NCCER has released its much anticipated 10th edition of Electrical Levels 1-4, updated to meet 2020 NFPA 70: National Electrical Code®. Written with subject matter experts from around the nation, revised content includes:

- Over 6,000 NEC code references including new content covering the NEC numbering standard with additional trainee exercises
- Updated sections on safety, with shock and arc blast hazards, PPE, ladder safety and more
- New applications in lighting, including LED technology
- Industry-recognized credentials that assure national portability of skills
- New, optional career pathway after completion of Electrical Levels 1-2 for Electronic Systems Technician
