Curriculum Catalog

2023

Standardized, competency-based curricula for construction professionals

Built For Industry, By Industry.
NCCER’s catalog is digital!

A compiled PDF of all crafts is available on the Instructor Portal at www.nccer.org/instructors. In addition, craft listings with modules for each level are available as downloadable PDFs on each of the individual craft webpages, found at www.nccer.org/crafts.

Stay up-to-date with all NCCER news by signing up for our mailing list at

WWW.NCCER.ORG/JOIN-MAILING-LIST

Check pages 2-3 for ordering information.

Pearson Education Directors’ contact information can be found on page 4.
## HOW TO ORDER

### Order Books

- **K-12 (secondary) organization**
  - Returning customer?
    - Yes.
    - No, I’m a new customer.

- **Other organizations: industry, college or government**
  - Returning customer?
    - Yes.
    - No, I’m a new customer.

### NCCERconnect Access

- Returning customer?
  - Yes.
    - I need course details.
    - I need help getting started.
  - No, I’m a new customer.
    - Have an access code?
      - I have an access code.
      - I have an access code.

### Custom Books

- Returning customer?
  - Yes.
    - Do you have a custom book ISBN?
      - Yes.
      - No, I’m a new customer.
        - Contact your Pearson/NCCER executive director.
  - No, I’m a new customer.

### Desk copy or general questions about product

- Contact your Pearson/NCCER executive director.

### Instructor Resources

- Have an access code?
  - Yes.
    - Visit www.nccer.org/irc and proceed to download your resources. You will have an option to enter your access code and create an account after you select the resources you want to download.
  - No.
    - Visit www.nccer.org/irc and proceed to download your resources. When promoted to login you will have an option to request an access code that will enable you to create a username and password.

### Additional FAQs:

**Pipeline ordering information:** Visit ncerc.org/pipeline-program. Refer to pages 73-83 for ISBNs, content information and pricing.
Module Orders
Individual modules are printed on demand. Please allow two to three weeks for fulfillment and delivery. Modules are not returnable.

Pricing
All prices listed in this catalog reflect net pricing available to schools, government, business and industry accounts. No additional discounts are available. Prices are subject to change without notice.

Shipping and Postage
Shipping costs are based on a number of factors including weight, destination and type of service. All orders are subject to approximately 8%-10% shipping cost on total order. State and local taxes will be added where they apply.

Billing
Invoices are generated only after items have shipped. You may receive multiple invoices on one purchase order if items are backordered and/or not yet published. Drop shipments to other locations are accompanied by a packing slip. This is not an invoice and should not be paid. Only the “Bill to” account will be invoiced.

Returns Policy
If you are not entirely satisfied with any of our textbooks, you may return materials including paperback, loose-leaf and binder in saleable condition for a full refund, credit or replacement within 15 months of the original invoice date (12 months for high school accounts). All packages must be returned complete as sold. Individual modules are printed on demand.

Payment Terms
Net 30 days.

Individual Ordering Information
Orders from individuals are welcome but must be prepaid by credit card (VISA, MasterCard and Discover accepted), check or money order. Individual pricing is list price, not reflected in this catalog. Individual Ordering Department: 800-947-7700

Check out the online catalog at www.nccer.org/bookstore

Pearson Credit Department
For payment inquiries call: 800-232-6556

NCCERconnect Support

International Orders
Phone: 800-635-3889
Email: intlcs@pearsoned.com

Visit nccerconnect.com and sign in. Click the gear button on your active courses to get course details.

Visit nccerconnect.com and click the Get Support button located in the light green bar.

Visit nccerconnect.com and click register.

Contact your Pearson/NCCER executive director.

See orange section above for ordering information, you will need to provide the custom book ISBN.

Visit pearsonhighered.com/collections to create a custom book. A custom book ISBN will be created and sent to you via email within 48-72 hours of creating your book.
Thank You

NCCER would like to thank the Subject Matter Experts from the following companies who provided their expertise and assistance in developing and revising this year’s curricula.

ABC Anaheim
ABC Eastern Pennsylvania-Lehigh Valley
ABC Florida Gulf Coast
ABC Greater Baltimore
ABC Keystone

Total Petrochemical
Tri-City Electrical Contractors
University of Florida, ME Rinker Sr. School of Construction Management
Westgate LLC
NCCERconnect fosters learning within and beyond the classroom through a media rich eText and a course management system.

Learning no longer needs to take place between the front and back covers of the textbook. Students are online—on their smartphones, tablets and laptops—from the instant they roll out of bed until the minute they turn in each night. Every moment is an opportunity to connect, experience and learn.

Highlights of this fully integrated learning program:

- **Gradebook:** A robust gradebook allows you to see multiple views of your classes’ progress. Completely customizable and exportable, the gradebook can be adapted to meet your specific needs.
- **Multimedia Library:** Students and instructors can quickly search through resources and find supporting media.
- **Pearson eText:** Rich media options let students watch example videos as they read or do homework.
- **Course Management:** A full suite of course management features including email, document uploading, announcements, gradebook and instructor tools.

NCCERconnect is currently available with eText for the following crafts:
- Carpentry
- Construction Technology
- Core
- Electrical
- Electronic Systems Technician
- Fundamentals of Crew Leadership
- Heavy Equipment Operator
- HVAC
- Masonry
- Plumbing
- Welding

For the most up-to-date information, including ordering information, visit [www.nccer.org/onlinesolutions](http://www.nccer.org/onlinesolutions).

Pearson Collections

Select your ideal content, align it with your syllabus, then publish and share with your students.

**Search:** Collections, the Pearson custom library, includes all of our NCCER titles. You can freely mix and match between any craft areas.

**Create:** Select modules from any of our NCCER titles and add them to a customized book that meets your needs.

**Preview:** You can preview your Collection online at any time. Review the content and either make edits yourself or contact our team to help with the changes.

For more information on this service, visit [www.nccer.org/collections](http://www.nccer.org/collections).
Product Design and Supplements

Each craft area comprises successive levels, and each level comprises individual units of study called modules. Modules can be treated as separate task-training units because each one contains objectives as well as knowledge and performance tests. Instructors may teach a single module or the entire craft level and even customize their own training programs by combining modules across various craft areas. Customization is easy and cost-effective.

Course Planning Tools

The following product supplements are available at no cost in the Program Resources - Crafts/Titles section at www.nccer.org:

- Competencies/Objective Lists — Includes all competencies and comprehensive learning objectives for each craft.
- Performance Profiles — Correlates to the performance tasks of NCCER curricula and can be used to provide record keeping where documentation of training is required.
- Equipment and Material Lists — Includes all of the equipment and materials required to teach each module.
- Course Maps — Tracks revised modules, records new module numbers and shows how modules may have been incorporated into revisions or indicates if they have been deleted.

Craft Identifiers

The first two digits of the Module Identification Number indicate the “parent” or source craft of that module. All NCCER Craft Identifiers are listed below.

<table>
<thead>
<tr>
<th>Module ID Numbers</th>
</tr>
</thead>
<tbody>
<tr>
<td>29102</td>
</tr>
</tbody>
</table>

The two-digit prefix (29) indicates the craft identifier (Welding).

The last three digits are the unique module identifiers.

Titles older than 2018 will have an additional two-digit date suffix.

<table>
<thead>
<tr>

Core: Introduction to Basic Construction Skills

Basic Safety (Construction Site Safety Orientation)
(Module ID 00101) Work at construction and industrial job sites can be hazardous. Most job-site incidents are caused by at-risk behavior, poor planning, lack of training, or failure to recognize the hazards. To help prevent incidents, every company must have a proactive safety program. Safety must be incorporated into all phases of the job and involve employees at every level, including management.

Introduction to Construction Math
(Module ID 00102) Craft professionals rely on math to do their jobs accurately and efficiently. Plumbers calculate pipe lengths, plan drain slopes, and interpret dimensioned plans. Carpenters meet code requirements by using math to frame walls and ceilings properly. HVAC professionals develop ductwork and calculate airflow with practical geometry. Whichever craft lies in your future, math will play a role in it. This module reviews the math that you will need and sharpens the skills that you will be using in the existing modules ahead.

Introduction to Hand Tools
(Module ID 00103) Every profession has its tools. A surgeon uses a scalpel, an instructor uses a whiteboard, and an accountant uses a calculator. The construction crafts require a broad array of hand tools. Even if you are familiar with some of the tools, all craftworkers need to learn how to select, maintain, and use them safely. A quality hand tool may cost more up front, but if it is properly used and maintained, it will last for years. A true craft professional invests wisely in hand tools, and uses, maintains, and stores them with the same wisdom.

Introduction to Power Tools
(Module ID 00104) Power tools play an important role in the construction industry. Thousands of construction workers across the world use power tools every day to make holes, cut different types of materials, smooth rough surfaces, and shape a variety of products. Regardless of their specialization, all construction workers eventually use power tools on their job. This module provides an overview of the common types of power tools and how they function. It also describes the proper techniques required to ensure their safe and efficient operation.

Introduction to Construction Drawings
(Module ID 00105) Various types of construction drawings are used to represent actual components of a building project. The drawings provide specific information about the locations of the parts of a structure, the types of materials to be used, and the correct layout of the building. Knowing the purposes of the different types of drawings and interpreting the drawings correctly are important skills for anyone who works in the construction trades. This module introduces common types of construction drawings, their basic components, standard drawing elements, and measurement tools that are typically used when working with construction drawings.

Introduction to Basic Rigging (Elective)
(Module ID 00106) A common activity at nearly every construction site is the movement of material and equipment from one place to another using various types of lifting gear. The procedures involved in performing this task are known as rigging. Not every worker will participate in rigging operations, but nearly all will be exposed to it at one time or another. This module provides an overview of the various types of rigging equipment, common hitches used during a rigging operation, and the related Emergency Stop hand signal.

Introduction to Materials Handling
(Module ID 00109) Lifting, stacking, transporting, and unloading materials such as brick, pipe, and various supplies are routine tasks on a job site. Whether performing these tasks manually or with the aid of specialized equipment, workers must follow basic safety guidelines to keep themselves and their co-workers safe. This module provides guidelines for using the appropriate PPE for the material being handled and using proper procedures and techniques to carry out the job.

Basic Communication Skills
(Module ID 00107) The construction professional communicates constantly. The ability to communicate skillfully will help to make you a better worker and a more effective leader. This module provides guidance in listening to understand, and speaking with clarity. It explains how to use and understand written materials, and it also provides techniques and guidelines that will help you to improve your writing skills.

Basic Employability Skills
(Module ID 00108) Becoming gainfully employed in the construction industry takes more preparation than simply filling out a job application. It is essential to understand how the construction industry and potential employers operate. Your trade skills are extremely important, but all employers are also looking for those who are eager to advance and demonstrate positive personal characteristics. This module discusses the skills needed to pursue employment successfully.

Curriculum Notes

- Revised: 2021, Sixth Edition
- downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- a Spanish translation of the fifth edition is available. Please see NCCER’s online catalog for more information.

Applied Construction Math

A Novel Approach

PAPERBACK ISBN
Trainee Guide: $34.99
978-0-13-227298-8

Applied Construction Math: A Novel Approach features a story that students can relate to and math skills they never thought they could grasp. Its innovative style motivates students to follow the lessons by associating math with events they may encounter in their own lives. Students will see that learning math can be exciting as they follow along with Mr. Whyte and his construction class while they build the perfect house. Thirteen chapters teach basic math skills, including:
- Division
- Decimals/Percentages
- Reading Measurements
- Calculating Area
- Powers of Ten
- Linear Measure, Angles, Volumes, Pressure, and Slopes
- Solving for Unknowns
- Square Inches, Feet, and Yards
- Volume

Basic Safety

Construction Site Safety Orientation
12.5 Hours
Revised: 2021
Module ID 00101

PAPERBACK ISBN
Trainee Guide: $24.99
978-0-13-748353-2

This module, from Core, replaces the Safety Orientation book. See the module description above for more information.

Tools for Success

Critical Skills for the Construction Industry

Revised: 2009,
Third Edition

PAPERBACK ISBN
Trainee Workbook: $34.99
978-0-13-610649-4

This workbook is designed for employees entering the construction industry and has been reviewed and updated with input from construction and training professionals. The Instructor’s Handbook includes an annotated instructor’s outline, recommended teaching schedules, answers to quizzes, and tips and ideas for enhancing class activities.

Trainee Guide: $69.99

### MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### Introduction to Boilermaking (10 Hours)
(Module ID 34101-10) Provides an overview of the boilermaker craft, including a description of career opportunities.

#### Boilermaking Safety (12.5 Hours)
(Module ID 34102-10) Covers safety issues specific to boilermakers on the job.

#### Boilermaking Tools (15 Hours)
(Module ID 34103-10) Introduces the hand and power tools used by boilermakers, and the associated safety concerns.

#### Fasteners and Anchors (5 Hours)
ISBN 978-0-13-213699-0
(Module ID 34105-10) Explains the safety requirements associated with oxyfuel cutting. Describes straight line, bevel, piercing, and washing techniques.

#### Welding Basics (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.

#### Oxyfuel Cutting (17.5 Hours)
(Module ID 34105-10) Describes gas equipment used in welding and cutting.

#### Base Metal Preparation (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for welding.

#### Air Carbon Arc Cutting and Gouging (12.5 Hours)
ISBN 978-0-13-213705-8
(Module ID 34210-11) Describes equipment and processes. Explains how to select and install CAC-A electrodes, and how to prepare the work area and CAC-A equipment for safe operation. Provides instructions for using CAC-A equipment for washing and gouging activities.

#### Socket Weld Pipe Fabrication (25 Hours)
(Module ID 34207-11) Identifies pipe hangers and supports and explains how to select pipe support drawings and symbols. Covers plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, piping and instrumentation drawings, isometric drawings, spool sheets, detail sheets, and orthographic drawings.

#### Pipe Hangers and Supports (25 Hours)
(Module ID 34203-11) Identifies pipe hangers and supports and explains how to interpret pipe support drawings and symbols. Explains how to select, store, handle, install, and maintain spring can supports.

#### Tube Weld Preparation and Fitting (17.5 Hours)
(Module ID 34106-10) Describes gasket materials used in mating flanges and procedures for laying out and cutting a flange gasket.

#### Butt Weld Pipe Fabrication (40 Hours)
(Module ID 34208-11) Covers preparing pipe ends for butt welding; determining pipe lengths between butt weld fittings; and using welding jigs to align pipe and butt weld fittings for welding. Explains how to select and install back-up rings.

#### Oxyfuel Cutting (17.5 Hours)
(Module ID 34105-10) Describes standard pipe and fittings used in welding and cutting.

#### Cutting and Fitting Gaskets (12.5 Hours)
ISBN 978-0-13-213699-0
(Module ID 34106-10) Describes gasket materials used in mating flanges and procedures for laying out and cutting a flange gasket.

#### Base Metal Preparation (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for cutting and welding.

#### Welding Basics (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.

#### Oxyfuel Cutting (17.5 Hours)
(Module ID 34105-10) Describes safety requirements associated with oxyfuel cutting. Describes straight line, bevel, piercing, and washing techniques.

#### Cutting and Fitting Gaskets (12.5 Hours)
ISBN 978-0-13-213699-0
(Module ID 34106-10) Describes gasket materials used in mating flanges and procedures for laying out and cutting a flange gasket.

#### Base Metal Preparation (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for cutting and welding.

#### Welding Basics (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.

#### Oxyfuel Cutting (17.5 Hours)
(Module ID 34105-10) Describes equipment used in welding and cutting.

#### Base Metal Preparation (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for welding.

#### Welding Basics (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.
Boilermaking Level 3

L3 BOILERMAKING

Curriculum Notes

- 165 Hours
- Revised: 2011, Second Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
978-0-13-257824-0

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103-09; from Welding Level One, Fourth Edition)

Boiler Pressure Components (25 Hours)
(Module ID 34301-11) Describes the pressure components of a boiler system and their locations. Explains the procedures required to repair nonpressure components of a boiler.

Boiler Auxiliaries (25 Hours)
(Module ID 34306-11) Describes the air flow systems within a boiler system and the different fuels used to fire boiler system furnaces. Describes ash removal systems and the equipment used to protect the environment. Covers the feed water system into a boiler and the blow down from a boiler system.

Brick, Refractory, Insulation, and Lagging (BRIL) (5 Hours)
(Module ID 34305-11) Describes types of BRIL and explains their functions. Also addresses hazards associated with BRIL.

Advanced Tube Work (20 Hours)
(Module ID 34303-11) Explains the methods used to identify problem tubes and extract them. Also discusses the methods used for replacing and plugging tubes.

Advanced Boilermaking Construction Drawings (20 Hours)
(Module ID 34402-12) Covers symbols and abbreviations used on piping and instrumentation drawings and piping arrangement drawings. Explains how to read and interpret different types of construction drawings. Explains how to sketch an isometric drawing from a plan view drawing, and how to calculate line lengths from isometric drawings.

Advanced Pipe Fabrication (50 Hours)
(Module ID 34401-12) Covers tables of equivalents and units of conversion. Explains the basics of trigonometry and how to apply them to the installation of pipe. Explains how to calculate the weight of objects.

Advanced Rigging (20 Hours)
(Module ID 34410-12) Explains how to determine the center of gravity for objects to be rigged and how a load’s weight and center of gravity affect lifting devices such as cranes. Describes how to use cribbing to support lifted loads. Covers the use of slings and spreader or equalizer bars to lift loads. Describes the tools used to move loads laterally. Explains how to determine the center of gravity of asymmetrical loads.

Testing Piping Systems and Equipment (20 Hours)
(Module ID 34308-11) Lists test requirements for boiler system piping systems and equipment. Describes service and flow tests, head pressure tests, and hydrostatic tests performed on boiler system piping systems and equipment.

Rigging (22.5 Hours)
(Module ID 15206-07; from Millwright Level Two)

Towers and Exchangers (25 Hours)
(Module ID 34307-11) Explains the functions of towers and exchangers and the basic distillation process. Describes various types of towers and exchangers and their components.

Advanced Exchangers (25 Hours)
(Module ID 34411-12) Identifies different types of heat exchangers and their components. Describes methods used to test exchangers, and how to pull exchanger bundles. Explains how to replace a flange and a nozzle on an exchanger.

Advanced Towers (25 Hours)
(Module ID 34412-12) Identifies different types of towers and their components. Explains how to replace and remove different types of packing used in towers. Describes methods used to make field repairs to tower trays. Explains how to remove a tower distributor for maintenance.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

978-0-13-292141-1

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Advanced Mechanical Trade Math (15 Hours)
(Module ID 34401-12) Covers tables of equivalents and units of conversion. Explains the basics of trigonometry and how to apply them to the installation of pipe. Explains how to calculate the weight of objects.

Advanced Rigging (20 Hours)
(Module ID 34410-12) Explains how to determine the center of gravity for objects to be rigged and how a load’s weight and center of gravity affect lifting devices such as cranes. Describes how to use cribbing to support lifted loads. Covers the use of slings and spreader or equalizer bars to lift loads. Describes the tools used to move loads laterally. Explains how to determine the center of gravity of asymmetrical loads.

Advanced Boilermaking Construction Drawings (20 Hours)
(Module ID 34402-12) Covers symbols and abbreviations used on piping and instrumentation drawings and piping arrangement drawings. Explains how to read and interpret different types of construction drawings. Explains how to sketch an isometric drawing from a plan view drawing, and how to calculate line lengths from isometric drawings.

Advanced Pipe Fabrication (50 Hours)
(Module ID 08402-07; from Pipelining Level Four)

Stress Relieving (10 Hours)
(Module ID 34406-12) Covers metal distortion and ways to prevent it. Explains thermal growth in metals, and how to calculate thermal growth in given metals. Explains how misalignment creates stress in metals. Describes ways to relieve stress in piping that is experiencing distortion due to welding, thermal growth, or misalignment.

Quality Assurance (10 Hours)
(Module ID 34407-12) Covers codes governing welding and boilers. Describes weld imperfections and their causes. Identifies and explains different nondestructive and destructive testing methods. Explains how to make visual inspections of fillet welds. Describes welder qualification testing, and stresses the importance of quality workmanship.
Orientation to Carpentry (2.5 Hours)
(Module ID 27101) Reviews the carpentry profession, describes the apprentice program, identifies career opportunities for carpenters, and lists the skills, responsibilities, and characteristics a carpenter should possess. Emphasizes the importance of site-specific safety and occupational safety relevant to the craft.

Building Materials and Fasteners (20 Hours)
(Module ID 27102) Introduces building materials used in construction, including lumber, engineered wood products, concrete materials, steel framing, and a variety of fasteners and anchors. Also describes material handling and storage techniques, and basic calculations used to determine needed framing and concrete quantities.

Construction Plans & Documents (20 Hours)
(Module ID 27113) Describes construction plans and documents used by carpenters, including drawings found in commercial and residential plans. Focuses on information included in civil, architectural, and structural drawings. Also covers the importance of specifications, and reviews building codes used by carpenters.

Principles of Site and Building Layout (20 Hours)
(Module ID 27114) Explains how carpenters use specific construction drawings, as well as measuring tools and leveling instruments to perform basic site and building layout activities. Along with providing step-by-step instructions, this module describes the use of construction drawings and math to guarantee the accuracy of the building site.

Floor Systems (25 Hours)
ISBN 978-0-13-787628-0
(Module ID 27105) Introduces carpenters to drawings used to construct flooring systems. Defines framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials. Covers the installation of floor components including sill plates, beams, girders, joists, and subfloors.

Wall Systems (10 Hours)
(Module ID 27111) Describes basic wall systems and provides step-by-step instructions for laying out and framing both wood and steel components. Explains the process for laying out and framing walls. Includes instructions for assembling, erecting, and verifying plumb for wall systems.

Roof Framing (47.5 Hours)
(Module ID 27112) Describes the most common roof types and introduces basic roof framing components. Includes instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers stick-built and truss-built roofs, and includes the basics of roof sheathing installation.

Basic Stair Layout (12.5 Hours)
(Module ID 27110) Introduces stair types, basic stair system components, and common codes associated with stairway construction. Explains essential stairway construction techniques, including how to construct stringers, measure and calculate rise and run, and build concrete stairway forms.

Building Envelope Systems (12.5 Hours)
(Module ID 27109) Introduces the concepts of moisture and insulation control from the ground up. Describes types of building wrap, windows, skylights and doors, while providing instructions for installation.
**Carpentry**

**MODULES**

The modules listed below are all included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Orientation to the Trade** (2.5 Hours)
(Module ID 27101-13) Reviews the history of the trade, describes the apprentice program, identifies career opportunities for carpenters and construction workers, and lists the skills, responsibilities, and characteristics a worker should possess. Emphasizes the importance of safety in the construction industry.

**Building Materials, Fasteners, and Adhesives**
(Module ID 27102-13) Introduces the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Also describes the fasteners and adhesives used in construction work. Discusses the methods of squaring a building.

**Hand and Power Tools** (70 Hours)
(Module ID 27103-13) Provides descriptions of hand tools and power tools used by carpenters. Emphasizes safe and proper operation, as well as care and maintenance.

**Introduction to Construction Drawings, Specifications, and Layout** (22.5 Hours)
(Module ID 27104-13) Covers the techniques for reading and using construction drawings and specifications, with an emphasis on drawings and information relevant to the carpentry trade. Introduces quantity takeoffs.

**Floor Systems** (25 Hours)
(Module ID 27105-13) Covers framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials.

**Wall Systems** (10 Hours)
(Module ID 27111-13) Describes procedures for laying out and framing walls, including rough-in, window and door openings, constructing corners, partition TS, and bracing walls. Includes the procedure to estimate the materials required to frame walls.

**Ceiling Joist and Roof Framing** (47.5 Hours)
(Module ID 27112-13) Describes types of roofs and provides instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers stick-built and truss-built roofs. Includes the basics of roof sheathing installation.

**Introduction to Building Envelope Systems**
(21 Hours)
(Module ID 27113-13) Introduces the concept of the building envelope and explains its components. Describes types of windows, skylights, and exterior doors, and provides instructions for installation.

**Basic Stair Layout** (12.5 Hours)
ISBN 978-0-13-340306-0
(Module ID 27110-13) Introduces types of stairs and common building code requirements related to stairs. Focuses on techniques for measuring and calculating rise, run, and stairwell openings, laying out stringers, and fabricating basic stairways.

**Exterior Finishing**
(Module ID 27108-13) Discusses types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

**Thermal and Moisture Protection** (7.5 Hours)
(Module ID 27203-13) Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

**Roofing Applications**
(Module ID 27202-13) Describes how to properly prepare the roof deck and install roofing for residential and commercial buildings.

**Doors and Door Hardware**
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as lockssets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

**MODULES**

All of the modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Commercial Drawings**
(Module ID 27201-13) Describes how to read and interpret a set of commercial drawings and specifications.

**Cold-Formed Steel Framing**
(Module ID 27205-13) Describes the types and grades of steel framing materials, and includes instructions for selecting and installing metal framing for interior and exterior walls, loadbearing and nonbearing walls, partitions, and other applications.

**Exterior Finishing**
(Module ID 27204-13) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.
Drywall Installation (15 Hours)
(Module ID 27206-13) Describes the various types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Contains detailed instructions for installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also discusses fire- and sound-rated walls.

Drywall Finishing (17.5 Hours)
ISBN 978-0-13-377913-4
(Module ID 27207-13) Describes the materials, tools, and methods used to finish and patch gypsum drywall. Also discussed automatic and manual taping and finishing tools.

Suspension Ceilings Elective for Residential Path
(Module ID 27208-13) Describes the materials, layout, and installation procedures for many types of suspended ceilings used in commercial construction, as well as ceiling tiles, drywall suspension systems, and pan-type ceilings.

Window, Door, Floor, and Ceiling Trim
(25 Hours)
(Module ID 27210-13) Describes the different types of trim used in finish work and focuses on the proper methods for selecting, cutting, and fastening trim to achieve a professional finished appearance.

Rigging Equipment (10 Hours)
ISBN 978-0-13-378675-0
(Module ID 38101-11; from Basic Rigger, Second Edition) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, and chains. Discusses attaching hardware such as shackles, eyebolts, and hooks, as well as rigging knots. Explains sling angles. Covers tuggers, jacks, hoists, and ratchet-lever hoists.

Rigging Practices (15 Hours)
(Module ID 38102-11; from Basic Rigger, Second Edition) Describes basic rigging and crane hazards as well as safety practices related to general rigging activities, working around power lines, and emergency response. Covers procedures for using slings and rigging pipes and valves.

Trenching and Excavating (15 Hours)
(Module ID 27306-14) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shoring, shielding, and sloping trenches and excavations; trenching safety requirements, including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

Reinforcing Concrete (15 Hours)
(Module ID 27304-14) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27307-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Vertical Formwork (22.5 Hours)
(Module ID 27308-14) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and steels, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

Horizontal Formwork (15 Hours)
(Module ID 27309-14) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and restroing systems.

Handling and Placing Concrete (20 Hours)
(Module ID 27305-14) Covers tools, equipment, and procedures for safely handling, placing, and finishing concrete. Describes joints made in concrete structures and the use of joint sealants.

Tilt-Up Wall Systems (17.5 Hours)
(Module ID 27310-14) Describes how tilt-up concrete construction is used and how tilt-up panels are formed, erected, and braced. Covers the installation of rebar and types of embedments used to lift and brace the panels. Also covers methods used to create architectural and decorative treatments.

MODULES
All of the modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Site Layout One: Differential Leveling (20 Hours)
(Module ID 27401-14) Covers the principles, equipment, and methods used to perform differential leveling. Also covers the layout responsibilities of surveyors, field engineers, and carpenters; interpretation and use of site/plot plan drawings; use of laser instruments; and methods used for on-site communication.

Introduction to Construction Equipment (7.5 Hours)
(Module ID 27406-14) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactor, and forklift. An overview of general safety, operation, and maintenance procedures is provided.

Introduction to Oxyfuel Cutting and Arc Welding (20 Elective Hours)
(Module ID 27407-14) Introduces the equipment, procedures, and safety practices used in cutting steel with oxyfuel equipment, as well as shielded metal arc welding, gas-tungsten arc welding, and gas metal arc welding. Labs include practice in cutting and welding techniques.

Site Preparation (7.5 Hours)
(Module ID 27409-14) Covers the planning process that precedes the start of work on a construction site, including environmental considerations, personnel issues, access roads, traffic control, permits, site safety, utilities, and crane-related concerns.

Fundamentals of Crew Leadership (20 Hours)
(Module 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader's role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Cabinetmaking

35 Hours
Revised: 2015, Third Edition
Module ID 27501-15

PAPERBACK ISBN

DIGITAL
NCCERconnect Access Card: $99.99 9780135215562

This module expands on the knowledge and skills gained through the Carpentry Curriculum and provides the basic information needed to construct and apply finishes to custom cabinetry. It identifies and discusses various types of wood products, wood-jointing techniques, power tools, cabinet doors, shelves, and hardware. Specific guidance is also provided for the installation of laminated countertops.

Trainee Guide: $69.99

PAPERBACK

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Concrete Construction (10 Hours)
(Module ID 23101) Introduces the role of concrete in construction and identifies basic concrete properties and characteristics. Provides an overview of the concrete construction process, identifies opportunities available to concrete craftworkers, and describes the purpose and structure of apprenticeship programs.

Concrete Safety (7.5 Hours)
(Module ID 23102) Describes the role of OSHA in the workplace and presents safety hazards unique to the concrete construction environment, including the control of silica dust. Identifies and describes the PPE concrete craftworkers commonly require.

Fall Protection Orientation (8 Hours)
(Module ID 75901; from Fall Protection Orientation) Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Concrete Tools and Equipment (12.5 Hours)
(Module ID 23104) Introduces trainees to a wide variety of both hand tools and powered equipment used in concrete construction, including screws, floats, trowels, saws, grinders, and mixing equipment. Tips for the safe use of tools and equipment are also provided.

Preparing for Placement (15 Hours)
(Module ID 23105) Provides an overview of common concrete-construction tasks that take place before placement begins. Covers elevations and subgrade preparation, as well as basic form types, joints, and pre-placement inspections.

Reinforcing Concrete (15 Hours)
(Module ID 27304; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Curing and Protecting Concrete (10 Hours)
(Module ID 23108) Describes the essential concrete curing and protection process. Introduces various approaches to curing and the primary factors that significantly affect the resulting strength and durability of the placement.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27307; from Carpentry Level Three) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Vertical Formwork (22.5 Hours)
(Module ID 27308; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

Horizontal Formwork (15 Hours)
(Module ID 27309; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

Preparing for Placement (17.5 Hours, Elective)
(Module ID 23109) Describes the construction of various placements that are common to many building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Prepping for Placement (15 Hours)
(Module ID 23104) Explains the installation of rebar and types of rebar used in concrete construction.

Site Concrete (35 Hours)
(Module ID 27304; from Carpentry Level Three) Describes the installation of rebar and types of rebar used in concrete construction.

Properties of Concrete (15 Hours)
(Module ID 23212) Presents the many possible components of concrete, including the desirable properties of the chosen aggregate and water. Includes a review of chemical and mineral admixtures, fibers, and special types of concrete. Also covers the basics of concrete testing.

Estimating Concrete Quantities (12.5 Hours)
(Module ID 23202) Reviews basic mathematical calculations for area and volume as well as metric conversions to prepare trainees for the module topic. A review of drawings and their interpretation is also provided, along with guidance for estimating the volume of concrete needed in placements of various shapes.

Tilt-Up Wall Systems (17.5 Hours, Elective)
(Module ID 27310; from Carpentry Level Three) Describes how tilt-up concrete construction is used and how tilt-up panels are formed, erected, and braced. Covers the installation of rebar and types of embedments used to lift and brace the panels. Also covers methods used to create architectural and decorative treatments.

Paving (12.5 Hours, Elective)
(Module ID 23206; from Heavy Highway Level Two) Describes paving operations, paving equipment, recycling processes, and quality control requirements for both concrete and hot-mix asphalt paving.

Architectural Finishes (22.5 Hours)
(Module ID 23205) Identifies and describes various architectural finishes and how they are applied. Covers the coloration of concrete surfaces and how to use form liners and stamps to create texture. Provides detailed guidance on the creation of exposed aggregate finishes.

Industrial Floors (22.5 Hours)
(Module ID 23206) Presents this key segment of concrete flatwork and the characteristics of industrial floors while explaining how industrial-class floors are created, including pre-placement considerations.

Continued on following page
Concrete Construction Level 2 (Continued)

**Superflat Floors** (20 Hours)  
(Module ID 23207) Describes random-traffic and defined-traffic superflat floors and the flat and level characteristics that set them apart from other slabs. Provides insight into the finishing process and describes how various floor-measurement instruments are used to document the results.

**Surface Treatments** (15 Hours)  
(Module ID 23208) Provides detailed coverage of the many methods used to prepare a concrete surface to meet a specific surface profile, from detergent scrubbing to rotomilling. Also identifies and describes how to apply shakes, protective sealants and coatings, and self-leveling toppings and underlayments.

**Troubleshooting and Quality Control** (15 Hours)  
(Module ID 23220) Defines quality control and discusses fresh-concrete troubleshooting and problem resolution. Provides detailed coverage of concrete field tests and specimen preparation according to ASTM standards.

**Concrete Repair** (20 Hours)  
(Module ID 23210) Provides an overview of the concrete repair process, focusing on repairing concrete with concrete. Explains how hidden concrete faults and embedments are located and how to properly prepare reinforced concrete for placement of the repair material. Coverage of pre-placement and post-placement inspections is also provided.
Construction Craft Laborer

Orientation to the Trade (2.5 Hours)
(Module ID 27101-13; from Carpentry Level One) Reviews the history of the trade, describes the apprentice program, identifies career opportunities for carpenters and construction workers, and lists the skills, responsibilities, and characteristics a worker should possess. Emphasizes the importance of safety in the construction industry.

Building Materials, Fasteners, and Adhesives
(20 Hours)
(Module ID 27102-13; from Carpentry Level One) Introduces the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Also describes the fasteners and adhesives used in construction work. Discusses the methods of squaring a building.

Properties of Concrete
(10 Hours)
(Module ID 27303-14; from Carpentry Level Three) Describes the properties, characteristics, and uses of cement, aggregates, and other materials used in different types of concrete. Covers procedures for estimating concrete volume and testing freshly mixed concrete, as well as methods and materials for curing concrete.

Site Layout One: Differential Leveling
(20 Hours)
(Module ID 27401-14; from Carpentry Level Four) Covers the principles, equipment, and methods used to perform differential leveling. Also covers the layout responsibilities of surveyors, field engineers, and carpenters; interpretation and use of site/plot plan drawings; use of laser instruments; and methods used for on-site communication.

Handling and Placing Concrete
(20 Hours)
(Module ID 27505-14; from Carpentry Level Three) Covers tools, equipment, and procedures for safely handling, placing, and finishing concrete. Describes joints made in concrete structures and the use of joint sealants.

Foundations and Slabs-On-Grade
(20 Hours)
(Module ID 27307-14; from Carpentry Level Three) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

PAPERBACK
ISBN
978-0-13-413096-5

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Reinforcing Concrete (15 Hours)
(Module ID 27304-14; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Vertical Formwork (22.5 Hours)
(Module ID 27308-14; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

Horizontal Formwork (15 Hours)
(Module ID 27309-14; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as sharing and reshoring systems.

Heavy Equipment, Forklift, and Crane Safety (5 Hours)
(Module ID 75122-13; from Field Safety) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

Steel Erection (2.5 Hours)
ISBN 978-0-13-340364-0
(Module ID 75121-13; from Field Safety) Covers common safety precautions related to steel-erection work, including controlled decking zones, hazardous materials and equipment precautions, tool safety, and appropriate personal protective equipment.

Electrical Safety (5 Hours)
(Module ID 75121-13; from Field Safety) Describes the basic precautions necessary to avoid electrical shock, arc, and blast hazards. It also describes the lockout/tagout procedure.

Introduction to Construction Equipment (7.5 Hours)
(Module ID 27406-14; from Carpentry Level Four) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactor, and forklift. An overview of general safety, operation, and maintenance procedures is provided.

Rough Terrain Forklifts (22.5 Hours)
(Module ID 22206-13; from Heavy Equipment Operations Level Two) Covers the uses of forklifts on construction sites. Includes instructions for lifting, transporting, and placing various types of loads, as well as safety, operation, and maintenance procedures.

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102-15; from Welding Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

Elevated Masonry (15 Hours)
(Module ID 28301-14; from Masonry Level Three) Describes how to work safely and efficiently on elevated structures. Explains how to maintain a safe work environment, ensure protection from falls, how to brace walls from outside forces, and how to identify common types of elevated walls. Stresses safety around equipment such as cranes and hoists.

Working from Elevations (5 Hours)
(Module ID 28301-14; from Masonry Level Three) Explains the uses of fall-protection equipment. Covers safety precautions related to elevated work surfaces, including ladders, scaffolding, and aerial lifts.

Your Role in the Green Environment (LEED V4) (15 Hours)
ISBN 978-0-13-294863-0
(Module ID 70101-15) Geared to entry-level craft workers, Your Role in the Green Environment provides pertinent information concerning the green environment, construction practices, and building rating systems. This edition has been updated to reflect LEED v4 with emphasis on standards for building design and construction. The updated content features contemporary issues such as net zero buildings and an expanded focus on issues relevant to international construction.
Ceiling Joist and Roof Framing (40 Hours)
(Module ID 27112-13; from Carpentry Level One) Describes types of roofs and provides instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers stick-built and truss-built roofs. Includes the basics of roof sheathing installation.

Roofing Applications (25 Hours)
(Module ID 27202-13; from Carpentry Level Two) Describes how to properly prepare the roof deck and install roofing for residential and commercial buildings.

Wall Systems (20 Hours)
(Module ID 27111-13; from Carpentry Level One) Describes procedures for laying out and framing walls, including roughing-in door and window openings, constructing corners, partition Ts, and bracing walls. Includes the procedures to estimate the materials required to frame walls.

Exterior Finishing (35 Hours)
(Module ID 27204-13; from Carpentry Level Two) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

Basic Stair Layout (12.5 Hours)
ISBN 978-0-13-340306-0
(Module ID 27110-13; from Carpentry Level One) Introduces types of stairs and common building code requirements related to stairs. Focuses on techniques for measuring and calculating rise, run, and stairwell openings, laying out stringers, and fabricating basic stairways.

Electrical Safety (10 Hours)
(Module ID 26102-14; from Electrical Level One) Covers safety rules and regulations for electricians, including precautions for electrical hazards found on the job. Also covers the OSHA-mandated lockout/tagout procedure.

Residential Electrical Services (15 Hours)
(Module ID 26111-14; from Electrical Level One) Covers the electrical devices and wiring techniques common to residential construction and maintenance. Allows trainees to practice making service calculations. Stresses the applicable NEC® requirements.

Introduction to HVAC (7.5 Hours)
(Module ID 032101-13; from HVAC Level One) Covers the basic principles of heating, ventilating, and air conditioning, career opportunities in HVAC, and how apprenticeship programs are constructed. Basic safety principles, as well as trade licensure and EPA guidelines, are also introduced.

Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)
(Module ID 02111-12; from Plumbing Level One) Explains how DWV systems remove waste safely and effectively. Discusses how system components, such as pipe, drains, traps, and vents work. Reviews drain and vent sizing, grade, and waste treatment. Discusses how building sewers and sewer drains connect the DWV system to the public sewer system.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106-12; from Plumbing Level One) Introduces different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to the manufacturer’s instructions and applicable codes. Discusses pressure testing of plastic pipe once installed.

Copper Pipe and Fittings (12.5 Hours)
(Module ID 02107-12; from Plumbing Level One) Discusses sizing, labeling, and applications of copper pipe and fittings, and reviews the types of valves that can be used on copper pipe systems. Explains proper methods for cutting, joining, and installing copper pipe. Addresses insulation, pressure testing, seismic codes, and handling and storage requirements.

Cabinetmaking (35 Hours)
(Module ID 27501-15) This module expands on the knowledge and skills gained through the Carpentry Curriculum and provides the basic information needed to construct and apply finishes to cabinetry. It identifies and discusses various types of wood products, wood-joining techniques, power tools, cabinet doors, shelves, and hardware. Specific guidance is also provided for the installation of laminated countertops.

Cabinet Installation (10 Hours)
(Module ID 27211-13; from Carpentry Level Two) Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

Introduction to Construction Equipment (7.5 Hours)
(Module ID 27406-14; from Carpentry Level Four) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactor, and forklift. An overview of general safety, operation, and maintenance procedures is provided.

Drywall

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Orientation to the Trade** (5 Hours)
(Module ID 45101-07) Reviews the history of the trade, shows examples of the work involved, describes the apprentice program, identifies career opportunities for construction workers, and lists the responsibilities and characteristics a worker should possess.

**Construction Materials and Methods** (12 Hours)
(Module ID 45102-07) Provides an overview of the materials and techniques used in building and finishing residential and commercial buildings, including wood- and steel-framed structures, masonry construction, and concrete-formed structures.

**Thermal and Moisture Protection** (7.5 Hours)
(Module ID 45103-07) Covers the selection and installation of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

**Drywall Installation** (25 Hours)
(Module ID 45104-07) Discusses types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Describes installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also covers fire- and sound-rated walls.

**Drywall Finishing** (25 Hours)
ISBN 978-0-13-604848-0
(Module ID 45105-07) Covers the materials, tools, and methods used to finish and patch gypsum drywall, including automatic and manual taping tools.

**Commercial Drawings** (25 Hours)
(Module ID 45201-09) Focuses on techniques for reading and using architectural and structural drawings and specifications.

**Steel Framing** (50 Hours)
(Module ID 45202-09) Describes the types and grades of steel framing and provides instructions for selecting and installing steel framing for interior walls, exterior non-bearing walls, and partitions. Also covers engineered framing systems.

**Acoustical Ceilings** (20 Hours)
(Module ID 45203-09) Describes the materials, layout, and installation procedures for suspended ceilings used in commercial construction. Also covers ceiling tiles, drywall suspension systems, and pan-type ceilings.

**Interior Specialties** (15 Hours)
(Module ID 45204-09) Covers the composition and use of specialty interior finishing products, such as vinyl- and fabric-covered panels, wood wall and ceiling panels, and glass fiber-reinforced gypsum (GFRG) panels.

**Exterior Cladding** (20 hours)
(Module ID 45205-09) Covers a variety of specialized exterior finish products, including EIFS, stucco, synthetic veneer stone, panelized cladding, and glass fiber-reinforced concrete (GFRC) panels.

**Specialty Finishes** (15 Hours)
(Module ID 45206-09) Covers the materials, tools, and application methods used for specialized interior finishes, such as sand, marble, clay, and Venetian plaster.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Occupational Overview: The Electrical Industry
(2.5 Hours)
(Module ID 26101-20) Provides an overview of the electrical craft and discusses the career paths available to electricians, including apprenticeship requirements.

Safety For Electricians (10 Hours)
(Module ID 26102-20) Discusses hazards and describes the various types of personal protective equipment (PPE) used to reduce injuries. Covers the standards related to electrical safety and the OSHA-mandated lockout/tagout rule.

Introduction to Electrical Circuits (7.5 Hours)
(Module ID 26103-20) Introduces electrical concepts used in Ohm’s law and how the power equation can be used to determine unknown values. Covers basic atomic theory and electrical theory, electrical schematic diagrams, and electric power equations.

Electrical Theory (7.5 Hours)
(Module ID 26104-20) Introduces basic circuits, as well as the methods for calculating the electrical energy within them. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Introduction to the National Electrical Code
(7.5 Hours)
(Module ID 26105-20) Introduces the NEC® and explains how to use it to find the installation requirements. Provides an overview of the National Electrical Manufacturers Association and Nationally Recognized Testing Laboratories.

Device Boxes (10 Hours)
(Module ID 26106-20) Describes the various types of boxes and explains how to calculate the NEC® fill requirements for outlet advection boxes under 100 cubic inches (1,450 cubic centimeters).

Hand Bending (10 Hours)

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Alternating Current (17.5 Hours)
(Module ID 26201-20) Describes AC circuits and explains how to apply Ohm’s law to solve for unknown circuit values.

Motors: Theory and Application (20 Hours)
(Module ID 26202-20) Covers AC and DC motors, including the main components, circuits, and connections.

Electric Lighting (15 Hours)
(Module ID 26203-20) Introduces the principles of human vision and the characteristics of light. Covers different types of light sources and the operating characteristics and installation requirements of various lighting fixtures.

Conduit Bending (15 Hours)
(Module ID 26204-20) Describes how to make conduit bends using mechanical, hydraulic, and electric benders.

Pull and Junction Boxes (12.5 Hours)
(Module ID 26205-20) Explains how to size and install pull and junction boxes. Identifies various specialty enclosures, including conduit bodies, FS and FD boxes, and handholes.

Conductor Installations (10 Hours)
ISBN 978-0-13-689717-0
(Module ID 26206-20) Describes how to prepare conduit for conductors. Explains how to set up and complete a cable-pulling operation.

Continued on following page
**Cable Tray** (7.5 Hours)  
(Module ID 26301-20) Explains how to calculate branch circuit and feeder loads for residential and commercial applications. Covers various derating factors.

**Conductor Terminations and Splices** (7.5 Hours)  
(Module ID 26302-20) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.

**Grounding and Bonding** (15 Hours)  
ISBN 978-0-13-689735-4  
(Module ID 26209-20) Explains the grounding and bonding requirements of NEC Article 250. Covers how to size the main and system bonding jumpers and the grounding electrode conductor for various AC systems.

**Circuit Breakers and Fuses** (12.5 Hours)  
ISBN 978-0-13-689766-0  
(Module ID 26210-20) Describes the operating principles of circuit breakers and fuses, and explains how to select and install overcurrent devices.

**Control Systems and Fundamental Concepts** (12.5 Hours)  
ISBN 978-0-13-689762-0  
(Module ID 26211-20) Describes the operating principles of contactors and relays, including both mechanical and solid-state devices. Explains how to select and install relays and troubleshoot control circuits.

**Conductor Selection and Calculations** (15 Hours)  
(Module ID 26302-20) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.

**Practical Applications of Lighting** (12.5 Hours)  
(Module ID 26303-20) Discusses switchboards and switchgear, including installation, grounding, maintenance requirements.

**Distribution Equipment** (12.5 Hours)  
(Module ID 26306-20) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. Covers ground fault relay testing.

**Hazardous Locations** (15 Hours)  
(Module ID 26304-20) Describes the construction, operation, and applications of various luminaires. Covers dimming, lighting controls, and energy management systems.

**Standby and Emergency Systems** (10 Hours)  
(Module ID 26403-20) Provides information on selecting, sizing, and installing motor controllers, as well as control circuit pilot devices and basic relay logic.
Electrical Level 4 (continued)

**Advanced Controls** (20 Hours)
(Module ID 26407-20) Discusses applications and operating principles of various control system components, such as solid-state relays, reduced-voltage starters, and adjustable-frequency drives. Covers basic troubleshooting procedures.

**HVAC Controls** (15 Hours)
(Module ID 26408-20) Provides a basic overview of HVAC systems and their controls. Also covers electrical troubleshooting and NEC® requirements.

**Heat Tracing and Freeze Protection** (10 Hours)
ISBN 978-0-13-691095-4
(Module ID 26409-20) Presents heat-tracing and freeze-protection systems along with various applications and installation requirements.

**Motor Operation and Maintenance** (10 Hours)
ISBN 978-0-13-691121-0
(Module ID 26410-20) Covers motor care procedures, including cleaning, testing, and preventive maintenance. Describes basic troubleshooting procedures.

**Medium-Voltage Terminations/Splices** (10 Hours)
(Module ID 26411-20) Identifies types of medium-voltage cable and describes how to make various splices and terminations. Covers hi-pot testing.

**Special Locations** (20 Hours)
ISBN 978-0-13-691118-0
(Module ID 26412-20) Describes the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

**Fundamentals of Crew Leadership** (22.5 Hours)
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

---

**Managing Electrical Hazards**

PAPERBACK

- A copy of NFPA 70E®, Standard for Electrical Safety in the Workplace, 2021 Edition, is required material for this course. To order, contact NFPA at www.nfpa.org or 1-800-344-3555.

Describes how to assess and eliminate shock, arc blast, and arc flash hazards using the practical safe working requirements detailed in NFPA 70E: Standard for Electrical Safety in the Workplace®. Where it is not possible to eliminate a hazard, an energized electrical work permit must be completed, and workers must be protected by appropriate safety procedures and personal protective equipment.

---

**Advanced Electrical Topics**

Much of the technology in emerging fields—such as wireless, integrated, and voice and data systems—has evolved greatly since the publication of Advanced Electrical Topics Volumes One and Two. Because of this, NCCER and Pearson suggest that those teaching a five-year electrical apprenticeship program use the following compilation of modules drawn from EST and Instrumentation.

- Cable Selection 33208-10
- Wire and Cable Terminations 33209-10
- CCTV Systems 33410-12
- Access Control Systems 33411-12
- Buses and Networks 33301-11
- Fiber Optics 33302-11
- Programmable Logic Controllers 12406-03
- Broadband Systems 33403-12
- Distributed Control Systems 12407-03
- Intrusion Detection Systems 33407-12
- Audio Systems 33401-12
- Overview of Nurse Call and Signaling Systems 33409-12

**MODULES**
- The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Limited-Energy Cabling** (20 Hours)
- **ISBN**: 978-0-13-689799-6
- (Module ID 33108) Covers the makeup, identification, and applications of conductors and cables used in limited-energy applications. Describes the tools, materials, and procedures for pulling limited-energy cabling through conduit and raceways.

**Limited-Energy Cable Selection** (10 Hours)
- **ISBN**: 978-0-13-690840-1
- (Module ID 33208) Provides an overview of the types of cable used for limited-energy installations. Also covers methods used to select the proper size and type of cable for a typical low-voltage installation.

**Limited-Energy Cable Termination** (25 Hours)
- **ISBN**: 978-0-13-690834-0
- (Module ID 33209) Provides information and instructions for selecting, installing, and testing connectors and other terminating devices on cables used in limited-energy work, including telecommunications, video, audio, and fiber optic installations.

**Limited-Energy Network Installations** (25 Hours)
- **ISBN**: 978-0-13-681283-8
- (Module ID 33301) Details procedures for connecting computers and other devices using both wired and wireless network connections. Describes components and architecture of ethernet, LAN, and powerline carrier networks.

**Fiber Optics** (25 Hours)
- **ISBN**: 978-0-13-681292-0
- (Module ID 33302) Introduces the types of equipment and methods used in fiber-optic cable installation.

Electronic Systems Technician (EST) has been combined with NCCER’s Electrical series to provide additional career pathways. After completing Electrical Levels 1 and 2, trainees can choose to advance into Electrical Levels 3-4 or EST Levels 3-4.

**PAPERBACK**
- **Trainee Guide**: $99.99
- **ISBN**: 978-0-13-684415-0

**DIGITAL**
- **NCCERconnect Access Card**: $99.99
- **NCCERconnect + Trainee Guide**: $124.99
- **ISBN**: 978-0-13-684421-1

**MODULES**
- The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Audio Systems** (30 Hours)
- **ISBN**: 978-0-13-684414-3
- (Module ID 33401) Introduces and explains audio system components, including input sources, amplifiers, signal processing equipment, and output equipment. Describes power requirements, cabling options, system configuration, and basic design considerations. Reviews common test equipment used for installation and troubleshooting.

**Video Systems** (40 Hours)
- **ISBN**: 978-0-13-684402-0
- (Module ID 33402) Describes the types of equipment used in various video systems and equipment, including both analog and digital video, video signaling, display devices, HDTV, reality technologies and, videoprocessing and distribution.

**Broadband** (25 Hours)
- **ISBN**: 978-0-13-684350-4
- (Module ID 33403) Explains the history of broadband and explores the primary delivery methods, including telephone lines, DSL, ADSL, BPL, cable and fiber optics, satellite, cellular, Wi-Fi®, and emerging technologies such as low earth orbit satellites.

**Media Management Systems** (25 Hours)
- (Module ID 33404) Explains the basic principles behind shared media resources and their access via computer networks, wireless systems, and hardwired applications. Describes media types for both analog and digital platforms. Explores cabling options including fiber optic interfaces.

**Telecommunications Systems** (20 Hours)
- **ISBN**: 978-0-13-684403-7
- (Module ID 33405) Describes the history and updates of basic subscriber systems. Identifies types of telephone technologies, compares multiplexing and modulation, and covers Voice over Internet Protocol (VoIP).

**Residential and Commercial Networks** (15 Hours)
- **ISBN**: 978-0-13-684372-6
- (Module ID 33406) Explains the integration of current and diverse low-voltage systems and the trend toward their singular hub control (or start topology connectivity). Covers implications of user-interfacing technologies. Updated to 2020 NEC® codes as well as future outlook of building networks.

**Intrusion Detection Systems** (30 Hours)
- **ISBN**: 978-0-13-684339-9
- (Module ID 33407) Describes devices such as sensors, notification, control panels, and programming used in intrusion detection security systems. Covers system design and installation guidelines, wiring, testing, and troubleshooting. Emphasizes codes and standards.

Continued on following page
Fire Alarm Systems (40 Hours)
(Module ID 33408) Covers the basics of fire alarm systems, including devices, circuits, system design and installation guidelines, power requirements, control unit programming, testing, and troubleshooting. Explores integration of fire alarms with other systems. Examines both residential and commercial fire alarm applications, emphasizing NEC® requirements and those found in NFPA 72.

Nurse Call and Signaling Systems (15 Hours)
(Module ID 33409) Presents an overview of nurse call and signaling systems as found in hospitals and other healthcare facilities. Covers basic emergency call and duress system requirements based on facility type. Identifies installation requirements based on UL and other building code specifications.

Closed Circuit Television (CCTV) (30 Hours)
(Module ID 33410) Describes the installation and configuration of closed circuit TV systems for small, medium, and large facilities. Explains various equipment and concepts, including cameras, lenses, remote positioning, video recording, cloud storage, and transmission. Covers the roles of the internet and digital technologies. Introduces test and troubleshooting equipment.

Access Control Systems (35 Hours)
(Module ID 33411) Introduces access control systems and applications including, door security and locking devices, card and biometric readers, and current ingress/egress technologies. Emphasizes installation practices as well as building and electrical codes.

EST and Internet of Things (IoT) (10 Hours)
(Module ID 33412) Introduces the history, development, and application of integrated Internet of Things (IoT) technologies as well as their influences on contemporary electronics. Addresses the increased need for component integration and introduces basic IoT devices involved today’s systems. Presents an outlook on the future of IoT and its increased demand for ESTs.
Heavy Equipment Operations

Orientation to the Trade (5 Hours)
(Module ID 22101) Provides an overview of heavy equipment terminology, operations, operator responsibilities, career opportunities, and basic principles of safety.

Heavy Equipment Safety (10 Hours)
(Module ID 22102) Provides a comprehensive overview of safety requirements on job sites with emphasis on OSHA, MSHA, and NIOSH requirements. Presents basic requirements for personal protection, safe equipment operations and maintenance, and HAZCOM.

Identification of Heavy Equipment (5 Hours)
(Module ID 22103) Teaches trainees the use of the different types of hand and power tools they will use on the job. Provides information on the appropriate use of tools for different tasks, and reviews tool maintenance and safety issues.

Basic Operational Techniques (27.5 Hours)
(Module ID 22104) Covers basic math skills required for site excavation work. Includes methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements on a job.

Interpreting Civil Drawings (20 Hours)
(Module ID 22207-13) Explains how to read site plans to calculate cut and fill requirements. Provides instruction and practice in interpreting both roadway and construction site drawings used for excavation and grading work.

Site Work (20 Hours)
(Module ID 22210-13) Expands on information covered in Level 1 in relation to setting and interpreting grade stakes. Also provides information and instructions on controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.

Utility Tractors (17.5 Hours)
(Module ID 22105) Covers operation of general utility tractors in the construction industry. Describes duties and responsibilities of the operator, safety rules for operation, the attachment of implements, and basic preventive maintenance practices.

Introduction to Earthmoving (12.5 Hours)
ISBN 978-0-13-663924-4
(Module ID 22201) Provides a broad introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.

Grades (17.5 Hours)
(Module ID 22106) Introduces the concept of preparing graded surfaces using heavy equipment. Describes identification of construction stokes and interpretation of marks on each type of stoke. Discusses the process for grading slopes.

Vertical-Mast Sit-Down Counterbalance Forklifts (7.5 Hours)
(Module ID 22107) Covers operation of vertical-mast Sit-Down Counterbalance (SDB) forklifts, commonly known as conventional forklifts. Describes duties and responsibilities of the operator, safety rules for operation, and distinguishing features. Includes operation for both indoor and outdoor environments.

On-Road Dump Trucks (20 Hours)
(Module ID 22202-13) Covers uses, inspection, startup, shutdown, operator maintenance, and operation of dump trucks used to carry loads on public highways. Includes operation of dump trucks in normal and emergency situations.

Excavation Math (17.5 Hours)
(Module ID 22207-13) Covers basic math skills required for site excavation work. Includes methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements on a job.

Soils (10 Hours)
(Module ID 22308-13) Describes soil classification systems and explains how shrink and swell factors affect equipment selection. Discusses how soil conditions affect equipment performance and explains techniques for working with various types of soils.

Skid Steers (22.5 Hours)
(Module ID 22212-13) Describes the many uses of skid steers and the attachments available for these machines. Covers safety practices, as well as inspection, startup, shutdown, and operation of skid steers.

Loaders (17.5 Hours)
(Module ID 22212-13) Covers the uses of wheel and track loaders, as well as operator maintenance, loader safety, and operating procedures. Includes procedures for using loaders in excavation, grading, and demolition work.

Scrapers (17.5 Hours)
(Module ID 22214-13) Describes the types of scrapers used in site preparation, as well as the safe practices associated with the operation of scrapers. Covers operator inspection and maintenance requirements, along with startup, shutdown, and operating techniques.

Heavy Equipment Operations Level 3

**L3 HEAVY EQUIPMENT OPERATIONS**

**Curriculum Notes**
- 215 Hours
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

DIGITAL

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Finishing and Grading (25 Hours)**
(Module ID 22307-14) Provides training on common types of equipment and instruments used for finish grading; materials and methods used to stabilize soils and control soil erosion; and finishing and grading methods used for various applications.

**Compaction Equipment (25 Hours)**
(Module ID 22203-14) Provides training on common types of compaction equipment; the primary instruments, controls, and attachments of a roller; safety guidelines associated with compaction equipment; and prestart inspections, preventive maintenance, and proper operating procedures. Presents factors involved in work activities associated with a roller.

**Backhoes (30 Hours)**
(Module ID 22303-14) Identifies and describes the common uses, types, components, instruments, controls, and attachments of backhoes. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with backhoes.

**Off-Road Dump Trucks (30 Hours)**
(Module ID 22310-14) Identifies and describes the common types, uses, and components of off-road dump trucks. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Covers basic startup, driving maneuvers, loading, and dumping procedures for off-road dump trucks.

**Dozers (30 Hours)**
ISBN 978-0-13-382759-0
(Module ID 22302-14) Identifies and describes the common uses, types, and components of dozers. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with dozers.

**Excavators (35 Hours)**
(Module ID 22304-14) Identifies and describes the common types, uses, and components of excavators. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with excavators.

**Motor Graders (40 Hours)**
(Module ID 22305-14) Identifies and describes the common uses and types of motor graders. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with motor graders.
Level 1: Heavy Highway Construction

**Modules**
- **Orientation to the Trade** (7.5 hours) ISBN 978-0-13-448575-1
  (Module ID 36101-17) Introduces the trainees to careers, equipment, and processes used in the construction of highways and bridges.
- **Identification of Equipment Used in Heavy Highway Construction** (10 hours) ISBN 978-0-13-448579-9
  (Module ID 36111-17) Describes the types of heavy equipment, utility equipment, and cranes used in the construction of bridges and highways. Trainees will be expected to recognize the equipment and describe its use.
- **Excavation Math** (17.5 hours) ISBN 978-0-13-340323-7
  (Module ID 22207-13) Covers basic math skills required for site excavation work. Includes methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements on a job.
- **Soils** (10 hours) ISBN 978-0-13-340326-8
  (Module ID 22210-13) Expands on information covered in Level 1 in relation to setting and interpreting grade stakes. Also provides information and instructions on controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.
- **Field Safety** (20 hours) ISBN 978-0-13-340328-2
  (Module ID 22208-13) Describes safety considerations related to power lines, weather conditions, and specific crane functions.
  (Module ID 22307-14) Provides an introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.
  (Module ID 21102 from Mobile Crane Operations, Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.
- **Interpreting Civil Drawings** (20 hours) ISBN 978-0-13-340352-1
  (Module ID 36110-17) Describes the types of heavy equipment, utility equipment, and cranes used in the construction of bridges and highways. Trainees will be expected to recognize the equipment and describe its use.
- **Mobile Crane Operations, Level Two** (Module ID 21106) Discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.
- **Mobile Crane Operations, Level One** (Module ID 21107) Provides a broad introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.
- **Trenching and Excavating** (15 hours) ISBN 978-0-13-378678-1
  (Module ID 23706-14) Discusses the types and bearing capacities of soils; procedures used in placing and compacting earth to support foundations and structures; and the use of earth-moving equipment in excavating trenches and excavations.
- **Plant Operations** (7.5 hours) ISBN 978-0-13-448584-3
  (Module ID 36107-17) Discusses the types and bearing capacities of soils; procedures used in placing and compacting earth to support foundations and structures; and the use of earth-moving equipment in excavating trenches and excavations.

Level 2: Heavy Highway Construction

**Modules**
- **Introduction to Earthmoving** (12.5 hours) ISBN 978-0-13-292310-1
  (Module ID 22201-12) Provides a broad introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.
- **Soils** (10 hours) ISBN 978-0-13-340326-8
  (Module ID 22210-13) Expands on information covered in Level 1 in relation to setting and interpreting grade stakes. Also provides information and instructions on controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.
- **Field Safety** (20 hours) ISBN 978-0-13-340328-2
  (Module ID 22208-13) Describes safety considerations related to power lines, weather conditions, and specific crane functions.
  (Module ID 22307-14) Provides an introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.
- **Trenching and Excavating** (15 hours) ISBN 978-0-13-378678-1
  (Module ID 23706-14) Discusses the types and bearing capacities of soils; procedures used in placing and compacting earth to support foundations and structures; and the use of earth-moving equipment in excavating trenches and excavations.
- **Plant Operations** (7.5 hours) ISBN 978-0-13-448584-3
  (Module ID 36107-17) Discusses the types and bearing capacities of soils; procedures used in placing and compacting earth to support foundations and structures; and the use of earth-moving equipment in excavating trenches and excavations.

Continued on the following page
Paving (12.5 Hours)
(Module ID 36108-17) Describes paving operations, paving equipment, recycling processes, and quality control requirements for both concrete and hot-mix asphalt paving.

Horizontal Formwork (15 Hours)
(Module ID 27309-14; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

Vertical Formwork (22.5 Hours)
(Module ID 27308-14; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

Reinforcing Concrete (15 Hours)
(Module ID 27304-14; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Working with Concrete (15 Hours)
(Module ID 36112-17) Introduces the trainees to the safety concerns associated with concrete, as well as concrete testing, concrete admixtures, and the proper procedure for placing concrete.

Trade Drawings One (12.5 Hours)
(Module ID 30108-11; from Ironworking Level One) Identifies the materials used in steel-framed buildings. Explains how to read basic structural blueprints.

Structural Ironworking One (7.5 Hours)
(Module ID 30109-11; from Ironworking Level One) Identifies the types of construction that utilize structural steel, the components of the structures, and the process involved in erecting a steel structure. Explains the principles of structural stresses and the requirements of bolted connections.

Bridge Construction (20 Hours)
(Module ID 36201-17) Describes the common types of bridges, along with the components that make up the substructure and superstructure of a bridge. The module also discusses the types of materials used in bridge construction, presents basic surveying equipment and practices, and explains how to interpret bridge drawings.

Bridge Foundations (10 Hours)
(Module ID 36202-17) Describes the types of footings used to support bridges, as well as various types of piles and pile-driving methods. Safety practices associated with pile driving on land and in marine environments are also covered, along with environmental protection issues.

Bridge Formwork (22.5 Hours)
(Module ID 36203-17) Describes the forms used to fabricate concrete walls, columns, footings, pile caps, and other bridge structures. This module covers site-built and manufactured forming systems and includes instructions for cleaning and storing forms.

Hydroblasting

PAPERBACK
Trainee Guide: $29.99

Includes the newest waterjet safety technologies, methods, and equipment. Also provides expanded information on shrouds, shielding, checking, and grounding.

To Order Call: 1-800-922-0579
Trade Mathematics (10 Hours)
(Module ID 03102) Explains how to solve HVACR trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

Basic Electricity (15 Hours)
(Module ID 03106) Introduces the concept of power generation and distribution, common electrical components, AC and DC circuits, electrical safety as it relates to the HVACR field, and reading and interpreting wiring diagrams.

Introduction to Heating (15 Hours)
(Module ID 03108) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service. Introduces temperature measurement calculations.

Introduction to Cooling (30 Hours)
(Module ID 03107) Explains the fundamental operating concepts of the refrigeration cycle and introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Discusses major components of cooling systems as well as their controls, including temperature switches.

Air Distribution Systems (15 Hours)
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Basic Copper and Plastic Piping Practices (12.5 Hours)
(MODULE ID 03101) Explains how to identify types of copper tubing and fittings used in the HVACR industry and how they are mechanically joined. Introduces push-to-connect and press-to-connect fittings. Also presents the identification and application of various types of plastic piping including PEX tubing, along with their common assembly and installation practices. Introduces pressure testing refrigerant lines.

Soldering and Brazing (10 Hours)
(MODULE ID 03104) Introduces the equipment, techniques, and materials used to safely join copper tubing through both soldering and brazing. Covers the required personal protective equipment, preparation, and work processes in detail. Also provides the procedures for brazing copper to dissimilar materials.

Basic Carbon Steel Piping Practices (10 Hours)
ISBN 978-0-13-794985-4
(MODULE ID 03105) Explains how to identify various carbon steel piping materials and fittings. Covers the joining and installation of threaded and grooved carbon steel piping systems, including detailed descriptions of threading and grooving techniques.
Leak Detection, Evacuation, Recovery, and Charging (30 Hours)
(Module ID 03285) Covers refrigerant handling and equipment servicing procedures for HVAC systems in an environmentally safe manner.

Metering Devices (12.5 Hours)
(Module ID 03030) Covers the operating principles, applications, installation, and adjustment of fixed and adjustable expansion devices used in air conditioning equipment.

Heat Pumps (20 Hours)
(Module ID 03211) Covers the principles of reverse cycle heating. Describes the operation of heat pumps and explains how to analyze heat pump control circuits. Includes heat pump installation and service procedures.

HVAC Level 4

Curriculum Notes

- 157.5 Hours
- Updated in 2018.
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

DIGITAL ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Water Treatment (10 Hours)
ISBN 978-0-13-546229-4
(Module ID 03308) Explains water problems encountered in heating and cooling systems and identifies water treatment methods and equipment. Covers basic water testing procedures and chemistry.

Indoor Air Quality (12.5 Hours)
(Module ID 03403) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

Energy Conservation Equipment (7.5 Hours)
ISBN 978-0-13-546214-0
(Module ID 03404) Covers heat recovery/reclaim devices, as well as other energy recovery equipment used to reduce energy consumption in HVAC systems.

Building Management Systems (12.5 Hours)
(Module ID 03405) Explains how computers and microprocessors are used to manage zoned HVAC systems. Provides coverage of various network protocols and systems controllers, and introduces trainees to the various means of connection and system interface.

System Air Balancing (15 Hours)
(Module ID 03402) Covers air properties and gas laws, as well as the use of psychrometric charts. Describes the tools, instruments, and procedures used to balance an air distribution system.

System Startup and Shutdown (15 Hours)
(Module ID 03406) Presents the procedures for the startup and shutdown of hot water, steam heating, chilled water, and air handling systems. Also covers the startup and shutdown of typical cooling towers and packaged HVAC units. The procedures for both short- and long-term shutdowns are included.

Construction Drawings and Specifications (12.5 Hours)
(Module ID 03401) Teaches how to interpret drawings used in commercial construction, including mechanical drawings, specifications, shop drawings, and as-builds. Explains how to perform takeoff procedures for equipment, fittings, ductwork, and other components.

Commercial/Industrial Refrigeration Systems (20 Hours)
(Module ID 03408) Expands on the study of product and process refrigeration equipment by describing systems used in cold storage and food processing applications, as well as transportation refrigeration. Various types of defrost systems are covered in detail.

Alternative and Specialized Heating and Cooling Systems (10 Hours)
(Module ID 03409) Describes alternative devices used to reduce energy consumption, including wood, coal, and pellet-fired systems, waste-oil heaters, geothermal heat pumps, solar heating, in-floor radiant heating, and direct-fired makeup units. Also introduces application-specific computer room environmental and air turnover systems.

Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) While this module has been designed to assist the recently promoted crew leader, it is beneficial for anyone in management. The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

**PAPERBACK ISBN**

- 978-0-13-604508-3
- 978-0-13-604510-6

**Basic Safety (15 Hours)**

(Module ID 00101-04; from Core, Third Edition) Explains the safety obligations of workers, supervisors, and managers to ensure a safe workplace. Discusses the causes and results of accidents and the dangers of rationalizing risk. Reviews the role of company policies and OSHA regulations in maintaining a safe workplace. Introduces common job-site hazards and protections such as lockout/tagout, personal protective equipment (PPE), and HazCom.

**Basic Rigging (20 Hours)**

(Module ID 00106-04; from Core, Third Edition) Explains how ropes, chains, hoists, loaders, and cranes are used to move material and equipment from one location to another on a job site. Describes inspection techniques and load-handling safety practices. Also reviews American National Standards Institute (ANSI) hand signals.

**Introduction to the Trade (5 Hours)**

(Module ID 69101-09) Provides an introduction to the coatings industry, including career opportunities and an introduction to coatings safety.

**Surface Preparation (100 Hours)**

(Module ID 69103-09) Describes types of coatings, their advantages and disadvantages, applications, and specific preparations required.

**Surface Preparation Two (80 Hours)**

(Module ID 69205-10) Explains how to identify the surface condition of common substrates. Provides specific training in surface-preparation equipment. Describes inspection and documentation of test equipment, and processes.

**Industrial Coatings (15 Hours)**

(Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

**Health and Safety, Debris Management, Containment, and Ventilation (47.5 Hours)**

(Module ID 69105-09) Teaches proper health and safety procedures for operators applying coatings in an industrial workplace. The use of personal protection equipment, debris management, and proper containment and ventilation procedures are discussed.

**Coating Applications Two (100 Hours)**

(Module ID 69207-10) Covers the setup, maintenance, and disassembly of conventional air spray, airless spray, air-assisted airless spray, and HVLP spraying equipment, including testing and documentation. Also covers overcoating and explains how to use wet and dry film thickness gauges.
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (2.5 Hours)
(Module ID 40101-07) Covers the history of the trade, and provides an overview of the industrial maintenance craft. Describes apprenticeship and training programs, as well as career opportunities. Also describes the responsibilities and characteristics of successful workers.

Fasteners and Anchors (5 Hours)
(Module ID 40103-07) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

Oxyfuel Cutting (17.5 Hours)
(Module ID 40104-07) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 40105-07) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 40106-07) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 40107-07) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Gaskets and Packing (10 Hours)
(Module ID 40105-07) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 40106-07) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 40107-07) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Alternating Current (20 Hours)
(Module ID 40204-08) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Test Equipment (10 Hours)
(Module ID 40205-08) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Flow, Pressure, Level, and Temperature (15 Hours)
(Module ID 40206-08) Presents devices used to measure flow, pressure, level, and temperature, along with their principles of operation.
continued on following page
Industrial Maintenance Electrical & Instrumentation Technician Level 4

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Standby and Emergency Systems**
(12.5 Hours)
(Module ID 40401-09) Explains the installation, utilization, and maintenance requirements for standby and emergency electrical systems.

**Basic Process Control Elements, Transducers, and Transmitters**
(15 Hours)
(Module ID 40402-09) Discusses sensing and transmitting devices used in an instrumentation loop, along with the process variables measured by the detectors or sensors. Gives examples of technical manuals and specification sheets. Explains how control devices are selected, and how to draw basic control loop diagrams that include a measuring element, a transducer, and a transmitter.

**Pneumatic Control Valves, Actuators, and Positioners**
(40 Hours)
(Module ID 40404-09) Covers the construction, operation, and uses of control valves, actuators, and positioners that are driven, and in some cases controlled by, compressed air. Explains the installation and maintenance of these devices, and includes alignment and troubleshooting procedures.

**Performing Loop Checks**
(7.5 Hours)
(Module ID 40405-09) Covers loop check steps, including verifying mechanical installation, validating that the loop has correct tag numbers, performing loop checks, and proving the loop.

**Troubleshooting and Commissioning a Loop**
(10 Hours)
(Module ID 40406-09) Teaches troubleshooting techniques used to locate problems in control loops, and how to isolate a loop in order to troubleshoot it. Covers commissioning of a loop once it is repaired, loop checked, and calibrated.

**Process Control Loops and Tuning**
(20 Hours)
(Module ID 40407-09) Describes control loops, devices, and terms. Introduces formulas and their applications to PID control. Offers a theory-based approach to PID control and its application in industrial process control. Addresses open, closed, and visual loop tuning.

**Data Networks**
(15 Hours)
(Module ID 40408-09) Introduces terms associated with data network devices and computers used in industrial facilities. Explains how data network devices and computers are interconnected for communication purposes. Describes how open connectivity is used in industrial data networks, and explores the hardware devices used in a data highway system.

**Programmable Logic Controllers**
(17.5 Hours)
(Module ID 40409-09) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

**Distributed Control Systems**
(17.5 Hours)
ISBN 978-0-13-609137-0
(Module ID 40410-09) Describes how DCS was developed by combining the technologies of single loop control, direct digital control, and supervisory control. Covers DCS hardware requirements, how control loops are implemented into a DCS, types of data transmission used in DCS, communication protocols, and human interfaces.
Industrial Maintenance Mechanic Level 2 (continued)

Distillation Towers and Vessels (20 Hours)
(Module ID 32210-07) Introduces the various types and functioning of distillation towers and vessels, including recovery vessels and condensate processing.

Heaters, Furnaces, Heat Exchangers, Cooling Towers, and Fin Fans (30 Hours)
(Module ID 32211-07) Introduces equipment used to transfer and remove heat from systems in process.

Introduction to Tube Work (10 Hours)
(Module ID 32212-07) Covers the basics of working with heat exchanger and furnace tubing and tube sheets.

L3 INDUSTRIAL MAINTENANCE MECHANIC

PAPERBACK
ISBN
Trainee Guide: $99.99
978-0-13-604496-3

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Advanced Trade Math (30 Hours)
(Module ID 32301-08) Explains right triangle trigonometry and its use in the trade. Also covers interpolation, equilateral isoceles triangles and the laws of acute triangles.

Compressors and Pneumatic Systems (35 Hours)
(Module ID 32403-09) Describes the theory and practice of compressing and transporting gases. Explains the types and principles of compressors and compressed air treatment equipment, as well as compressed air use and safety.

Conventional Alignment (30 Hours)
(Module ID 32306-08) Covers types of misalignment, aligning couplings using a straightedge and feeler gauge, adjusting parallel and angular alignment, using a dial indicator, and eliminating coupling stress.

Compressors and Pneumatic Systems (35 Hours)
(Module ID 32403-09) Describes the theory and practice of compressing and transporting gases. Explains the types and principles of compressors and compressed air treatment equipment, as well as compressed air use and safety.

Conventional Alignment (30 Hours)
(Module ID 32306-08) Covers types of misalignment, aligning couplings using a straightedge and feeler gauge, adjusting parallel and angular alignment, using a dial indicator, and eliminating coupling stress.

Troubleshooting and Repairing Gearboxes (20 Hours)
(Module ID 32408-09) Describes types and operation of gearboxes, and gearbox diagnostics. Explains how to troubleshoot, remove, and disassemble gearboxes, how to identify gear wear patterns, and how to install and maintain gearboxes.

Advanced Topics

Advanced Towers and Vessels (15 Hours)
ISBN 978-0-13-610455-1
(Module ID 32501-09) Introduces the basics of reactor and refinery processes, including cat crackers, vacuum, and distillation. Also teaches the use of hydraulic torquing and tensioning equipment.

PAPERBACK
Trainee Guide: $69.99
978-0-13-383080-4

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Instrumentation Safety Practices** (12.5 Hours)
(Module ID 12115-14) Covers precautions for electrical hazards found on the job and teaches the OSHA-mandated lockout/tagout procedure. Identifies safety practices related to potentially hazardous tools and materials.

**Craft-Related Mathematics** (10 Hours)
(Module ID 12119-14) Covers basic concepts of the metric system and the conversion of English units to metric units. Also reviews basic algebra, geometric figures, and calculations associated with triangles.

**Instrument Drawings and Documents Part One** (7.5 Hours)
(Module ID 12107-14) Identifies and describes the types of drawings used in instrumentation work and familiarizes trainees with basic instrument symbols, lines, and abbreviations used on drawings.

**Inspect, Handle, and Store Instrumentation Materials** (2.5 Hours)
(Module ID 12304-14) Covers the methods used in receiving, inspecting, handling, and storing project-related instrumentation equipment.

**Electrical Systems for Instrumentation** (12.5 Hours)
(Module ID 12116-14) Covers basic electrical concepts and terms, DC circuit calculations, electrical measuring instruments, and electrical wiring.

**Steel Piping Practices** (10 Hours)
(Module ID 12117-14) Covers both carbon steel and stainless steel piping measuring 2” as it applies to instrumentation work. Includes instructions for calculating pipe cut length, cutting, deburring, reaming, and threading pipe.

**Hoses** (7.5 Hours)
(Module ID 12113-14) Describes different types of hoses and related fittings, along with proper storage and handling. Includes instructions for cutting hoses and installing standard reusable fittings.

**Fasteners** (7.5 Hours)
(Module ID 12106-14) Explains how to properly identify, select, and install threaded and non-threaded fasteners and anchors used in instrumentation work.

**Gaskets, O-Rings, and Packing** (10 Hours)
(Module ID 12108-14) Teaches how to recognize, select, and properly install gaskets, packing, and O-rings. Covers the various materials used in gaskets and O-rings, along with their applications and limitations.

**Lubricants, Sealants, and Cleaners** (7.5 Hours)
ISBN 978-0-13-378844-0
(Module ID 12109-14) Covers the proper use, storage, handling, and safety practices associated with various lubricants, cutting fluids, sealants, and cleaners. Includes coverage of the tools and materials used in applying lubricants and cleaning products.

**Tubing** (75 Hours)
(Module ID 12111-14) Explains how to identify, inspect, use, and maintain the various hand and power tools used by instrument fitters and technicians.

**Instruments and Related Equipment** (15 Hours)
(Module ID 12118-14) Introduces basic test equipment used in low-voltage work. Also covers specialized test equipment such as signal generators, wattmeters, cable testers, and RF analyzers.

**Installing Field-Mounted Instruments** (25 Hours)
ISBN 978-0-13-378857-0
(Module ID 12213-15) Covers selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

**LEVEL 2**

**Curriculum Notes**
- 182.5 Hours
- Revised: 2016, Third Edition
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $99.99
978-0-13-413101-6

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Temperature, Pressure, Level, and Flow** (15 Hours)
(Module ID 12110-15) Examines the characteristics of temperature, pressure, level, and flow, and describes the units of measure for each variable. Introduces common devices used to measure these process variables and the basic principles of operation for each device.

**Instrument Fitter’s Math** (15 Hours)
(Module ID 12301-15) Discusses the application of right triangles in bending and installing tubing and conduit as it applies to instrumentation. Shows how to use a scientific calculator in applying instrumentation piping and fitting math.

**Instrument Drawings and Documents, Part Two** (17.5 Hours)
(Module ID 12202-15) Covers reading and interpreting piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics to enable the identification of types of instrumentation and the specifications for installation.

**Test Equipment** (10 Hours)
(Module ID 33205-10; from Electronic Systems Technician Level Two) Covers the selection, inspection, use, and maintenance of basic test equipment used in low-voltage work. Also covers specialized test equipment such as signal generators, wattmeters, cable testers, and RF analyzers.

**Panel-Mounted Instruments** (10 Hours)
(Module ID 12212-15) Explains the selection of instruments to be panel-mounted, locating the instruments using drawings, and procedures for installing the instruments in the panels.

**Installing Field-Mounted Instruments** (25 Hours)
(Module ID 12213-15) Covers selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

Continued on following page
Raceways for Instrumentation (17.5 Hours)
(Module ID 12214-15) Introduces raceways. Also covers identification and selection of conduit, raceways, wireways, cable trays, fittings, and NEC® requirements for installation.

Clean, Purge, and Test Tubing and Piping Systems (10 Hours)
(Module ID 12303-15) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in instrumentation.

Protective Measures for Instrumentation (20 Hours)
(Module ID 12308-15) Covers protective measures applied in instrumentation installations, including heat tracing, chemical treatment, and insulation.

Layout and Installation of Tubing and Piping Systems (35 Hours)
(Module ID 12302-15) Introduces piping and tubing layout procedures. Explains the steps in creating a hand-sketched isometric drawing that can be applied in the piping and tubing installation. Introduces methods and procedures used to measure, cut, and bend and support piping and tubing.

Detectors, Secondary Elements, Transducers, and Transmitters (25 Hours)
(Module ID 12205-16) Introduces instrumentation devices that detect different process variables, devices that change the variable into a transmittable form, and devices that transmit the information to another device for control or informational purposes. Covers devices that sense flow, level, temperature, and pressure, along with various types of transducers and transmitters.

Instrumentation Electrical Circuitry (25 Hours)
(Module ID 12305-16) Describes various types of series and parallel circuits; resistance, inductance, and capacitance in AC circuits; DC power supplies; analog and digital signals; and common applications of electrical and electronic circuitry.

Relays and Timers (10 Hours)
(Module ID 12208-16) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

Switches and Photoelectric Devices (10 Hours)
(Module ID 12209-16) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

Controllers (10 Hours)
(Module ID 12206-16) Covers the theory of operation and the application of common process controllers, including both pneumatic and electronic devices.

Proving, Commissioning, and Troubleshooting a Loop (17.5 Hours)
(Module ID 12401-16) Examines open, closed, and visual loop tuning methods. Examines ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

Tuning Loops (15 Hours)
ISBN 978-0-13-448303-0
(Module ID 12405-16) Introduces the techniques used in tuning loops employing PID control. Includes basic tuning theory and formulas. Examines open, closed, and visual loop tuning methods.
Instrumentation Level 4 (continued)

**Digital Logic Circuits (15 Hours)**
ISBN 978-0-13-448305-4
(Module ID 12401-16) Introduces the basic ideas of digital electronics. Presents gates, combination logic, and truth tables. Addresses memory devices, counters, and arithmetic circuits as well as the numbering systems commonly used in digital systems.

**Programmable Logic Controllers (12.5 Hours)**
(Module ID 12406-16) Introduces PLCs and their uses in industrial control. Includes hardware components, applications, communications, number systems, and programming methods.

**Distributed Control Systems (15 Hours)**
(Module ID 12407-16) Surveys DCS technologies, including an overview of their development. Discusses key components, fieldbuses, servers, and human-machine interfaces. Also introduces maintenance and the increasingly important aspect of DCS security.

**Analyzers and Monitors (30 Hours)**
(Module ID 12409-16) Introduces the key concepts of chemistry, with an emphasis on their application in instrumentation. Explains crucial physical and chemical properties of matter. Discusses the different analytical methods used in industry to assess processes. Includes pH, conductivity, ORP, gas analysis, and particulate counts. Explores specific instruments and techniques.

Ironworking

L1 IRONWORKING

LEVEL 1

Curriculum Notes

• 237.5 Hours (includes Core)
• Revised: 2011, Second Edition
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
• A Spanish translation is available. Please see NCCER’s online catalog for more information.

PAPERSBACK

ISBN

Trainee Guide: $69.99
978-0-13-213714-0

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to the Trade (5 Hours)
(Module ID 30101-11) Discusses the historical development of the ironworking trade. Explains personal qualities that contribute to successful employment. Describes the organization and purpose of apprenticeship training, and the safety obligations of the employer and employee.

Trade Safety (12.5 Hours)
(Module ID 30102-11) Discusses the consequences of on-the-job accidents and the responsibilities of OSHA. Identifies potential ironworker health and safety hazards and safe work practices around cranes. Explains the safe use of personnel lifts. Discusses the safe use and operation of aerial platforms, hoists, and fall protection systems.

Tools and Equipment of the Trade (10 Hours)
(Module ID 30103-11) Identifies safety tools and equipment. Describes the proper use of hand and power tools. Identifies power sources for ironworking tools.

Fastening (5 Hours)
(Module ID 30104-11) Explains how to recognize A-325 and A-490 bolts, washers, and nuts. Describes how to correctly tension bolts and explains procedures for calibrated wrench and turn-of-nut tightening methods.

Mobile Construction Cranes (10 Hours)
(Module ID 30105-11) Identifies common lifting equipment and construction cranes. Describes how to use crane manuals, perform record keeping, and follow safety requirements. Provides procedures for assembling construction cranes.

Rigging Equipment (10 Hours)
(Module ID 30106-11) Describes the use and inspection of equipment and hardware used in rigging. Describes slings and explains how to determine sling capacities and angles. Covers the selection and inspection of rigging equipment, including block and tackle, chain hoists, come-alongs, jacks, and tuggers.

Rigging Practices (15 Hours)
(Module ID 30107-11) Identifies the site and environmental hazards associated with rigging. Explains how to attach rigging hardware for routine lifts and identify the components of a lift plan. Describes how to perform sling tension calculations and determine the weight of beams and basic weight estimation.

Trade Drawings One (12.5 Hours)
(Module ID 30108-11) Identifies the materials used in steel-framed buildings. Explains how to read basic structural blueprints.

Structural Ironworking One (7.5 Hours)
(Module ID 30109-11) Identifies the types of construction that utilize structural steel, the components of the structures, and the process involved in erecting a steel structure. Explains the principles of structural stresses and the requirements of bolted connections.

Plumbing, Aligning, and Guying (5 Hours)
(Module ID 30110-11) Describes the purpose and function of aligning and plumbing steel structures, the tools that are used, and the procedures for performing the plumbing and aligning. Identifies and explains column base and baseplate components and foundation failures.

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102-09; from Welding Level One, Fourth Edition) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

Introduction to Arc Welding (22.5 Hours)
ISBN 978-0-13-213812-4
(Module ID 30111-11) Identifies welding equipment and processes. Describes safety precautions associated with arc welding. Explains how to identify weld joints, their dimensions, and applications from welding symbols and drawings. Describes how to set up and use SMAW equipment and explains the governing welding codes.

Bar Joists and Girders (5 Hours)
(Module ID 30112-11) Explains how to recognize types of bar joists and how they are designated. Describes the proper procedures for rigging and storing steel joists. Explains the use of joint girders in steel joist construction systems and the proper erection procedures for bar joists. Includes OSHA Subpart R.

Metal Decking (5 Hours)
(Module ID 30113-11) Identifies decking types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and job-site safety. Discusses the effects of deck penetrations and damage. Includes OSHA Subpart R.

Field Fabrication (15 Hours)
(Module ID 30115-11) Identifies the safety hazards associated with field fabrication. Describes how to use common layout tools. Explains how to fabricate angle iron, channel, T-shapes, and W-shapes to given dimensions.

Position Arc Welding (20 Hours)
(Module ID 30202-11) Identifies and explains weld joints, weld positions, and open V-butt welds. Describes how to prepare arc welding equipment and how to make flat welds, horizontal welds, vertical welds, and overhead welds.

Forklifts (17.5 Hours)
(Module ID 30203-11) Identifies the basic components of forklifts and the corresponding hand signals. Explains safe practices and how to perform inspections. Covers how to read load charts and how to operate forklifts.

Continued on following page
Trade Drawings Two (10 Hours)
(Module ID 30204-11) Introduces types of structural plans and describes the information included on each type. Presents the sequences of erection plans for each step of construction and identifies the symbols and abbreviations used on drawings.

Intermediate Rigging (10 Hours)
(Module ID 38201-11, from Intermediate Rigging, First Edition) Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

Structural Ironworking Two (30 Hours)
(Module ID 30205-11) Describes pre-erection activities for structural steel. Provides procedures for erecting bearing devices, columns, beams, girders, joists, bracing, and bridging.

Steel Joists and Joist Girders (15 Hours)
(Module ID 30206-11) Identifies the types of joists, methods of end support, and the types of bridging available. Explains how to locate the ironworking information on framing plans and describes steel joist installation procedures. Describes the conditions necessary and the benefits of panelizing bar joists.

Tower Cranes (15 Hours)
(Module ID 30207-11) Describes safe practices when erecting steel using tower cranes. Explains the difference between erecting steel with a mobile crane versus a tower crane. Describes tower crane hand and verbal signals.

Survey Equipment Use and Care One (10 Hours)
(Module ID 30208-11) Identifies survey equipment and uses. Explains the proper set up and use of a builder’s level and a theodolite. Covers how to shoot elevations, sweep a column for plumb, and set up over a point and back sight to another point.

L3 IRONWORKING LEVEL 3

Curriculum Notes
• 150 Hours
• Revised: 2012, Second Edition
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $99.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Applied Trade Math (5 Hours)
(Module ID 30312-12) Explains the math needed to calculate the size of cribbing or blocking needed for a load; parts of line, maximum load, and line pull for lifting operations; sling capacities; and load distribution for two-crane lifts.

Flux Core for Ironworking (40 Hours)
(Module ID 30314-12) Describes the equipment and methods used in flux core arc welding (FCAW). Includes proper selection and use of filler metals and shielding gases, as well as techniques for performing fillet and V-groove welding in various positions.

Stud Welding (10 Hours)
(Module ID 30304-12) Introduces the stud welding process, stud welding safety, and identifies the equipment used to weld studs. Provides step-by-step procedures to set up welding equipment and guidelines to make acceptable stud welds with proper stud placement. Explains testing of stud welds.

Structural Ironworking Three (10 Hours)
(Module ID 30312-12) Describes the fabrication and uses of precast concrete elements and cast-in-place tilt-up wall systems. Focuses on rigging practices associated with these two distinct construction methods and the role of ironworkers in their installation.

Special Application Hoisting Devices (10 Hours)
(Module ID 30307-12) Describes techniques for rigging and moving equipment using a variety of hoisting devices, including gin poles, Chicago booms, A-frames, davits, balance beams, pump handles, high lines, catapiller dolly’s, rollers. Also covers special cranes, including derricks, gantries, HLDs, trolley cranes, and jack frames.

Survey Equipment Use and Care Two (15 Hours)
(Module ID 30315-12) Focuses on the total station and its uses, including setup and controls. It includes information on primary and secondary control points and procedures for turning horizontal angles and plumbing columns and wall panels.

Pre-Engineered Systems (5 Hours)
(Module ID 30302-12) Identifies the structural components and accessories of metal buildings and describes their installation. Describes the pre-erection and erection procedures that apply to their installation and the safety precautions associated with their installation.

Miscellaneous/Ornamental Ironworking (5 Hours)
ISBN 978-0-13-292289-0
(Module ID 30303-12) Identifies the types of ornamental metal and describes the different types of components used in ornamental ironworking. Explains the skills required to fabricate and install ornamental components safely.

Grating and Checkered Plate (5 Hours)
(Module ID 30316-12) Provides general information and procedures for the installation and attachment of gratings and checker plate. Describes the rigging methods associated with grating and checker plate.

Air Carbon Arc Cutting and Gouging (12.5 Hours)
(Module ID 29104-09; from Welding Level One, Fourth Edition) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc washing and gouging activities.

Demolition (10 Hours)
(Module ID 30310-12) Identifies the tools used to remove rivets and explains the demolition skills required to safely remove structural steel beams, steel columns, and steel reinforced concrete columns.
MASONRY

LEVEL 1

Curriculum Notes

- 197.5 Hours (includes Core)
- Revised: 2013, Fourth Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation of the third edition is available. Please see NCCER’s online catalog for more information.

HARDCOVER
Trainee Guide: $69.99

PAPERBACK
Trainee Guide: $69.99

DIGITAL
NCCERconnect Access Card: $69.99
NCCERconnect + Trainee Guide: $94.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Masonry (12.5 Hours)
(Module ID 28101-13) Covers basic masonry materials, tools, techniques, and safety precautions. Explains how to mix mortar by hand and lay masonry units. Also describes the skills, attitudes, and abilities of successful masons.

Masonry Safety (15 Hours)
(Module ID 28106-13) Describes how to identify the common causes of accidents and the hazards associated with masonry tools, equipment, mortar, and concrete. Focuses on using personal protective equipment, working safely from elevated surfaces, properly using masonry tools and equipment, and handling masonry materials safely.

Masonry Tools & Equipment (15 Hours)
(Module ID 28102-13) Describes a variety of hand tools, measuring tools, mortar equipment, power tools and equipment, and lifting equipment that masons use on the job, and explains how to use these tools correctly and safely. Provides instructions for assembling and disassembling scaffolds.

MASONRY

LEVEL 2

Curriculum Notes

- 152.5 Hours
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $99.99

DIGITAL
NCCERconnect Access Card: $99.99
NCCERconnect + Trainee Guide: $99.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Residential Plans and Drawing Interpretation (12.5 Hours)
(Module ID 28201-14) Explains how to work with residential plans and construction drawings and convert that information into action on the job. Describes the organization and format of plans, dimensioning and scaling, and estimating materials quantities from information on the plans.

Residential Masonry (25 Hours)
(Module ID 28202-14) Covers the construction techniques for residential and small structure foundations, steps, patios, decks, chimneys, and fireplaces. Describes work activities that the mason must perform, as well as those that tie into the masonry work.

Reinforced Masonry (20 Hours)
(Module ID 28203-14) Focuses on the use of grout and other types of reinforcement, such as reinforcing steel, to strengthen and support masonry structures. Describes the locations where grout can be used and the techniques for placement. Discusses the use and application of various types of reinforced masonry elements, such as rebar and bond beam lintels.

Masonry Openings and Metalwork (20 Hours)
(Module ID 28204-14) Introduces types of metal components, including metal rods, joint reinforcements, plates, anchors, fasteners, and hollow metal frames for doors and windows, and explains how they are installed.

Advanced Laying Techniques (40 Hours)
(Module ID 28205-14) Describes the construction of masonry wall systems, weep vents, and joints. Includes safety requirements and interaction with structural components.

Effects of Climate on Masonry (20 Hours)
(Module ID 28206-14) Describes materials and techniques used to apply insulation and methods of moisture control as they relate to the mason’s trade. Includes hot- and cold-weather considerations.

Construction Inspection and Quality Control (15 Hours)
(Module ID 28207-14) Introduces the quality control requirements for masonry construction. Presents procedures for inspection and testing of masonry materials and finished masonry construction.

Measurements, Drawings, and Specifications (10 Hours)
(Module ID 28103-13) Reviews the calculation of distances and areas common in masonry work; describes the information found on residential construction drawings; and explains the role of specifications, standards, and codes.

Mortar (10 Hours)
(Module ID 28104-13) Explains the types and properties of mortar and the materials used in the mixture, including admixtures; provides instructions for mixing mortar by machine; and describes how to properly apply and store mortar.

Masonry Units and Installation Techniques (60 Hours)
(Module ID 28105-13) Covers characteristics of block and brick; how to set up, lay out, and bond block and brick; how to cut block and brick; how to lay and tool block and brick; and how to clean block and brick once they have been laid. Describes masonry reinforcements and accessories used to lay block and brick professionally and safely.

## Level 3 Masonry

### Curriculum Notes
- 200 Hours
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

### Modules

|---------------------------------------|---------------------|---------------|--------------------------|-----------------------------|

### Specialized Materials and Techniques (60 Hours)
(Module ID 28302-14) Introduces unique types of masonry situations that won’t be encountered on every job, including sound-barrier walls, arches, and the use of acid brick, refractory brick, and glass block. Describes the handling and construction of these materials, and introduces the intricacies of each.

### Site Layout – Distance Measurement and Leveling (20 Hours)
(Module ID 28306-14) Covers the techniques needed to produce and read site plans and topographic maps. Describes the use of measuring devices such as tapes, range poles, plumb bobs, total stations, leveling instruments, and field notes. Also discusses the construction of batter boards and how to ensure correct measurements.

### Stone Masonry (15 Hours)
(Module ID 28306-14) Focuses on the application of natural stone in masonry construction. Describes types of stone and how stone is cut, finished, and stored. Discusses equipment and tools for handling stone. Details how to estimate and install stone using anchors and mortars and explains how to install stone veneers.

### Repair and Restoration (20 Hours)
(Module ID 28305-14) Details techniques for identifying and repairing common masonry problems of weathering, settling, stain, etc. Explains tuckpointing, the removal of efflorescence and stains, and crack repair. Includes sections on how to repair foundation walls, water intrusion, and localized problems, as well as fireplace and chimney repair.

### Commercial Drawings (25 Hours)
(Module ID 28304-14) Explains how to read and identify drawings for commercial structures using previous experience from structural drawings as a baseline. Describes requirements for these drawings, as well as how to interpret and create plans for architectural, structural, and shop drawings.

### Estimating (25 Hours)
(Module ID 28305-14) Describes how to estimate building materials, such as brick, block, grout, mortar, joint reinforcement, and masonry ties. Details multiple methods for estimating, as well as how to estimate for masonry elements such as openings and lintels.

### Elevating Masonry (15 Hours)
(Module ID 28301-14) Describes how to work safely and efficiently on elevated structures. Explains how to maintain a safe work environment, ensure protection from falls, how to brace walls from outside forces, and how to identify common types of elevated walls. Stresses safety around equipment such as cranes and hoists.
MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (5 Hours)
(Module ID 19101-18) Provides an overview of the insulation industry, including how and why insulation is used, safety factors related to insulation, and common insulation-specific tools.

Material Handling, Storage, and Distribution
(2.5 Hours)
(Module ID 19104-18) Covers receiving, stacking, and storage of insulation materials, as well as material movement on the job site.

Characteristics of Pipe (5 Hours)
ISBN 978-0-13-448318-4
(Module ID 19105-18) Provides an overview of different pipe types and their uses, pipe sizing methodology, and the relationship between pipe sizes and insulation sizes.

Flexible Foam Insulation (25 Hours)
(Module ID 19201) Covers proper tool use and procedures for installing flexible foam insulation, including how to cut and install flexible foam insulation on pipe fittings, valves, flanges, equipment, and air ducts.

Air Duct Systems (7.5 Hours)
(Module ID 19302) Covers the identification of various duct systems and their associated components.

Blanket Insulation for Ducts (7.5 Hours)
(Module ID 19202) Covers fiberglass blanket insulation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

Board Insulation for Ducts (20 Hours)
ISBN 978-0-13-498775-0
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

Cements and Fabric Finishes (10 Hours)
(Module ID 19208) Covers the proper use of finishing tools, cleanup and protection procedures, and the limitations of cements, fabric finishes, and mastics.

Insulation Adhesives (5 Hours)
(Module ID 19304) Covers the identification, application, and use of adhesives.

Chilled and Hot Water Heating Systems
(5 Hours)
(Module ID 19210-18) Covers chilled and hot water heating and dual temperature systems, including the types of pipe and equipment common to each type of system. Explains the types of insulation required by each type of system.

Installing Fiberglass Pipe Insulation (30 Hours)
(Module ID 19106-18) Describes the characteristics of fiberglass pipe insulation and the characteristics of ASJ jacketing.

Insulating Pipe Fittings, Valves, and Flanges
(40 Hours)
(Module ID 19217-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.

Flexible Foam Insulation (25 Hours)
(Module ID 19201) Covers proper tool use and procedures for installing flexible foam insulation, including how to cut and install flexible foam insulation on pipe fittings, valves, flanges, equipment, and air ducts.

Air Duct Systems (7.5 Hours)
(Module ID 19302) Covers the identification of various duct systems and their associated components.

Blanket Insulation for Ducts (7.5 Hours)
(Module ID 19202) Covers fiberglass blanket insulation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

Board Insulation for Ducts (20 Hours)
ISBN 978-0-13-498775-0
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

Cements and Fabric Finishes (10 Hours)
(Module ID 19208) Covers the proper use of finishing tools, cleanup and protection procedures, and the limitations of cements, fabric finishes, and mastics.

Insulation Adhesives (5 Hours)
(Module ID 19304) Covers the identification, application, and use of adhesives.

Chilled and Hot Water Heating Systems
(5 Hours)
(Module ID 19210-18) Covers chilled and hot water heating and dual temperature systems, including the types of pipe and equipment common to each type of system. Explains the types of insulation required by each type of system.

Installing Fiberglass Pipe Insulation (30 Hours)
(Module ID 19106-18) Describes the characteristics of fiberglass pipe insulation and the characteristics of ASJ jacketing.

Insulating Pipe Fittings, Valves, and Flanges
(40 Hours)
(Module ID 19217-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.

Flexible Foam Insulation (25 Hours)
(Module ID 19201) Covers proper tool use and procedures for installing flexible foam insulation, including how to cut and install flexible foam insulation on pipe fittings, valves, flanges, equipment, and air ducts.

Air Duct Systems (7.5 Hours)
(Module ID 19302) Covers the identification of various duct systems and their associated components.

Blanket Insulation for Ducts (7.5 Hours)
(Module ID 19202) Covers fiberglass blanket insulation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

Board Insulation for Ducts (20 Hours)
ISBN 978-0-13-498775-0
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

Cements and Fabric Finishes (10 Hours)
(Module ID 19208) Covers the proper use of finishing tools, cleanup and protection procedures, and the limitations of cements, fabric finishes, and mastics.

Insulation Adhesives (5 Hours)
(Module ID 19304) Covers the identification, application, and use of adhesives.

Chilled and Hot Water Heating Systems
(5 Hours)
(Module ID 19210-18) Covers chilled and hot water heating and dual temperature systems, including the types of pipe and equipment common to each type of system. Explains the types of insulation required by each type of system.

Installing Fiberglass Pipe Insulation (30 Hours)
(Module ID 19106-18) Describes the characteristics of fiberglass pipe insulation and the characteristics of ASJ jacketing.

Insulating Pipe Fittings, Valves, and Flanges
(40 Hours)
(Module ID 19217-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.
### Industrial Boiler Systems (7.5 Hours)
(Module ID 19306) Describes boilers and related equipment, and their insulation requirements.

### Mineral Wool Insulation (12.5 Hours)
(Module ID 19205) Describes how to measure, cut, and score mineral wool insulation. Discusses attachments used on mineral wool, installation methods, sealing requirements, and how to use pin welding equipment.

### Board and Block Insulation
(Module ID 19207) Covers the measuring requirements of board and block insulation; scoring, beveling, and cutting methods; and how to install board and block insulation on flat or curved surfaces and on large diameter tanks.

### Sheet-Metal Lagging
(Module ID 19312) Describes the identification and application of common sheet metal tools, discusses fabrication and installation methods, and covers flashing and sealing techniques.

### Jacketing Systems (12.5 Hours)
(Module ID 19313) Describes the purposes and the types of insulation jacketing available for mechanical systems. This module also explains how to work with various kinds of organic, polymeric, and other types of jacket not made from rigid sheet metal.

### Jacketing Fabrication — Pipe and Fittings
(Module ID 19310) Covers the identification and applications of pipes and pipe fittings and describes types of pipe and fitting jacketing, along with layout installation procedures and securements.

### Jacketing Fabrication — Vessels and Equipment
(Module ID 19311) Covers the identification of vessel and equipment jacketing, along with layout, fabrication, installation procedures, and securements.

### Removable and Reusable Flexible Insulation Covers (12.5 Hours)
(Module ID 19314) Provides a detailed introduction to removable and reusable flexible insulation covers, and explains the construction and installation of commercially-fabricated and kit insulation covers.

### Specialized Insulation Systems (5 Hours)
(Module ID 19308) Describes special-application insulation systems, including low-temperature and prefabricated panels; refractory insulation; soft pads and pre-shaped removable covers; preinsulated systems; spray, foam, and pour-in-place insulation; fire stops; noise and sound control systems; and cryogenic applications.

### Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating.
Millwright

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to the Millwright Craft (5 Hours)
(Module ID 15101) Presents the history of the trade and discusses career paths for millwrights. Describes environments and types of work associated with the millwright trade.

Millwright Hand Tools (17.5 Hours)
(Module ID 15102) Introduces hand tools used by millwrights. Explains hand tool safety and covers the methods for selecting, inspecting, using, and maintaining these tools.

Fasteners and Anchors (12.5 Hours)
(Module ID 15103) Identifies fasteners and anchors used by millwrights, including their applications and installation procedures.

Millwright Power Tools (22.5 Hours)
(Module ID 15205) Introduces power tools used by millwrights and procedures for using, caring for, and maintaining these tools.

Setting Baseplates and Soleplates (20 Hours)
(Module ID 15207) Describes how to set a machine baseplate and soleplate while guaranteeing alignment with other equipment.

Rigging Practices (15 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Teaches use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches.

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment.

Gaskets and Packing (15 Hours)
(Module ID 15107) Describes gaskets and packing and their applications, while also providing instructions for laying out, cutting, and installing gaskets.

O-Rings and Non-Mechanical Seals (7.5 Hours)
(Module ID 15304) Enhanced coverage of dynamic and static seals, including their applications, tools used, installation procedures, and removal. Also covers lip, cup, oil, and labyrinth seals.

Introduction to Bearings (15 Hours)
(Module ID 15209) Describes the types and applications of bearings, including plain, roller, ball, thrust, and guide bearings, as well as pillow block, flanged, and takeup bearings. Also explains bearing designation systems.

Removing and Installing Bearings (22.5 Hours)
(Module ID 15306) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Craft-Related Algebra and Trigonometry (30 Hours)
(Module ID 15301) Explains right-triangle trigonometry and its use in the trade. Also covers interpolation, equilateral and isosceles triangles, and the laws of acute triangles.

Field Sketching (10 Hours)
ISBN 978-0-13-765400-0
(Module ID 15202) Elective - Teaches the basic skills needed to make a good field sketch to convey information about how parts should be made or assembled.

Basic Layout (20 Hours)
(Module ID 15104) Discusses the tools used in layout. Explains how to lay out baselines using the arc method and 3-4-5 method.

O-Rings and Non-Mechanical Seals (7.5 Hours)
(Module ID 15304) Enhanced coverage of dynamic and static seals, including their applications, tools used, installation procedures, and removal. Also covers lip, cup, oil, and labyrinth seals.

Introduction to Bearings (15 Hours)
(Module ID 15209) Describes the types and applications of bearings, including plain, roller, ball, thrust, and guide bearings, as well as pillow block, flanged, and takeup bearings. Also explains bearing designation systems.

Removing and Installing Bearings (22.5 Hours)
(Module ID 15306) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

Plasma Arc Cutting (7.5 Hours)
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Craft-Related Algebra and Trigonometry (30 Hours)
(Module ID 15301) Explains right-triangle trigonometry and its use in the trade. Also covers interpolation, equilateral and isosceles triangles, and the laws of acute triangles.

Millwright Level 3

L3 MILLRIGHT

Curriculum Notes
- 175 Hours (required); 37.5 Hours (elective)
- Revised: 2022, Fourth Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Basic Pneumatic Systems (7.5 Hours)
(Module ID 15407) Explains pneumatic system components and compressed-air treatment. Introduces equipment auxiliary and special-application equipment used with compressors and with tools.

Compressors and Compressor Maintenance (20 Hours)
(Module ID 15404) Introduces compressors and the troubleshooting and maintenance procedures associated with compressors.

Lubrication (15 Hours)

Introduction to Pumps (20 Hours)

Troubleshooting and Repairing Pumps (17.5 Hours)

Mechanical Seals (15 Hours)
ISBN 978-0-13-765453-6 (Module ID 15305) Covers the function and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting, and installing mechanical seals.

Couplings and Alignment Fundamentals (15 Hours)

Installing Belt and Chain Drives (15 Hours)
ISBN 978-0-13-817577-1 (Module ID 15311) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Introduction to Conveyors (10 Hours)

Troubleshooting and Repairing Conveyors (12.5 Hours)

Laser Alignment (25 Hours)

Optical Layout and Alignment (15 Hours)
ISBN 978-0-13-817590-0 (Module ID 15504) Explains how to use theodolites, optical levels, auto levels, and total stations to place and align equipment.

Prelignment and Shim Fabrication (20 Hours)

Dial Indicator Alignment (45 Hours)
ISBN 978-0-13-812127-3 (Module ID 15314) Explains the procedures involved in aligning shafts, first with a straightedge and feeler gauges, then with dial indicators. Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment, based on reverse dial indicator measurements.

Troubleshooting and Repairing Pneumatic Equipment (10 Hours)

Advanced Mechanical Drawings (17.5 Hours)
ISBN 978-0-13-812135-8 (Module ID 15503) Examines the use of drawing sets to obtain information about a system. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

Vibration Analysis (10 Hours)
ISBN 978-0-13-812136-5 (Module ID 15509) Explains the causes of vibration and the procedures and types of equipment used in vibration analysis. Describes the equipment used for vibration testing and monitoring. Describes field machine balancing.

L4 MILLRIGHT

Curriculum Notes
- 160 Hours (required); 47.5 Hours (elective)
- Revised: 2023, Fourth Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Basic Hydraulic Systems (15 Hours)

Troubleshooting and Repairing Hydraulic Equipment (12.5 Hours)

Installing Belt and Chain Drives (15 Hours)
ISBN 978-0-13-817577-1 (Module ID 15311) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Introduction to Conveyors (10 Hours)

Troubleshooting and Repairing Conveyors (12.5 Hours)

Laser Alignment (25 Hours)

Optical Layout and Alignment (15 Hours)
ISBN 978-0-13-817590-0 (Module ID 15504) Explains how to use theodolites, optical levels, auto levels, and total stations to place and align equipment.

Gearboxes (25 Hours)

Troubleshooting and Repairing Gearboxes (15 Hours)
ISBN 978-0-13-817596-2 (Module ID 15411) Explains how to troubleshoot, remove, and disassemble gearboxes; how to identify gear wear patterns; and how to install and maintain gearboxes.

Turbines (15 Hours)
ISBN 978-0-13-817599-3 (Module ID 15505) Describes types of turbines and their components. Describes the operation and common applications of particular types, including gas, steam, and water turbines.

Preventive and Predictive Maintenance (10 Hours)
ISBN 978-0-13-817605-1 (Module ID 15508) Describes preventive and predictive maintenance programs. Provides information on nondestructive testing, and introduces the basic techniques for nondestructive evaluation. Discusses lubricant analysis, and acoustic, infrared, and vibration testing.

Continued on following page
Maintaining and Repairing Turbine Components  
(12.5 Elective Hours)  
(Module ID 15506) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.

Crane Safety and Emergency Procedures  
(25 Elective Hours)  
(Module ID 53101) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Communications  
(10 Elective Hours)  
(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.
Painting

Module A: Safety (10 Hours)
(Module ID 07102) Provides an overview of construction site hazards and safety precautions for those in the painting trade. Covers methods of rigging and care of ladders, scaffolds, swing devices, and other equipment.

Module B: Ladders, Scaffolds, Lifts, and Fall Protection (10 Hours)
(Module ID 07103) Covers methods of erecting, using, and maintaining ladders, scaffolds, and lifts. Discusses fall protection equipment and safety practices used when working on ladders, scaffolds, and lifts.

Module C: Identifying Surface/Substrate Materials and Conditions (5 Hours)
(Module ID 07104) Explains how to identify types of surfaces used in construction, including wood, metal, masonry/concrete, plaster/drywall, and synthetic substrates. Also discusses how to identify new, aged, or previously coated surface conditions of substrates and coatings.

Module D: Protection of Adjacent Surfaces (5 Hours)
(Module ID 07105) Describes the tools, materials, and methods used for protecting adjacent surfaces and areas prior to surface preparation, paint spraying, etc.

Module E: Chemical Cleaning and Stripping (7.5 Hours)
(Module ID 07203) Describes chemical cleaners and strippers and how they are used to clean and/or remove unwanted material from substrates.

Module F: Low-Pressure Water Cleaning (7.5 Hours)
(Module ID 07204) Covers the design and function of low-pressure washing equipment, including procedures for the safe operation and maintenance of typical equipment.

Module G: Abrasive Blasting (7.5 Hours)
(Module ID 07205) Covers the basic design and function of abrasive blasting equipment, including general procedures for its use, related industry standards, and safety and health considerations.

Module H: Drywall Finishing and Patching (25 Hours)
(Module ID 07206) Covers the materials and procedures used for drywall finishing and patching. Emphasizes techniques for finishing and patching drywall, including the use and care of tools, equipment and supplies, and safety.

Module I: Stains (7.5 Hours)
(Module ID 07207) Describes the different classes and/or kinds of stains, including their composition, selection for use, and application considerations.

Module J: Clear Finishes (7.5 Hours)
(Module ID 07208) Introduces the composition, uses, and application of clear finishes, including varnishes, lacquers, shellacs, and urethanes.

Module K: Wood Finishing (22.5 Hours)
(Module ID 07209) Presents the science and technology of wood and wood products. Provides procedures and techniques for wood surface preparation and the application of clear finishes to various kinds of wood.

Module L: Coatings Two (10 Hours)
(Module ID 07210) Introduces the unique properties of high-performance coatings. Includes safety and health considerations, surface preparation, application, testing, and inspection.

Module M: Spray Painting (Conventional, Airless and HVLP) (32.5 Hours)
(Module ID 07211) Covers the design and function of conventional, airless, and HVLP spraying equipment, including procedures for the safe operation and maintenance of typical equipment.

Continued on following page
Coatings Three (15 Hours)
ISBN 978-0-13-875105-0
(Module ID 07303) Describes unique properties, safety and health considerations, surface preparation, application, and testing, and inspection of high-performance coatings used primarily to protect substrates for commercial or light industrial applications.

Color and Tinting (10 Hours)
(Module ID 07304) Presents the theory and definition of color. Describes procedures for mixing, tinting, and matching colors. The use of the color wheel and the Munsell, Federal Standard 595B, and other color systems are also explained.

Decorative (Faux) Finishes (22.5 Hours)
ISBN 978-0-13-875121-0
(Module ID 07305) Describes techniques for glazing, antiquing, stippling, mottling, gilding, marbling, and graining decorative finishes.

Wallcovering (40 Hours)
(Module ID 07306) Covers the wallcovering process from start to finish. Includes equipment and materials, estimating methods, surface preparation, adhesives and installation, and Failures and Remedies.

Graphics (12.5 Hours)
(Module ID 07307) Describes types of graphics and their uses, methods of transferring graphic patterns to a surface, building code regulations, and other factors in the use of graphics.

Texturing (10 Hours)
(Module ID 07308) Explains the characteristics of various texturing materials, surface preparation procedures, and techniques for producing different patterns.

Spraying with Special Devices (20 Hours)
(Module ID 07309) Covers the design and function of texture, cold roof coating, electrostatic, and plural component spraying equipment. Includes procedures for the safe operation and maintenance of typical equipment.

The Painting Level 4 curriculum has been discontinued. The Industrial Coating and Application Specialist curriculum may be used instead.
Pipefitting

**L1 PIPEFITTING**

**LEVEL 1**

**Curriculum Notes**

- **155 Hours (includes Care)**
- Core Introduction to Basic Rigging module is required for the Level 3 credential.
- Updated in 2019.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation is available. Please see NCCER’s online catalog for more information.

**PAPERBACK**

---

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Piping Systems** (5 Hours)
ISBN 978-0-13-581129-0
(Module ID 08203) Introduces chemical, compressed air, fuel oil, steam, and water systems. Explains how to identify piping systems according to color codes, the effects of thermal expansion, and the purpose of pipe insulation.

**Drawings and Detail Sheets** (15 Hours)
(Module ID 08202) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, spool drawings, detail sheets, and orthographic drawings. Explains how to read and interpret various types of drawing as well as the symbology used to convey information.

**Orientation to the Pipefitting Craft** (5 Hours)
(Module ID 08101) Provides an overview of work performed by the pipefitter, as well as the responsibilities, career opportunities, safety principles associated with the pipefitting trade, and the types of pipes and tools pipefitters will encounter.

**Pipefitting Hand Tools** (20 Hours)
(Module ID 08102) Covers hand tool safety as well as procedures for selecting, inspecting, using, and maintaining hand tools used by pipefitters. Introduces the most common hand tools used in pipefitting, including pipe wrenches, pipe stands, pipe vises, levels, pipe fabrication tools, pipe bending tools, and pipe joining tools.

**Pipefitting Power Tools** (15 Hours)
(Module ID 08103) Covers the safe operation of power tools used to cut, grind, thread, and shape all types of materials, and includes procedures for selecting, inspecting, using, and maintaining power tools used by pipefitters. Provides guidelines for using electrical and pneumatic tools, including pipe threading machines.

**Identifying and Installing Valves** (20 Hours)
(Module ID 08203) Identifies different types of valves, including those that start and stop flow, regulate flow, regulate flow direction, and relieve pressure, and describes their installation as well as proper storage and handling procedures. Covers common valve operators and actuators.

**Pipefitting Trade Math** (15 Hours)
(Module ID 08204) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

**Threaded Pipe Fabrication** (15 Hours)
(Module ID 08205) Describes the materials used in threaded piping systems. Explains how to determine pipe lengths between threaded pipe fittings, prepare the pipe and fittings for fit-up, and assemble the piping system. Includes how to calculate simple and rolling offsets.

**Socket-Weld Pipe Fabrication** (25 Hours)
(Module ID 08206) Describes the fittings and materials involved in socket-welds, interpreting drawings, determining pipe lengths between fittings, aligning pipe and fittings, and cutting out a socket weld to save the structure.

**Butt-Weld Pipe Fabrication** (37.5 Hours)
(Module ID 08207) Describes materials, fittings, drawings, calculating takeouts, determining pipe lengths between fittings, beveling pipe, aligning components for welding, performing alignments, and cutting a butt weld to save the structure.

**Oxyfuel Cutting** (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevelling, washing, and gouging.

**Ladders and Scaffolds** (12.5 Hours)
(Module ID 08105) Describes hazards and safety procedures governing the use of stepladders, extension ladders, fixed scaffolds, and rolling scaffolds. Includes general procedures for scaffold assembly and use.

**Motorized Equipment One** (10 Hours)
(Module ID 08106) Explains the safety factors, operator maintenance, and operating procedures associated with motorized equipment used on job sites. Covers electrical generators, air compressors, aerial lifts, forklifts, trenchers, backhoes, mobile cranes, and portable equipment including welding machines, pumps, and compactors.

**Excavations** (10 Hours)
(Module ID 08208) Explains soil and trenching hazards involved in excavations, as well as the use of shoring and shielding systems per OSHA standards, sloping requirements by soil type, and combined systems for trench reinforcement. Covers how to determine grade and elevation, how to use a laser level, and how to backfill.

**Underground Pipe Installation** (20 Hours)
(Module ID 08209) Explains pipe installation procedures and guidelines, including the procedures for cast iron, ductile iron, concrete, carbon steel, fiberglass, and thermoplastic pipe. Includes an introduction to horizontal directional drilling for pipe installation, and the use of a weak link for plastic pipe.

Continued on following page
### L3 PIPEFITTING
#### LEVEL 3

**Curriculum Notes**
- 152.5 Hours
- Revised: 2021, Fourth Edition
- downloadable instructor resources that include module tests, PowerPoints™, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Basic Rigging** *(7.5 Hours)*
(Module ID 00106) A common activity at nearly every construction site is the movement of material and equipment from one place to another using various types of lifting gear. The procedures involved in performing this task are known as rigging. Not every worker will participate in rigging operations, but nearly all will be exposed to it at one time or another. This module provides an overview of the various types of rigging equipment, common hitches used during a rigging operation, and the related Emergency Stop hand signal.

**Introduction to Aboveground Pipe Installation** *(25 Hours)*
(Module ID 08306) Identifies various types of pipe, flanges, gaskets, and bolts. Covers the fabrication of gaskets, assembling and installing flanged and grooved pipe, fabricating and installing pipe spools, and installing pipe sleeves and floor penetrations.

**Field Routing and Vessel Trim** *(15 Hours)*
ISBN 978-0-13-748742-4
(Module ID 08307) Explains how to secure the work area and determine field run specifications, load weights for erection equipment, and support needs. Provides details on evaluating the run, assembling the field run, installing test blinds, working with instruments, and how to erect vessel trim.

**Pipe Hangers and Supports** *(25 Hours)*
(Module ID 08308) Explains the roles of pipe hangers and supports, with details on clevises, saddles, U-bolts, clamps, turnbuckles, rods, welded beam attachments, spring can supports, travel stops, and snubbers.

**Testing Piping Systems and Equipment** *(20 Hours)*
(Module ID 08309) Discusses the importance of safety and following procedures with testing and inspections. Topics include pretest requirements, visual weld inspections, service flow tests, hard pressure tests, hydrostatic tests, and steam blow tests.

**Advanced Blueprint Reading** *(50 Hours)*
(Module ID 08402) Provides details on environmental and other concerns associated with hot tapping. Discusses the installation of fittings, the operation of hot tap machines, working with line stop plugs, and identifying and mitigating known and potential hazards.

**Fundamentals of Crew Leadership** *(22.5 Hours)*
(Module ID 46101) The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

### L4 PIPEFITTING
#### LEVEL 4

**Curriculum Notes**
- 175 Hours (required); 197.5 Hours (with Fundamentals of Crew Leadership elective)
- Revised: 2021, Fourth Edition
- downloadable instructor resources that include module tests, PowerPoints™, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Advanced Pipe Fabrication** *(50 Hours)*
(Module ID 08402) Explains the use of ordinate tables and trigonometry in creating fittings and pipe assemblies for process applications. Details are provided on calculating piping offsets, fabricating miter turns, laying out and fabricating saddles and supports made out of pipe, and laying out lators, wyes, ninety-degree intersections, and supports without using references.

**Hot Taps** *(10 Hours)*
(Module ID 08407) Provides details on environmental and other concerns associated with hot tapping. Discusses the installation of fittings, the operation of hot tap machines, working with line stop plugs, and identifying and mitigating known and potential hazards.

**Maintaining Valves** *(10 Hours)*
(Module ID 08408) Explains how to replace packing and O-rings, and how to open and close a valve’s bonnet. Discusses how to safely troubleshoot and maintain several types of valves.

**In-Line Specialties** *(20 Hours)*
(Module ID 08408) Discusses methods of assembling copper tubing with flared and compression joints. Includes brazing and soldering and explains the differences between these two procedures. Also describes bending pipe, working with glass-lined piping, handling hydraulic compression joints, and managing grooved piping systems.
Pipelayer

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Job Site Safety** (17.5 Hours)
  (Module ID 24101) Describes appropriate personal protective equipment commonly used on the job site and the impact of housekeeping on safety and project completion. Describes common indicators of existing utilities and recommends safe methods for locating and working around existing utilities.

- **Tools and Equipment** (22.5 Hours)
  ISBN 978-0-13-015305-0
  (Module ID 24102) Describes the safe use, care, and maintenance of pipelayer hand and power tools. Discusses methods for operating and maintaining dewatering equipment, generators, and compressors. Contains an introduction to drilling and tapping machines.

- **Rigging and Delivering Pipe and Associated Structures** (7.5 Hours)
  (Module ID 24103) Describes methods for receipt inspection, storage, and delivery to the trench of PVC, ductile iron, corrugated steel, and concrete pipe. Identifies the hand signals used by pipelayers when rigging pipe, and piping components, including manholes and appurtenances.

- **Cutting Pipe** (12.5 Hours)
  (Module ID 24104) Discusses practical methods for safely cutting common pipe materials. Describes pipe materials and standard sizes for thermoplastic, concrete, ductile iron, and corrugated steel pipe.

- **Gaskets, Joints, and Fittings** (20 Hours)
  (Module ID 24105) Describes methods for joining PVC, ductile iron, and concrete pipe, including O-ring pipe, slip joints, mechanical joints, and restraint joints. Discusses methods for joining pipe to pipe, pipe to appurtenances, and pipe to manhole connections, including transition couplings.

- **Introduction to Elevations** (5 Hours)
  (Module ID 24106) Discusses the use, care, and maintenance of the optical level, transit, and the pipe laser. Contains a brief introduction to elevations as it relates to the setup of these instruments. Describes common causes and solutions to laser problems in the field.

- **Trench Safety** (7.5 Hours)
  (Module ID 24107) Discusses soil behavior as it relates to trench failures, including common indicators of an unstable trench. Introduces typical shoring, shielding, and sloping methods. Identifies characteristics that may make a trench a confined space and describes the safety measures needed to work in the trench.

- **Foundation Stabilization, Bedding, and Dewatering** (7.5 Hours)
  ISBN 978-0-13-015312-8
  (Module ID 24108) Discusses methods for preparing the trench for pipe installation, including stabilization, bedding, and initial backfill. Describes effective methods for dewatering a trench and includes a section on troubleshooting dewatering equipment.

- **Testing Pipe** (12.5 Hours)
  (Module ID 24109) Discusses methods for preparing pressure and gravity systems for testing, including cleaning and inspecting pipe systems. Describes methods for preparing pressure and gravity systems, including vacuum testing of concrete manholes.

©NCCER
Plumbing

Tools of the Plumbing Trade  (10 Hours)
(Module ID 02103) This module describes hand and power tools used by plumbers to measure, lay out, level, cut, drill, and join different pipe. Along with teaching trainees how to select the appropriate tools for the task, this module teaches them how to avoid some of the most dangerous hazards associated with power tools. Trainees are also instructed in the proper care of different types of hand and power tools.

Introduction to Plumbing Math  (12.5 Hours)
(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrates how they apply to on-the-job situations. Teaches trainees how to recognize the type of math necessary for each job, and illustrates methods for measuring pipe length using a variety of tables and illustrations.

Introduction to Plumbing Drawings  (17.5 Hours)
(Module ID 02105) Introduces trainees to the types of plumbing drawings they will encounter, and teaches them how to interpret and apply the information when laying out and installing plumbing systems. Reviews symbols used in plumbing and mechanical drawings and provides examples of isometric, oblique, orthographic, and schematic drawings. Requires trainees to interpret plumbing drawings and to understand the relationship between code requirements and plumbing drawings.

Plastic Pipe and Fittings  (12.5 Hours)
(Module ID 02106) Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to manufacturer’s instructions and applicable codes. Also discusses pressure testing of plastic pipe after it is installed.

Copper Tube and Fittings  (12.5 Hours)
(Module ID 02107) Explains sizing, labeling, and applications related to copper tube and fittings. Reviews valves used with copper tube systems, and describes methods for cutting, joining, and installing copper tube. Insulation, pressure testing, seismic codes, and handling and storage requirements are also addressed.

Cast Iron Pipe and Fittings  (12.5 Hours)
ISBN 978-0-13-793427-0
(Module ID 02108) Describes hub-and-spigot and no-hub cast iron pipe and fittings are used in DWV systems. Reviews related sizing and labeling standards, types of fittings, and techniques for measuring and cutting cast iron pipe. Also provides instructions for joining, hanging, and testing pipe installations.

Steel Pipe and Fittings  (12.5 Hours)
(Module ID 02109) Presents concepts related to threaded, labeling, and sizing of steel pipe and fittings. Different types of elbows, couplings, and valves are described. Provides instructions for measuring, cutting, threading, joining, and hanging steel pipe, and reviews corrugated stainless steel tubing.

Introduction to Plumbing Fixtures  (7.5 Hours)
(Module ID 02110) Introduces trainees to the primary types of plumbing fixtures, the materials from which they are made, and how they function in typical applications. Also reviews the functionality of specific bathroom and kitchen fixtures, including compression and non-compression faucets, shower and bath fixtures, and exterior utility faucets.

Introduction to Drain, Waste, and Vent (DWV) Systems  (10 Hours)
(Module ID 02111) Explains how DWV systems remove liquid and solid waste safely and effectively. Identifies DWV components, including pipe, drains, traps, and vents. Also describes how plumbers connect these components to municipal and private sewer systems.

Introduction to Water Distribution Systems  (10 Hours)
(Module ID 02112) Identifies the major features and functions of components used in water distribution systems, including pipe and fittings, valves, and water heating and treatment equipment. Reviews private and public water sources, and describes how plumbers connect service lines to both types of systems.

Continued on following page
Tools of the Plumbing Trade (10 Hours)
(Module ID 02103) Instructs trainees in the care and use of the different types of hand and power tools they will use on the job. Gives trainees the information they need to select the appropriate tools for different tasks, and reviews tool maintenance and safety issues.

Introduction to Plumbing Math (12.5 Hours)
(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrates how they apply to on-the-job situations. Teaches trainees how to measure pipe using fitting tables and framing squares and how to calculate 45-degree offsets.

Introduction to Plumbing Drawings (17.5 Hours)
(Module ID 02105) Introduces trainees to the different types of plumbing drawings they will encounter on the job and discusses how to interpret and apply them when laying out and installing plumbing systems. Discusses the symbols used in plumbing and mechanical drawings and reviews isometric, oblique, orthographic, as well as schematic drawings. Requires trainees to render plumbing drawings and to recognize how code requirements apply to plumbing drawings.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106) Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to manufacturer’s instructions and applicable codes. Also discusses pressure testing of plastic pipe once installed.

Copper Tube and Fittings (12.5 Hours)
(Module ID 02107) Discusses sizing, labeling, and applications of copper tube and fittings and reviews the types of valves that can be used on copper tube systems. Explains proper methods for cutting, joining, and installing copper tube. Also addresses insulation, pressure testing, seismic codes, and handling and storage requirements.

Cast-Iron Pipe and Fittings (12.5 Hours)
(Module ID 02108) Introduces trainees to hub-and-spigot and no-hubcast-iron pipe and fittings and their applications in DWV systems. Reviews material properties, storage and handling requirements, and fittings and valves. Covers joining methods, installation, and testing.

Steel Pipe and Fittings (12.5 Hours)
(Module ID 02109) Discusses threading, labeling, and sizing of steel pipe and reviews the differences between domestic and imported pipe. Covers the proper techniques for measuring, cutting, threading, joining, and hanging steel pipe. Also reviews corrugated stainless steel tubing.

Introduction to Plumbing Fixtures (7.5 Hours)
(Module ID 02110) Discusses the proper applications of code-approved fixtures in plumbing installations. Reviews the different types of fixtures and the materials used in them. Also covers storage, handling, and code requirements.

Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)
(Module ID 02111) Explains how DWV systems remove waste safely and effectively. Discusses how system components, such as pipe, drains, traps, and vents work. Reviews drain and vent sizing, grade, and waste treatment. Also discusses how building sewers and sewer drains connect the DWV system to the public sewer system.

Introduction to Water Distribution Systems (10 Hours)
(Module ID 02112) Identifies the major components of water distribution systems and describes their functions. Reviews water sources and treatment methods and covers storage and distribution for the different types of systems that trainees will install on the job.

Structural Penetrations, Insulation, and Fire-Stopping (15 Hours)
(Module ID 02203-13) Introduces methods for adjusting structural members, insulating pipe, and installing fire-stopping. Covers reinforcement techniques for modified structural members; how to measure, cut, and install fiberglass and flexible foam insulation; and how to identify walls, floors, and ceilings that require fire-stopping.

Installing and Testing DWV Piping (30 Hours)
ISBN 978-0-13-340278-0
(Module ID 02204-13) Explains how to locate, install, connect, and test a complete drain, waste, and vent (DWV) system. Discusses how to develop material takeoffs, set up and use levels, locate building sewers and building drains, locate fixtures, and test a DWV system.
Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205-13) Covers the proper techniques for locating, installing, and connecting roof, floor, and area drains, and floor sinks according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.

Installing and Testing Water Supply Piping (20 Hours)
(Module ID 02206-13) Explores the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and hose bibs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, ice maker and washing machine boxes, and pipe stubouts and supports.

Types of Valves (5 Hours)
ISBN 978-0-13-340281-0
(Module ID 02207-13) Covers topics such as drain waste and vent (DWV) systems; storm drainage systems; roof storage and drainage systems.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-340283-4
(Module ID 02208-13) Covers the installation of basic plumbing fixtures, including toilets, showers, sinks, bathtubs, lavatories, water closets, and urinals. Reviews the installation of associated valves, faucets, and components. Explains how to connect appliances such as dishwashers, food waste disposers, refrigerators and ice makers, and washing machines.

Installing Water Heaters (10 Hours)
(Module ID 02209-13) Discusses gas-fired, electric, tankless, heat pump, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Sizing and Protecting the Water Supply System (30 Hours)
(Module ID 02312-14) Teaches techniques for sizing water supply systems, including calculating system requirements and demand, developed lengths, and pressure drops. Reviews the factors that can reduce efficiency of water supply piping. Introduces different backflow prevention devices and explains how they work, where they are used, and how they are installed in water supply systems.

Potable Water Supply Treatment (15 Hours)
(Module ID 02303-14) Explains how to disinfect, filter, and soften water supply systems. Discusses how to troubleshoot water supply problems, flush out visible contaminants from a plumbing system, and disinfect a potable water plumbing system.

Types of Venting (20 Hours)
(Module ID 02305-14) Reviews the different types of vents that can be installed in a DWV system and explains how they work. Teaches design and installation techniques.

Sizing DWV and Storm Systems (20 Hours)
(Module ID 02306-14) Explains how to calculate drainage fixture units for waste systems. Reviews how to size drain, waste, and vent (DWV) systems; storm drainage systems; and roof storage and drainage systems.

Sewage Pumps and Sump Pumps (12.5 Hours)
(Module ID 02307-14) Discusses the installation, diagnosis, and repair of pumps, controls, and sumps in sewage and storm water removal systems.

Corrosive-Resistant Waste Piping (7.5 Hours)
(Module ID 02308-14) Discusses corrosive wastes and reviews related safety issues and hazardous communications. Explains how to determine when corrosive-resistant waste piping needs to be installed, as well as how to correctly select and properly connect different types of piping.

Compressed Air (10 Hours)
(Module ID 02309-14) Explains the principles of compressed air systems and describes their components and accessories. Reviews installation and periodic servicing of air compressor systems.

Service Plumbing (27.5 Hours)
ISBN 978-0-13-378279-0
(Module ID 02310-14) Covers the troubleshooting and repair of fixtures, valves, and faucets in accordance with code and safety guidelines. Explains how to diagnose and repair water supply and drainage piping, water heaters, and other appliances and fixtures. Describes the effects of corrosion, freezing, and hard water on plumbing systems.

Basic Electricity (10 Hours)
(Module ID 02210-13) Introduces electrical safety and the principles of electricity including voltage, current, resistance, and power. Includes important electrical formulas, circuitry, and common plumbing-related electrical applications.

Fuel Gas and Fuel Oil Systems (20 Hours)
(Module ID 02211-13) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.

Fuel Gas and Fuel Oil Systems (20 Hours)
(Module ID 02211-13) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.

To Order Call: 1-800-922-0579 ©NCCER
Plumbing Level 4 (continued)

Water Pressure Booster and Recirculation Systems (12.5 Hours)
(Module ID 02403-14) Builds on trainees’ previous experience with pumps, storage tanks, controls, and pipes and fittings by teaching how to assemble those components into systems that boost water pressure and provide hot water.

Indirect and Special Waste (17.5 Hours)
(Module ID 02404-14) Describes the code requirements and installation procedures for systems that protect against contamination from indirect and special waste.

Hydronic and Solar Heating Systems (17.5 Hours)
(Module ID 02405-14) Introduces the basic types of hydronic and solar heating systems and their components. Reviews hydronic and solar heating system layout, installation, testing, and balancing, and also discusses methods that inhibit corrosion in hydronic or solar heating systems.

Codes (12.5 Hours)
(Module ID 02406-14) Discusses the different codes used by plumbers across the country and explains how these codes are written, adopted, modified, and implemented.

Private Water Supply Well Systems (10 Hours)
(Module ID 02408-14) Describes the operation of pumps and well components. Reviews the qualities of good wells and how to assemble and disassemble pumps and components.

Private Waste-Disposal Systems (10 Hours)
(Module ID 02409-14) Describes the types of private waste-disposal systems, discusses the maintenance and installation of these systems, and explains how to determine the local code requirements for these systems. Covers percolation tests and sewage system planning and layout.

Swimming Pools and Hot Tubs (7.5 Hours)
(Module ID 02410-14) Introduces trainees to plumbing systems in swimming pools, hot tubs, and spas.

Plumbing for Mobile Homes and Travel Trailer Parks (7.5 Hours)
(Module ID 02411-14) Describes the location and layout of plumbing systems for mobile home and travel trailer parks. Reviews how to design and lay out a system, how to connect water and sewer lines to a mobile home, and how to estimate materials for the park.

Introduction to Medical Gas and Vacuum Systems (15 Hours)
(Module ID 02412-14) Introduces the various types of medical gas and vacuum systems used in health care facilities. Covers the system requirements and professional qualifications required by code, describes common types of medical gas and vacuum systems, and introduces the safety requirements for installing, testing, and servicing these systems.
Reinforcing Ironwork

L1 REINFORCING IRONWORK

Curriculum Notes

• 192.5 Hours (includes Core)
• Published: 2005
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
• A Spanish translation is available. Please see NCCER’s online catalog for more information.

Trainee Guide: $69.99
PAPERBACK ISBN 978-0-13-228220-8

Level 1

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Concrete Reinforcement (40 Hours)
ISBN 978-0-13-228987-0
(Module ID 39101-05) Describes the selection and use of rebar, bar supports, and welded-wire fabric. Presents general procedures for cutting, bending, splicing, and tying rebar, and placement of steel in various types of footings, columns, walls, and slabs.

Concrete Reinforcement Safety (15 Hours)
(Module ID 39102-05) Focuses on safety topics of particular concern to the reinforcing ironworker, including rebar-related hazards, fall protection, use of positioning devices, PPE, excavations, and lifting/carrying techniques.

Rigging Equipment (10 Hours)
ISBN 978-0-13-228989-4
(Module ID 39103-05) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, and attaching hardware such as shackles, eyebolts, and hooks, as well as rigging knots.

Concrete Forms (32.5 Hours)
(Module ID 27204-01) Covers the construction of forms for continuous, stepped continuous, pier and grade beam concrete footings. Describes the edge forms used for on-grade concrete slabs and similar structures. Forming terms, parts of forms and procedures for constructing basic footing and edge forms are included.

Foundations and Flatwork (15 Hours)
(Module ID 30116) Identifies decking types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and placing concrete safely. Explains the effects of deck penetrations and damage.

Metal Decking (10 Hours)
(Module ID 30117) Identifies deck types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and placing concrete safely. Explains the effects of deck penetrations and damage.

Introductory Skills for the Crew Leader (16 Hours)
Trainee
(Module ID MT101) Teaches leadership skills required to supervise personnel. Discusses principles of project planning, scheduling, estimating, and management. Presents several case studies for student participation.

Oxyfuel Cutting (17.5 Hours)
(Module ID 39106-05) Explains the safety requirements for oxyfuel cutting. Identifies equipment and setup requirements and explains how to light, adjust, and shut down oxyfuel equipment. Explains how to perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

Manufactured Forms (22.5 Hours)
(Module ID 39104-05) Describes basic rigging and crane hazards and related safety procedures. Provides an overview of personnel lifting and lift planning, and introduces crane load charts and load balancing. Includes instructions for rigging and lifting pipe.

Commercial Blueprints (20 Hours)
(Module ID 39105-05) Explains the format and content of drawings typically found in a commercial drawings package.

L2 REINFORCING IRONWORK

Curriculum Notes

• 118.5 Hours

Trainee Guide: $99.99
PAPERBACK ISBN 978-0-13-227294-0

Level 2

MODULES

Reinforcing Ironwork Level Two comprises modules from NCCER’s Carpentry and Ironworking curricula. The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Concrete Reinforcement (40 Hours)
ISBN 978-0-13-228987-0
(Module ID 39101-05) Describes the selection and use of rebar, bar supports, and welded-wire fabric. Presents general procedures for cutting, bending, splicing, and tying rebar, and placement of steel in various types of footings, columns, walls, and slabs.

Concrete Reinforcement Safety (15 Hours)
(Module ID 39102-05) Focuses on safety topics of particular concern to the reinforcing ironworker, including rebar-related hazards, fall protection, use of positioning devices, PPE, excavations, and lifting/carrying techniques.

Rigging Equipment (10 Hours)
ISBN 978-0-13-228989-4
(Module ID 39103-05) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, and attaching hardware such as shackles, eyebolts, and hooks, as well as rigging knots.

Concrete Forms (32.5 Hours)
(Module ID 27204-01) Covers the construction of forms for continuous, stepped continuous, pier and grade beam concrete footings. Describes the edge forms used for on-grade concrete slabs and similar structures. Forming terms, parts of forms and procedures for constructing basic footing and edge forms are included.

Foundations and Flatwork (15 Hours)
(Module ID 30116) Identifies decking types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and placing concrete safely. Explains the effects of deck penetrations and damage.

Metal Decking (10 Hours)
(Module ID 30117) Identifies deck types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and placing concrete safely. Explains the effects of deck penetrations and damage.

Introductory Skills for the Crew Leader (16 Hours)
Trainee
(Module ID MT101) Teaches leadership skills required to supervise personnel. Discusses principles of project planning, scheduling, estimating, and management. Presents several case studies for student participation.
 Roofing

Introduction to Roofing (2.5 Hours)
(Module ID 16101) Introduces the roofing craft and describes types of roofs and roof systems. Overviews basic concepts of safety, describes apprenticeship programs, and lists skills, responsibilities, and characteristics a worker should possess.

Curriculum Notes
- 178 Hours (includes Core)
- Revised: 2022, Second Edition, in conjunction with NRCA
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $69.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Roofing (2.5 Hours)
(Module ID 16101) Introduces the roofing craft and describes types of roofs and roof systems. Overviews basic concepts of safety, describes apprenticeship programs, and lists skills, responsibilities, and characteristics a worker should possess.

Wood Roof Systems (12.5 Hours)
(Module ID 16203) Outlines the components, tools, and installation methods used for wood roof systems. Distinguishes between wood shingles and wood shakes. Identifies common mistakes in the installation of wood roof systems and introduces basic repair methods.

Slate Roof Systems (12.5 Hours)
(Module ID 16204) Describes slate roof system components, styles, tools, and safety considerations. Details appropriate procedures for the installation and repair of these systems.

Metal Roof Systems (15 Hours)
(Module ID 16205) Describes the various types of metal roofs, including architectural, structural, and metal shingle systems. Discusses the seam types, methods, and tools used in metal roof installation. Details the proper tools and techniques used for the installation of these features.

Thermoplastic Roof Systems (10 Hours)
(Module ID 16206) Describes types of thermoplastic roof systems and outlines their installation and repair. Identifies types of field membranes, pre-manufactured flashing accessories, attachment components, and related tools.

EPDM Roof Systems (10 Hours)
(Module ID 16207) Describes types of EPDM roof systems and their components. Identifies field membrane types, pre-manufactured flashing accessories, attachment methods, and components of EPDM roof systems. Describes installation and repair of these systems.

Built-Up Roof Systems (15 Hours)
ISBN 978-0-13-749149-0
(Module ID 16208) Introduces types of built-up roof (BUR) systems and their components. Outlines basic installation and repair methods associated with BUR system, as well as related tools.

Modified Bitumen Roof Systems (15 Hours)
ISBN 978-0-13-749152-0
(Module ID 16209) Describes types and characteristics of modified bitumen (mod-bit) roof systems. Discusses the components, installation procedure, basic repair methods, and tools used for mod-bit systems.

Liquid-Applied Roofing (12.5 Hours)
(Module ID 16210) Describes liquid-applied roofing products and explains the difference between roof coatings and liquid-applied roof membranes. Outlines procedures and tools used to install and repair liquid-applied roofing.

Roofing Service and Repair (15 Hours)
(Module ID 16212) Introduces service and repair in the roofing industry and related career opportunities for roofers. Describes the general process of repair as well as specific repairs for specific steep- and low-slope roof systems.

©NCCER 63
MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to the Trade** *(7.5 Hours)*
(Module ID 31101-15) Introduces the scaffolding program, describes the duties of a scaffold, and identifies scaffold types and scaffolding terms.

**Trade Safety** *(7.5 Hours)*
(Module ID 31102-15) Provides a comprehensive overview of the safety regulations and guidelines in the scaffolding industry.

**Trade Tools and Equipment** *(7.5 Hours)*
(Module ID 31103-15) Covers the safe use and applications of hand and power tools used in the trade.

**Trade Math** *(7.5 Hours)*
(Module ID 31104-15) Explains and gives examples of math calculations of scaffold loads, including area loads, concentrated loads, live loads, cantilevered loads, and wind loads.

**Supported Scaffolds** *(32.5 Hours)*
ISBN 978-0-13-378899-0
(Module ID 31105-15) Identifies the equipment used with supported scaffolds. Describes the procedures for erecting supported scaffolds.

**Mobile Scaffolds** *(10 Hours)*
(Module ID 31106-15) Identifies the different types of powered and manually propelled mobile scaffolds and describes their erection and operation.

**Suspension Scaffolds** *(7.5 Hours)*
(Module ID 31107-15) Identifies the types of equipment used with suspension scaffolds. Describes the rigging of suspension scaffolds.
Sheet Metal

L1  SHEET METAL  LEVEL 1

Curriculum Notes

- 192.5 Hours (includes Core)
- Updated: 2019
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Occupational Overview: The Sheet Metal Industry (7.5 Hours)
(Module ID 04101) Summarizes the history and development of the sheet metal craft. Explains the benefits of apprenticeship training, and identifies career opportunities in the trade.

Construction and Sheet Metal Drawings (17.5 Hours)
(Module ID 04200) Describes the techniques used for field measuring and layout of duct runs and fittings. Covers the math involved in creating various offsets and seam allowances, based on field measurements to fit unique and specific situations.

Sheet Metal Tools and Equipment (10 Hours)
(Module ID 04102) Describes the hand and power tools used in the sheet metal craft, including layout tools and cutting, bending, and forming machines. Includes safety and maintenance guidelines.

Radial Line Development (20 Hours)
(Module ID 04203) Introduces radial line development principles used to determine layouts for sheet metal fittings. Includes practice layout and fabrication tasks that allow trainees to develop and demonstrate their skills.

Sheet Metal Math and Measurements (20 Hours)
(Module ID 04104) Covers calculations using denominate numbers, area and volume calculations, English-metric system conversions, basic geometry, percentages, and calculation of stretchouts.

Sheet Metal Tools and Equipment (10 Hours)
(Module ID 04102) Describes the hand and power tools used in the sheet metal craft, including layout tools and cutting, bending, and forming machines. Includes safety and maintenance guidelines.

Bend Allowances (7.5 Hours)
(Module ID 04206) Provides instruction and practice in determining proper bend allowances in sheet metal. Also reviews the interplay of different factors that affect the amount of bend allowance needed and the methods for calculating allowance.

Installation of Air Distribution Accessories (12.5 Hours)
(Module ID 04107) Describes how air distribution accessories such as louvers, dampers, and access doors function as part of an air distribution system. Includes installation guidelines and checklists.

NATE CERTIFICATION
NCCER is an officially recognized training provider for North American Technician Excellence (NATE), an independent, third-party certification body for HVAC/R technicians. NATE-certified technicians can use module completions through NCCER-accredited training providers for the continuing education hours required for recertification through NATE. For details and lists of available NATE-recognized training, visit www.natex.org. For more information regarding NATE recertification, please contact NCCER Customer Service at 1-888-622-3720.
# Sheet Metal Level 3

## L3 SHEET METAL

**Curriculum Notes**
- 145 Hours
- Updated: 2019
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Commercial Airside Systems (12.5 Hours)
(Module ID 03201) Describes the systems, equipment, and operating sequences commercial airside system configurations such as constant volume single-zone and multi-zone, VVT, VAV, and dual-duct VAV.

### Architectural Sheet Metal (20 Hours)
(Module ID 04403) Introduces the techniques and proper operation of equipment used for welding and brazing. Emphasizes safety and awareness of hazards involved. Trainees practice welds in a variety of positions and perform a basic braise.

### Welding and Brazing (25 Hours)
(Module ID 04403) Introduces the techniques and proper operation of equipment used for welding and brazing. Emphasizes safety and awareness of hazards involved. Trainees practice welds in a variety of positions and perform a basic braise.

### Sheet Metal Job Specifications (20 Hours)
(Module ID 04402) Describes the use of project specifications and submittals. Covers how specifications and submittals are applied when working on a specific job. Covers the coordination of crafts.

### Air Testing and Balancing (20 Hours)
(Module ID 04402) Describes the use of project specifications and submittals. Covers how specifications and submittals are applied when working on a specific job. Covers the coordination of crafts.

### Board Insulation For Ducts (25 Hours)
(Module ID 19203) Covers fiberglass board insulation applications, such as cutting fiberglass board insulation to fit over standing seams and stiffeners, vapor-seal applications, and cutting and installing fiberglass board insulation on round or oval ducts.

### Blanket Insulation For Ducts (7.5 Hours)
(Module ID 19202) Covers fiberglass blanket installation to ducts and apparatus and discusses vapor-sealed blanket insulation facings.

**Trainee Guide:** $99.99

**Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.**

# L4 SHEET METAL

## L4 SHEET METAL

**Curriculum Notes**
- 147.5 Hours
- Updated: 2019
- NATE-Recognized Training Provider
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Fume and Exhaust System Design (25 Hours)
(Module ID 04404) Reviews the codes and specifications pertaining to fume and exhaust system design for safe workspaces. Provides instruction in selecting the appropriate materials for fume or exhaust system components and to identify the different types of hoods and applications for each.

### Principles of Airflow (25 Hours)
(Module ID 04303) Explains the basic principles of airflow and reviews how airflow is affected by duct size, shape, and fittings. Also reviews the components of an air distribution system.

### Using Construction Drawings in Sheet Metal (20 Hours)
(Module ID 04308) Covers equipment schedules, material takeoffs, and craft scheduling. Explains how to put knowledge of construction drawings and documents to work as a sheet metal fabricator or installer.

### Sheet Metal Job Specifications (20 Hours)
(Module ID 04405) Explains how to balance an air distribution system so that the right amount of air is correctly distributed at the proper velocities and returned to the heating and cooling units. Reviews the tools and techniques used for adjusting fans, volume dampers, registers, and grilles. Provides proper techniques for duct leakage testing.

### Architectural Sheet Metal (25 Hours)
(Module ID 04307) Teaches how to lay out and fabricate sheet metal components of a roof drainage system, including flashing, gutters, and downspouts.

### Shop Production and Organization (25 Hours)
(Module ID 04401) Introduces the production, organization, planning, and control functions that occur in a sheet metal shop. Emphasizes optimization of processes and accurate estimating for competitive bidding. Discusses project planning techniques, principles of efficient shop layout and materials flow, as well as the roles and relationships of shop personnel.

### Sheet Metal Business and Technology (7.5 Hours)
(Module ID 04407) Covers advancements in software and technology as it pertains to sheet metal workflow. Covers tools to enhance design, estimation, fabrication, installation, and project documentation.

### Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

**Trainee Guide:** $99.99

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Site Layout (10 Hours)
(Module ID 78101-04) Provides an overview of the site layout trade and related tasks. Covers the use of the builder’s level and leveling rods, as well as the equipment and procedures for making distance measurements by taping ( chaining). Also covers the elements of professional conduct, safety, and communications. Briefly describes the aspects of an apprenticeship program and the career path and professional opportunities related to the site layout trade.

Surveying Math (30 Hours)
(Module ID 78102-04) Expands on the Core module, Introduction to Construction Math, with emphasis on the metric system, including how to convert between English and metric system units. Covers basic concepts for working with formulas and equations, as well as basic geometry and right-angle trigonometry.

Survey Equipment Use and Care One (30 Hours)
(Module ID 78103-04) Expands on the use and care of tools and instruments commonly used to perform site survey work. Introduces the instruments and procedures used for making distance measurements electronically and for performing differential leveling and basic horizontal and vertical angular measurements. Includes guidelines for recording surveying measurement data in field notes.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Advanced Surveying Math (30 Hours)
(Module ID 78201-04) Covers the advanced math needed for site layout, including area and volume of solids, use of the Pythagorean Theorem to solve for distances and angles, and use of polar and rectangular coordinates. Covers common coordinate and grid systems.

Survey Equipment Use and Care Two, EDMIs and Total Stations (10 Hours)
(Module ID 78202-04) Covers the setup, use, calibration, and care of electronic distance measuring instruments and total stations.

Control Setup (30 Hours)
(Module ID 78203-04) Contains information and instructions for setting up, running, recording, and closing a horizontal traverse and a level loop. Also covers primary and secondary control plans, as well as vertical control for multilevel structures.

Boundary and Topography Surveys (10 Hours)
(Module ID 78204-04) Contains information and instructions for gathering, recording, and plotting profile and cross-section leveling data. Includes plot and site plans to identify rights-of-way, utilities, setbacks, boundaries, and tie-in locations.

Data Collection and Basic Computer Skills (10 Hours)
(Module ID 78205-04) Covers the use of integrated total station systems and GPS surveying systems. Explains the use of integrated field and office software to collect and manage data.

Concrete Properties and Quality Control (15 Hours)
(Module ID 78206-04) Covers the chemical and physical properties of concrete and the components, such as cement, aggregates, and admixtures, that make up the concrete mixture. Explains the various methods and equipment used to sample, test, and inspect concrete.

Means and Methods (40 Hours)
ISBN 978-0-13-160027-0
(Module ID 78207-04) Provides extensive coverage of soils and their classifications and explains how various soils behave in excavations. Covers the safety procedures and equipment used when working in or near trenches. Provides layout procedures for footings, piers, building corners, columns, walls, embeddings, and stairs.

Continued on following page

Occupational Overview: The Sprinkler Industry

(5 Hours)
(Module ID 18101) Describes the basic types of sprinkler systems, the tools used to install them, and the codes and standards that apply to these systems. Covers the apprenticeship requirements for sprinkler fitters, employer and employee responsibilities, and career paths in the sprinkler industry.

Introduction to Components and Systems

(10 Hours)
(Module ID 18102) Provides an overview of the four main types of sprinkler systems. Describes testing laboratories and listing requirements. Covers sprinkler characteristics, including thermal response, spray pattern and coverage area, orientation, K-factors, and temperature ratings. Describes various types of piping, valves, and pumps.

Steel Pipe and Fittings

(20 Hours)
(Module ID 18103) Describes the steel pipe used in sprinkler systems, including pipe types, schedules, and sizes. Covers common methods of end preparation, including cutting, reaming, grooving, and threading pipe. Describes various types of grooved, threaded, flanged, and plain-end fittings, along with the installation methods and applications of each type.

CPVC Pipe and Fittings

(12.5 Hours)
(Module ID 18104) Covers the special type of chlorinated polyvinyl chloride (CPVC) pipe and fittings used in sprinkler systems. Describes the procedures for cutting, beveling, cleaning, and joining CPVC pipe and fittings. Provides an overview of how to test the installed sprinkler system.

Copper Tubing and Fittings

(10 Hours)
(Module ID 18105) Copper tubing and fittings are introduced along with cutting and bending tools. The soldering process is described, including techniques for measuring, cutting, reaming, and cleaning tubing. Brazing is described, as are brazing metals, fluxes, and brazing equipment. Also covers grooved couplings and compression connections.

Underground Pipe

(12.5 Hours)
(Module ID 18106) Describes the installation of underground piping systems. Covers ductile iron and PVC piping and components, including risers, backflow preventer assemblies, hydrants, and restraints. Also covers trench safety requirements, backfilling, and testing.

CPVC Pipe and Fittings

(12.5 Hours)
(Module ID 18104) Covers the special type of chlorinated polyvinyl chloride (CPVC) pipe and fittings used in sprinkler systems. Describes the procedures for cutting, beveling, cleaning, and joining CPVC pipe and fittings. Provides an overview of how to test the installed sprinkler system.

Standard Spray Sprinklers

(20 Hours)
(Module ID 18205) This module describes the characteristics of standard spray sprinklers. It also covers types of construction, NFPA 13 light and ordinary hazard occupancy classifications, and installation considerations.

Wet Pipe Sprinkler Systems

(25 Hours)
(Module ID 18206) This module describes the operation and installation of wet pipe sprinkler systems. It covers various system controls and switches and explains how they operate. It also describes how to complete a Contractor’s Material and Test Certificate for Aboveground Piping and provides an overview of basic system troubleshooting procedures.

Dry Pipe Sprinkler Systems

(25 Hours)
(Module ID 18207) This module describes the operation and installation of dry pipe sprinkler systems. It covers differential and mechanical dry pipe valves and trim, including switches, gauges, air sources, accelerators, and drains. It also provides an overview of basic system troubleshooting and acceptance testing procedures, including the completion of a Contractor’s Material and Test Certificate for Aboveground Piping for a dry pipe sprinkler system.

Continued on following page
**Level 3 Sprinkler Fitting**

**Curriculum Notes**
- 150 Hours
- Revised: 2022, Fourth Edition to reflect NFPA 13
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

Trainee Guide: $99.99

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Water Supplies** (15 Hours)
  (Module ID 18303) Identifies the chemical and physical properties of water. Covers the water supplies available for sprinkler systems, including tanks and municipal water supply systems. Describes the procedures and NFPA requirements for waterflow testing.

- **Fire Pump Systems** (35 Hours)
  (Module ID 18304) Identifies various types of fire pump systems and their components, including pumps, drivers, controllers, and sensing lines. Describes fire pump system pre-checks and start-up/acceptance testing.

- **Standpipes** (25 Hours)
  (Module ID 18302) Identifies different types and classifications of standpipe systems. Covers hose valves and adapters used with these systems. Describes procedures and NFPA requirements for acceptance testing.

- **Deluge and Preaction Sprinkler Systems** (35 Hours)
  (Module ID 18301) Describes the operation, installation, and NFPA 13 requirements for deluge and preaction sprinkler systems. Covers initiating and notification devices. Provides an overview of acceptance testing, including completing a Contractor’s Material and Test Certificate for Aboveground Piping for these systems.

- **Application-Specific and Special Sprinklers** (40 Hours)
  (Module ID 18305) Covers application-specific sprinklers, including extended coverage sprinklers, residential sprinklers, control mode specific application (CMSA) sprinklers, and early suppression fast-response (ESFR) sprinklers. Describes the area of coverage, positioning, and obstruction requirements for each type. Covers special sprinklers and their uses.

**Level 4 Sprinkler Fitting**

**Curriculum Notes**
- 145 Hours
- Revised: 2023, Fourth Edition to reflect NFPA 13
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

Trainee Guide: $99.99

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **System Layout** (27.5 Hours)
  (Module ID 18401) Identifies three types of system configurations and a variety of occupancy and storage classifications. Covers the basics of sprinkler system layout and design methods. Describes flow characteristics and pressure loss.

- **Inspection, Testing, and Maintenance** (37.5 Hours)
  (Module ID 18402) Covers inspection, testing, and maintenance requirements for sprinkler systems, standpipe and hose systems, fire pumps, and other systems.

- **Special Extinguishing Systems** (27.5 Hours)
  (Module ID 18403) Describes water spray, water mist, foam, carbon dioxide, and clean agent extinguishing systems. Covers all of the appropriate system components, including pipe and fittings, nozzles, alarms, detectors, and control equipment.

- **Fundamentals of Crew Leadership** (22.5 Hours)
  (Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are also discussed. Explains details and procedures for project planning, scheduling, and estimating.

- **Procedures and Documentation** (30 Hours)
  ISBN 978-0-13-817417-0
  (Module ID 18405) Explains the various ways sprinkler projects are documented. Reviews daily reports, materials documentation, and documentation of safety policies and incidents. Covers responses to water damage, including documentation and investigation.
Plasma Arc Cutting (7.5 Hours)
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slotting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Air-Carbon Arc Cutting and Gouging (10 Hours)
(Module ID 29104) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc washing and gouging activities.

Base Metal Preparation (12.5 Hours)
(Module ID 29105) Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

SMAW – Equipment and Setup (5 Hours)
(Module ID 29107) Describes how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

SMAW – Electrodes (2.5 Hours)
ISBN 978-0-13-792468-4
(Module ID 29108) Describes electrode characteristics and different types of filler metals. Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Explains proper storage and control of filler metals and identifies the use of rods.

SMAW – Groove Welds with Backing (50 Hours)
(Module ID 29110) Describes groove welds and explains how to set up welding equipment for making groove welds. Describes how to make groove welds with backing. Provides procedures for making flat, horizontal, vertical, and overhead groove welds.

SMAW – Open-Root Groove Welds – Plate (60 Hours)
(Module ID 29112) Introduces various types of groove welds and describes how to prepare for grooving weld. Describes the techniques required to produce various open V-groove welds.
**Welding Level 1**

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Welding Safety** (5 Hours)
(Module ID 29101-15) Covers safety equipment, protective clothing, and procedures applicable to the cutting and welding of metals.

**Oxyfuel Cutting** (17.5 Hours)
(Module ID 29102-15) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, beveling, washing, and gouging.

**Plasma Arc Cutting** (7.5 Hours)
(Module ID 29103-15) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

**Air-Carbon Arc Cutting and Gouging** (10 Hours)
(Module ID 29104-15) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc washing and gouging activities.

**Base Metal Preparation** (12.5 Hours)
(Module ID 29105-15) Describes how to clean and prepare all types of base metals for cutting or welding. Identifies and explains joint design and base metal preparation for all welding tasks.

**SMAW – Equipment and Setup** (5 Hours)
(Module ID 29106-15) Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

**SMAW – Beads and Fillet Welds** (100 Hours)
(Module ID 29111-15) Introduces various types of groove welds and describes how to prepare for groove welding. Describes the techniques required to produce various open V-groove welds.
## Welding Level 2

### Curriculum Notes

- **277.5 Hours**
- **Revised:** 2015, Fifth Edition
- Sequenced in accordance with the American Welding Society’s (AWS) S.E.N.S.E school requirements. When combined with NCCER Welding Level 1, the content aligns with the key indicators specified in AWS E62.0:2008 Level 1-Entry Welder.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**Continued on following page**
Welding Level 3 (continued)

SMAW — Stainless Steel Plate and Pipe Groove Welds (100 Elective Hours)

(Module ID 29306-16) Explains stainless steel metallurgy; how to select SMAW electrodes for stainless steel welds; and how to weld different types of stainless steels. Covers safety issues associated with welding on stainless steels; how to prepare weld coupons; and how to set up SMAW equipment for welding stainless steel. Provides procedures for making open-root V-groove welds with SMAW equipment on stainless steel plate in the 1G, 2G, 3G, and 4G positions. Includes procedures for making open-root V-groove welds with SMAW equipment on stainless steel pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

Trainee Guide: $99.99

NCCER Connect Access Card: $99.99

GMAW — Aluminum Plate (30 Hours)
(Module ID 29402-16) Covers the setup of GTAW equipment for welding aluminum plate. Explains how to clean and prepare aluminum plate coupons for welding, and how to select the aluminum filler metals and shielding gases used in the GTAW process. Provides GTAW procedures on how to build weld pads on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

GMAW — Aluminum Plate (30 Hours)
(Module ID 29401-16) Covers the setup of GMAW equipment for welding aluminum plate. Explains aluminum metallurgy and the characteristics of aluminum welding; how to clean and prepare aluminum plate coupons for welding; and problems often encountered in aluminum welding. Explains GMAW techniques used in aluminum welding. Provides GMAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

GMAW — Aluminum Pipe (50 Hours)

GTAW — Aluminum Plate (30 Hours)
(Module ID 29402-16) Covers the setup of GTAW equipment for welding aluminum plate. Explains how to clean and prepare aluminum plate coupons for welding, and how to select the aluminum filler metals and shielding gases used in the GTAW process. Provides GTAW procedures on how to build weld pads on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

GTAW — Aluminum Pipe (50 Hours)
(Module ID 29403-16) Covers the setup of GTAW equipment for welding aluminum pipe. Explains how to clean and prepare aluminum pipe coupons for welding. Addresses GTAW techniques used to make V-groove and modified U-groove welds on aluminum pipe with and without backing. Provides GTAW procedures on how to make V-groove or modified U-groove welds on aluminum pipe in the 2G, 5G, and 6G positions.

Soldering and Brazing (12.5 Hours)
(Module ID 29405-16) Introduces the equipment, techniques, and materials used to safely join copper tubing through both brazing and soldering processes. Covers the required PPE, preparation, and work processes in detail. Also presents procedures for brazing copper to dissimilar materials such as steel.
**Mobile Crane Operations**

### LEVEL 1

**Curriculum Notes**
- 170 Hours (includes Core)
- Updated in 2018.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Orientation to the Trade** (5 Hours)

(Module ID 21101) Provides an overview of the entire course and highlights the duties and responsibilities of a mobile crane operator. Discusses ASME B30.5 and 29 CFR 1926, Subpart CC, as well as crane operator certification.

**Basic Principles of Cranes** (15 Hours)

(Module ID 21102) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

**Rigging Practices** (15 Hours)

(Module ID 38102; from Basic Rigger) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

**Crane Communications** (10 Hours)

(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

**Crane Safety and Emergency Procedures** (25 Hours)

(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

**Operating a Crane** (25 Hours)

(Module ID 21105) Describes preparations and considerations prior to lifting operations. Provides an opportunity to become familiar with the operation of a crane and the functions of its controls.

### LEVEL 2

**Curriculum Notes**
- 145 Hours
- Updated in 2018.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Machine Power Flow** (15 Hours)

(Module ID 21202) Discusses the power systems that enable cranes to perform. Discusses diesel and gasoline/propane engines and electrical/motor-generator, as well as mechanical, electrical, pneumatic, and hydraulic power systems.

**Computer Aids/Operator Aids** (20 Hours)

(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

**Wire Rope** (25 Hours)

(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

**Load Dynamics** (17.5 Hours)

(Module ID 21206) Covers leverage, forward and backward stability, operational quadrants, submerged lifts, non-centered lifts, and other forces that affect stability.

**Transporting Requirements** (17.5 Hours)

(Module ID 21308) Discusses the proper handling, loading and unloading, and securing procedures for mobile cranes and their components. Presents information on driver requirements and procedures for securing the mobile crane for transporting.

**On-Site Equipment Movement** (25 Hours)

(Module ID 21207) Covers site hazards and restrictions that could hinder on-site crane movement; safety considerations involved in crane movement over unlevel ground; pick-and-carry operations; and power line contact. Also addresses flotation capacity.

Rigger/Signal Person

**BASIC RIGGER**

**Curriculum Notes**

- 140 Hours (includes Core)
- Updated in 2018.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.
- A Spanish translation of Rigging Fundamentals is available. Please see NCCER’s online catalog for more information.

**PAPERBACK**

Trainee Guide: $49.99  

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Rigging Practices (15 Hours)**  
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

**Basic Principles of Cranes (15 Hours)**  
(Module ID 21102; from Mobile Crane Operations Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

**Crane Safety and Emergency Procedures (25 Hours)**  
(Module ID 21106; from Mobile Crane Operations Level One) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

**Intermediate Rigging (17.5 Hours)**  
(Module ID 38201) Describes basic rigging and safety practices related to rigging activities. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

**Load Dynamics (17.5 Hours)**  
(Module ID 21206; from Mobile Crane Operations Level Two) Covers leverage, forward and backward stability, operational quadrants, submerged lifts, non-centered lifts, and other forces that affect stability.

**Wire Rope (25 Hours)**  
(Module ID 21204; from Mobile Crane Operations Level Two) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

**Telescopic Boom Attachment Setup and Assembly (20 Hours)**  
(Module ID 21302; from Mobile Crane Operations Level Three) Covers the setup and stowing of swing-away extensions and various jibs, as well as the assembly of intermediate boom sections, on telescopic cranes. Includes the description and operating characteristics of manual and power luffing jibs.

**Lattice Boom Assembly and Disassembly (25 Hours)**  
(Module ID 21306; from Mobile Crane Operations Level Three) Identifies lattice-boom components and provides pre-/post-assembly considerations. Provides step-by-step guidance in the assembly and disassembly of lattice booms.

**Crane Communications (10 Hours)**  
(Module ID 53101) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Advanced Rigging (20 Hours)**
(Module ID 38301) Explains how load weight and center of gravity affect lifting and crane stability. Load calculations for multi-crane lifts are presented, along with the application of equalizer beams. The movement of loads up an inclined plane and the line pull required are examined in detail. The module concludes with guidance in the rigging and handling of rebar bundles.

**Load Charts (35 Hours)**
(Module ID 21301; from Mobile Crane Operations Level Three) Discusses the importance of load charts and charts that apply to different configurations. Includes on-rubber, on-outrigger, jib, and deduction charts, as well as range diagrams and operational notes. Covers parts of line and capacity calculations.

**Lift Planning (20 Hours)**
(Module ID 21304; from Mobile Crane Operations Level Three) Discusses lift plan implementation, including reference information, calculations, single- and multiple-crane lifting, critical lifts, and engineering considerations.

**Hoisting Personnel (20 Hours)**
(Module ID 21305; from Mobile Crane Operations Level Three) Examines ASME B30.23 and 29 CFR 1926.550(g) requirements while presenting advanced operation techniques for hoisting personnel.

# Tower Crane Operator

## Modules

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Orientation to the Trade (5 Hours)

(Module ID 48101-10) Provides an overview of the tower crane industry and highlights the duties and responsibilities of a tower crane operator. Discusses ASME and OSHA standards, as well as career opportunities and operator requirements.

### Basic Principles of Tower Cranes (20 Hours)

(Module ID 48102-10) Identifies the three main types of tower cranes and their components, including operator aids and base support systems. Explains the basic scientific principles associated with tower crane operation. Discusses the factors that affect lifting capacities.

### Tower Crane Safety (15 Hours)

(Module ID 48103-10) Introduces various safety aspects of tower crane operation, including equipment inspection, rigging, swing paths, and site hazard identification.

### Rigging Practices (15 Hours)

(Module ID 48104-10) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, lifting beams, and attaching hardware such as shackles, eyebolts, and hooks. Explains sling capacities and sling angles.

### Load Charts (15 Hours)

(Module ID 48105-10) Explains how to use load charts to calculate safe lifting capacities for self-erecting, luffing boom, and hammerhead tower cranes. Also covers parts of line and counterweight configurations.

### Communications (10 Hours)

(Module ID 48106-10) Covers the fundamentals of the communication process, including verbal and nonverbal methods of communication. Also presents the ASME B30.3 hand signals, including the appropriate operator action when the signal is given.

### Operating a Tower Crane (25 Hours)

ISBN 978-0-13-213826-0

(Module ID 48107-10) Describes the basic functions of a tower crane, as well as standard procedures for starting up and shutting down self-erecting, luffing boom, and hammerhead tower cranes. Provides an opportunity for trainees to become familiar with the actual operation of a tower crane and the functions of its controls.
Alternative Energy

• Introduction to the Power Industry is a prerequisite for completion and must be purchased separately.
  • 132.5 Hours
  • Published: 2011
  • Endorsed by the Florida Energy Workforce Consortium in support of the 17th Career Cluster developed for Energy, Alternative Energy investigates the viability and value of fossil fuel alternatives, such as biomass/biofuel, nuclear, solar, and wind.
  • The intended audience is secondary and post-secondary programs, as well any programs designed to articulate into a green career track.
  • Introduction to Alternative Energy (Module ID 74101-11) has been approved for 25 general continuing education hours under GBCI’s Credential Maintenance Program.
  • This craft requires additional instructor qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.
  • Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Alternative Energy (25 Hours)
(Module ID 74101-11) Identifies the need for alternative energy development. Describes the contributions and potential of individual alternative energy sources. Also covers the present U.S. electrical grid and issues affecting specific alternative energy source tie-in and reliability.

Biomass and Biofuels (22.5 Hours)
(Module ID 74102-11) Defines potential sources of biomass and biofuels and discusses their advantages and disadvantages for energy production. Discusses the future of biomass as well as biomass energy applications.

Nuclear Power (25 Hours)
(Module ID 74103-11) Describes nuclear power and its sources. Discusses the advantages and disadvantages of nuclear power, the future of nuclear energy, and nuclear power generation.

Solar Power (25 Hours)
(Module ID 74104-11) Describes solar photovoltaic (PV) power and how it is harnessed. Identifies the advantages and disadvantages of solar energy. Discusses the past, present, and future of solar energy, as well as solar PV applications.

Wind Power (22.5 Hours)
ISBN 978-0-13-272939-0
(Module ID 74105-11) Describes wind power and how it is harnessed. Identifies the advantages and disadvantages of wind energy. Discusses the past, present, and future of wind energy, as well as wind energy applications.
Solar Photovoltaics

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Solar Photovoltaics
(40 Hours) Trainee S22
(Module ID 57101-11) Covers the basic concepts of PV systems and their components, along with general sizing and electrical/mechanical design requirements. Provides an overview of performance analysis and troubleshooting. Successful completion of this module will help prepare trainees for the North American Board of Certified Energy Practitioners (NABCEP) PV Entry Level Exam.

Site Assessment (10 Hours)
ISBN 978-0-13-266202-4
(Module ID 57102-11) Explains how to determine customer needs, assess site-specific safety hazards, conduct a site survey, and identify a suitable location for the PV array and other system components. Also explains how to acquire and interpret site solar radiation and temperature data.

System Design (25 Hours)
(Module ID 57103-11) Describes system design considerations, including array configurations, component selection, and wire sizing. Covers bonding, grounding, and the selection of overcurrent protection and disconnects.

System Installation and Inspection (60 Hours)
(Module ID 57104-11) Explains how to use the information from the site assessment and system design documents to safely install a photovoltaic array and other system components.

Maintenance and Troubleshooting (10 Hours)
(Module ID 57105-11) Covers basic system performance monitoring and troubleshooting procedures, including record-keeping requirements.

©NCCER
Sustainable Construction Supervisor

Sustainable Construction Supervisor provides front-line supervisors with sustainable construction management techniques as they relate to targeted construction-phase LEED points for their projects. Topics include project sustainability goals, Green building materials and technologies, Green building methods and processes, and more. This module has been endorsed and approved by GBCI for 20 general and LEED-specific continuing education hours for credential maintenance.

This craft requires additional instructor qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.
As energy efficiency is becoming a priority for homeowners across America, many are turning to the weatherization industry to assist in their efforts. NCCER’s Weatherization program offers training that exceeds the existing standards for weatherization technicians, crew chiefs, and building auditors. This program combines existing NCCER curricula with new building science modules that address the specific needs of this industry. Dual credentials are available within this program. Note: Instructors wishing to teach NCCER’s Weatherization program must meet specific qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720.

PAPERBACK ISBN

MODULES

Wood and Masonry Construction Methods
(12.5 Hours)
(Module ID 33102-10; from Electronic Systems Technician Level One) Reviews the materials and techniques used in constructing and finishing residential and commercial buildings, including wood frame, brick and block, and post and beam. Covers common drills, bits, and techniques used to drill through wood and masonry. Also describes types of fasteners used with these materials.

Thermal & Moisture Protection (7.5 Hours)
(Module ID 27203-07; from Carpentry Level Two, Fourth Edition) Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

Concrete and Steel Construction Methods
(12.5 Hours)
ISBN 978-0-13-266284-0
(Module ID 33103-10; from Electronic Systems Technician Level One) Describes the materials and techniques used in constructing and finishing residential and commercial buildings, including poured and prefabricated concrete and structural steel. Covers common drills, bits, and techniques used to drill through concrete and steel. Also describes types of fasteners used with these materials.

Commercial Drawings (25 Hours)
(Module ID 27201-07; from Carpentry Level Two, Fourth Edition) Describes how to read and interpret a set of commercial drawings and specifications.

Introduction to Supervisory Skills (15 Hours)
(Module ID 03410-09; from HVAC Level Four, Third Edition) Describes the skills that must be learned for the craftsperson who plans to move into leadership roles. Introduces human resource criteria and concepts for the first time in the series.

Introduction to Heating (15 Hours)
(Module ID 03108-07; from HVAC Level One, Third Edition) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

Chimneys, Vents, and Flues (5 Hours)
(Module ID 03202-07; from HVAC Level Two, Third Edition) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

Sealing the Building Envelope (25 Hours)
(Module ID 59102-10) Describes how to correct heat losses and gains by applying insulating materials to uninsulated areas of the building envelope. Describes how to reduce air infiltration by applying caulks and other materials. Also explains how to patch drywall and install weatherstripping.

Insulating Pipes, Ducts, and Water Heaters (10 Hours)
(Module ID 59103-10) Describes how to insulate water pipes and water heaters, and explains how to make simple duct system repairs, seal air leaks in a duct system, and insulate ducts to reduce heat loss.

Air Distribution Systems (10 Hours)
(Module ID 03109-07; from HVAC Level One, Third Edition) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Air Quality Equipment (5 Hours)
(Module ID 03204-07; from HVAC Level Two, Third Edition) Covers principles, processes, and devices used to control humidity and air cleanliness, as well as devices used to conserve energy in HVAC systems.

Indoor Air Quality (15 Hours)
(Module ID 03103-09; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

Diagnostics and Management Practices (30 Hours)
(Module ID 59201-10) Explains how to interpret energy audit reports and how to prioritize and schedule air sealing. Describes how to perform the following tests: blower door, pressure pan, burner efficiency, carbon monoxide, draft, and spillage. Also covers lead-safe work practices and how to perform quality inspections on completed work.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Trade Mathematics (10 Hours)
(Module ID 03102-07; from HVAC Level One, Third Edition) Explains how to solve HVAC/R trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

Introduction to Cooling (30 Hours)
(Module ID 03107-07; from HVAC Level One, Third Edition) Explains the fundamental operating concepts of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC/R systems. Also introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Introduces basic control concepts for simple systems.

Introduction to Heating (15 Hours)
(Module ID 03108-07; from HVAC Level One, Third Edition) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

Chimneys, Vents, and Flues (5 Hours)
(Module ID 03202-07; from HVAC Level Two, Third Edition) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

Introduction to Hydronic Systems (10 Hours)
ISBN 978-0-13-266312-0
(Module ID 03203-07; from HVAC Level Two, Third Edition) Introduces hot water heating systems, focusing on safe operation of the low-pressure boilers and piping systems in residential applications.

Heating and Cooling System Design (25 Hours)
(Module ID 03407-09; from HVAC Level Four, Third Edition) Identifies factors that affect heating and cooling loads. Explains the process by which heating and cooling loads are calculated, and how load calculations are used in the selection of heating and cooling equipment. Covers basic types of duct systems and their selection, sizing, and installation requirements.

Energy Conservation Equipment (10 Hours)
(Module ID 03404-09; from HVAC Level Four, Third Edition) Covers heat recovery/reclaim devices, as well as other energy recovery equipment used to reduce energy consumption in HVAC systems.

Indoor Air Quality (15 Hours)
(Module ID 03403-09; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

Alternative Heating and Cooling Systems (10 Hours)
(Module ID 03409-09; from HVAC Level Four, Third Edition) Describes alternative devices used to reduce energy consumption, including wood, coal, and pellet-fired systems, waste-oil heaters, geothermal heat pumps, solar heating, in-floor radiant heating, and direct-fired makeup units. Also introduces application-specific computer room environmental and air turnover systems.

Performing a Building Audit (42.5 hours)
(Module ID 59202-10) Explains how to interview homeowners and educate them about saving energy in their homes. Explains how to inspect and evaluate the building envelope and HVAC systems. Describes how to perform the following tests: blower door, pressure pan, burner efficiency, carbon monoxide, draft, and spillage. Also covers lead-safe work practices, baseload energy use, and the purpose of the forms and reports a building auditor is responsible for completing.
Introduction to Electrical Circuits (7.5 Hours)
(Module ID 26103-11; from Electrical Level One, Seventh Edition)
Introduces electrical concepts used in Ohm’s law applied to DC series circuits. Covers atomic theory, electromagnetic force, resistance, and electric power equations.

Electrical Theory (7.5 Hours)
ISBN 978-0-13-257811-0
(Module ID 26104-11; from Electrical Level One, Seventh Edition)
Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Electrical Test Equipment (5 Hours)
(Module ID 26112-11; from Electrical Level One, Seventh Edition)
Covers proper selection, inspection, and use of common electrical test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment. Also covers safety precautions and meter category ratings.

Electrical Wiring (10 Hours)
(Module ID 58104-11) Describes types and applications of conductors as well as their installation techniques. Also describes the technique and components used for terminating and splicing conductors.

Wind Turbine Power Distribution Systems
(12.5 Hours)
(Module ID 58107-11) Discusses the basics of power generation and the generators used in wind turbines. Reviews how power is distributed and controlled during various modes of wind turbine operation. Simple one-line diagrams are also covered.

Fasteners and Torquing (20 Hours)
(Module ID 58108-11) Presents comprehensive coverage of wind turbine fasteners and their required characteristics. Covers torque theory, torquing, tensioning, and hydraulic torquing equipment. Presents the use and care of all significant torquing and tensioning tools. The use of taps and dies is also introduced.

Introduction to Bearings (15 Hours)
(Module ID 32207-07; from Industrial Maintenance Mechanic Level Two) Introduces plain, ball, thrust, guide, flanged, pillow block, and takeup bearings. Discusses bearing materials and designations.

Lubrication (12.5 Hours)
(Module ID 58109-11) Explores basic lubrication theory and related equipment. Includes the different applications and types of lubricants used in the wind turbine environment. Reviews OSHA’s hazard communication program and the EPA’s hazardous waste control program. Includes in-depth coverage of material safety data sheets.

Introduction to Hydraulic Systems (10 Hours)
(Module ID 58110-11) Covers all aspects of common hydraulic systems, including fluids, system components, and pumps. Presents the principles of hydraulic system operation and the related components. Simple hydraulic system maintenance is also introduced.

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Alternating Current and Three-Phase Systems
(17.5 Hours)
(Module ID 80201-11; from Power Line Worker, Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Circuit Breakers and Fuses (10 Hours)
(Module ID 58105-11) Explains the necessity of overcurrent protection and the way it is applied in the wind turbine environment. Explores the operation of common circuit breakers and the differences in various fuse types. Overcurrent device terminology is presented, along with a review of the information found on such devices.

Switching Devices (12.5 Hours)
(Module ID 58106-11) Provides coverage of switching devices related to the power distribution and control of wind turbines. Mechanical and solid-state relay types are presented, as well as typical wind turbine control wiring diagrams. Explains various time delay schemes and how they can be applied.
Management Learning Series

The Management Learning Series provides companies with the tools to develop qualified management personnel. From Fundamentals of Crew Leadership to Project Supervision to Project Management, these programs provide an answer to the management shortage crisis impacting companies today and expected to continue for the foreseeable future.

Fundamentals of Crew Leadership

22.5 Hours
Module ID 46101

PAPERBACK  ISBN
Trainee Guide: $49.98  978-0-13-803097-1

• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

While this module has been designed to assist the recently promoted crew leader, it is beneficial for anyone in management. The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

#### Curriculum Notes

- **115 Hours**
- **Updated in 2019.**
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

---

**Interpersonal Skills (12.5 Hours)**

(Module ID 44103) Discusses the values and expectations of the workforce, building relationships, and satisfying stakeholders. Describes the principles of effective communication, applying the management grid, and using relationship skills to create a leadership environment. Discusses behavioral and non-discriminatory interviewing, and professional development of personnel. Covers issues surrounding disabled workers, sexual harassment, gender and minority discrimination, child labor laws, antitrust laws, and copyright infringement.

**Issues and Resolutions (15 Hours)**

(Module ID 44104) Describes the key elements of successful negotiations and negotiating techniques. Explains how to recognize nonverbal signals, use negotiating tools, and apply conflict resolution strategies. Identifies symptoms and barriers to solving project-related problems and applying problem-solving techniques, brainstorming, and identifying root cause consequences.

---

To Order Call: 1-800-922-0579 ©NCCER
MODULES
The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Job (5 Hours)
(Module ID MT201-01) Introduces the history of the construction industry and construction organization. Covers the phases of a construction project and the role and duties of the supervisor.

Human Relations and Problem Solving (20 Hours)
(Module ID MT202-01) Focuses on the communication process and developing effective communication and leadership skills. Compares problem solving to decision making. Discusses potential human relations difficulties and how to resolve them.

Safety (7.5 Hours)
ISBN 978-0-13-103668-0
(Module ID MT203-01) Describes the supervisor’s role in job-site safety, the true cost of accidents, and how to train and involve all employees in job safety. Includes OSHA safety inspections.

Quality Control (5 Hours)
(Module ID MT204-01) Defines different types of quality control. Explains how to incorporate quality and safety through effective communication, document control, and inspections.

Contract and Construction Documents (5 Hours)
(Module ID MT205-01) Teaches how to understand and interpret construction drawings, technical specifications, and as-built drawings. Includes different types of bidding, contracts, change orders, closeout documents, and more.

Document Control and Estimating (10 Hours)
ISBN 978-0-13-103671-0
(Module ID MT206-01) Provides an introduction to using and maintaining document control. Defines the elements of material, labor, and equipment estimates and how to develop, organize, and look for errors in an estimate.

Planning and Scheduling (17.5 Hours)
(Module ID MT207-01) Introduces stages of planning, how to implement a plan, and how to coordinate with other contractors. Includes planning resources, materials, equipment, tools, and labor. Discusses short- and long-term schedules.

Resource Control and Cost Awareness (15 Hours)
(Module ID MT208-01) Explains how to measure job-site productivity and how to increase it. Discusses resources, materials, tools, equipment, labor, quality, and cost and resource control. Introduces cost awareness and types of reports.

Sustainable Construction Supervisor
Sustainable Construction Supervisor has been developed to instruct construction managers on sustainable construction management, the LEED rating system as it would apply to oversight of their projects and crews, and how to supervise and train their subcontractors and crews so that LEED points aren’t unintentionally sacrificed. This module is published in full color and is competency-based. An assessment is also available.
Introduction to the Pipeline Industry

Introduction to the Pipeline Industry (15 Hours)
(Module ID 66101-02) Introduces the pipeline industry, including pipeline products and flow paths, maps and drawings used in the industry, and basic pipeline operations. Also covers hydraulics, pipeline equipment, electrical power systems, and corrosion control. Regulations, documentation, and pipeline industry occupations are also described.

Tools of the Trade (7.5 Hours)
(Module ID 62104-02) Explains use and care of hand and power tools used in the pipeline industry. Describes the use of welding equipment and meters and testers. Also discusses nondestructive testing and the uses of hydraulic cranes and heavy excavating equipment.

Pipeline Documentation (5 Hours)
ISBN 978-0-13-038238-0
(Module ID 62105-02) Identifies alignment sheets used in the pipeline industry including maps, P&IDs, and electrical drawings. Also describes the types of documentation and document management required in the industry.

Basic Pipeline Pneumatics and Equipment (10 Hours)
(Module ID 67102-02) Introduces the basics of pneumatic equipment. Topics include pneumatic safety and the physical characteristics of gas. A discussion of compressors, valves, meters, and other pipeline equipment and an overview on pipeline design also are included.

Basic Pipeline Hydraulics and Equipment (10 Hours)
(Module ID 66102-02) Explains pipeline hydraulics safety, basic principles of hydraulic systems, hydraulic properties of petroleum products, pipeline design factors, and basic pipeline equipment.

Pipeline Communications (7.5 Hours)
(Module ID 60103-02) Introduces channels of communications that must exist in pipeline operations, including internal communications with scheduling, operations, and maintenance; and external communications with contractors, the general public, regulatory agencies, and local, state, and federal government.

Pipeline Operations (40 Hours)
(Module ID 64106-02) Describes pipeline system hydraulics and ASME ratings and standards. Discusses station control systems and recognizing and responding to AOCs. Also covers pigging operations and proving process meters.

Release Identification and Response (5 Hours)
(Module ID 64105-02) Describes company environmental manuals and the DNR and EPA regulations. Explains the NRC and Coast Guard responsibilities and spill prevention. Covers soil contamination, release reporting and containment, hydrostatic testing, flaring/venting, and trash handling.

Curriculum Notes
• 175 Hours (includes Core)
• Revised: 2017, Third Edition
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK
Trainee Guide: $104.99
978-0-13-480566-5

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.
Abnormal Operating Conditions

Abnormal Operating Conditions Field
and Gas

Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Abnormal Operating Conditions
Control Center

Introduces the abnormal operating conditions that can occur on a pipeline or in a pipeline facility. Explains how to recognize and react to abnormal operating conditions from the control center and the necessary documentation and notifications that must be completed when responding to these conditions.
Pipeline Electrical and Instrumentation

L1 PIPELINE ELECTRICAL AND INSTRUMENTATION

LEVEL 1

Pipeline E&I Drawings (30 Hours)
(Module ID 64107-02) Identifies drawing classifications and written specifications. Describes the uses of electrical drawings and piping and instrumentation drawings. Also covers special drawings and documentation as well as pipeline maps and alignment sheets.

Understanding the National Electrical Code® (7.5 Hours)
(Module ID 64108-02) Provides a map for using the NEC®. Introduces the layout and the types of information found within the code book. Presents an easy-to-follow procedure for finding information in the NEC®.

Fasteners and Anchors (7.5 Hours)
(Module ID 64109-02) Introduces hardware and systems used to mount and support boxes, receptacles, and other electrical components. Covers types of anchors and supports, their applications, and their safe installation.

Use of Meters and Test Equipment (15 Hours)
(Module ID 64201-02) Explains how to calculate and amperage, and perform pipeline-specific E&I calculations. Also provides a description of conductors.

Grounding (30 Hours)
(Module ID 64203-02) Explains grounding basics, system types, NEC® requirements, equipment grounding, and how to bond service equipment. Includes discussion of effective grounding paths, conductors, separately derived systems, grounding at more than one building, and systems over 1,000 volts. Describes how to test grounding and measure earth resistance, three-point testing, and tank grounding.

Process Control Theory (40 Hours)
(Module ID 64204-02) Explains process characteristics and control systems. Describes control loop components and control loops and modes. Discusses types of control applications, including temperature, pressure, flow, and level control.

Supervisory Control Systems (15 Hours)
(Module ID 64205-02) Explains pipeline supervisory control systems, PLCs, HMIs, and RTUs. Describes data highways and protocols, including data transfer methods, and SCADA-related communications, including transfer media, wireless radios, and Ethernet, and transmission and interface methods.

Transformers (25 Hours)
(Module ID 64301-02) Describes power systems and explains transformer construction, taps, installation requirements, and connections. Describes power distribution, instruments, control, and isolation transformer types. Also covers transformer maintenance and testing.

Switchgear and MCCs (25 Hours)
(Module ID 64302-02) Explains power factor and medium versus low-voltage cable and MCCs. Describes types of switchgear and cables, feeders, fusing, and bracing. Includes testing and maintenance on switchgear and MCCs and associated components.

Low-Voltage and Standby Power (25 Hours)
(Module ID 64303-02) Explains pipeline system standby generators, batteries, chargers, inverters, converters, and rotary and static UPSs. Also addresses the maintenance and testing of each.

Power Quality (25 Hours)
(Module ID 64304-02) Explains power quality and types of defects, power systems, protection, and conditioning equipment. Discusses types of electrical noise and related problems, and possible solutions. Describes static electricity and its effect, system verification testing, and equipment maintenance.

Prime Movers (32.5 Hours)
(Module ID 64305-02) Describes various electric motors and drives and their components. Discusses their maintenance and testing. Explains engine types, cooling and lubrication systems, turbine operation, fuel sources, and controls.

Facility Auxiliary Systems (22.5 Hours)
(Module ID 64306-02) Includes information on pipeline facility buildings and related systems, including fire, security, vapor recovery, injection, water treatment, cathodic protection, and blending systems.

SCADA (30 Hours)
ISBN 978-0-13-103147-0
(Module ID 64307-02) Explains pipeline operations systems, including control, communications, SCADA, and PLCs. Explains redundant systems and control system troubleshooting.

Abnormal Operating Conditions - Field and Gas
(5 Hours)
ISBN 978-0-13-472784-4
(Module ID AOCFG-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Inspect, Test and Calibrate Pressure Switches
(7.5 Hours)
(Module ID CT25_1-17)

Inspect, Test and Calibrate Pressure Transmitters
(7.5 Hours)
(Module ID CT25_2-17)

Verify or Set Protection Parameters for Programmable Controllers and/or Other Instrumentation Control Loops
(7.5 Hours)
ISBN 978-0-13-470632-0
(Module ID CT26_0-17)

Test Overfill Protective Devices
(5 Hours)
(Module ID CT30_0-17)

Inspect and Calibrate Overfill Protective Devices
(7.5 Hours)
(Module ID CT31_0-17)

Inspect, Test, and Maintain Flow Computer for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_3-17)

Inspect, Test, and Maintain Flow Computer for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_4-17)

Prove Flow Meters for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_5-17)

Maintain Flow Meters for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_6-17)

Inspect, Test and Maintain Gravitometers/Densitometers for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_7-17)

Inspect, Test and Maintain Temperature Transmitters for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_8-17)

Maintain Fixed Gas Detection Equipment
(25 Hours)
(Module ID CT55_0-17)
Pipeline Maintenance and Mechanical

Identify Types of Valve Actuators/Operators (15 Hours)
(Module ID 63200-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Discusses control and operation, installation, and preventive maintenance procedures for these actuators.

Installing Seals and Gaskets (10 Hours)
(Module ID 63109-02) Covers the applications, removal procedures, and installation procedures for dynamic and static seals and O-rings. Also identifies gaskets and gasket materials and explains the procedures for laying out, cutting, and installing gaskets.

Introduction to Pneumatic Systems (10 Hours)
ISBN 978-0-13-038354-0
(Module ID 63201-02) Discusses pneumatic system safety, characteristics of gases and how they are compressed, pneumatic transmission of energy, and compressor operation.

Introduction to Hydraulic Systems (10 Hours)
(Module ID 63202-02) Discusses hydraulic system safety and the basic principles of hydraulics, including Pascal’s law and Bernoulli’s principle. Explains the function of fluids, parts, pumps, and motors.

Specialty and Precision Tools (15 Hours)
(Module ID 63203-02) Introduces specialty tools and precision measuring tools and explains how to select, inspect, use, and care for these tools.

Introduction to Metering Devices and Provers (10 Hours)
ISBN 978-0-13-038357-0
(Module ID 63206-02) Identifies and explains the use of pipeline meters including positive displacement, turbine, ultrasonic, mass-flow, vortex, and orifice. Identifies and explains the use of provers including tank provers, traditional pipe provers, and small volume pipe provers.

Introduction to Pumps (10 Hours)
(Module ID 63207-02) Identifies main-line and feeder line pumps including centrifugal, rotary, reciprocating, and metering pumps. Explains how to inspect and replace drivers, replace bearings and seals, and perform preventive maintenance.

Introduction to Gas Compressors (10 Hours)
(Module ID 63208-02) Identifies gas compressors used in the transmission of gas through pipelines. Also explains the function and operation of compressors and identifies the auxiliary equipment used with compressors.

General Maintenance and Winterizing Pipeline Equipment (7.5 Hours)
(Module ID 62301-02) Explains preventive and predictive maintenance and general maintenance on rotating machinery. Discusses gas compressors and maintaining pumps and prime movers.

Tank Repair (40 Hours)
(Module ID 63209-02) Identifies tank repair, including weld repair, installation, and maintenance on rotating equipment. Explains how to inspect and replace drivers, replace bearings and seals, and perform preventive maintenance.

Install and Maintain Bearings (15 Hours)
(Module ID 63210-02) Explains the function and advantages of mechanical seals. Identifies parts and types of mechanical seals. Includes procedures for removing, inspecting, and installing mechanical seals.

Maintain and Repair Drivers (15 Hours)
(Module ID 63211-02) Identifies types of drivers that provide power to rotating equipment on pipelines. Explains how to inspect and replace drivers, replace bearings and seals, and perform preventive maintenance.

Install Rotating Equipment (25 Hours)
ISBN 978-0-13-103178-4
(Module ID 63301-02) Explains inspection requirements for an equipment pad, requirements for equipment base preparation, and procedures for inspecting equipment prior to installation. Also explains how to prepare equipment prior to installation, the installation process for rotating equipment, and the procedures used to relieve pipe stress from rotating equipment.

Unit Alignment (40 Hours)
(Module ID 63302-02) Describes types of equipment misalignment and how to identify and correct them. Explains how to perform conventional, rim and face indicator, reverse dial indicator, and laser alignments. Also identifies other laser alignment procedures that may be completed on the machinery trains depending on equipment needs.

To Order Call: 1-800-922-0579
©NCCER
National Center for Construction Education and Research
Vibration Analysis (5 Hours)
(Module ID 63303-02) Covers common causes of vibration and how to minimize them. Includes vibration monitoring techniques, vibration analysis techniques, vibration test equipment, and how to field balance machines.

Maintain, Troubleshoot, and Repair Pumps (10 Hours)
(Module ID 63304-02) Identifies the preventive maintenance requirements, inspection requirements, and common troubleshooting techniques for pumps used in the pipeline industry. Also gives general guidelines for preparing a pump for shutdown, removing a pump from a pipeline system, disassembling a pump, installing the pump after the pump has been reassembled, and preparing the pump for startup and operational check after maintenance or repair has been completed.

Maintain, Troubleshoot, and Repair Gas Compressors (15 Hours)
(Module ID 63305-02) Identifies the typical lubrication system components, preventive maintenance requirements, and common troubleshooting techniques for a gas compressor. Also gives general guidelines for preparing a gas compressor for shutdown and repair, isolating a gas compressor from a pipeline system, repairing rotary and reciprocating gas compressors, and preparing a gas compressor for startup and operational check after maintenance has been completed.

Maintain, Troubleshoot, and Repair Metering Devices and Provers (20 Hours)
(Module ID 63309-02) Explains how to inspect, maintain, and repair metering devices and prover systems. Also describes the waterdraw calibration procedures used to calibrate and verify the reliability of prover systems.
Pipeline Field and Control Center Operations

### L1 PIPELINE FIELD AND CONTROL CENTER OPERATIONS

**LEVEL 1**

#### Curriculum Notes
- 115 Hours
- Revised: 2017, Third Edition
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

#### MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Quality Control and Measurement** (20 Hours)
(Module ID 67106-02) Focuses on the importance of quality control and accurate measurement as they affect safety, customer service, and the company’s reputation. Topics include taking samples, performing product testing, and product testing and measurement tools.

**Product Batch and Pig Tracking** (10 Hours)
(Module ID 60104-02) Describes how to track pipeline product line inventories; handle scheduled pipeline shipments; identify product interface changes; and launch, receive, and track pigs through the pipeline and facility.

**Field Quality Control** (15 Hours)
(Module ID 60107-02) Introduces field quality control procedures including activation of tank mixing devices, collection of product samples, product testing, pipeline switching, product blending operations, and injection of appropriate additives.

**Field Measurement** (20 Hours)
ISBN 978-0-13-038232-0
(Module ID 60108-02) Introduces techniques used in field measurement of products in the pipeline, including measurement components, types of meters, measurement of custody transfers and receipts, verification of meter accuracy, waterdraw calibration techniques, and utilization of tank strappings.

**Abnormal Operating Conditions - Field and Gas** (5 Hours)
ISBN 978-0-13-472784-4
(Module ID AOCFG-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

**Purge Gas from a Pipeline** (5 Hours)
(Module ID CT50_0-17)

**Purge Air from a Gas Pipeline** (5 Hours)
(Module ID CT51_0-17)

**Locally Operate Valves on a Liquid Pipeline System** (5 Hours)
(Module ID CT54_0-17)

**Perform Incremental Pressure Increases to Uprate the MAOP** (5 Hours)
(Module ID CT56_0-17)

**Operate Odorant Equipment** (5 Hours)
(Module ID CT57_0-17)

**Monitor Odorant Level** (5 Hours)
(Module ID CT58_0-17)

**Start-up of a Liquid Pipeline (Field)** (5 Hours)
ISBN 978-0-13-472800-1
(Module ID CT54_1-17)

**Shutdown of a Liquid Pipeline (Field)** (5 Hours)
(Module ID CT63_2-17)

**Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them Within Allowable Limits on a Liquid Pipeline System (Field)** (15 Hours)
(Module ID CT63_3-17)

**Locally Operate Valves on a Liquid Pipeline System** (5 Hours)
(Module ID CT63_4-17)

**Start-up of a Liquid Pipeline (Control Center)** (5 Hours)
(Module ID CT64_1-17)

**Shutdown of a Liquid Pipeline (Control Center)** (5 Hours)
(Module ID CT64_2-17)

**Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them Within Allowable Limits on a Liquid Pipeline System (Control Center)** (5 Hours)
(Module ID CT64_3-17)

**Remotely Operate Valves on a Liquid Pipeline System** (5 Hours)
(Module ID CT64_4-17)

### L2 PIPELINE OPERATIONS (CONTROL CENTER/GAS/LIQUID)

**LEVEL 2**

#### MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Abnormal Operating Conditions - Control Center** (5 Hours)
ISBN 978-0-13-472782-0
(Module ID AOCCC-17) Introduces the abnormal operating conditions that must be completed when responding to these conditions.

**System Remotely Operate Valves on a Liquid Pipeline System** (5 Hours)
(Module ID CT64_2-17)

**Locally Operate Valves on a Liquid Pipeline System** (5 Hours)
(Module ID CT63_4-17)

**Start-up of a Liquid Pipeline (Control Center)** (5 Hours)
(Module ID CT64_1-17)

**Shutdown of a Liquid Pipeline (Control Center)** (5 Hours)
(Module ID CT64_2-17)

**Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them Within Allowable Limits on a Liquid Pipeline System (Control Center)** (5 Hours)
(Module ID CT64_3-17)

**Remotely Operate Valves on a Liquid Pipeline System** (5 Hours)
(Module ID CT64_4-17)
Pipeline Operations (Control Center/Gas/Liquid) (continued)

Start-up of a Gas Pipeline (5 Hours)
(Module ID CT65_1-17)

Shutdown of a Gas Pipeline (5 Hours)
(Module ID CT65_2-17)

Monitor Pressures, Flows, Communications and Line Integrity and Maintain Them Within Allowable Limits (Gas) (5 Hours)
(Module ID CT65_3-17)

Manually or Remotely Open or Close Valves or Other Equipment (5 Hours)
ISBN 978-0-13-472825-4
(Module ID CT65_4-17)
Pipeline Corrosion Control

(Module ID CT2_1-17)
Repair Damaged Test Leads (5 Hours)
(Module ID CT2_2-17)
Install Test Leads by Non-Exothermic Welding Methods (5 Hours)
ISBN 978-0-13-472089-0
(Module ID CT2_3-17)
Install Test Leads by Exothermic Welding Methods (5 Hours)
(Module ID CT2_4-17)
Obtain a Voltage and Current Output Reading from a Rectifier to Verify Proper Performance (5 Hours)
(Module ID CT2_5-17)
Troubleshoot Rectifier (5 Hours)
(Module ID CT2_6-17)
Repair or Replace Defective Rectifier Components (5 Hours)
(Module ID CT4_1-17)
Adjustment of Rectifier (5 Hours)
(Module ID CT4_2-17)
Examine for Mechanical Damage on Buried or Submerged Pipe (5 Hours)
ISBN 978-0-13-472076-0
(Module ID CT5_1-17)
Examine for External Corrosion on Buried or Submerged Pipe (5 Hours)
(Module ID CT5_2-17)
Inspect the Condition of External Coatings on Buried or Submerged Pipe (5 Hours)
(Module ID CT5_3-17)
Prepare Surface for Atmospheric Coating Using Media Other Than Water (5 Hours)
ISBN 978-0-13-472063-0
(Module ID CT5_4-17)
Apply Coating Using Hand Application Methods (5 Hours)
(Module ID CT5_5-17)
Apply Coating Using Spray Application (5 Hours)
(Module ID CT5_6-17)
Visual Inspection of Atmospheric Coatings (5 Hours)
(Module ID CT5_7-17)
Visually Inspect Internal Pipe Surface (5 Hours)
(Module ID CT5_8-17)
Perform Coating Inspection (5 Hours)
(Module ID CT5_9-17)
Prepare Surface for Coating by Abrasive Blasting (5 Hours)
(Module ID CT5_10-17)
Apply Coating Using Abrasive Blasting (5 Hours)
(Module ID CT5_11-17)
Prepare Surface for Coating by Abrasive Blasting (5 Hours)
(Module ID CT5_12-17)
Perform Coating Inspection (5 Hours)
(Module ID CT5_13-17)
Visually Inspect Internal Pipe Surface (5 Hours)
(Module ID CT5_14-17)

Introduction to the Power Industry

This module sets the stage for trainees entering the electrical energy production and distribution field. It describes the many ways in which electricity can be produced, from burning fossil fuels such as coal and natural gas, to harnessing nuclear energy, and using renewable energy sources such as wind, geothermal, and solar energy.

Curriculum Notes

- 97.5 Hours
- Published: 2010
- The Trainee Guide is shrinkwrapped with Core and the Introduction to the Power Industry module.
- Prerequisites: Power Generation, Power Line Worker, and Wind Turbine Maintenance Technician programs.
- Basic Rigging (Module ID 00106-09 or 00106-15) is required to complete Power Industry Fundamentals.
- Either 2009 or 2015 Core can be used for the Power Industry Fundamentals package.
Power Generation Maintenance Electrician

L1 POWER GENERATION MAINTENANCE ELECTRICIAN

Curriculum Notes
- 232.5 Hours
- Includes 97.5 hours of Power Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Tools of the Trade (5 Hours)
ISBN 978-0-13-614614-8 (Module ID 40101-07; from Industrial Maintenance E&I Technician Level One) Introduces the hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

Fasteners and Anchors (5 Hours)
ISBN 978-0-13-614614-8 (Module ID 40103-07; from Industrial Maintenance E&I Technician Level One) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

Oxyfuel Cutting (17.5 Hours)
ISBN 978-0-13-614615-5 (Module ID 40104-07; from Industrial Maintenance E&I Technician Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
ISBN 978-0-13-614616-2 (Module ID 40105-07; from Industrial Maintenance E&I Technician Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
ISBN 978-0-13-614617-9 (Module ID 40106-07; from Industrial Maintenance E&I Technician Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
ISBN 978-0-13-614618-6 (Module ID 40107-07; from Industrial Maintenance E&I Technician Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Pumps and Drivers (5 Hours)
ISBN 978-0-13-614619-3 (Module ID 40108-07; from Industrial Maintenance E&I Technician Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Valves (5 Hours)
ISBN 978-0-13-614620-9 (Module ID 40109-07; from Industrial Maintenance E&I Technician Level One) Identifies different types of valves and describes their installation, storage, and handling.

Introduction to Test Instruments (75 Hours)
ISBN 978-0-13-614621-6 (Module ID 40110-07; from Industrial Maintenance E&I Technician Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

Material Handling and Hand Rigging (15 Hours)
ISBN 978-0-13-614623-3 (Module ID 40111-07; from Industrial Maintenance E&I Technician Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Mobile and Support Equipment (10 Hours)
ISBN 978-0-13-614620-9 (Module ID 40112-07; from Industrial Maintenance E&I Technician Level One) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

Lubrication (12.5 Hours)
ISBN 978-0-13-614624-7 (Module ID 40113-07; from Industrial Maintenance E&I Technician Level One) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

SMAW Equipment and Setup (5 Hours)

- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Industrial Safety for E&I Technicians (12.5 Hours)

Managing Electrical Hazards (12.5 Hours)
ISBN 978-0-13-608661-1 (Module ID 26501-09; from Electrical, First Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

Introduction to the National Electrical Code® (5 Hours)
ISBN 978-0-13-604702-5 (Module ID 40202-08; from Industrial Maintenance E&I Technician Level Two) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an easy-to-follow procedure.

Electrical Theory (5 Hours)
ISBN 978-0-13-604704-9 (Module ID 40203-08; from Industrial Maintenance E&I Technician Level Two) Introduces electrical concepts used in Ohm’s law as applied to DC series circuits. Includes atomic theory, electromotive force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Continued on following page
Alternating Current (20 Hours)
(Module ID 40204-08; from Industrial Maintenance E&I Technician Level Two) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Drawings (10 Hours)
(Module ID 40303-09; from Industrial Maintenance E&I Technician Level Three) Explains how to read and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

E&I Test Equipment (10 Hours)
(Module ID 40205-08; from Industrial Maintenance E&I Technician Level Two) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Conductors and Cables (10 Hours)
(Module ID 40212-08; from Industrial Maintenance E&I Technician Level Two) Focuses on the types and applications of conductors and electrical cabling and covers proper wiring techniques. Stresses the applicable NEC® requirements.

Conductor Terminations and Splices (10 Hours)
(Module ID 40213-08; from Industrial Maintenance E&I Technician Level Two) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.

Motor Controls (15 Hours)
(Module ID 40304-09; from Industrial Maintenance E&I Technician Level Three) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Hydraulic Controls (15 Hours)
(Module ID 40311-09; from Industrial Maintenance E&I Technician Level Three) Introduces hydraulic principles and fluids, functions and controls of system devices, hydraulic symbols, and drawings. Covers safety considerations for hydraulic systems, as well as troubleshooting.

Grounding and Bonding (15 Hours)
(Module ID 26109-08; from Electrical Level Two, Sixth Edition) Focuses on the purpose of grounding and bonding electrical systems. Thoroughly covers NEC® requirements.

Hand Bending (10 Hours)
(Module ID 40208-08; from Industrial Maintenance E&I Technician Level Two) Introduces conduit bending and installation. Covers the techniques for using hand-operated and step conduit benders, as well as cutting, reaming, and threading conduit.

Machine Bending of Conduit (15 Hours)
(Module ID 40310-09; from Industrial Maintenance E&I Technician Level Three) Covers bends in conduit up to six inches. Focuses on mechanical, hydraulic, and electrical benders.

Pneumatic Controls (15 Hours)
ISBN 978-0-13-604739-1
(Module ID 40312-09; from Industrial Maintenance E&I Technician Level Three) Describes principles of atmospheric and compressed air gases, and how compressors transmit and treat compressed (pneumatic) air. Covers pneumatic system symbols, drawings, and system safety. Addresses the functions and control of pneumatic system components and provides guidelines for troubleshooting.

Programmable Logic Controllers (17.5 Hours)
(Module ID 40409-09; from Industrial Maintenance E&I Technician Level Four) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

Hazardous Locations (10 Hours)
(Module ID 40301-09; from Industrial Maintenance E&I Technician Level Three) Covers all classes of hazardous locations, including seals, components, and equipment approved for use in various hazardous locations.

Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26210-08; from Electrical Level Two, Sixth Edition) Describes fuses and circuit breakers along with their practical applications. Also covers sizing.

Transformer Applications (7.5 Hours)
(Module ID 40306-09; from Industrial Maintenance E&I Technician Level Three) Discusses transformer types, construction, connections, protection, and grounding along with capacitors and rectifiers.

Distribution Equipment (17.5 Hours)
(Module ID 40305-09; from Industrial Maintenance E&I Technician Level Three) Explains distribution equipment, including grounding, switchboard and ground fault maintenance, transformers, and electrical drawing identification.

To Order Call: 1-800-922-0579
Power Plant Electrical Systems (12.5 Hours)
(Module ID 50301-11) Describes how the electrical power to operate a power station is developed and distributed in normal, shutdown, and emergency situations. Covers equipment used in power stations, including circuit breakers, switchgear, and motor control centers.

Conductor Selection and Calculations (15 Hours)
(Module ID 40307-09; from Industrial Maintenance E&I Technician Level Three) Covers the types of conductors used in wiring systems, including insulation, current-carrying capacity, and temperature ratings.

Motors: Theory and Application (20 Hours)
(Module ID 26202-08; from Electrical Level Two, Sixth Edition) Covers AC and DC motors, including the main components, circuits, and connections.

Motor-Operated Valves (15 Hours)
(Module ID 40313-09; from Industrial Maintenance E&I Technician Level Three) Covers motor-driven valves, ranging from small, servomechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

Specialty Transformers (10 Hours)
ISBN 978-0-13-609319-0
(Module ID 26406-08; from Electrical Level Four, Sixth Edition) Covers various types of transformers and their applications. Also provides information on selecting, sizing, and installing these devices.

Advanced Controls (20 Hours)
(Module ID 26407-08; from Electrical Level Four, Sixth Edition) Discusses applications and operating principles of solid-state controls, reduced-voltage starters, and adjustable frequency drives. Also covers basic troubleshooting procedures.

Generator Maintenance (20 Hours)
(Module ID 50401-10) Covers the operating characteristics and major components of AC and DC generators. Topics include generator connection methods; voltage regulators; auxiliary systems; and maintenance procedures.

Switchgear and Breaker Maintenance (25 Hours)
(Module ID 50402-11) Reviews the safety practices associated with power station electrical work. Explains how medium-voltage and low-voltage sources are developed and used in the power station, and how the station power system functions in a blackout or shutdown situation. Also describes the circuit breakers, switchgear, and motor control centers used in power stations, and provides instructions for maintenance of these devices.

Control Systems and Fundamental Concepts (12.5 Hours)
(Module ID 26211-08; from Electrical Level Two, Sixth Edition) Gives basic descriptions of various types of contactors and relays along with their practical applications.

Temporary Grounding (15 Hours)
ISBN 978-0-13-604738-4
(Module ID 40308-09; from Industrial Maintenance E&I Technician Level Three) Covers the methods used to eliminate or reduce electrical shock hazards to personnel working on electrical equipment.

Preventive and Predictive Maintenance (10 Hours)
(Module ID 32401-09; from Industrial Maintenance Mechanic Level Four) Explains preventive and predictive maintenance and non-destructive testing, and introduces the basic techniques for testing. Also describes lubricant analysis, and acoustic, infrared, and vibration testing.

Medium Voltage Terminations/Splices (10 Hours)
(Module ID 26411-08; from Electrical Level Four, Sixth Edition) Offers an overview of the NEC® and cable manufacturers’ requirements for medium-voltage terminations and splices.

Fire Alarm Systems (15 Hours)
(Module ID 26405-08; from Electrical Level Four, Sixth Edition) Covers fire alarm control units, Digital Alarm Communicator Systems (DACS), wiring for alarm initiating and notification devices, and alarm system maintenance.

Heat Tracing and Freeze Protection (10 Hours)
(Module ID 26409-08; from Electrical Level Four, Sixth Edition) Covers heat tracing systems along with their applications and installation requirements.

Standby and Emergency Systems (12.5 Hours)
(Module ID 40401-09; from Industrial Maintenance E&I Technician Level Four) Explains the installation, utilization, and maintenance requirements for standby and emergency electrical systems.

Power Generation Maintenance Electrician Level 3 (continued)
Oxyfuel Cutting (17.5 Hours)
(Module ID 40104-07; from Industrial Maintenance E&I Technician Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 40105-07; from Industrial Maintenance E&I Technician Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Construction Drawings (12.5 Hours)
(Module ID 40107-07; from Industrial Maintenance E&I Technician Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Pumps and Drivers (5 Hours)
(Module ID 40108-07; from Industrial Maintenance E&I Technician Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Industrial Safety for E&I Technicians (12.5 Hours)
(Module ID 40201-08; from Industrial Maintenance E&I Technician Level Two) Covers safety rules and regulations for electrical workers, precautions for electrical hazards on the job, and the OSHA-mandated lockout/tagout procedure.

Managing Electrical Hazards (12.5 Hours)
(Module ID 26501-09; from Electrical, First Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

Introduction to the National Electrical Code® (5 Hours)
(Module ID 40202-08; from Industrial Maintenance E&I Technician Level Two) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an easy-to-follow procedure.

Electrical Theory (15 Hours)
(Module ID 40203-08; from Industrial Maintenance E&I Technician Level Two) Introduces electrical concepts used in Ohm’s law as applied to DC circuits. Includes atomic theory, electromotive force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Continued on following page
Power Generation I&C Maintenance Technician Level 2 (continued)

Alternating Current (20 Hours)
(Module ID 40204-08; from Industrial Maintenance &I Technician Level Two) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Drawings (10 Hours)
(Module ID 40300-09; from Industrial Maintenance &I Technician Level Three) Explains how to read and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

E&I Test Equipment (10 Hours)
(Module ID 40205-08; from Industrial Maintenance &I Technician Level Two) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Conductors and Cables (10 Hours)
(Module ID 40212-08; from Industrial Maintenance &I Technician Level Two) Focuses on the types and applications of conductors and electrical cabling and covers proper wiring techniques. Stresses the applicable NEC® requirements.

Conductor Terminations and Splices (10 Hours)
(Module ID 40213-08; from Industrial Maintenance &I Technician Level Two) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and tapping conductors.

Motor Controls (15 Hours)
(Module ID 40304-09; from Industrial Maintenance &I Technician Level Three) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Flow, Pressure, Level and Temperature
(15 Hours)
(Module ID 40206-08; from Industrial Maintenance &I Technician Level Two) Covers devices used to measure flow, pressure, level, and temperature, along with their principles of operation.

Instrument Drawings and Documents, Part One (15 Hours)
(Module ID 40211-08; from Industrial Maintenance &I Technician Level Two) Introduces instrument symbols, abbreviations, and drawings and documents, including instrument indexes, installation detail drawings, location drawings, and control loops.

Electrical Systems for Instrumentation
(22.5 Hours)
(Module ID 12104-01; from Instrumentation Level One, Second Edition) Covers basic electrical concepts and terms, DC circuit calculations, electrical measuring instruments, and electrical wiring.

Relays and Timers (7.5 Hours)
(Module ID 12208-03; from Instrumentation Level Two, Second Edition) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

Switches and Photoelectric Devices (5 Hours)
(Module ID 12209-03; from Instrumentation Level Two, Second Edition) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

Hydraulic Controls (15 Hours)
(Module ID 40311-09; from Industrial Maintenance &I Technician Level Three) Introduces hydraulic principles and fluids, functions and controls of system devices, hydraulic symbols, and drawings. Covers safety considerations for hydraulic systems, as well as troubleshooting.

Pneumatic Controls (15 Hours)
ISBN 978-0-13-604739-1
(Module ID 40312-09; from Industrial Maintenance &I Technician Level Three) Describes principles of atmospheric and compressed air gases, and how compressors transmit and treat compressed (pneumatic) air. Covers pneumatic system symbols, drawings, and system safety. Addresses the functions and control of pneumatic system components and provides guidelines for troubleshooting.

Programmable Logic Controllers (17.5 Hours)
(Module ID 40409-09; from Industrial Maintenance &I Technician Level Four) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

Flow, Pressure, Level and Temperature
(15 Hours)
(Module ID 40206-08; from Industrial Maintenance &I Technician Level Two) Covers devices used to measure flow, pressure, level, and temperature, along with their principles of operation.

Instrument Drawings and Documents, Part One (15 Hours)
(Module ID 40211-08; from Industrial Maintenance &I Technician Level Two) Introduces instrument symbols, abbreviations, and drawings and documents, including instrument indexes, installation detail drawings, location drawings, and control loops.

Electrical Systems for Instrumentation
(22.5 Hours)
(Module ID 12104-01; from Instrumentation Level One, Second Edition) Covers basic electrical concepts and terms, DC circuit calculations, electrical measuring instruments, and electrical wiring.

Relays and Timers (7.5 Hours)
(Module ID 12208-03; from Instrumentation Level Two, Second Edition) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

Switches and Photoelectric Devices (5 Hours)
(Module ID 12209-03; from Instrumentation Level Two, Second Edition) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

Tubing (15 Hours)
ISBN 978-0-13-604710-0
(Module ID 40209-08; from Industrial Maintenance &I Technician Level Two) Introduces a variety of tubing, tubing materials, tools, and work practices. Covers proper storage and handling, cutting, deburring, reaming, bending, and flaring of tubing.

Clean, Purge, and Test Tubing and Piping Systems (7.5 Hours)
(Module ID 40210-08; from Industrial Maintenance &I Technician Level Two) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in industrial maintenance.

Layout and Installation of Tubing and Piping Systems (22.5 Hours)
(Module ID 40309-09; from Industrial Maintenance &I Technician Level Three) Introduces piping and tubing layout procedures. Explains the steps for creating a hand-sketched isometric drawing that can be applied to a piping and tubing installation. Introduces methods and procedures used to measure, cut, bend, and support piping and tubing.

Electronic Components (10 Hours)
(Module ID 40302-09; from Industrial Maintenance &I Technician Level Three) Introduces the principles of electronics and semiconductor theory, components, and applications.

Panel-Mounted Instruments (7.5 Hours)
ISBN 978-0-13-603277-4
(Module ID 12212-03; from Instrumentation Level Two, Second Edition) Explains the selection of instruments to be panel-mounted, locating the instruments using drawings, and procedures for installing the instruments in the panels.

Continued on following page
Installing Field-Mounted Instruments (25 Hours)
(Module ID 12213-03; from Instrumentation Level Two, Second Edition) Covers selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

Grounding and Shielding of Instrumentation Wiring (10 Hours)
(Module ID 12306-03; from Instrumentation Level Three, Second Edition) Teaches the basic concepts of grounding and shielding, including wire and cable identification. Defines various types of noise that can be induced into instrumentation wiring and describes the methods used to reduce or eliminate it.

Pneumatic Control Valves, Actuators and Positioners (40 Hours)
(Module ID 40404-09; from Industrial Maintenance E&I Technician Level Four) Covers the construction, operation, and uses of control valves, actuators, and positioners that are driven, and in some cases controlled by, compressed air. Explains the installation and maintenance of these devices, and includes alignment and troubleshooting procedures.

Performing Loop Checks (7.5 Hours)
(Module ID 40405-09; from Industrial Maintenance E&I Technician Level Four) Covers loop check steps, including verifying mechanical installation, validating that the loop has correct tag numbers, performing loop checks, and proving the loop.

Troubleshooting and Commissioning a Loop (10 Hours)
(Module ID 40406-09; from Industrial Maintenance E&I Technician Level Four) Teaches troubleshooting techniques used to locate problems in control loops, and how to isolate a loop in order to troubleshoot it. Covers commissioning of a loop once it is repaired, loop checked, and calibrated.

Process Control Theory (20 Hours)
(Module ID 12204-03; from Instrumentation Level Two, Second Edition) Describes the principles of process control and how various types of control loops are applied. Discusses ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

Process Control Loops and Tuning (20 Hours)
(Module ID 40407-09; from Industrial Maintenance E&I Technician Level Four) Describes control loops, devices, and terms. Introduces formulas and their applications to PID control. Offers a theory-based approach to PID control and its application in industrial process control. Addresses open, closed, and visual loop tuning.

Data Networks (15 Hours)
(Module ID 40408-09; from Industrial Maintenance E&I Technician Level Four) Introduces terms associated with data network devices and computers used in industrial facilities. Explains how data network devices and computers are interconnected for communication purposes. Describes how open connectivity is used in industrial data networks, and explores the hardware devices used in a data highway system.

Analog Outputs (20 Hours)
(Module ID 41401-03; from Instrumentation Level Four, Second Edition) Introduces basic ideas of digital electronics. Presents gates, combination logic, and truth tables. Addresses memory devices, counters, and arithmetic circuits as well as the numbering systems commonly used in digital systems.

Calibrate Supervisory Instrumentation Elements (10 Hours)
(Module ID 51401-10) Describes the sensing devices used to monitor key parameters, including vibration and speed sensors, eccentricity sensors, and thrust bearing wear detectors. Also covers the test instruments used to calibrate supervisory instrumentation, including shakers and Wobulators®, and explains how to use selected test instruments in the calibration process.

Boiler/HRSG Control (12.5 Hours)
(Module ID 51402-10) Covers the control devices, methods, and strategies used for boilers and Heat Recovery Steam Generators (HRSGs). Discusses fuel, air, oxygen, feedwater, and steam control, as well as the regulations and regulations related to burner and furnace fuel control.

Preventive and Predictive Maintenance (10 Hours)
(Module ID 52401-09; from Industrial Maintenance Mechanic Level Four) Explains preventive and predictive maintenance and non-destructive testing, and introduces the basic techniques for testing. Also describes lubricant analysis, and acoustic, infrared, and vibration testing.

Digital Logic Circuits (10 Hours)
ISBN 978-0-13-609136-0
(Module ID 40409-09; from Industrial Maintenance E&I Technician Level Four) Introduces basic ideas of digital electronics. Presents gates, combination logic, and truth tables. Addresses memory devices, counters, and arithmetic circuits as well as the numbering systems commonly used in digital systems.

L4 POWER GENERATION I&C MAINTENANCE TECHNICIAN

Curriculum Notes
• 210 Hours
• Published: 2010
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

L1 POWER GENERATION MAINTENANCE MECHANIC

LEVEL 1

**Curriculum Notes**
- 232.5 Hours
- Includes 97.5 hours of Power Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources that include module tests, PowerPoint®️, and performance profile sheets are available at www.nccer.org/irc.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Tools of the Trade** (5 Hours)
  - (Module ID 32102-07; from Industrial Maintenance Mechanic Level One) Introduces hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

- **Fasteners and Anchors** (5 Hours)
  - (Module ID 32103-07; from Industrial Maintenance Mechanic Level One) Covers the hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

- **SMAW Equipment and Setup** (5 Hours)
  - (Module ID 32107-07; from Industrial Maintenance Mechanic Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

- **Mobile and Support Equipment** (10 Hours)
  - (Module ID 32112-07; from Industrial Maintenance Mechanic Level One) Introduces the equipment and techniques of mobile support equipment, including forklifts, personnel lifts, compressors, and generators.

- **Material Handling and Hand Rigging** (15 Hours)
  - (Module ID 32111-07; from Industrial Maintenance Mechanic Level One) Provides training for rigging and communicating with riggers.

- **Craft-Related Mathematics** (15 Hours)
  - (Module ID 32104-07; from Industrial Maintenance Mechanic Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

- **Lubrication** (12.5 Hours)
  - (Module ID 32106-07; from Industrial Maintenance Mechanic Level One) Explains lubrication equipment, and lubricating charts. Explains how to use lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

- **Mobile and Support Equipment** (10 Hours)
  - (Module ID 32112-07; from Industrial Maintenance Mechanic Level One) Introduces the equipment and techniques of mobile support equipment, including forklifts, personnel lifts, compressors, and generators.

- **Lubrication** (12.5 Hours)
  - (Module ID 32111-07; from Industrial Maintenance Mechanic Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

- **Mobile and Support Equipment** (10 Hours)
  - (Module ID 32112-07; from Industrial Maintenance Mechanic Level One) Introduces the equipment and techniques of mobile support equipment, including forklifts, personnel lifts, compressors, and generators.

- **Material Handling and Hand Rigging** (15 Hours)
  - (Module ID 32111-07; from Industrial Maintenance Mechanic Level One) Provides training for rigging and communicating with riggers.

- **Craft-Related Mathematics** (15 Hours)
  - (Module ID 32104-07; from Industrial Maintenance Mechanic Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

- **Lubrication** (12.5 Hours)
  - (Module ID 32106-07; from Industrial Maintenance Mechanic Level One) Explains lubrication equipment, and lubricating charts. Explains how to use lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

- **SMAW Equipment and Setup** (5 Hours)
  - (Module ID 29107-07; from Welding Level One, Fourth Edition) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

- **Introduction to Test Instruments** (7.5 Hours)
  - (Module ID 32110-07; from Industrial Maintenance Mechanic Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

- **Gaskets and Packing** (10 Hours)
  - (Module ID 32105-07; from Industrial Maintenance Mechanic Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

- **Construction Drawings** (12.5 Hours)
  - (Module ID 32107-07; from Industrial Maintenance Mechanic Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

- **Pumps and Drivers** (5 Hours)
  - (Module ID 32108-07; from Industrial Maintenance Mechanic Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

- **Valves** (5 Hours)
  - (Module ID 32109-07; from Industrial Maintenance Mechanic Level One) Identifies different types of valves and describes their installation as well as valve storage and handling.

- **Welding Level One** (30 Hours)
  - (Module ID 32100-07; from Industrial Maintenance Mechanic Level Two) Discusses the tools used in layout. Explains how to lay out baselines using the arc method and 3-4-5 method.

- **Introduction to Bearings** (15 Hours)
  - (Module ID 32201-07; from Industrial Maintenance Mechanic Level Three) Describes the tools, materials, and equipment used in storage and handling.

- **Advanced Trade Math** (30 Hours)
  - (Module ID 32301-07; from Industrial Maintenance Mechanic Level Three) Explains right triangle trigonometry and its use in the trade. Also covers interpolation, equilateral and isosceles triangles and the laws of acute triangles.

- **Precision Measuring Tools** (20 Hours)
  - (Module ID 32302-08; from Industrial Maintenance Mechanic Level Three) Explains how to select, inspect, use and care for levels, feeler gauges, calipers, micrometers, height gauges and surface plates, dial indicators, protractors, parallels and gauge blocks, turrets, and pyrometers.

- **Installing Couplings** (15 Hours)
  - (Module ID 32304-08; from Industrial Maintenance Mechanic Level Three) Identifies various types of couplings, and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

**To Order Call: 1-800-922-0579**

©NCCER
Installing Mechanical Seals (20 Hours)
(Module ID 32208-08; from Industrial Maintenance Mechanic Level Three) Covers the functions and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting and installing mechanical seals.

Conventional Alignment (30 Hours)
(Module ID 32306-08; from Industrial Maintenance Mechanic Level Three) Covers types of misalignment, aligning couplings using a straightedge and feeler gauge, adjusting parallel and angular alignment, using a dial indicator, and eliminating coupling stress.

Reverse Alignment (30 Hours)
(Module ID 32404-09; from Industrial Maintenance Mechanic Level Four) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment based on reverse dial indicator measurements.

Laser Alignment (25 Hours)
(Module ID 32404-09; from Industrial Maintenance Mechanic Level Four) Using one example system, describes the principles of using laser alignment systems to perform alignments.

Installing Belt and Chain Drives (10 Hours)
(Module ID 32307-08; from Industrial Maintenance Mechanic Level Three) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Introduction to Piping Components (5 Hours)
(Module ID 32202-07; from Industrial Maintenance Mechanic Level Two) Introduces chemical, compressed air, fuel oil, steam, and water systems. Explains how to identify piping systems according to color codes.

Copper and Plastic Piping Practices (5 Hours)
(Module ID 32203-07; from Industrial Maintenance Mechanic Level Two) Covers the selection, preparation, joining, and support of copper and plastic piping and fittings.

Introduction to Ferrous Metal Piping Practices (5 Hours)
ISBN 978-0-13-604624-0
(Module ID 32204-07; from Industrial Maintenance Mechanic Level Two) Covers iron and steel pipe and fittings and provides step-by-step instructions for cutting, threading, and joining ferrous piping.

Identify, Install and Maintain Valves (10 Hours)
(Module ID 32205-07; from Industrial Maintenance Mechanic Level Two) Explains how to remove and install threaded and flanged valves, how to replace valve stem O-ring and bonnet gaskets, and how to re-pack a valve stuffing box. Also discusses the purpose of valve packing.

Heaters, Furnaces, Heat Exchangers, Cooling Towers and Fin Fans (30 Hours)
(Module ID 32211-07; from Industrial Maintenance Mechanic Level Two) Introduces equipment used to transfer and remove heat from systems in process.

Hydrostatic and Pneumatic Testing (10 Hours)
(Module ID 32206-07; from Industrial Maintenance Mechanic Level Two) Describes non-destructive and pressure testing of systems and equipment.

Troubleshooting and Repairing Conveyors (12.5 Hours)
(Module ID 15401-08; from Millwright Level Four) Describes conveyor systems and their principles of operation.

Troubleshooting and Repairing Pneumatic, Vacuum, and Hydraulic Systems (10 Hours)
(Module ID 15409-08; from Millwright Level Four) Describes principles and types of hydraulic equipment and related safety procedures. Describes applications of hydraulic equipment.

Troubleshooting and Repairing Hydraulic Equipment (7.5 Hours)
(Module ID 15410-08; from Millwright Level Four) Explains inspecting hydraulic systems, diagnosing problems, and repairing these systems. Shows how to read hydraulic schematic symbols.

Motor-Operated Valves (15 Hours)
(Module ID 40313-09; from Industrial Maintenance E&I Technician Level Three) Covers motor-driven valves, ranging from small, servo-mechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

Advanced Blueprint Reading (25 Hours)
(Module ID 32402-09; from Industrial Maintenance Mechanic Level Four) Describes the use of drawing sets to obtain system information. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

Continued on following page
Power Generation Maintenance Mechanic Level 4

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Vibration and Balancing (12.5 Hours)**
(Module ID 52401-10) Reviews machine basics and explains the causes of machine vibrations. Reviews the basics of vibration analysis and covers the devices used to detect and analyze vibration signatures. Explains how and why vibration analysis is used as part of predictive maintenance programs. Describes field machine balancing.

**Preventive and Predictive Maintenance**
(10 Hours)
(Module ID 32401-09; from Industrial Maintenance Mechanic Level Four) Explains preventive and predictive maintenance and non-destructive testing, and introduces the basic techniques for testing. Also describes lubricant analysis, and acoustic, infrared, and vibration testing.

**Fuel Preparation and Delivery Equipment**
(25 Hours)
(Module ID 52402-10) Explains the basic operations of a coal-fired boiler system. Describes the delivery processes from the storage yard into the coal preparation equipment, and from the equipment into the furnace. Addresses the maintenance checks that need to be made on coal delivery and preparation equipment and explains how solid fuel wastes are disposed of in coal-burning furnace systems. Describes how other solid-fuel furnaces, such as biomass furnaces, are used with boilers.

**Introduction to Tube Work**
(10 Hours)
(Module ID 32212-07; from Industrial Maintenance Mechanic Level Two) Covers the basics of working with heat exchanger and furnace tubing and tube sheets.

**Compressors and Pneumatic Systems**
(35 Hours)
(Module ID 32403-09; from Industrial Maintenance Mechanic Level Four) Describes the theory and practice of compressing and transporting gases. Explains the types and principles of compressors and compressed air treatment equipment, as well as compressed air use and safety.

**Troubleshooting and Repairing Pumps**
(10 Hours)
ISBN 978-0-13-610452-0
(Module ID 32407-09; from Industrial Maintenance Mechanic Level Four) Explains how to inspect, troubleshoot, disassemble, assemble, and install a pump. Also describes the process of preparing for startup.

**Troubleshooting and Repairing Gearboxes**
(20 Hours)
(Module ID 32408-09; from Industrial Maintenance Mechanic Level Four) Describes types and operation of gearboxes, and gearbox diagnostics. Explains how to troubleshoot, remove, and disassemble gearboxes, how to identify gear wear patterns, and how to install and maintain gearboxes.

**Setting Baseplates and Prealignment**
(30 Hours)
(Module ID 32305-09; from Industrial Maintenance Mechanic Level Three) Explains how to lay out and install baseplates and soleplates. Describes how to field-verify a plate installation. Covers precision leveling procedures and performing clearance installation. Also describes basic steps for setting motors and pumps.

**Turbines**
(20 Hours)
ISBN 978-0-13-610496-4
(Module ID 15505-09; from Millwright Level Five) Describes types of turbines and their components. Describes the operation and common applications of particular types, including gas, steam, and water turbines.

**Maintaining and Repairing Turbine Components**
(15 Hours)
(Module ID 15506-09; from Millwright Level Five) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.
Power Line Worker

To address the need for one standardized and nationally recognized Power Line Worker curriculum, NCCER has developed Power Line Worker Level One. Common to transmission, distribution, and substation, Power Line Worker Level One addresses the fundamental aspects of power line work to include safety, electrical theory, climbing techniques, aerial framing and rigging, and operating utility service equipment. After Level One, the training program diverges into the three specialty areas (transmission, distribution, and substation) for two additional years of skills training.

Climbing Wooden Poles (80 Hours)
(Module ID 49105-11) Describes how to safely climb a wooden utility pole. Covers climbing equipment, inspection of equipment, pole inspection, climbing techniques, and pole-top rescue.

Climbing Structures Other Than Wood
(40 Hours)
(Module ID 49106-11) Explains the equipment, safety practices, and climbing techniques required to climb towers. Hazards associated with the environment, such as snakes, birds, insects, and weather hazards, are also covered.

Tools of the Trade (10 Hours)
(Module ID 49107-11) Covers the specialized tools used by line workers, including hot sticks, as well as universal tool accessories. Also covers ladders and work platforms; crimpers; cable cutters; pneumatic tools; and powder-actuated tools.

Aerial Framing and Associated Hardware
(80 Hours)
(Module ID 49108-11) Explains how to install guys to support a utility pole, as well as how to install the equipment on the pole to support conductors. Includes procedures for the installation of cross-arms, transformers, and conductors.

Utility Service Equipment
(75 Hours)
(Module ID 49109-11) Provides instructions for the storage, loading, and transport of wooden utility poles. Includes use of the digger derrick to dig the hole and install the pole. Also covers pole removal using a hydraulic jacking device.

Trenching, Excavating, and Boring Equipment
(7.5 Hours)
(Module ID 49111-11) Covers the use and maintenance of trenching equipment, backhoe/loaders, and horizontal directional drilling equipment for the installation of direct-buried power lines. Includes a review of safety guidelines related to buried utilities.

Introduction to Electrical Test Equipment
(7.5 Hours)
ISBN 978-0-13-266338-0
(Module ID 49113-11) Introduces the basic test equipment used by electrical workers to test and troubleshoot electrical circuits. Also covers specialized line worker test equipment, including the high-voltage detector, phase rotation tester, megohmmeter, phasing stick, and hi-pot tester.

Continued on following page
Power Line Worker: Distribution Level 2

Alternate Current and Three-Phase Systems (17.5 Hours)
(Module ID 80201-11) Introduces the development of both single- and three-phase alternating current. Analyzes the behavior of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Aerial Distribution Equipment (25 Hours)
(Module ID 80202-11) Identifies the various equipment components found on overhead distribution system poles and describes the function of each, including transformers, reclosers, fuses, sectionalizers, capacitor banks, and voltage regulators.

Cable and Conductor Installation and Removal (20 Hours)
ISBN 978-0-13-274261-0
(Module ID 80203-11) Describes the types of conductors and cables used in overhead and underground residential distribution systems and the equipment and procedures used to install and remove them. Includes methods used to splice conductors.

Live-Line Work (40 Hours)
ISBN 978-0-13-296759-4
(Module ID 80301-12) Covers tools such as hot sticks, shotgun sticks, and wire tongs, along with the PPE and safe work practices that are critical elements of live line and bare hand work. Includes coverage of various live-line tasks such as different methods of moving conductors and replacing insulators, cross-arms, and poles.

Three-Phase URD Systems (25 Hours)
ISBN 978-0-13-296760-0
(Module ID 80302-12) Covers safety practices associated with three-phase URD systems; describes vault and manhole applications; and explains different transformer configurations and sectionalizing equipment used in three-phase URD systems. Also covers three-phase cables and how cable is pulled through conduit.

System Protection and Monitoring (7.5 Hours)
(Module ID 80303-12) Presents an overview of monitoring and protection systems and reviews the key components that make them work. Describes feeder diagrams and their use in locating and identifying components.

Underground Residential Distribution (URD) Systems (30 Hours)
ISBN 978-0-13-274263-4
(Module ID 80204-11) Describes the methods used to distribute power in residential and commercial subdivisions, including the equipment used in the process, such as pad-mount transformers and switchgear. Covers the components and methods used to connect primary and secondary power, as well as the protective devices used in URD systems and methods used to locate and repair buried cables.

Overhead and URD Service Installations (15 Hours)
(Module ID 80205-11) Describes the methods and procedures used in terminating single-phase and three-phase aerial and URD systems at residential and commercial customer locations. Includes coverage of revenue meters and street light connections.

Distribution Line Maintenance (50 Hours)
(Module ID 80206-11) Describes the inspection process and the methods and procedures used to inspect and maintain poles, conductors, and equipment used in aerial and URD systems. Includes coverage of transformer testing; location and correction of faults in URD systems; load management systems; and protective device coordination.

To Order Call: 1-800-922-0579 ©NCCER
**Power Line Worker: Substation Level 2**

**Curriculum Notes**
- 180 Hours
- Published: 2012
- Downloadable instructor resources that include module tests, PowerPoint®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**
Trainee Guide: $99.99
978-0-13-295343-6

**L2 POWER LINE WORKER: SUBSTATION**

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Substations (10 Hours)**
(Module ID 82201-12) Provides an overview of the different types and functions of substations. Identifies the various voltage classes and introduces the primary equipment and components found in substations. Safe work practices and access issues related to substations are presented, as well as an introduction to one-line diagrams.

**Managing Electrical Hazards (12.5 Hours)**
(Module ID 26501-12; from Power Line Worker: Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

**Conductors and Cables (10 Hours)**
(Module ID 82202-12) Identifies the many types, sizes, and applications of conductors and cables. Fiber-optic cable is also introduced. Reviews the use of cable drawings and schedules. Provides coverage of the methods of routing cables underground in the substation environment.

**Cable Tray (7.5 Hours)**
(Module ID 26207-11; from Electrical Level Two, Seventh Edition) Focuses on NEC® installation requirements for cable tray, including cable installations.

**Conduit Bending (15 Hours)**
(Module ID 26204-11; from Electrical Level Two, Seventh Edition) Covers bends in conduit up to 6 inches. Focuses on mechanical, hydraulic, and electrical benders.

**Conductor Installations (10 Hours)**
(Module ID 26206-11; from Electrical Level Two, Seventh Edition) Covers the transportation, storage, and setup of cable reels; methods of rigging; and procedures for complete cable pulls in raceways and cable trays.

**Conductor Terminations and Splicing (7.5 Hours)**
(Module ID 26208-11; from Electrical Level Two, Seventh Edition) Describes methods of terminating and splicing conductors, including preparing and taping conductors.

**Grounding Systems (12.5 Hours)**
(Module ID 82203-12) Describes the purpose and arrangement of grounding systems installed beneath a substation. Covers the materials of construction and the approaches to reliable ground system connections. Introduces safety concerns and precautions associated with substation and grounding grid expansion.

**Grades (15 Hours)**
(Module ID 22106-12; from Heavy Equipment Operations Level One) Introduces the concept of preparing graded surfaces using heavy equipment. Covers identification of construction stakes and interpretation of marks on each type of stake. Describes the process for grading slopes.

**Concrete Work (35 Hours)**
(Module ID 82204-12) Provides comprehensive coverage of concrete pouring and finishing techniques. Includes detailed information on concrete types and their uses. Form layout and construction, along with basic surveying skills, is presented. Also provides detailed coverage of rebar types and their common geometric forms.

**Mechanical Construction Methods and Materials (17.5 Hours)**
(Module ID 82205-12) Covers the diverse types of substation structures and their composition. Identifies components commonly supported by structures and the various bus forms and materials of construction. Includes thorough coverage of threaded fasteners along with mechanical torquing tools and procedures.

**Intermediate Rigging (30 Hours)**
(Module ID 38201-11; from Intermediate Rigger, Second Edition) Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and shift a load between two hoists.

**Concrete Work (35 Hours)**
(Module ID 82204-12) Provides comprehensive coverage of concrete pouring and finishing techniques. Includes detailed information on concrete types and their uses. Form layout and construction, along with basic surveying skills, is presented. Also provides detailed coverage of rebar types and their common geometric forms.

**Intermediate Rigging (30 Hours)**
(Module ID 38201-11; from Intermediate Rigger, Second Edition) Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and shift a load between two hoists.

**Medium- and High-Voltage Equipment Installation**

**(25 Hours)**
ISBN 978-0-13-296792-1
(Module ID 82302-12) Presents the typical installation procedures for primary substation components. Identifies the common and unique factors related to the proper installation of transformers, circuit breakers, capacitors, reactors, bus systems, and insulators. A discussion of corona and how proper installation techniques can prevent it is also included.

**Control House (20 Hours)**
(Module ID 82303-12) Provides an overview of the substation control house and its function in the substation. The components and protective systems generally contained within a control house are examined, including the essential DC power systems and emergency power supplies. Coverage of racking systems and their layout is also included.

Continued on following page
Connectors, Conductor Terminations, and Splicing (25 Hours)
ISBN 978-0-13-296794-5 (Module ID 82304-12) Describes the procedures and materials required to prepare and complete terminations and splices on insulated and non-insulated conductors and cables. Coverage is provided for both medium- and high-voltage circuits. Hydraulic presses and crimpers are introduced, along with hi-pot testing procedures for terminations and splices.

Equipment Testing and Maintenance (30 Hours)
ISBN 978-0-13-296795-2 (Module ID 82305-12) Identifies the testing procedures required and explains how to properly maintain substation components. Coverage of testing and maintenance procedures is provided for power transformers, potential devices, various circuit breakers, disconnects and switches, capacitors, and reactors.

System Protection and Control (12.5 Hours)
ISBN 978-0-13-296779-9 (Module ID 82306-12) Describes the protective functions required in the substation environment to defend against overloads, fault currents, and other incidents that can disrupt service or damage the system. Offers coverage of the components used to provide both protection and system control. An introduction to the various protective relay schemes used in today’s substations is included.

Alternating Current and Three-Phase Systems (17.5 Hours)
ISBN 978-0-13-274259-7 (Module ID 80201-11; from Power Line Worker: Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Transmission Structure Rigging (17.5 Hours)

Transmission Structure Erection (50 Hours)
ISBN 978-0-13-274276-4 (Module ID 81202-11) Focuses on the safe installation of insulators, towers, and poles. Discusses the erection requirements for various types of transmission structures, including steel towers, wood structures, and different types of poles. Discusses general construction requirements, as well as right-of-way clearing, foundations, framing and erection, guying and anchoring, and grounding and bonding.

Transmission Equipment Installation (50 Hours)
ISBN 978-0-13-274277-1 (Module ID 81201-11) Covers the installation of insulators, towers, and poles. Discusses the methods used to install power line equipment, including the use of cranes and other lifting devices. Contains performance tasks to assist the learning process.

Construction, Maintenance, and Repair – Hot Stick (80 Hours)
ISBN 978-0-13-296774-7 (Module ID 81301-12) Covers tools such as hot sticks, shotgun sticks, and wire tongs, along with the PPE and safe work practices that are critical elements of live-line and bare-hand work. Includes coverage of live-line tasks such as replacing insulators, cross-arms, and spacers.

Construction, Maintenance, and Repair – Live-Line Barehand (40 Hours)
ISBN 978-0-13-296672-3 (Module ID 81301-12) Describes the methods used to work on live transmission lines by bending to the line. Covers safety practices and PPE, and includes coverage of bonded buckets, non-conductive suits, insulated ladders, bonding jumpers, and rescue procedures.

Fundamentals of Crew Leadership (20 Hours)
ISBN 978-0-13-292245-6 (Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Construction, Maintenance, and Repair – Live-Line Barehand (40 Hours)
ISBN 978-0-13-296672-3 (Module ID 81301-12) Describes the methods used to work on live transmission lines by bending to the line. Covers safety practices and PPE, and includes coverage of bonded buckets, non-conductive suits, insulated ladders, bonding jumpers, and rescue procedures.

Construction, Maintenance, and Repair – Live-Line Barehand (40 Hours)
ISBN 978-0-13-296672-3 (Module ID 81301-12) Describes the methods used to work on live transmission lines by bending to the line. Covers safety practices and PPE, and includes coverage of bonded buckets, non-conductive suits, insulated ladders, bonding jumpers, and rescue procedures.

Fundamentals of Crew Leadership (20 Hours)
ISBN 978-0-13-292245-6 (Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Power Line Worker: Substation Level 3 (continued)

L2 POWER LINE WORKER: TRANSMISSION

Field Safety

Curriculum Notes

• 45 Hours
• Revised: 2013, Second Edition
• Provides the necessary safety task training to all field personnel. This manual is designed for individuals involved with completing or overseeing a specific task, from the craftsperson, crew leader, and safety supervisor to superintendent.
• Downloadable instructor resources that include module tests, PowerPoint®️, and performance profile sheets are available at www.nccer.org/irc.
• A Spanish translation of the first edition is available. Please see NCCER’s online catalog for more information.

PAPERBACK
978-0-13-340245-2

MODULES
The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Introduction to Safety (10 hours)
(Module ID 75101-13) Presents basic safety concepts and explains the difference between regulatory compliance and best practices. Introduces OSHA and explains how accidents affect everyone on a job site. Provides an overview of common jobsite hazards, including walking and working surfaces, temperature extremes, fire prevention, and tool safety. Identifies the elements of a hazard communication system and describes the types of information found on a product’s safety data sheet (SDS).

Confined Spaces and Excavations (5 hours)
(Module ID 75120-13) Covers safety precautions related to work in confined spaces, including the responsibilities and duties of each member of the confined-space entry team. It also covers the safety hazards and safeguards required when working in an excavation, including an explanation of various trenching supports and soil types.

Work-Zone Safety (5 hours)
(Module ID 75104-13) Introduces the signs, signals, and barricades found on various job sites, and covers highway work-zone safety requirements.

Electrical Safety (5 hours)
(Module ID 75121-13) Describes the basic precautions necessary to avoid electrical shock, arc, and blast hazards. It also describes the lockout/tagout procedure.

Working from Elevations (5 hours)
(Module ID 75122-13) Explains the use of fall-protection equipment. Covers safety precautions related to elevated work surfaces, including ladders, scaffolding, and aerial lifts.

Steel Erection (2.5 hours)
ISBN 978-0-13-340364-0
(Module ID 75110-13) Covers common safety precautions related to steel-erection work, including controlled decking zones, hazardous materials and equipment precautions, tool safety, and appropriate personal protective equipment.

Heavy Equipment, Forklift, and Crane Safety (5 hours)
(Module ID 75123-13) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

Concrete and Masonry (2.5 hours)
(Module ID 75119-13) Describes the personal protective equipment that must be used when working with concrete and masonry as well as the common jobsite and health hazards associated with this type of work.

Introduction to Materials Handling (5 hours)
(Module ID 75124-13) Explains the safety precautions required when transporting, handling, rigging, stacking, and storing various types of loads. It also covers safe lifting procedures.

Safety Learning Series

The Safety Learning Series consists of three separate titles comprising a suggested education path: the Basic Safety module from Core, Field Safety, and Safety Technology. The curriculum was built on industry best practices by a team of safety professionals and meets the training needs of the craft professional, safety technician, and safety manager.

The modularized structure of the curriculum enables companies to cost-effectively customize training programs and offer industry credentials through the NCCER Registry System. The Safety Learning Series has been recognized by the Board of Certified Safety Professionals (BCSP). Completion of the Safety Learning Series will help personnel prepare for the Safety Trained Supervisor Construction (STSC) and Construction Health and Safety Technologist (CHST) certification exams administered by BCSP. BCSP sets and certifies technical competency criteria for safety, health, and environmental practitioners worldwide.
Field Safety (continued)

**Basic Safety**

(Construction Site Safety Orientation)

- 12.5 Hours
- Revised: 2021
- Module ID 00101

**PAPERBACK**

Trainee Guide: $24.99

This module, from Core, replaces the Safety Orientation book. See the module description above for more information.

**Fall Protection Orientation**

- 8 Hours
- Module ID 75901

**PAPERBACK**

Trainee Guide: $34.99

Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

**Managing Electrical Hazards**

- 12.5 Hours
- Revised: 2021, Fifth Edition
- Module ID 26501-21

**PAPERBACK**

Trainee Guide: $29.99

- A copy of NFPA 70E® Standard for Electrical Safety in the Workplace, 2021 Edition, is required material for this course. To order contact NFPA at www.nfpa.org or 1-800-344-3555.

Describes how to assess and eliminate shock, arc blast, and arc flash hazards using the practical safe working requirements detailed in NFPA 70E® Standard for Electrical Safety in the Workplace®. Where it is not possible to eliminate a hazard, an energized electrical work permit must be completed, and workers must be protected by appropriate safety procedures and personal protective equipment.
Curriculum Notes

- 45 Hours
- Updated in 2018.
- Provides instruction on how to implement and administer a company safety program. This manual is designed for field managers, safety directors, safety committees, owner safety representatives, and insurance/loss control representatives.
- downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

MODULES

The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Introduction to Safety Technology (2.5 hours)
(Module ID 75201) Describes the responsibilities of a safety technician and identifies the basic components of a safety program. It also provides an overview of regulatory requirements.

Positive Safety Communication (2.5 hours)
(Module ID 75205) Explains how to support an effective safety culture on the job site, including communication techniques, motivation, and responding to behavioral issues.

Hazard Recognition, Environmental Awareness, and Occupational Health (5 hours)
(Module ID 75219) Covers environmental and safety hazards. It explains how to evaluate risks and identify appropriate methods of hazard control. It also discusses environmental regulations for hazardous materials and describes the elements of a medical surveillance program.

Job Safety Analysis and Pre-Task Planning (5 hours)
(Module ID 75220) Provides guidance on safety performance analysis and employee coaching. It also explains how to complete job and task safety planning.

Safety Data Tracking and Trending (5 hours)
(Module ID 75221) Covers how to conduct safety inspections, audits, and employee safety observations. It discusses both traditional and predictive methods of performance measurement, and explains how to analyze safety data in order to prevent future incidents.

Safety Orientation and Safety Meetings (5 hours)
(Module ID 75223) Describes how to prepare and deliver effective training using both formal safety meetings and tailgating.

Permits and Policies (5 hours)
(Module ID 75224) Provides an overview of the various work permits required on a construction site. It also provides detailed procedures for completing a hot work permit, lockout/tagout, and confined-space entry permit.

Incident Investigations, Policies, and Analysis (5 hours)
(Module ID 75225) Describes how to conduct an incident investigation, including employee interviews and reporting requirements. It also explains how to analyze an incident to determine the root cause and prevent future incidents.

OSHA Inspections and Recordkeeping (5 hours)
(Module ID 75226) Discusses the OSHA requirements for recordkeeping and explains how to manage the safety and health records for a job site. It also covers the two main types of OSHA inspections.
