2	Visually inspect internal pipe surface (CT12_0-17).				
	Identify potential abnormal operating conditions that may occur during performance of this CT, and know the appropriate actions to take in response to them.				
	Utilize the appropriate personal protective equipment according to relevant company procedures.				
	Confirm that pipe is in a condition to allow an internal inspection and, if removed, that orientation has been properly marked. Mark both the removed section and the upstream/downstream pipe according to operator's procedures.				
	Record the initial visual inspection of the inside of the pipe.				
	Remove any hydrocarbon residue by using an approved solvent or mechanical means.
