Certification Information for Primary Administrators

Individuals who have completed a certification program in the NCCER Learning Management System (LMS) will receive a certificate that validates their program completion.

The instructions on the certificate direct the individual to provide a digital/paper copy of the certificate to their Primary Administrator or Secondary Administrator.

Once you have received this certificate, you will submit a Registration of Assessment Certifications via the Registry System followed by affiliating the newly certified individual with the appropriate Authorized Assessment Site (AAS) in the Registry System.

Please remember, if this individual is a certified Assessment Proctor, this affiliation gives them access to the Assessment Platform.

The following programs will result in a certificate of completion:

- Assessment Performance Evaluator Certification Training
- Assessment Proctor Certification Training
