

LEVEL EXAM SPECIFICATIONS

PIPELINE FIELD AND CONTROL CENTER OPERATIONS, 3rd Edition, Level 1

NCCER Overview

NCCER is a not-for-profit 501(c)(3) education foundation created in 1996 as The National Center for Construction Education and Research. It was developed with the support of more than 125 construction CEOs and various association and academic leaders who united to revolutionize training for the construction industry. Sharing the common goal of developing a safe and productive workforce, these companies created a standardized training and credentialing program for the industry.

NCCER develops standardized construction and maintenance curriculum and assessments with portable credentials. These credentials are tracked through NCCER's Registry System that allows organizations and companies to track the qualifications of their craft professionals and/or check the qualifications of possible new hires. NCCER's Registry System also assists craft professionals by maintaining their records in a secure database.

NCCER is headquartered in Alachua, Florida, and is affiliated with the University of Florida's M.E. Rinker, Sr. School of Construction Management.

Field and Control Center Operations – Overview

Provides basic, intermediate and advanced training to safely operate gas and liquid pipelines as well as manage operations in the control center. Level 1 includes key content such as quality control, measurement, and SCADA communications.

Module Exam Guidelines

- May use a basic function, non-printing calculator
- No extra papers, books, notes or study materials are allowed
- The minimum passing score is 70

Study Materials

All NCCER written module exams are referenced to NCCER's curriculum listed in the content. You may order modules from Pearson (800.922.0579) or from NCCER's Online Catalog at www.nccer.org.

Credentials

NCCER will send appropriate credentials to the location designated by the accredited training sponsor for successful completions.

Registry

Module exam results will be maintained in NCCER's Registry and become a portable record of the candidate's training and assessment achievements.

Table of Contents:	Recommended Training Hours	Number of Exam Items	Performance Task Required?
67106-02 - Quality Control and Measurement	20	15	Yes
60104-02 - Product Batch and Pig Tracking	10	15	Yes
60107-02 - Field Quality Control	15	20	Yes
60108-02 - Field Measurement	20	20	Yes
65107-02 - Liquid Pipeline Measurement and Quality Control	20	25	Yes
64307-02 - SCADA	30	30	Yes
Total Number of Training Hours & Module Exam Questions:	115	125
