Tools of the Plumbing Trade (10 Hours)
(Module ID 02103) This module describes hand and power tools used by plumbers to measure, lay out, level, cut, drill, and join different pipe. Along with teaching trainees how to select the appropriate tools for the task, this module teaches them how to avoid some of the most dangerous hazards associated with power tools. Trainees are also instructed in the proper care of different types of hand and power tools.

Introduction to Plumbing Math (12.5 Hours)
(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrates how they apply to on-the-job situations. Teaches trainees how to recognize the type of math necessary for each job, and illustrates methods for measuring pipe length using a variety of tables and illustrations.

Introduction to Plumbing Drawings (17.5 Hours)
(Module ID 02105) Introduces trainees to the types of plumbing drawings they will encounter, and teaches them how to interpret and apply the information when laying out and installing plumbing systems. Reviews symbols used in plumbing and mechanical drawings and provides examples of isometric, oblique, orthographic, and schematic drawings. Requires trainees to interpret plumbing drawings and to understand the relationship between code requirements and plumbing drawings.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106) Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to manufacturer's instructions and applicable codes. Also discusses pressure testing of plastic pipe after it is installed.

Copper Tube and Fittings (12.5 Hours)
(Module ID 02107) Explains the importance of copper tubing and related fittings. Reviews copper tube systems, and describes methods for cutting, joining, and installing copper tubing. Insulation, pressure testing, seismic reinforcement techniques, and handling and storage requirements are also addressed.

Cast Iron Pipe and Fittings (12.5 Hours)
ISBN 978-0-13-793427-0
(Module ID 02108) Describes how hub-and-spirog and no-hub cast iron pipe and fittings are used in DWV systems. Reviews related sizing and labeling standards, types of fittings, and techniques for measuring and cutting cast iron pipe. Also provides instructions for joining, hanging, and testing pipe installations.

Steel Pipe and Fittings (12.5 Hours)
(Module ID 02109) Presents concepts related to threading, labeling, and sizing of steel pipe and fittings. Different types of elbows, couplings, and valves are described. Provides instructions for measuring, cutting, threading, joining, and hanging steel pipe, and reviews corrugated stainless steel tubing.

Introduction to Plumbing Fixtures (7.5 Hours)
(Module ID 02110) Introduces trainees to the primary types of plumbing fixtures, the materials from which they are made, and how they function in typical applications. Also reviews the functionality of specific bathroom and kitchen fixtures, including compression and non-compression faucets, shower and bath fixtures, and exterior utility faucets.

Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)
(Module ID 02111) Explains how DWV systems remove liquid and solid waste safely and effectively. Identifies DWV components, including pipe, drains, traps, and vents. Also describes how plumbers connect these components to municipal and private sewer systems.

Introduction to Water Distribution Systems (10 Hours)
(Module ID 02112) Identifies the major features and functions of components used in water distribution systems, including pipe and fittings, valves, and water heating and treatment equipment. Reviews private and public water sources, and describes how plumbers connect service lines to both types of systems.

Structural Penetrations, Insulation, and Fire-Stopping (15 Hours)
(Module ID 02203) Introduces methods for adjusting structural members, insulating pipe, and installing fire-stopping. Covers reinforcement techniques for modified structural members; how to measure, cut, and install fiberglass and flexible foam insulation; and how to identify walls, floors, and ceilings that require fire-stopping.

Installing and Testing DWV Piping (30 Hours)
(Module ID 02204-13) Explains how to locate, install, connect, and test a complete drain, waste, and vent (DWV) system. Discusses how to develop material takeoffs, set up and use levels, locate building sewers and building drains, locate fixtures, and test a DWV system.

Continued on following page
Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205) Covers the proper techniques for locating, installing, and connecting roof, floor, and area drains and floor sinks according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.

Installing and Testing Water Supply Piping (20 Hours)
(Module ID 02206) Explores the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and hose bibs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, ice maker and washing machine boxes, and pipe stubouts and supports.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-819468-0
(Module ID 02208) Covers the installation of basic plumbing fixtures, including bathtubs, shower stalls, lavatories, sinks, water closets, and urinals. Reviews the installation of associated valves, faucets, and components. Explains how to connect appliances such as dishwashers, food-waste disposers, refrigerators and ice makers, and washing machines.

Installing Water Heaters (10 Hours)
(Module ID 02209) Discusses gas-fired, electric, tankless, heat pump, solar thermal, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Types of Valves (5 Hours)
(Module ID 02207) Reviews types of valves, their components, and applications. Also covers valve servicing.

Basic Electricity (10 Hours)
(Module ID 02210) Introduces electrical safety and the principles of electricity needed by plumbers including voltage, current, resistance, and power. Includes important electrical formulas, circuitry, and common plumbing-related electrical applications.

Fuel Gas and Fuel Oil Systems (20 Hours)
(Module ID 02211) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.
Lee Company

Brad Sims,

apprenticeship program.

NCCER's Plumbing resources are the best available, and are important components of any daily, including servicing, tools, materials, measurement, and trade-specific math.

"NCCER's Plumbing curriculum is an excellent educational resource for future plumbers. Earn Industry-Recognized Credentials from NCCER

LEVEL 1

TOOLS OF THE PLUMBING TRADE (10 Hours)

(Module ID 02103) Introduces trainees in the care and use of different types of power tools they will use on the job. Gives trainees the information they need to select the appropriate tools for different tasks, and reviews tool maintenance and safety issues.

INTRODUCTION TO PLUMBING MATH (12.5 Hours)

(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and square roots, and demonstrates how they apply to on-the-job situations. Teaches trainees how to measure pipe using fitting tables and framing squares and how to calculate 45-degree offsets.

INTRODUCTION TO PLUMBING DRAWINGS (17.5 Hours)

(Module ID 02105) Introduces trainees to the different types of plumbing drawings they will encounter on the job and discusses how to interpret and apply them when laying out and installing plumbing systems. Discusses the symbols used in plumbing and mechanical drawings and reviews isometric, oblique, and orthographic drawings. Requires trainees to render plumbing drawings and to recognize how code requirements apply to plumbing drawings.

PLASTIC PIPE AND FITTINGS (12.5 Hours)

(Module ID 02106) Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to manufacturer's instructions and applicable codes. Also discusses pressure testing of plastic pipe once installed.

COPPER TUBE AND FITTINGS (12.5 Hours)

(Module ID 02107) Discusses sizing, labeling, and applications of copper tube and fittings and reviews the types of valves that can be used on copper tube systems. Explains proper methods for cutting, joining, and installing copper tube. Also addresses insulation, pressure testing, seismic codes, and handling and storage requirements.

CAST-IRON PIPE AND FITTINGS (12.5 Hours)

(Module ID 02108) Introduces trainees to hub-and-spigot and no-hubcast-iron pipe and fittings and their applications in DWV systems. Reviews material properties, storage and handling requirements, and fittings and valves. Covers joining methods, installation, and testing.

STEEL PIPE AND FITTINGS (12.5 Hours)

(Module ID 02109) Discusses threading, labeling, and sizing of steel pipe and reviews the differences between domestic and imported pipe. Covers the proper techniques for measuring, cutting, threading, joining, and hanging steel pipe. Also reviews corrugated stainless steel tubing.

INTRODUCTION TO PLUMBING FIXTURES (7.5 Hours)

(Module ID 02110) Discusses the proper applications of code-approved fixtures in plumbing installations. Reviews the different types of fixtures and the materials used in them. Also covers storage, handling, and code requirements.

INTRODUCTION TO DRAIN, WASTE, AND VENT (DWV) SYSTEMS (10 Hours)

(Module ID 02111) Explains how DWV systems remove waste safely and effectively. Discusses how system components, such as pipe, traps, vents, and waste work. Reviews drain and vent sizing, grade, and waste treatment. Also discusses how building sewers and sewer drains connect the DWV system to the public sewer system.

INTRODUCTION TO WATER DISTRIBUTION SYSTEMS (10 Hours)

(Module ID 02112) Identifies the major components of water distribution systems and describes their functions. Reviews water sources and treatment methods and covers supply and distribution for the different types of systems that trainees will install on the job.

MODULAS

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

INTRODUCTION TO THE PLUMBING PROFESSION (5 Hours)

(Module ID 02101) Introduces trainees to the many career options available in today’s plumbing profession. Provides a history of plumbing and also discusses the current technology, industries, and associations that make up the modern plumbing profession. Also reviews human relations and safety skills.

PLUMBING SAFETY (22.5 Hours)

(Module ID 02102) Discusses the causes of accidents and their consequences and repercussions in terms of delays, increased expenses, injury, and loss of life. Reviews the types and proper use of personal protective equipment (PPE). Instructs trainees in the use of critical safety information conveyed in hazard communication (HazCom), safety signs, signals, lockout/tagout, and emergency response. Covers confined-space safety, and reviews safety issues related to hand and power tools.

INTRODUCTION TO WATER SYSTEMS (5 Hours)

(Module ID 02103) Introduces trainees to the different types of water systems. Reviews material properties, storage, handling, and code requirements. Covers joining methods, installation, and testing.

INTRODUCTION TO STEAM, HYDROELECTRIC, AND OTHER SPECIALIZED SYSTEMS (5 Hours)

(Module ID 02104) Discusses how to identify and interpret civil, architectural, structural, HVAC/mechanical, plumbing, and electrical drawings. Discusses how to ensure accurate dimensions, generate RFIs, and locate plumbing entry points, as well as how to establish piping routes and fixture locations. Isometric drawings, material takeoffs, approved submittal data, and Building Information Management (BIM), are also covered.

MODELS

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

INTRODUCTION TO WATER SYSTEMS (5 Hours)

(Module ID 02201-13) Explains the Pythagorean theorem and reviews methods for laying out square corners. Discusses the techniques used to calculate simple and rolling offsets, as well as offsets on parallel runs of pipe.

READING COMMERCIAL DRAWINGS (25 Hours)

(Module ID 02202-13) Explains how to identify and interpret civil, architectural, structural, HVAC/mechanical, plumbing, and electrical drawings. Discusses how to ensure accurate dimensions, generate RFIs, and locate plumbing entry points, as well as how to establish piping routes and fixture locations. Isometric drawings, material takeoffs, approved submittal data, and Building Information Management (BIM), are also covered.

STRUCTURAL PENETRATIONS, INSULATION, AND FIRE-STOPPING (15 Hours)

(Module ID 02203-13) Introduces methods for adjusting structural members, insulating pipe, and installing fire-stopping. Covers reinforcement techniques for modified structural members; how to measure, cut, and install fiberglass and flexible foam insulation; and how to identify walls, floors, and ceilings that require fire-stopping.

INSTALLING AND TESTING DWV PIPING (30 Hours)

ISBN 978-0-13-340278-0

(Module ID 02204-13) Explains how to locate, install, connect, and test a complete drain, waste, and vent (DWV) system. Discusses how to develop material takeoffs, set up and use levels, locate building sewers and building drains, locate fixtures, and test a DWV system.

Continued on following page
### Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205-13) Covers the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and hose bibs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, ice maker and washing machine boxes, and pipe stubouts and supports.

### Types of Valves (5 Hours)
ISBN 978-0-13-340281-0
(Module ID 02207-13) Reviews types of valves, their components, and applications. Also covers valve servicing.

### Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-340283-4
(Module ID 02208-13) Covers the installation of basic plumbing fixtures, including bathtubs, shower stalls, lavatories, sinks, water closets, and toilets. Reviews the installation of associated valves, faucets, and components. Explains how to connect appliances such as dishwashers, food-waste disposers, refrigerators and ice makers, and washing machines.

### Installing Water Heaters (10 Hours)
(Module ID 02209-13) Discusses gas-fired, electric, tankless, heat pump, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

### Basic Electricity (10 Hours)
(Module ID 02210-13) Introduces electrical safety and the principles of electricity including voltage, current, resistance, and power. Includes important electrical formulas, circuitry, and common plumbing-related electrical applications.

### Fuel Gas and Fuel Oil Systems (20 Hours)
(Module ID 02211-13) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.

### Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-340283-4
(Module ID 02208-13) Covers the installation of basic plumbing fixtures, including bathtubs, shower stalls, lavatories, sinks, water closets, and toilets. Reviews the installation of associated valves, faucets, and components. Explains how to connect appliances such as dishwashers, food-waste disposers, refrigerators and ice makers, and washing machines.

### Installing Water Heaters (10 Hours)
(Module ID 02209-13) Discusses gas-fired, electric, tankless, heat pump, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

### Sewage Pumps and Sump Pumps (12.5 Hours)
(Module ID 02307-14) Discusses the installation, diagnosis, and repair of pumps, controls, and sumps in sewage and storm water removal systems.

### Corrosive-Resistant Waste Piping (7.5 Hours)
(Module ID 02308-14) Discusses corrosive wastes and reviews related safety issues and hazard communications. Explains how to determine when corrosive-resistant waste piping needs to be installed, as well as how to correctly select and properly connect different types of piping.

### Compressed Air (10 Hours)
(Module ID 02309-14) Explains the principles of compressed air systems and describes their components and accessories. Reviews installation and periodic servicing of air compressor systems.

### Service Plumbing (27.5 Hours)
ISBN 978-0-13-378279-0
(Module ID 02310-14) Covers the troubleshooting and repair of fixtures, valves, and faucets in accordance with code and safety guidelines. Explains how to diagnose and repair water supply and drainage piping, water heaters, and other appliances and fixtures. Describes the effects of corrosion, freezing, and hard water on plumbing systems.

**L3 PLUMBING**

**LEVEL 3**

**Curriculum Notes**

- 160 Hours
- Downloadable instructor resources are available.

**PAPERBACK**

**TRAINEE GUIDE:** Trainee Guide: $99.99

**DIGITAL**

**NCCECONNECT ACCESS CARD:** $99.99
NCCECONNECT +
Trainee Guide: $124.99

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**APPLIED MATH (17.5 Hours)**
(Module ID 02301-14) Reviews math concepts, including weights and measures, area and volume, temperature, pressure, and force. Describes the six simple machines: inclined planes, levers, pulleys, wedges, screws, and wheels and axles.

**SIZING AND PROTECTING THE WATER SUPPLY SYSTEM (20 Hours)**
(Module ID 02312-14) Teaches techniques for sizing water supply systems, including calculating system requirements and demand, developed lengths, and pressure drops. Reviews the factors that can reduce efficiency of water supply piping. Introduces different backflow prevention devices and explains how they work, where they are used, and how they are installed in water supply systems.

**PORABLE WATER SUPPLY TREATMENT (15 Hours)**
(Module ID 02303-14) Explains how to disinfect, filter, and soften water supply systems. Discusses how to troubleshoot water supply problems, flush out visible contaminants from a plumbing system, and disinfect a portable water distribution system.

**TYPES OF VENTS (20 Hours)**
(Module ID 02305-14) Reviews the different types of vents that can be installed in a DWV system and explains how they work. Teaches design and installation techniques.

**SIZING DWV AND STORM SYSTEMS (20 Hours)**
(Module ID 02306-14) Explains how to calculate drainage fixture units for waste systems. Reviews how to size drain, waste, and vent (DWV) systems; storm drainage systems; and roof drainage systems.

**SIZING AND PROTECTING THE WATER SUPPLY SYSTEM (20 Hours)**
(Module ID 02312-14) Teaches techniques for sizing water supply systems, including calculating system requirements and demand, developed lengths, and pressure drops. Reviews the factors that can reduce efficiency of water supply piping. Introduces different backflow prevention devices and explains how they work, where they are used, and how they are installed in water supply systems.

**PORABLE WATER SUPPLY TREATMENT (15 Hours)**
(Module ID 02303-14) Explains how to disinfect, filter, and soften water supply systems. Discusses how to troubleshoot water supply problems, flush out visible contaminants from a plumbing system, and disinfect a portable water distribution system.

**TYPES OF VENTS (20 Hours)**
(Module ID 02305-14)Reviews the different types of vents that can be installed in a DWV system and explains how they work. Teaches design and installation techniques.

**SIZING DWV AND STORM SYSTEMS (20 Hours)**
(Module ID 02306-14) Explains how to calculate drainage fixture units for waste systems. Reviews how to size drain, waste, and vent (DWV) systems; storm drainage systems; and roof drainage systems.

---

Continued on following page
Water Pressure Booster and Recirculation Systems (12.5 Hours)
(Module ID 02403-14) Builds on trainees' previous experience with pumps, storage tanks, controls, and pipes and fittings by teaching how to assemble those components into systems that boost water pressure and provide hot water.

Indirect and Special Waste (17.5 Hours)
(Module ID 02404-14) Describes the code requirements and installation procedures for systems that protect against contamination from indirect and special waste.

Hydronic and Solar Heating Systems (17.5 Hours)
(Module ID 02405-14) Introduces the basic types of hydronic and solar heating systems and their components. Reviews hydronic and solar heating system layout, installation, testing, and balancing, and also discusses methods that inhibit corrosion in hydronic or solar heating systems.

Codes (12.5 Hours)
(Module ID 02406-14) Discusses the different codes used by plumbers across the country and explains how those codes are written, adopted, modified, and implemented.

Private Waste-Disposal Systems (10 Hours)
(Module ID 02409-14) Describes the maintenance and installation of these systems, and explains how to determine the local code requirements for these systems. Covers percolation tests and sewage system planning and layout.

Swimming Pools and Hot Tubs (7.5 Hours)
(Module ID 02410-14) Introduces trainees to plumbing systems in swimming pools, hot tubs, and spas.

Plumbing for Mobile Homes and Travel Trailer Parks (7.5 Hours)
(Module ID 02411-14) Describes the location and layout of plumbing systems for mobile home and travel trailer parks. Reviews how to design and lay out a system, how to connect water and sewer lines to a mobile home, and how to estimate materials for the park.

Introduction to Medical Gas and Vacuum Systems (15 Hours)
(Module ID 02412-14) Introduces the various types of medical gas and vacuum systems used in health care facilities. Covers the system requirements and professional qualifications required by code, describes common types of medical gas and vacuum systems, and introduces the safety requirements for installing, testing, and servicing these systems.

Private Water Supply Well Systems (10 Hours)
(Module ID 02408-14) Describes the operation of pumps and well components. Reviews the qualities of good wells and how to assemble and disassemble pumps and components.
