-11) Covers the specialized tools used by line workers, including hot sticks, as well as universal tool accessories. Also covers ladders and work platforms; clippers; cable cutters; pneumatic tools; and powder-actuated tools.

Aerial Framing and Associated Hardware (80 Hours)
(Module ID 49108-11) Explains how to install guys to support a utility pole, as well as how to install the equipment on the pole to support conductors. Includes procedures for the installation of cross-arms, transformers, and conductors.

Utility Service Equipment (70 Hours)
(Module ID 49109-11) Provides descriptions and operations instructions for use of the digger derrick, bucket truck, crane truck, and aerial lift. Also covers safety requirements; inspection and maintenance; driving and setup operations; and emergency procedures.

Rigging (12.5 Hours)
(Module ID 49110-11) Explains how to select and use rigging equipment. Covers common rigging equipment and rigging methods that are likely to be used by power line workers. Also covers hand signals and other methods of communication between the rigger and the crane operator.

Setting and Pulling Poles (20 Hours)
(Module ID 49111-11) Provides instructions for the storage, loading, and transport of wooden utility poles. Includes use of the digger derrick to dig the hole and install the pole. Also covers pole removal using a hydraulic jacking device.

Trenching, Excavating, and Boring Equipment (7.5 Hours)
(Module ID 49112-11) Covers the use and maintenance of trenching equipment, backhoe/loaders, and horizontal directional drilling equipment for the installation of direct-buried power lines. Includes a review of safety guidelines related to buried utilities.

Introduction to Electrical Test Equipment (7.5 Hours)
ISBN 978-0-13-266338-0
(Module ID 49113-11) Introduces the basic test equipment used by electrical workers to test and troubleshoot electrical circuits. Also covers specialized line worker test equipment, including the high-voltage detector, phase rotation tester, megohmmeter, phasing stick, and hi-pot tester.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Power Line Worker Safety** (22.5 Hours)
(Module ID 49102-11) Covers the safety equipment and safety practices associated with the special hazards of power line work, including electrical and arc flash hazards; traffic control; trenching; horizontal directional drilling; working in confined spaces; and safe entry into a substation.

**Introduction to Electrical Circuits** (7.5 Hours)
(Module ID 49103-11) Provides a general introduction to electricity and DC circuits, including theory of voltage, current and resistance, basic DC circuits, and Ohm’s law. Also introduces the test equipment used in power line work.

**Introduction to Electrical Theory** (7.5 Hours)
(Module ID 49104-11) Describes how to calculate voltage, current, and resistance values in series, parallel, and combination DC circuits using Ohm’s law. Also includes a basic description of grounding and bonding.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Alternating Current and Three-Phase Systems (17.5 Hours)
(Module ID 80201-11) Introduces the development of both single- and three-phase alternating current. Discusses the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Aerial Distribution Equipment (25 Hours)
(Module ID 80202-11) Identifies the various equipment components found on overhead distribution system poles and describes the function of each, including transformers, reclosers, fuses, sectionalizers, capacitor banks, and voltage regulators.

Cable and Conductor Installation and Removal (20 Hours)
ISBN 978-0-13-274261-0
(Module ID 80203-11) Describes the types of conductors and cables used in overhead and underground residential distribution systems and the equipment and procedures used to install and remove them. Includes methods used to splice conductors.

Live-Line Work (40 Hours)
ISBN 978-0-13-296759-4
(Module ID 80301-12) Covers tools such as hot sticks, shotgun sticks, and wire tongs, along with the PPE and safe work practices that are critical elements of live line and bare hand work. Includes coverage of various live-line tasks such as different methods of moving conductors and replacing insulators, cross-arms, and poles.

Three-Phase URD Systems (25 Hours)
ISBN 978-0-13-296760-0
(Module ID 80302-12) Covers safety practices associated with three-phase URD systems; describes vault and manhole applications; and explains different transformer configurations and sectionalizing equipment used in three-phase URD systems. Also covers three-phase cables and how cable is pulled through conduit.

Distribution Line Maintenance (40 Hours)
(Module ID 80304-12) Focuses on the methods used to safely locate and correct faults in aerial and URD systems. Includes troubleshooting methods as well as work site preparation.

Introduction to Smart Grids (25 Hours)
(Module ID 80305-12) Describes the network of transmission and distribution lines that delivers electricity between generating sources and consumers, and explains how the smart grid overlays this network to maintain a balance between power availability and demand.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Substations (10 Hours)
ISBN 978-0-13-274263-4
(Module ID 82201-12; from Power Line Worker: Substation Level Two) Provides an overview of the different types and functions of substations. Identifies the various voltage classes and introduces the primary equipment and components found in substations. Safe work practices and access issues related to substations are presented, as well as an introduction to one-line diagrams.

Distribution Line Protection and Monitoring (7.5 Hours)
(Module ID 80204-11) Introduces the development of both single- and three-phase alternating current. Discusses the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Alternating Current and Three-Phase Systems (17.5 Hours)
(Module ID 80201-11) Introduces the development of both single- and three-phase alternating current. Discusses the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Underground Residential Distribution (URD) Systems (30 Hours)
ISBN 978-0-13-274263-4
(Module ID 80204-11) Describes the methods used to distribute power in residential and commercial subdivisions, including the equipment used in the process, such as pad-mount transformers and switchgear. Covers the components and methods used to connect primary and secondary power, as well as the protective devices used in URD systems and methods used to locate and repair buried cables.

Overhead and URD Service Installations (15 Hours)
(Module ID 80205-11) Describes the methods and procedures used in terminating single-phase and three-phase aerial and URD systems at residential and commercial customer locations. Includes coverage of revenue meters and street light connections.

Distribution Line Maintenance (50 Hours)
(Module ID 80206-11) Describes the inspection process and the methods and procedures used to inspect and maintain poles, conductors, and equipment used in aerial and URD systems. Includes coverage of transformer testing; location and correction of faults in URD systems; load management systems; and protective device coordination.

Troubleshooting (40 Hours)
(Module ID 80304-12) Focuses on the methods used to safely locate and correct faults in aerial and URD systems. Includes troubleshooting methods as well as work site preparation.

Introduction to Smart Grids (25 Hours)
(Module ID 80305-12) Describes the network of transmission and distribution lines that delivers electricity between generating sources and consumers, and explains how the smart grid overlays this network to maintain a balance between power availability and demand.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Continued on following page
**Power Line Worker: Substation Level 2**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Substations** (10 Hours)
(Module ID 82201-12) Provides an overview of the different types and functions of substations. Identifies the various voltage classes and introduces the primary equipment and components found in substations. Safe work practices and access issues related to substations are presented, as well as an introduction to one-line diagrams.

**Managing Electrical Hazards** (12.5 Hours)
(Module ID 26501-12; from Electrical, Second Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

**Alternating Current and Three-Phase Systems** (17.5 Hours)
(Module ID 80201-12; from Power Line Worker: Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

**Conductors and Cables** (10 Hours)
(Module ID 82202-12) Identifies the many types, sizes, and applications of conductors and cables. Fiber-optic cable is also introduced. Reviews the use of cable drawings and schedules. Provides coverage of the methods of routing cables underground in the substation environment.

**Cable Tray** (7.5 Hours)
(Module ID 26207-11; from Electrical Level Two, Seventh Edition) Focuses on NEC® installation requirements for cable tray, including cable installations.

**Conduit Bending** (15 Hours)
(Module ID 26204-11; from Electrical Level Two, Seventh Edition) Covers bends in conduit up to 6 inches. Focuses on mechanical, hydraulic, and electrical benders.

**Conductor Installations** (10 Hours)
(Module ID 26206-11; from Electrical Level Two, Seventh Edition) Covers the transportation, storage, and setup of cable reels; methods of rigging; and procedures for complete cable pulls in raceways and cable trays.

**Conductor Terminations and Splicing** (7.5 Hours)
(Module ID 26208-11; from Electrical Level Two, Seventh Edition) Describes methods of terminating and splicing conductors, including preparing and taping conductors.

**Grading** (20 Hours)
(Module ID 82204-12) Provides comprehensive coverage of concrete pouring and finishing techniques. Includes detailed information on concrete types and their uses. Form layout and construction, along with basic surveying skills, is presented. Also provides detailed coverage of rebar types and their common geometric forms.

**Medium- and High-Voltage Equipment Installation** (25 Hours)
ISBN 978-0-13-296792-1
(Module ID 82302-12) Presents the typical installation procedures for primary substation components. Identifies the common and unique factors related to the proper installation of transformers, circuit breakers, capacitors, reactors, bus systems, and insulators. A discussion of corona and how proper installation techniques can prevent it is also included.

**Control House** (20 Hours)
(Module ID 82303-12) Provides an overview of the substation control house and its function in the substation. The components and protective systems generally contained within a control house are examined, including the essential DC power systems and emergency power supplies. Coverage of racking systems and their layout is also included.
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Connectors, Conductor Terminations, and Splicing (25 Hours)
(Module ID 82304-12) Describes the procedures and materials required to prepare and complete terminations and splices on insulated and non-insulated conductors and cables. Coverage is provided for both medium- and high-voltage circuits. Hydraulic presses and crimper s are introduced, along with hi-pot testing procedures for terminations and splices.

Equipment Testing and Maintenance (30 Hours)
(Module ID 82305-12) Identifies the testing procedures required and explains how to properly maintain substation components. Coverage of testing and maintenance procedures is provided for power transformers, potential devices, various circuit breakers, disconnects and switches, capacitors, and reactors.

System Protection and Control (12.5 Hours)
(Module ID 82306-12) Describes the protective functions required in the substation environment to defend against overloads, fault currents, and other incidents that can disrupt service or damage the system. Offers coverage of the components used to provide both protection and system control. An introduction to the various protective relay schemes used in today’s substations is included.

Alternating Current and Three-Phase Systems (17.5 Hours)
(Module ID 80201-11; from Power Line Worker: Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Transmission Structure Rigging (17.5 Hours)
(Module ID 81201-11) Covers rigging equipment and practices specific to transmission structures. Coverage includes slings, crane stability, and the safe use of personnel platforms.

Transmission Structure Erection (50 Hours)
(Module ID 81202-11) Describes the erection requirements for various types of transmission structures, including steel towers, wood structures, and different types of poles. Covers general construction requirements, as well as right-of-way clearing, foundations, framing and erection, guying and anchoring, and grounding and bonding.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Topics safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Transmission Equipment Installation (50 Hours)
(Module ID 81203-11) Focuses on the safe installation of insulators and conductors. Coverage includes stringing and splicing of conductors, conductor terminations, conductor sagging, clipping-in, and the installation of accessories such as vibration dampers, spacers, warning lights, and day markers.

Transmission System Maintenance (40 Hours)
(Module ID 81204-11) Coverage includes safety practices related to working with helicopters, as well as inspection of insulators, towers, and poles. Discusses clearance procedures and environmental concerns such as protection of wetlands, waterways, and wildlife.

Construction, Maintenance, and Repair – Live-Line Barehand (40 Hours)
(Module ID 81301-12) Describes the methods used to work on live transmission lines by bonding to the line. Covers safety practices and PPE, and includes coverage of bonded buckets, non-conductive suits, insulated ladders, banding jumpers, and rescue procedures.

Reconductoring Transmission Lines (40 Hours)
(Module ID 81302-12) Describes the replacement of existing transmission conductors as contrasted with installation of new conductors. Coverage includes pulling equipment setup, guard structures, and permit requirements. Includes live-line replacement as well as use of the existing conductors to pull the replacement conductors.

Construction, Maintenance, and Repair – Hot Stick (80 Hours)
(Module ID 81303-12) Covers tools such as hot sticks, shotgun sticks, and wire ropes, along with the PPE and safe work practices that are critical elements of live-line and bare-hand work. Includes coverage of live-line tasks such as replacing insulators, cross-arms, and spacers.

Lift Planning (40 Hours)
(Module ID 38302-11; from Advanced Rigging, First Edition) Discusses lift plan implementation, including reference information, calculations, single- and multiple-crane lifting, critical lifts, and engineering considerations.

Field Safety

Curriculum Notes

- 45 Hours
- Revised: 2013, Second Edition
- Provides the necessary safety task training to all field personnel. This manual is designed for individuals involved with completing or overseeing a specific task, from the craftsperson, crew leader, and safety supervisor to superintendent.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation of the first edition is available. Please see NCCER’s online catalog for more information.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Introduction to Safety (10 hours)
(Module ID 75101-13) Presents basic safety concepts and explains the difference between regulatory compliance and best practices. Introduces OSHA and explains how accidents affect everyone on a job site. Provides an overview of common jobsite hazards, including walking and working surfaces, temperature extremes, fire prevention, and tool safety. Identifies the elements of a hazard communication system and describes the types of information found on a product’s safety data sheet (SDS).

Confined Spaces and Excavations (5 hours)
(Module ID 75120-13) Covers safety precautions related to work in confined spaces, including the responsibilities and duties of each member of the confined-space entry team. It also covers the safety hazards and safeguards required when working in an excavation, including an explanation of various trenching supports and soil types.

Work-Zone Safety (5 hours)
(Module ID 75104-13) Introduces the signs, signals, and barricades found on various job sites, and covers highway work-zone safety requirements.

Electrical Safety (5 hours)
(Module ID 75121-13) Describes the basic precautions necessary to avoid electrical shock, arc, and blast hazards. It also describes the lockout/tagout procedure.

Working from Elevations (5 hours)
(Module ID 75122-13) Explains the use of fall-protection equipment. Covers safety precautions related to elevated work surfaces, including ladders, scaffolding, and aerial lifts.

Steel Erection (2.5 hours)
ISBN 978-0-13-340364-0
(Module ID 75110-13) Covers common safety precautions related to steel-erection work, including controlled decking zones, hazardous materials and equipment precautions, tool safety, and appropriate personal protective equipment.

Confined Spaces and Excavations (5 hours)
(Module ID 75123-13) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

Concrete and Masonry (2.5 hours)
(Module ID 75119-13) Describes the personal protective equipment that must be used when working with concrete and masonry as well as the common jobsite and health hazards associated with this type of work.

Introduction to Materials Handling (5 hours)
(Module ID 75124-13) Explains the safety precautions required when transporting, handling, rigging, stacking, and storing various types of loads. It also covers safe lifting procedures.

Basic Safety

(Construction Site Safety Orientation)

12.5 Hours
Revised: 2021
Module ID 00101
PAPERBACK ISBN

This module, from Core, replaces the Safety Orientation book. See the module description above for more information.

Fall Protection Orientation

8 Hours
Module ID 75901
PAPERBACK ISBN
Trainee Guide: $34.99 978-0-13-530500-3

Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Managing Electrical Hazards

12.5 Hours Revised: 2021, Fifth Edition
Module ID 26501-21
PAPERBACK ISBN

A copy of NFPA 70E®: Standard for Electrical Safety in the Workplace, 2021 Edition, is required material for this course. To order, contact NFPA at www.nfpa.org or 1-800-344-3555.

Describes how to assess and eliminate shock, arc blast, and arc flash hazards using the practical safe working requirements detailed in NFPA 70E®: Standard for Electrical Safety in the Workplace®. Where it is not possible to eliminate a hazard, an energized electrical work permit must be completed, and workers must be protected by appropriate safety procedures and personal protective equipment.

Field Safety (continued)
Curriculum Notes

- 45 Hours
- Updated in 2018.
- Provides instruction on how to implement and administer a company safety program. This manual is designed for field managers, safety directors, safety committees, owner safety representatives, and insurance/loss control representatives.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Participant Guide: $89

MODULES
The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Introduction to Safety Technology (2.5 hours)
(Module ID 75201) Describes the responsibilities of a safety technician and identifies the basic components of a safety program. It also provides an overview of regulatory requirements.

Safety Technology

Positive Safety Communication (2.5 hours)
(Module ID 75205) Explains how to support an effective safety culture on the job site, including communication techniques, motivation, and responding to behavioral issues.

Hazard Recognition, Environmental Awareness, and Occupational Health (5 hours)
(Module ID 75219) Covers environmental and safety hazards. It explains how to evaluate risks and identify appropriate methods of hazard control. It also discusses environmental regulations for hazardous materials and describes the elements of a medical surveillance program.

Job Safety Analysis and Pre-Task Planning (5 hours)
(Module ID 75220) Provides guidance on safety performance analysis and employee coaching. It also explains how to complete job and task safety planning.

Safety Data Tracking and Trending (5 hours)
(Module ID 75221) Covers how to conduct safety inspections, audits, and employee safety observations. It discusses both traditional and predictive methods of performance measurement, and explains how to analyze safety data in order to prevent future incidents.

Site-Specific Safety Plans (5 hours)
(Module ID 75222) Explains how to use pre-bid checklists to identify hazards and develop a site safety plan. It also describes how to develop an emergency action plan.

Safety Orientation and Safety Meetings (5 hours)
(Module ID 75223) Describes how to prepare and deliver effective training using both formal safety meetings and tailgate talks.

Permits and Policies (5 hours)
(Module ID 75224) Provides an overview of the various work permits required on a construction site. It also provides detailed procedures for completing a hot work permit, lockout/tagout, and confined-space entry permit.

Incident Investigations, Policies, and Analysis (5 hours)
(Module ID 75225) Describes how to conduct an incident investigation, including employee interviews and reporting requirements. It also explains how to analyze an incident to determine the root cause and prevent future incidents.

OSHA Inspections and Recordkeeping (5 hours)
(Module ID 75226) Discusses the OSHA requirements for record-keeping and explains how to manage the safety and health records for a job site. It also covers the two main types of OSHA inspections.

The new testing system makes module testing easier than ever.

1. Multiple Test Versions
- Automatically scrambles test questions for you.

2. Electronic Format
- Create, launch, score and submit module tests all online.

3. Web-Based Platform
- No special software or hardware requirements.

4. Proctor Station
- Administer tests easily and quickly.

5. Responsive Design
- Automatically conforms to multiple devices (i.e. laptops, tablets, Google Chromebooks & Macbooks).

Visit nccer.org/testing to find out why you should make the switch!

BENEFITS OF NCCER’S BADGES

NCCER’s online credentials transform skills, abilities and achievements into badges that are formatted to be shared across social media and other digital platforms.

Learn how to start claiming badges and more by scanning the QR code or visiting www.nccer.org/badges.

They are recognized industry-wide.

It’s the new way to display knowledge.

Easily spot credentials and specific skill sets.

Learn how to start claiming badges and more by scanning the QR code or visiting www.nccer.org/badges.
NCCER TESTING HAS GONE DIGITAL

The new testing system makes module testing easier than ever.

1. **Multiple Test Versions** - Automatically scrambles test questions for you.

2. **Electronic Format** - Create, launch, score and submit module tests all online.

3. **Web-Based Platform** - No special software or hardware requirements.

4. **Proctor Station** - Administer tests easily and quickly.

5. **Responsive Design** - Automatically conforms to multiple devices (i.e. laptops, tablets, Google Chromebooks & Macbooks).

Visit nccer.org/testing to find out why you should make the switch!
Get industry-recognized credentials.

The construction industry needs 1.4 million craft professionals by 2024*. Employers look for credentials that validate knowledge and skills. NCCER offers standardized training, assessments and credentials for the construction industry.

Get trained. Get skills. Get certified.

Drive.
Honor.
Loyalty.
Integrity.
Leadership.

Get credentials for the training you received in the military

Veterans and transitioning military can receive NCCER industry-recognized credentials for the training they received while in the service. These credentials allow employers to hire veterans at the correct skill level, provide competitive pay and continue training where the service left off.

Join the fast track to employment and build your career at veterans.byf.org.
