Curriculum Catalog

2024

Standardized, competency-based curricula for construction professionals

Built For Industry, By Industry.
NCCER’s catalog is digital!

A compiled PDF of all crafts is available on the Instructor Portal at www.nccer.org/instructors. In addition, craft listings with modules for each level are available as downloadable PDFs on each of the individual craft webpages, found at www.nccer.org/crafts.

Stay up-to-date with all NCCER news by signing up for our mailing list at www.nccer.org/join-mailing-list
# Table of Contents

## ORDERING AND CUSTOMER SERVICE
- Ordering and Customer Service ........................................... 2
- Pearson Contact Information .................................................. 4

## ABOUT NCCER
- Subject Matter Expert Thank You ......................................... 5
- NCCERconnect .................................................................. 6
- Module and Craft Identification Numbers ................................ 7

## CONSTRUCTION ESSENTIALS
- Applied Construction Math .................................................. 9
- Core ................................................................................... 8
- Tools for Success .................................................................. 9

## CONSTRUCTION & MAINTENANCE
- Boilermaking ........................................................................ 10
- Cabinetmaking ...................................................................... 15
- General Carpentry .................................................................. 12
- Carpentry ............................................................................... 13
- Concrete Construction .......................................................... 16
- Construction Craft Laborer .................................................... 18
- Construction Technology ....................................................... 20
- Drywall ............................................................................... 21
- Electrical .............................................................................. 23
- Electronic Systems Technician ............................................... 29
- Heavy Equipment Operations ............................................... 31
- Heavy Highway Construction ................................................ 33
- HVAC ................................................................................. 35
- HVAC ................................................................................. 36
- Hydroblasting ........................................................................ 34
- Industrial Coating and Lining Application Specialist ............. 39
- Industrial Maintenance Electrical & Instrumentation ............... 40
- Industrial Maintenance Mechanic ......................................... 43
- Instrumentation ..................................................................... 45
- Ironworking .......................................................................... 48
- Managing Electrical Hazards ................................................. 25, 120
- Masonry ............................................................................... 50
- Mechanical Insulating ............................................................ 52
- Millwright ............................................................................. 54
- Painting ................................................................................. 57
- Pipefitting ............................................................................ 59
- Pipelayer .............................................................................. 61
- Plumbing ............................................................................... 62
- Reinforcing Ironwork ............................................................. 67
- Roofing ................................................................................. 68
- Scaffolding .......................................................................... 69
- Sheet Metal ............................................................................ 70
- Site Layout ............................................................................. 72
- Sprinkler Fitting ..................................................................... 73
- Welding ................................................................................ 75

## CRANE, RIGGER, AND SIGNAL PERSON
- Mobile Crane Operations ....................................................... 80
- Rigger/Signal Person ............................................................. 82
- Tower Crane Operator ............................................................ 84

## GREEN/SUSTAINABLE
- Alternative Energy ................................................................. 85
- Solar Photovoltaics ................................................................. 86
- Sustainable Construction Supervisor ..................................... 88
- Weatherization ..................................................................... 89
- Wind Energy ......................................................................... 92
- Your Role in the Green Environment .................................... 9, 88

## MANAGEMENT
- Fundamentals of Crew Leadership ........................................ 93
- Project Management .............................................................. 94
- Project Supervision ............................................................... 95

## MARITIME
- Maritime Industry Fundamentals .......................................... 123
- Maritime Aluminum Welding ................................................. 124
- Maritime Electrical ............................................................... 125
- Maritime Pipefitting .............................................................. 127
- Maritime Structural Fitter ...................................................... 128
- Maritime Welding ................................................................. 1230

## PIPELINE
- Introduction to the Pipeline Industry .................................... 96
- Pipeline Abnormal Operating Conditions ............................. 97
- Pipeline Corrosion Control .................................................. 104
- Pipeline Electrical and Instrumentation ............................... 98
- Pipeline Field and Control Center Operations ....................... 102
- Pipeline Maintenance and Mechanical ................................. 100

## POWER
- Power Generation Maintenance Electrician .......................... 107
- Power Generation I&C Maintenance Technician ..................... 110
- Power Generation Maintenance Mechanic ........................... 113
- Power Industry Fundamentals .............................................. 106
- Power Line Worker .............................................................. 116
- Power Line Worker: Distribution .......................................... 117
- Power Line Worker: Substation ........................................... 118
- Power Line Worker: Transmission ........................................ 119

## SAFETY
- Basic Safety (Construction Site Safety Orientation) ............... 9, 121
- Fall Protection Orientation ................................................... 121
- Field Safety ......................................................................... 120
- Safety Technology ............................................................... 122
## HOW TO ORDER

### Order Books

<table>
<thead>
<tr>

Module Orders
Individual modules are printed on demand. Please allow two to three weeks for fulfillment and delivery. Modules are not returnable.

Pricing
All prices listed in this catalog reflect net pricing available to schools, government, business and industry accounts. No additional discounts are available. Prices are subject to change without notice.

Shipping and Postage
Shipping costs are based on a number of factors including weight, destination and type of service. All orders are subject to approximately 8%-10% shipping cost on total order. State and local taxes will be added where they apply.

Billing
Invoices are generated only after items have shipped. You may receive multiple invoices on one purchase order if items are backordered and/or not yet published. Drop shipments to other locations are accompanied by a packing slip. This is not an invoice and should not be paid. Only the “Bill to” account will be invoiced.

Returns Policy
If you are not entirely satisfied with any of our textbooks, you may return materials including paperback, loose-leaf and binder in saleable condition for a full refund, credit or replacement within 15 months of the original invoice date (12 months for high school accounts). All packages must be returned complete as sold. Individual modules are printed on demand.

Payment Terms
Net 30 days.

Individual Ordering Information
Orders from individuals are welcome but must be prepaid by credit card (VISA, MasterCard and Discover accepted), check or money order. Individual pricing is list price, not reflected in this catalog. Individual Ordering Department: 800-947-7700

Check out the online catalog at www.nccer.org/bookstore

NCCERconnect fosters learning within and beyond the classroom through a media rich eText and a course management system.

Learning no longer needs to take place between the front and back covers of the textbook. Students are online—on their smartphones, tablets and laptops—from the instant they roll out of bed until the minute they turn in each night. Every moment is an opportunity to connect, experience and learn.

**Highlights of this fully integrated learning program:**

- **Gradebook:** A robust gradebook allows you to see multiple views of your classes’ progress. Completely customizable and exportable, the gradebook can be adapted to meet your specific needs.
- **Multimedia Library:** Students and instructors can quickly search through resources and find supporting media.
- **Pearson eText:** Rich media options let students watch example videos as they read or do homework.
- **Course Management:** A full suite of course management features including email, document uploading, announcements, gradebook and instructor tools.

NCCERconnect is currently available with eText for the following crafts:

- Carpentry
- Construction Technology
- Core
- Electrical
- Electronic Systems Technician
- Fundamentals of Crew Leadership
- Heavy Equipment Operator
- HVAC
- Intro to Solar Photovoltaics
- Masonry
- Plumbing
- Welding

---

**Pearson Collections**

Select your ideal content, align it with your syllabus, then publish and share with your students.

**Search:** Collections, the Pearson custom library, includes all of our NCCER titles. You can freely mix and match between any craft areas.

**Create:** Select modules from any of our NCCER titles and add them to a customized book that meets your needs.

**Preview:** You can preview your Collection online at any time. Review the content and either make edits yourself or contact our team to help with the changes.

For more information on this service, visit www.nccer.org/collections.
The first two digits of the Module Identification Number indicate the “parent” or source craft of that module. All NCCER Craft Identifiers are listed below.

Alternative Energy: 74  
Boilermaking: 34  
Carpentry: 27  
Concrete Construction: 23  
Construction Craft Laborer: 35  
Construction Technology: 68  
Control Center Abnormal Operating Conditions: 71  
Core: 00  
Drywall: 45

Power Line Worker: Substation: 82  
Power Line Worker: Transmission: 81  
Plumbing: 02  
Project Management: 44  
Project Supervision: MT200  
Reinforcing Ironwork: 39  
Roofing: 16  
Rigging: 38  
Safety: 75  
Scaffolding: 31  
Sheet Metal: 04  
Signal Person: 53  
Site Layout: 78  
Solar Photovoltaic Installation: 57  
Sprinkler Fitting: 18  
Tower Crane: 48  
Weatherization: 59  
Welding: 29  
Wind Turbine Maintenance Technician: 58
Basic Safety (Construction Site Safety Orientation) (12.5 Hours) ISBN 978-0-13-748353-2 (Module ID 00101) Work at construction and industrial job sites can be hazardous. Most job-site incidents are caused by at-risk behavior, poor planning, lack of training, or failure to recognize the hazards. To help prevent incidents, every company must have a proactive safety program. Safety must be incorporated into all phases of the job and involve employees at every level, including management.

Introduction to Construction Math (10 Hours) ISBN 978-0-13-748343-3 (Module ID 00102) Craft professionals rely on math to do their jobs accurately and efficiently. Plumbers calculate pipe lengths, plan drain slopes, and interpret dimensioned plans. Carpenters meet code requirements by using math to frame walls and ceilings properly. HVAC professionals develop ductwork and calculate airflow with practical geometry. Whichever craft lies in your future, math will play a role in it. This module reviews the math that you will need and sharpens the skills that you will be using in the exciting modules ahead.

Introduction to Hand Tools (12.5 Hours) ISBN 978-0-13-748348-8 (Module ID 00103) Every profession has its tools. A surgeon uses a scalpel, an instructor uses a whiteboard, and an accountant uses a calculator. The construction crafts require a broad array of hand tools. Even if you are familiar with some of the tools, all craftworkers need to learn how to select, maintain, and use them safely. A quality hand tool may cost more up front, but if it is properly used and maintained, it will last for years. A true craft professional invests wisely in hand tools, and uses, maintains, and stores them with the same wisdom.

Introduction to Power Tools (10 Hours) ISBN 978-0-13-748348-8 (Module ID 00104) Power tools play an important role in the construction industry. Thousands of construction workers across the world use power tools every day to make holes, cut different types of materials, smooth rough surfaces, and shape a variety of products. Regardless of their specialization, all construction workers eventually use power tools on their job. This module provides an overview of the common types of power tools and how they function. It also describes the proper techniques required to ensure their safe and efficient operation.

Introduction to Construction Drawings (10 Hours) ISBN 978-0-13-748352-5 (Module ID 00105) Various types of construction drawings are used to represent actual components of a building project. The drawings provide specific information about the locations of the parts of a structure, the types of materials to be used, and the correct layout of the building. Knowing the purposes of the different types of drawings and interpreting the drawings correctly are important skills for anyone who works in the construction trades. This module introduces common types of construction drawings, their basic components, standard drawing elements, and measurement tools that are typically used when working with construction drawings.

Enhance your construction training with these supplemental Core companions. The following titles are excellent resources for your existing program. They can be used on a standalone basis or in combination with Core.

**Applied Construction Math**

_A Novel Approach_

**PAPERBACK**  

Published: 2006

- Division
- Decimals/Percentages
- Reading Measurements
- Calculating Area
- Powers of Ten
- Linear Measure, Angles, Volumes, Pressure, and Slopes
- Solving for Unknowns
- Square Inches, Feet, and Yards
- Volume

**Tools for Success**

**Critical Skills for the Construction Industry**

Revised: 2009, Third Edition

**PAPERBACK**  

- Division
- Decimals/Percentages
- Reading Measurements
- Calculating Area
- Powers of Ten
- Linear Measure, Angles, Volumes, Pressure, and Slopes
- Solving for Unknowns
- Square Inches, Feet, and Yards
- Volume

This workbook is designed for employees entering the construction industry and has been reviewed and updated with input from construction and training professionals. The Instructor’s Handbook includes an annotated instructor’s outline, recommended teaching schedules, answers to quizzes, and tips and ideas for enhancing class activities.

**Basic Safety**

**Construction Site Safety Orientation**

12.5 Hours  
Revised: 2021
Module ID 00101

**PAPERBACK**  

This module, from Core, replaces the Safety Orientation book. See the module description above for more information.

**Your Role in the Green Environment**

15 Hours  
Updated: 2019
Module ID 70101

**PAPERBACK**  
ISBN 978-0-13-670120-0

- Downloadable instructor resources are available.
Boilermaking

L1 BOILERMAKING

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Boilermaking (10 Hours)
(Module ID 34101-10) Provides an overview of the boilermaker craft, including a description of career opportunities.

Boilermaking Safety (12.5 Hours)
(Module ID 34102-10) Covers safety issues specific to boilermakers on the job.

Boilermaking Tools (15 Hours)
(Module ID 34103-10) Introduces the hand and power tools used by boilermakers, and the associated safety concerns.

Basic Materials (10 Hours)
(Module ID 34104-10) Identifies materials used in the construction of boilers, including material properties, standards and codes, and material markings.

Pipe Hangers and Supports (25 Hours)
(Module ID 34203-11) Identifies pipe hangers and supports and explains how to interpret pipe support drawings and symbols. Explains how to select, store, handle, install, and maintain spring can supports.

Drawings and Detail Sheets (15 Hours)
(Module ID 34204-11) Explains how to read drawings and their symbols. Covers plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, piping and instrumentation drawings, isometric drawings, spool sheets, detail sheets, and orthographic drawings.

Fasteners and Anchors (5 Hours)
(Module ID 34205-11) Covers threaded and non-threaded fasteners and anchoring devices. Explains how to select fasteners and anchors for given applications. Describes how to install threaded, non-threaded, and insulated fasteners and anchors.

Welding Symbols (5 Hours)
(Module ID 34206-11) Explains how to read symbols on welding drawings, specifications, and welding procedure specifications. Describes the symbols for fillet welds, groove welds, miscellaneous other welds, and non-destructive tests.

Oxyfuel Cutting (17.5 Hours)
(Module ID 34105-10) Describes the safety requirements associated with oxyfuel cutting. Describes straight line, bevel, piercing, and washing techniques.

Cutting and Fitting Gaskets (12.5 Hours)
ISBN 978-0-13-213699-0
(Module ID 34106-10) Describes gasket materials used in mating flanges and procedures for laying out and cutting a flange gasket.

Base Metal Preparation (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for cutting and welding.

Welding Basics (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.

Socket Weld Pipe Fabrication (25 Hours)
(Module ID 34207-11) Describes different types of socket weld piping materials and fittings and how to read socket weld piping drawings. Explains how to determine pipe lengths between socket weld fittings, as well as how to mate socket weld fittings to pipe.

Butt Weld Pipe Fabrication (40 Hours)
(Module ID 34208-11) Covers preparing pipe ends for butt welding; determining pipe lengths between butt weld fittings; and using welding jigs to align pipe and butt weld fittings for welding. Explains how to select and install backing rings.

Tube Weld Preparation and Fitting (15 Hours)
(Module ID 34209-11) Describes methods used to gain access to boiler tubes needing repair, and to prepare boiler tubes for replacement. Explains how to fit-up a section of boiler tube. Describes welding procedures for making butt welds on standard carbon steel tubes and composite tubes.

Air Carbon Arc Cutting and Gouging (12.5 Hours)
ISBN 978-0-13-257796-0
(Module ID 34210-11) Describes air carbon arc cutting (CAC-A) equipment and processes. Explains how to select and install CAC-A electrodes, and how to prepare the work area and CAC-A equipment for safe operation. Provides instructions for using CAC-A equipment for washing and gouging activities.

Trainee Guide: $74.99
978-0-13-213702-7

L2 BOILERMAKING

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Boiler Systems and Components (22.5 Hours)
(Module ID 34201-11) Introduces boiler configurations and applications. Identifies boiler components and explains their functions.

Identifying and Installing Valves (20 Hours)
(Module ID 34202-11) Identifies valves found in boiler systems. Describes valve components and explains their functions. Explains how to select, store, handle, and install valves, and describes valve markings and nameplate information.

Cutting and Fitting Gaskets (12.5 Hours)
ISBN 978-0-13-213699-0
(Module ID 34106-10) Describes gasket materials used in mating flanges and procedures for laying out and cutting a flange gasket.

Base Metal Preparation (10 Hours)
(Module ID 34107-10) Describes how to clean and prepare base metals for cutting and welding.

Welding Basics (22.5 Hours)
ISBN 978-0-13-213701-0
(Module ID 34108-10) Describes welding and cutting processes and related equipment. Includes filler metals, joint design, and the codes that govern welding practices.

**MODULES**

- **Revision:** 2011, Second Edition
- **Downloadable instructor resources are available.

**Advanced Boilermaking Construction Drawings (20 Hours)**

- **Module ID:** 34412
- **Description:** Covers symbols and abbreviations used on piping and instrumentation drawings and piping arrangement drawings. Explains how to read and interpret different types of construction drawings. Explains how to sketch an isometric drawing from a plan view drawing, and how to calculate line lengths from isometric drawings.

**Advanced Pipe Fabrication (50 Hours)**

- **Module ID:** 08402
- **Description:** Covers symbols and abbreviations used on piping and instrumentation drawings and piping arrangement drawings. Explains how to read and interpret different types of construction drawings. Explains how to sketch an isometric drawing from a plan view drawing, and how to calculate line lengths from isometric drawings.

---

**Modules**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Plasma Arc Cutting (7.5 Hours)

- **Module ID:** 29103-09
- **Description:** Describes types of plasma cutting and explains their functions. Also addresses hazards associated with BRIL.

### Boiler Pressure Components (25 Hours)

- **Module ID:** 34301-11
- **Description:** Describes the pressure components of a boiler and their locations. Explains the procedures required to repair pressure components of a boiler.

### Boiler Nonpressure Components (15 Hours)

- **Module ID:** 34302-11
- **Description:** Describes the nonpressure components of a boiler system and their locations. Explains the procedures required to repair nonpressure components of a boiler.

### Stress Relieving (10 Hours)

- **Module ID:** 34406-12
- **Description:** Covers metal distortion and ways to prevent it. Explains thermal growth in metals, and how to calculate thermal growth in given metals. Explains how misalignment creates stress in metals. Describes ways to relieve stress in piping that is experiencing distortion due to welding, thermal growth, or misalignment.

### Quality Assurance (10 Hours)

- **Module ID:** 34407-12
- **Description:** Covers codes governing welding and boilers. Describes weld imperfections and their causes. Identifies and explains different nondestructive and destructive testing methods. Explains how to make visual inspections of fill welding. Describes welder qualification testing, and stresses the importance of quality workmanship.

---

**Advanced Boilermaking Construction Drawings (20 Hours)**

- **Module ID:** 34412-11
- **Description:** Identifies different types of heat exchangers and their components. Describes methods used to test exchangers, and how to pull exchanger bundles. Explains how to replace a flange and a nozzle on an exchanger.

**Advanced Towers (25 Hours)**

- **Module ID:** 34412-11
- **Description:** Identifies different types of towers and exchangers and their components. Explains how to remove and replace different types of packing used in towers. Describes methods used to make field repairs to tower trays. Explains how to remove a tower distributor for maintenance.

**Fundamentals of Crew Leadership (20 Hours)**

- **Module ID:** 46101-11
- **Description:** Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Joists safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
## Orientation to Carpentry (2.5 Hours)
(Module ID 27101) Reviews the carpentry profession, describes the apprentice program, identifies career opportunities for carpenters, and lists the skills, responsibilities, and characteristics a carpenter should possess. Emphasizes the importance of site-specific safety and occupational safety relevant to the craft.

## Building Materials and Fasteners (20 Hours)
(Module ID 27102) Introduces building materials used in construction, including lumber, engineered wood products, concrete materials, steel framing, and a variety of fasteners and anchors. Also describes material handling and storage techniques, and basic calculations used to determine needed framing and concrete quantities.

## Construction Plans & Documents (20 Hours)
(Module ID 27113) Describes construction plans and documents used by carpenters, including drawings found in commercial and residential plans. Focuses on information included in civil, architectural, and structural drawings. Also covers the importance of specifications, and reviews building codes used by carpenters.

## Principles of Site and Building Layout (20 Hours)
(Module ID 27114) Explains how carpenters use specific construction drawings, as well as measuring tools and leveling instruments to perform basic site and building layout activities. Along with providing step-by-step instructions, this module describes the use of construction drawings and math to guarantee the accuracy of the building site.

## Floor Systems (25 Hours)
ISBN 978-0-13-787628-0
(Module ID 27105) Introduces carpenters to drawings used to construct flooring systems. Defines framing basics and the procedures for laying out and constructing a wood floor using common lumber, as well as engineered building materials. Covers the installation of floor components including sill plates, beams, girders, joists, and subfloors.

## Wall Systems (10 Hours)
(Module ID 27111) Describes basic wall systems and provides step-by-step instructions for laying out and framing both wood and steel components. Explains the process for laying out and framing walls. Includes instructions for assembling, erecting, and verifying plumb for wall systems.

## Roof Framing (47.5 Hours)
(Module ID 27112) Describes the most common roof types and introduces basic roof framing components. Includes instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers stick-built and truss-built roofs, and includes the basics of roof sheathing installation.

## Basic Stair Layout (12.5 Hours)
(Module ID 27110) Introduces stair types, basic stair system components, and common codes associated with stairway construction. Explains essential stairway construction techniques, including how to construct stringers, measure and calculate rise and run, and build concrete stairway forms.

## Building Envelope Systems (12.5 Hours)
(Module ID 27109) Introduces the concepts of moisture and insulation control from the ground up. Describes types of building wrap, windows, skylights and doors, while providing instructions for installation.

---

**Curriculum Notes**

- 247.5 Hours (includes Core)
- Revised: 2022, Sixth Edition
- Downloadable instructor resources are available.

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.
Advanced Carpentry

Roofing Applications  (35 hours)  
(Module ID 27202) Covers residential and commercial roofing materials and structures and describes the procedures for installing commercial roofing such as lap seam, standing seam, and built-up roofs.

Steel Framing Systems  (15 Hours)  
(Module ID 27205) Describes the types and grades of steel framing materials, and includes instructions for selecting and installing metal framing for interior and exterior walls, loadbearing and nonbearing walls, partitions, and other applications.

Thermal and Moisture Protection  (7.5 Hours)  
(Module ID 27203) Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for sound insulation, vapor barriers, and waterproofing materials.

Drywall Installation  (25 Hours)  
(Module ID 45104) Discusses types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Describes installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also covers fire- and sound-rated walls.

Interior Finish, Trim, and Cabinets  (30 Hours)  
(Module ID 27215) Describes the different types of trim used in finish work and focuses on the proper methods for selecting, cutting, and fastening trim to achieve a professional finished appearance. Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

Doors and Door Hardware  (25 Hours)  
(Module ID 27208) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

Suspended and Acoustical Ceilings  (15 Hours)  
ISBN 978-0-13-830247-4  
(Module ID 27209) Describes the materials, layout, and installation procedures for suspended ceilings used in commercial construction. Also covers ceiling tiles, drywall suspension systems, and pan-type ceilings.

Finished Stairs  (25 Hours)  
(Module ID 27405) Provides extensive coverage of the materials and techniques used in finishing wooden staircases. Also covers a variety of stair systems used in commercial construction.

Exterior Finish and Trim  (35 Hours)  
(Module ID 27204) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

Mass Timber Construction  (25 Hours)  
(Module ID 27214) Describes the various types of mass timber, including the tools and building techniques needed for mass timber projects. Provides an overview of the mass timber building process.

Introduction to Leadership  (22.5 Hours)  
(Module ID 40100) Introduces leadership skills and different leadership styles, as well as communication and problem solving techniques. Jobsite safety and safety leadership are also discussed. Introduces business topics that are important to understand for construction projects.

Modules
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

The Building Process  (5 Hours)  
(Module ID 27213) Provides an overview of the stages in the building process and the roles of people involved, as well as the codes and standards that apply to construction projects.

Site Preparation  (7.5 Hours)  
(Module ID 27409) Covers the planning process that precedes the start of work on a construction site, including environmental considerations, personnel issues, access roads, traffic control, permits, site safety, utilities, and crane-related concerns.

Wall Systems and Installation  (25 Hours)  
(Module ID 27404) Covers installation of a variety of finishing materials, including concrete masonry units and brick. Also covers installation of curtain walls, structural insulated panels, and fire-rated commercial construction.

Thermal and Moisture Protection  (7.5 Hours)  
(Module ID 27203) Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for sound insulation, vapor barriers, and waterproofing materials.

Drywall Installation  (25 Hours)  
(Module ID 45104) Discusses types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Describes installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also covers fire- and sound-rated walls.

Interior Finish, Trim, and Cabinets  (30 Hours)  
(Module ID 27215) Describes the different types of trim used in finish work and focuses on the proper methods for selecting, cutting, and fastening trim to achieve a professional finished appearance. Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

Doors and Door Hardware  (25 Hours)  
(Module ID 27208) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

Suspended and Acoustical Ceilings  (15 Hours)  
ISBN 978-0-13-830247-4  
(Module ID 27209) Describes the materials, layout, and installation procedures for suspended ceilings used in commercial construction. Also covers ceiling tiles, drywall suspension systems, and pan-type ceilings.

 Finished Stairs  (25 Hours)  
(Module ID 27405) Provides extensive coverage of the materials and techniques used in finishing wooden staircases. Also covers a variety of stair systems used in commercial construction.

Exterior Finish and Trim  (35 Hours)  
(Module ID 27204) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

Mass Timber Construction  (25 Hours)  
(Module ID 27214) Describes the various types of mass timber, including the tools and building techniques needed for mass timber projects. Provides an overview of the mass timber building process.

Introduction to Leadership  (22.5 Hours)  
(Module ID 40100) Introduces leadership skills and different leadership styles, as well as communication and problem solving techniques. Jobsite safety and safety leadership are also discussed. Introduces business topics that are important to understand for construction projects.
## Carpentry

### Modules

The modules listed below are all included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### Orientation to the Trade (2.5 Hours)
(Module ID 27101-13) Reviews the history of the trade, describes the apprentice program, identifies career opportunities for carpenters and construction workers, and lists the skills, responsibilities, and characteristics a worker should possess. Emphasizes the importance of safety in the construction industry.

#### Building Materials, Fasteners, and Adhesives (20 Hours)
(Module ID 27102-13) Introduces the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Also describes the fasteners and adhesives used in construction work. Discusses the methods of squaring a building.

#### Hand and Power Tools (70 Hours)
(Module ID 27103-13) Provides descriptions of hand tools and power tools used by carpenters. Emphasizes safe and proper operation, as well as care and maintenance.

#### Introduction to Construction Drawings, Specifications, and Layout (22.5 Hours)
(Module ID 27104-13) Covers the techniques for reading and using construction drawings and specifications, with an emphasis on drawings and information relevant to the carpentry trade. Introduces quantity takeoffs.

#### Cold-Formed Steel Framing (15 Hours)
(Module ID 27205-13) Describes the types and grades of steel framing materials, and includes instructions for selecting and installing metal framing for interior and exterior walls, loadbearing and nonbearing walls, partitions, and other applications.

#### Exterior Finishing (25 Hours)
(Module ID 27204-13) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

#### Electrical Systems (25 Hours)
(Module ID 27206-13) Describes如何 to properly prepare the roof deck and install roofing for residential and commercial buildings.

#### Doors and Door Hardware (20 Hours)
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

#### Exterior Insulation (20 Hours)
ISBN 978-0-13-377912-4
(Module ID 27207-13) Describes how to properly prepare the roof deck and install roofing for residential and commercial buildings.

#### Exterior Insulation (7.5 Hours)
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

#### Exterior Insulation (20 Hours)
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

#### Exterior Insulation (47.5 Hours)
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

#### Exterior Insulation (10 Hours)
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

#### Exterior Insulation (7.5 Hours)
ISBN 978-0-13-377918-0
(Module ID 27208-13) Describes the installation of metal doors and related hardware in steel-framed, wood-framed, and masonry walls, along with their related hardware, such as locksets and door closers. Also discusses the installation of wood doors, folding doors, and pocket doors.

#### Elective for Commercial Path (2.5 Hours)

#### Elective for Residential Path (20 Hours)

#### Elective for Commercial Path (47.5 Hours)

#### Elective for Residential Path (7.5 Hours)

### Curriculum Notes

- 237.5 Hours (includes Core)
- Revised: 2013, Fifth Edition
- Downloadable instructor resources are available...
- A Spanish translation of the fourth edition is available.

Please see NCCER’s online catalog for more information.
Carpentry Level 2 (continued)

Drywall Installation (15 Hours)
(Module ID 27206-13) Describes the various types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Contains detailed instructions for installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also discusses fire- and sound-rated walls.

Drywall Finishing (17.5 Hours)
ISBN 978-0-13-377913-4
(Module ID 27207-13) Describes the materials, tools, and methods used to finish and patch gypsum drywall. Also discussed automatic and manual taping and finishing tools.

Suspended Ceilings Elective for Residential Path
(15 Hours)
(Module ID 27209-13) Describes the materials, layout, and installation procedures for many types of suspended ceilings used in commercial construction, as well as ceiling tiles, drywall suspension systems, and pan-type ceilings.

Window, Door, Floor, and Ceiling Trim
(25 Hours)
(Module ID 27210-13) Describes the different types of trim used in finish work and focuses on the proper methods for selecting, cutting, and fastening trim to achieve a professional finished appearance.

Rigging Practices (15 Hours)
(Module ID 38102-11; from Basic Rigger, Second Edition) Describes basic rigging and crane hazards as well as safety practices related to general rigging activities, working around power lines, and emergency response. Covers procedures for using slings and rigging pipes and valves.

Trenching and Excavating (15 Hours)
(Module ID 27307-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Horizontal Formwork (15 Hours)
(Module ID 27309-14) Covers elevated decks and formwork systems and methods used in their construction. Covers joint, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27305-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Reinforcing Concrete (15 Hours)
(Module ID 27304-14) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Cabinet Installation (10 Hours)
(Module ID 27211-13) Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

Suspended Ceilings Elective for Residential Path
(15 Hours)
(Module ID 27209-13) Describes the materials, layout, and installation procedures for many types of suspended ceilings used in commercial construction, as well as ceiling tiles, drywall suspension systems, and pan-type ceilings.

Window, Door, Floor, and Ceiling Trim
(25 Hours)
(Module ID 27210-13) Describes the different types of trim used in finish work and focuses on the proper methods for selecting, cutting, and fastening trim to achieve a professional finished appearance.

Rigging Practices (15 Hours)
(Module ID 38102-11; from Basic Rigger, Second Edition) Describes basic rigging and crane hazards as well as safety practices related to general rigging activities, working around power lines, and emergency response. Covers procedures for using slings and rigging pipes and valves.

Trenching and Excavating (15 Hours)
(Module ID 27307-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Horizontal Formwork (15 Hours)
(Module ID 27309-14) Covers elevated decks and formwork systems and methods used in their construction. Covers joint, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27305-14) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Reinforcing Concrete (15 Hours)
(Module ID 27304-14) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Cabinet Installation (10 Hours)
(Module ID 27211-13) Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.
Carpentry Level 4

L4 CARPENTRY ADVANCED
LEVEL 4

Curriculum Notes
• 182.5 Hours (162.5 Required, 20 Elective)
• Revised 2014, Fifth Edition
• Downloadable instructor resources are available.

PAPERBACK ISBN
DIGITAL
NCCECconnect + Trainee Guide: $129.99 978-0-13-453969-0

MODULES
All of the modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Site Layout One: Differential Leveling (20 Hours)
(Module ID 27401-14) Covers the principles, equipment, and methods used to perform differential leveling. Also covers the layout responsibilities of surveyors, field engineers, and carpenters; interpretation and use of site/plot plan drawings; use of laser instruments; and methods used for on-site communication.

Site Layout Two: Angular and Distance Measurement (37.5 Hours)
(Module ID 27402-14) Covers the principles, equipment, and methods used to perform site layout tasks that require angular and distance measurements. Tasks include laying out building lines and determining elevations by trigonometric leveling. Covers the use of transits, theodolites, electronic distance measurement, and total stations. Reviews trade mathematics needed to perform calculations related to angular measurements.

Advanced Roof Systems (20 Hours)
(Module ID 27403-14) Covers commercial roofing materials and structures and describes the procedures for installing commercial roofing such as lap seam, standing seam, and built-up roofs.

Advanced Wall Systems (25 Hours)
(Module ID 27404-14) Covers installation of a variety of finishing materials, including concrete masonry units and brick. Also covers installation of curtain walls and fire-rated commercial construction.

Advanced Stair Systems (25 Hours)
(Module ID 27405-14) Provides extensive coverage of the materials and techniques used in finishing wooden staircases. Also covers a variety of stair systems used in commercial construction.

Introduction to Construction Equipment (7.5 Hours)
(Module ID 27406-14) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactor, and forklift. An overview of general safety, operation, and maintenance procedures is provided.

Introduction to Oxyfuel Cutting and Arc Welding (20 Elective Hours)
(Module ID 27407-14) Introduces the equipment, procedures, and safety practices used in cutting steel with oxyfuel equipment, as well as shielded metal arc welding, gas-tungsten arc welding, and gas metal arc welding. Labs include practice in cutting and welding techniques.

Site Preparation (7.5 Hours)
(Module ID 27409-14) Covers the planning process that precedes the start of work on a construction site, including environmental considerations, personnel issues, access roads, traffic control, permits, site safety, utilities, and crane-related concerns.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Cabinetmaking

35 Hours
Revised: 2015, Third Edition
Module ID 27501-15

PAPERBACK ISBN
DIGITAL
NCCECconnect Access Card: $24.99 9780135215562

This module expands on the knowledge and skills gained through the Carpentry Curriculum and provides the basic information needed to construct and apply finishes to custom cabinetry. It identifies and discusses various types of wood products, wood-joining techniques, power tools, cabinet doors, shelves, and hardware. Specific guidance is also provided for the installation of laminated countertops.
Concrete Construction

ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Concrete Construction (10 Hours)
(Module ID 23101) Introduces the role of concrete in construction and identifies basic concrete properties and characteristics. Provides an overview of the concrete construction process, identifies opportunities available to concrete craftworkers, and describes the purpose and structure of apprenticeship programs.

Concrete Safety (7.5 Hours)
(Module ID 23102) Describes the role of OSHA in the workplace and presents safety hazards unique to the concrete construction environment, including the control of silica dust. Identifies and describes the PPE concrete craftworkers commonly require.

Fall Protection Orientation (8 Hours)
(Module ID 75901; from Fall Protection Orientation) Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Concrete Tools and Equipment (12.5 Hours)
(Module ID 23104) Introduces trainees to a wide variety of both hand tools and powered equipment used in concrete construction, including scoops, floats, trowels, saws, grinders, and mixing equipment. Tips for the safe use of tools and equipment are also provided.

Preparing for Placement (15 Hours)
(Module ID 23105) Provides an overview of common concrete-construction tasks that take place before placement begins. Covers elevations and subgrade preparation, as well as basic form types, joints, and pre-placement inspections.

Reinforcing Concrete (15 Hours)
(Module ID 23104; from Carpenter Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Conducting Placement (15 Hours)
(Module ID 23106; from Carpenter Level Three) Describes how to place concrete. Includes coverage of calibrating and spaying concrete, positioning forms, and removing loose material.

Curing and Protecting Concrete (15 Hours)
(Module ID 23107; from Carpenter Level Three) Describes the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Concrete Construction (15 Hours)
(Module ID 23108) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Industrial Floors (17.5 Hours)
(Module ID 23109) Describes the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 23108; from Carpenter Level Three) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Concrete Construction (15 Hours)
(Module ID 23110; from Carpenter Level Three) Describes the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Architectural Finishes (22.5 Hours)
ISBN 978-0-13-686807-0
(Module ID 23111) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Curing and Protecting Concrete (15 Hours)
(Module ID 23107; from Carpenter Level Three) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Concrete Construction (15 Hours)
(Module ID 23108) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Concrete Construction (15 Hours)
(Module ID 23109) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Concrete Construction (15 Hours)
(Module ID 23110; from Carpenter Level Three) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Concrete Construction (15 Hours)
ISBN 978-0-13-686807-0
(Module ID 23111) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Concrete Construction (15 Hours)
ISBN 978-0-13-686806-4
(Module ID 23112) Describes the construction of various placements that are common to building construction projects, including curbs and gutters, stairways and steps, walks, driveways, and patios.

Continued on following page
Superflat Floors (20 Hours)
(Module ID 23207) Describes random-traffic and defined-traffic superflat floors and the flat and level characteristics that set them apart from other slabs. Provides insight into the finishing process and describes how various floor-measurement instruments are used to document the results.

Surface Treatments (15 Hours)
(Module ID 23208) Provides detailed coverage of the many methods used to prepare a concrete surface to meet a specific surface profile, from detergent scrubbing to rotomilling. Also identifies and describes how to apply shakes, protective sealants and coatings, and self-leveling toppings and underlayments.

Troubleshooting and Quality Control (15 Hours)
(Module ID 23211) Defines quality control and discusses fresh-concrete troubleshooting and problem resolution. Provides detailed coverage of concrete field tests and specimen preparation according to ASTM standards.

Concrete Repair (20 Hours)
(Module ID 23210) Provides an overview of the concrete repair process, focusing on repairing concrete with concrete. Explains how hidden concrete faults and embedments are located and how to properly prepare reinforced concrete for placement of the repair material. Coverage of pre-placement and post-placements inspections is also provided.
Orientation to the Trade (2.5 Hours)
(Module ID 27101-13; from Carpentry Level One) Reviews the history of the trade, describes the apprentice program, identifies career opportunities for carpenters and construction workers, and lists the skills, responsibilities, and characteristics a worker should possess. Emphasizes the importance of safety in the construction industry.

Building Materials, Fasteners, and Adhesives (20 Hours)
(Module ID 27102-13; from Carpentry Level One) Introduces the building materials used in construction work, including lumber, sheet materials, engineered wood products, structural concrete, and structural steel. Also describes the fasteners and adhesives used in construction work. Discusses the methods of squaring a building.

Properties of Concrete (10 Hours)
(Module ID 27303-14; from Carpentry Level Three) Describes the properties, characteristics, and uses of cement, aggregates, and other materials used in different types of concrete. Covers procedures for estimating concrete volume and testing freshly mixed concrete, as well as methods and materials for curing concrete.

Site Layout One: Differential Leveling (20 Hours)
(Module ID 27401-14; from Carpentry Level Four) Covers the principles, equipment, and methods used to perform differential leveling. Also covers the layout responsibilities of surveyors, field engineers, and carpenters; interpretation and use of site/plot plan drawings; use of laser instruments; and methods used for on-site communication.

Handling and Placing Concrete (20 Hours)
(Module ID 27305-14; from Carpentry Level Three) Covers tools, equipment, and procedures for safely handling, placing, and finishing concrete. Describes joints made in concrete structures and the use of joint sealants.

Foundations and Slabs-On-Grade (20 Hours)
(Module ID 27307-14; from Carpentry Level Three) Covers basic site layout safety, tools, and methods; layout and construction of deep and shallow foundations; types of foundation forms; layout and formation of slabs-on-grade; and forms used for curbing and paving.

Curriculum Notes

## Modules

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Reinfocing Concrete (15 Hours)
(Module ID 27304-14; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

### Vertical Formwork (22.5 Hours)
(Module ID 27308-14; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

### Horizontal Formwork (15 Hours)
(Module ID 27309-14; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoring and reshoring systems.

### Heavy Equipment, Forklift, and Crane Safety (5 Hours)
ISBN 978-0-13-340364-0
(Module ID 75110-13; from Field Safety) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

### Steel Erection (2.5 Hours)
(Module ID 75121-13; from Field Safety) Describes common safety precautions related to steel-erection work, including controlled decking zones, hazardous materials and equipment precautions, tool safety, and appropriate personal protective equipment.

### Electrical Safety (5 Hours)
(Module ID 75122-13; from Field Safety) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

### Oxyfuel Cutting (17.5 Hours)
(Module ID 29102-15; from Welding Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

### Elevated Masonry (15 Hours)
(Module ID 28301-14; from Masonry Level Three) Describes how to work safely and efficiently on elevated structures. Explains how to maintain a safe work environment, secure protection from falls, how to brace walls from outside forces, and how to identify common types of elevated walls. Stress safety around equipment such as cranes and hoists.

### Working from Elevations (5 Hours)
(Module ID 75122-13; from Field Safety) Explains the use of fall-protection equipment. Covers safety precautions related to elevated work surfaces, including ladders, scaffolding, and aerial lifts.

### Your Role in the Green Environment (LEED V4) (15 Hours)
ISBN 978-0-13-294863-0
(Module ID 70101-15) Geared to entry-level craft workers, Your Role in the Green Environment provides pertinent information concerning the green environment, construction practices, and building rating systems. This edition has been updated to reflect LEED v4 with emphasis on standards for building design and construction. The updated content features contemporary issues such as net zero buildings and an expanded focus on issues relevant to international construction.
### Ceiling Joist and Roof Framing (40 Hours)

**ISBN 978-0-13-340305-3**

(Module ID 27112-13; from Carpentry Level One) Describes types of roofs and provides instructions for laying out rafters for gable roofs, hip roofs, and valley intersections. Covers stick-built and truss-built roofs. Includes the basics of roof sheathing installation.

### Roofing Applications (25 Hours)

**ISBN 978-0-13-377902-8**

(Module ID 27202-13; from Carpentry Level Two) Describes how to properly prepare the roof deck and install roofing for residential and commercial buildings.

### Wall Systems (20 Hours)

**ISBN 978-0-13-340304-6**

(Module ID 27111-13; from Carpentry Level One) Describes procedures for laying out and framing walls, including roughing-in door and window openings, constructing corners, partition Ts, and bracing walls. Includes the procedure to estimate the materials required to frame walls.

### Exterior Finishing (35 Hours)

**ISBN 978-0-13-377909-7**

(Module ID 27204-13; from Carpentry Level Two) Covers the various types of exterior finish materials and their installation procedures, including wood, metal, vinyl, and fiber-cement siding.

### Basic Stair Layout (12.5 Hours)

**ISBN 978-0-13-340306-0**

(Module ID 27110-13; from Carpentry Level One) Introduces types of stairs and common building code requirements related to stairs. Focuses on techniques for measuring and calculating rise, run, and stairwell openings, laying out stringers, and fabricating basic stairways.

### Electrical Safety (10 Hours)

**ISBN 978-0-13-378785-7**

(Module ID 26102-14; from Electrical Level One) Covers safety rules and regulations for electricians, including precautions for electrical hazards found on the job. Also covers the OSHA-mandated lockout/tagout procedure.

### Residential Electrical Services (15 Hours)

(Module ID 26111-14; from Electrical Level One) Covers the electrical devices and wiring techniques common to residential construction and maintenance. Allows trainees to practice making service calculations. Stresses the applicable NEC® requirements.

### Introduction to HVAC (7.5 Hours)

(Module ID 03101-13; from HVAC Level One) Covers basic principles of heating, ventilating, and air conditioning. Covers the basic principles of heating, ventilating, and air conditioning. Includes the architectural and mechanical installation applications of HVAC, and how apprenticeship programs are constructed. Basic safety principles, as well as trade license and EPA guidelines, are also introduced.

### Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)

**ISBN 978-0-13-292331-6**

(Module ID 02111-12; from Plumbing Level One) Explains how DWV systems remove waste safely and effectively. Discusses how system components, such as pipe, drains, traps, and vents work. Reviews drain and vent sizing, grade, and waste treatment. Describes how building sewers and sewer drains connect the DWV system to the public sewer system.

### Plastic Pipe and Fittings (12.5 Hours)

(Module ID 02106-12; from Plumbing Level One) Introduces different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to the manufacturer’s instructions and applicable codes. Discusses pressure testing of plastic pipe once installed.

### Copper Pipe and Fittings (12.5 Hours)

(Module ID 02107-12; from Plumbing Level One) Discusses sizing, labeling, and applications of copper pipe and fittings, and reviews the types of valves that can be used on copper pipe systems. Explains proper methods for cutting, joining, and installing copper pipe. Addresses insulation, pressure testing, seismic codes, and handling and storage requirements.

### Cabinetmaking (35 Hours)

**ISBN 978-0-13-428854-3**

(Module ID 27501-15) This module expands on the knowledge and skills gained through the Carpentry Curriculum and provides the basic information needed to construct and apply finishes to custom cabinetry. It identifies and discusses various types of wood products, wood-joining techniques, power tools, cabinet doors, shelves, and hardware. Specific guidance is also provided for the installation of laminated countertops.

### Cabinet Installation (10 Hours)

(Module ID 27211-13; from Carpentry Level Two) Provides detailed instructions for the selection and installation of base and wall cabinets and countertops.

### Introduction to Construction Equipment (7.5 Hours)

**ISBN 978-0-13-378706-1**

(Module ID 27406-14; from Carpentry Level Four) Introduces construction equipment, including the aerial lift, skid steer loader, electric power generator, compressor, compactors, and fork lift. An overview of general safety, operation, and maintenance procedures is provided.
# Drywall Curriculum Notes

## MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Introduction to Drywall (5 Hours)

- ISBN 978-0-13-817535-1 (Module ID 45101) Reviews the history of the craft and provides modern examples of drywall work, including descriptions of the training process and career opportunities in the wall and ceiling industry. Also identifies the responsibilities and characteristics a drywall technician should possess, as well as safety precautions associated with the industry.

### Construction Materials and Methods (12 Hours)

- ISBN 978-0-13-817535-1 (Module ID 45102) Provides an overview of the materials and techniques used in building and finishing walls and ceilings in residential and commercial buildings, including wood- and steel-framed structures, masonry construction, and concrete-formed structures. Also explains fire- and sound-rated construction.

### Thermal and Moisture Protection (7.5 Hours)

- ISBN 978-0-13-817535-1 (Module ID 45103) Covers the selection and installation of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for ventilation and vapor retarders, water-resistant barriers, and air infiltration control.

### Drywall Installation (25 Hours)

- ISBN 978-0-13-817535-1 (Module ID 45104) Discusses the uses for different types of gypsum board and the fastening devices, adhesives, and methods used to install them. Describes single- and multi-ply installations along with drywall trim. Also covers guidelines for moisture control and fire- and sound-rated walls.

### Drywall Finishing (25 Hours)

- ISBN 978-0-13-817535-1 (Module ID 45105) Covers the materials, tools, and methods used to achieve the various drywall finishing levels. Also describes the process for repairing finished joints, problems with compound, fastener-related damage, and common problems with gypsum drywall sheets.

MODULOS

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (5 Hours)
(Module ID 45101-07) Reviews the history of the trade, shows examples of the work involved, describes the apprentice program, identifies career opportunities for construction workers, and lists the responsibilities and characteristics a worker should possess.

Construction Materials and Methods (12 Hours)
(Module ID 45102-07) Provides an overview of the materials and techniques used in building and finishing residential and commercial buildings, including wood- and steel-framed structures, masonry construction, and concrete-formed structures.

Thermal and Moisture Protection (7.5 Hours)
(Module ID 45103-07) Covers the selection and installation of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

Drywall Installation (25 Hours)
(Module ID 45104-07) Discusses types of gypsum drywall, their uses, and the fastening devices and methods used to install them. Describes installing drywall on walls and ceilings using nails, drywall screws, and adhesives. Also covers fire- and sound-rated walls.

Drywall Finishing (25 Hours)
ISBN 978-0-13-604848-0
(Module ID 45105-07) Covers the materials, tools, and methods used to finish and patch gypsum drywall, including automatic and manual taping tools.

Acoustical Ceilings (20 Hours)
(Module ID 45203-09) Describes the materials, layout, and installation procedures for suspended ceilings used in commercial construction. Also covers ceiling tiles, drywall suspension systems, and pan-type ceilings.

Exterior Cladding (20 hours)
(Module ID 45205-09) Covers a variety of specialized exterior finish products, including EIFS, stucco, synthetic veneer stone, panelized cladding, and glass fiber-reinforced concrete (GFRC) panels.

Specialty Finishes (15 Hours)
(Module ID 45206-09) Covers the materials, tools, and application methods used for specialized interior finishes, such as sand, marble, clay, and Venetian plaster.

Commercial Drawings (25 Hours)
(Module ID 45201-09) Focuses on techniques for reading and using architectural and structural drawings and specifications.

Steel Framing (50 Hours)
(Module ID 45202-09) Describes the types and grades of steel framing and provides instructions for selecting and installing steel framing for interior walls, exterior nonbearing walls, and partitions. Also covers engineered framing systems.

Interior Specialties (15 Hours)
(Module ID 45204-09) Covers the composition and use of specialty interior finishing products, such as vinyl- and fabric-covered panels, wood wall and ceiling panels, and glass fiber-reinforced gypsum (GFRG) panels.

Acoustical Ceilings (20 Hours)
(Module ID 45203-09) Describes the materials, layout, and installation procedures for suspended ceilings used in commercial construction. Also covers ceiling tiles, drywall suspension systems, and pan-type ceilings.

Exterior Cladding (20 hours)
(Module ID 45205-09) Covers a variety of specialized exterior finish products, including EIFS, stucco, synthetic veneer stone, panelized cladding, and glass fiber-reinforced concrete (GFRC) panels.

Specialty Finishes (15 Hours)
(Module ID 45206-09) Covers the materials, tools, and application methods used for specialized interior finishes, such as sand, marble, clay, and Venetian plaster.
## Electrical

### L1 ELECTRICAL LEVEL 1

**Curriculum Notes**
- 190 Hours (includes Core)
- Downloadable instructor resources are available.
- A Spanish translation of the 2008 NEC® version is available. Please see NCCER’s online catalog for more information.

Electrical Level 2 (continued)

Grounding and Bonding (15 Hours)
(Module ID 26209-23) Explains the grounding and bonding requirements of NEC Article 250. Covers how to size the main and system bonding jumpers and the grounding electrode conductor for various AC systems.

Circuit Breakers and Fuses (12.5 Hours)
ISBN 978-0-13-825299-1
(Module ID 26210-23) Describes the operating principles of circuit breakers and fuses, and explains how to select and install overcurrent devices.

Conductor Selection and Calculations (15 Hours)
(Module ID 26302-23) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.

Practical Applications of Lighting (12.5 Hours)
(Module ID 26303-20) Describes various luminaires and the types of luminaires suited for various applications. Covers dimming, lighting controls, and energy management systems.

Hazardous Locations (15 Hours)
(Module ID 26304-23) Presents the NEC® requirements for equipment installed in hazardous locations.

Overcurrent Protection (25 Hours)
(Module ID 26305-23) Explains how to size and select circuit breakers and fuses for various applications. Covers short circuit calculations and troubleshooting.

Distribution Equipment (12.5 Hours)
(Module ID 26306-23) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. Covers ground fault relay testing.

Transformers (12.5 Hours)
(Module ID 26307-23) Describes the construction, operation, and applications of various transformers. Covers transformer connections and grounding requirements.

Commercial Electrical Services (10 Hours)
(Module ID 26308-23) Covers the components, installation considerations, and NEC® requirements for commercial services.

Motor Calculations (12.5 Hours)
(Module ID 26309-23) Covers the calculations required to size the conductors and overcurrent protection required for motor applications.

Voice, Data, & Video (10 Hours)
(Module ID 26310-23) Covers the installation, termination, and testing of these systems.

Motor Controls (12.5 Hours)
(Module ID 26311-23) Provides information on selecting, sizing, and installing motor controllers, as well as control circuit pilot devices and basic relay logic.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Load Calculations — Branch and Feeder Circuits (175 Hours)**
(Module ID 26301-23) Explains how to calculate branch circuit and feeder loads for residential and commercial applications. Covers various derating factors.

**Conductor Selection and Calculations (15 Hours)**
(Module ID 26302-23) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.

**Practical Applications of Lighting (12.5 Hours)**
(Module ID 26303-20) Describes various luminaires and the types of luminaires suited for various applications. Covers dimming, lighting controls, and energy management systems.

**Hazardous Locations (15 Hours)**
(Module ID 26304-23) Presents the NEC® requirements for equipment installed in hazardous locations.

**Overcurrent Protection (25 Hours)**
(Module ID 26305-23) Explains how to size and select circuit breakers and fuses for various applications. Covers short circuit calculations and troubleshooting.

**Distribution Equipment (12.5 Hours)**
(Module ID 26306-23) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. Covers ground fault relay testing.

**Transformers (12.5 Hours)**
(Module ID 26307-23) Describes the construction, operation, and applications of various transformers. Covers transformer connections and grounding requirements.

**Commercial Electrical Services (10 Hours)**
(Module ID 26308-23) Covers the components, installation considerations, and NEC® requirements for commercial services.

**Motor Calculations (12.5 Hours)**
(Module ID 26309-23) Covers the calculations required to size the conductors and overcurrent protection required for motor applications.

**Voice, Data, & Video (10 Hours)**
(Module ID 26310-23) Covers the installation, termination, and testing of these systems.

**Motor Controls (12.5 Hours)**
(Module ID 26311-23) Provides information on selecting, sizing, and installing motor controllers, as well as control circuit pilot devices and basic relay logic.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Load Calculations — Feeder & Services (20 Hours)**
(Module ID 26401-23) Covers basic calculations for commercial and residential applications, including raceway fill, conductor derating, and voltage drop.

**Health Care Facilities (10 Hours)**
(Module ID 26402-23) Covers the installation, alarm system, and backup system requirements of electrical systems in health care facilities, including the requirements for life safety and critical circuits.

**Standby and Emergency Systems (10 Hours)**
(Module ID 26403-23) Explains the NEC® installation requirements for electric generators and storage batteries used during such emergency situations.

**Basic Electronic Theory (10 Hours)**
(Module ID 26404-23) Explains the function and operation of basic electronic devices, including semiconductors, diodes, rectifiers, and transistors.

**Fire Alarm Systems (15 Hours)**
ISBN 978-0-13-828917-1
(Module ID 26405-23) Explains the technologies, codes, and wiring approaches used to assemble a fire alarm system. Examines installation and troubleshooting techniques.

**Specialty Transformers (10 Hours)**
(Module ID 26406-23) Covers various types of transformers, and provides information on selecting, sizing, and installing them.

Continued on following page
Managing Electrical Hazards

- A copy of NFPA 70E®, Standard for Electrical Safety in the Workplace, 2024 Edition, is required material for this course. To order, contact NFPA at www.nfpa.org or 1-800-344-3555.

Describes how to assess and eliminate shock, arc blast, and arc flash hazards using the practical safety working requirements detailed in NFPA 70E: Standard for Electrical Safety in the Workplace®. Where it is not possible to eliminate a hazard, an energized electrical work permit must be completed, and workers must be protected by appropriate safety procedures and personal protective equipment.

Advanced Controls (20 Hours)
(Module ID 26407-23) Discusses applications and operating principles of various control system components, such as solid-state relays, reduced-voltage starters, and adjustable-frequency drives. Covers basic troubleshooting procedures.

HVAC Controls (15 Hours)
(Module ID 26408-23) Provides a basic overview of HVAC systems and their controls. Also covers electrical troubleshooting and NEC® requirements.

Heat Tracing and Freeze Protection (10 Hours)
(Module ID 26409-23) Presents heat-tracing and freeze-protection systems along with various applications and installation requirements.

Motor Operation and Maintenance (10 Hours)
(Module ID 26410-23) Covers motor care procedures, including cleaning, testing, and preventive maintenance. Describes basic troubleshooting procedures.

Medium-Voltage Terminations/Splices (10 Hours)
(Module ID 26411-23) Identifies types of medium-voltage cable and describes how to make various splices and terminations. Covers hi-pot testing.

Special Locations (20 Hours)
(Module ID 26412-23) Describes the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

Introduction to Leadership (22.5 Hours)
(Module ID 46100) (Lockdown) Introduces leadership skills and different leadership styles, as well as communication and problem solving techniques. Jobsite safety and safety leadership are also discussed. Introduces business topics that are important to understand for construction projects.
LEVEL 1

Now Available! Journeyman Electrician Exam Prep — NCCER is releasing online practices exams through NCCER’s learning platform to prepare trainees for taking the electrical licensing exam. The practice exams will consist of 300 questions based on the trainee’s choice of either 2020 or 2017 NEC®. Learn more at www.nccer.org/electrician-prep.

Safety For Electricians (10 Hours)
(Module ID 26102-20) Discusses hazards and describes the various types of personal protective equipment (PPE) used to reduce injuries. Covers the standards related to electrical safety and the OSHA-mandated lockout/tagout rule.

Introduction to Electrical Circuits (7.5 Hours)
(Module ID 26103-20) Introduces electrical concepts used in Ohm’s law and how the power equation can be used to determine unknown values. Covers basic atomic theory and electrical theory, electrical schematic diagrams, and electric power equations.

Electrical Theory (7.5 Hours)
(Module ID 26105-20) Introduces basic circuits, as well as the methods for calculating the electrical energy within them. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Introduction to the National Electrical Code (7.5 Hours)
(Module ID 26105-20) Introduces the NEC® and explains how to use it to find the installation requirements. Provides an overview of the National Electrical Manufacturers Association and Nationally Recognized Testing Laboratories.

Device Boxes (10 Hours)
(Module ID 26106-20) Provides an overview of the electrical craft and discusses the career paths available to electricians, including apprenticeship requirements.

Hand Bending (10 Hours)

Conduit Bending (15 Hours)
(Module ID 26204-20) Discusses how to make conduit bends using mechanical, hydraulic, and electric benders.

Pull and Junction Boxes (12.5 Hours)
(Module ID 26205-20) Explains how to size and install pull and junction boxes. Identifies various specialty enclosures, including conduit bodies, FS and FD boxes, and handholes.

Conductor Installations (10 Hours)
ISBN 978-0-13-689717-0
(Module ID 26206-20) Describes how to prepare conduit for conductors. Explains how to set up and complete a cable-pulling operation.

Conductors and Cables (10 Hours)
(Module ID 26109-20) Discusses conductor types, cable markings, color codes, and ampacity derating. Describes how to install conductors using fish tape and power conduit fishing systems.

Basic Electrical Construction Documents (7.5 Hours)
(Module ID 26110-20) Describes how to interpret electrical drawings, including the use of architect’s and engineer’s scales.

Residential Wiring (15 Hours)
(Module ID 26111-20) Covers basic load calculations and NEC® requirements for residential electrical systems. Describes how to lay out branch circuits, install wiring, size outlet boxes, and install wiring devices.

Electrical Test Equipment (5 Hours)
(Module ID 26112-20) Covers the applications of various types of electrical test equipment. Describes meter safety precautions and category ratings.

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

MODULES

Occupational Overview: The Electrical Industry (2.5 Hours)
(Module ID 26101-20) Provides an overview of the electrical craft and discusses the career paths available to electricians, including apprenticeship requirements.

Conductors and Cables (10 Hours)
(Module ID 26109-20) Discusses conductor types, cable markings, color codes, and ampacity derating. Describes how to install conductors using fish tape and power conduit fishing systems.

Basic Electrical Construction Documents (7.5 Hours)
(Module ID 26110-20) Describes how to interpret electrical drawings, including the use of architect’s and engineer’s scales.

Residential Wiring (15 Hours)
(Module ID 26111-20) Covers basic load calculations and NEC® requirements for residential electrical systems. Describes how to lay out branch circuits, install wiring, size outlet boxes, and install wiring devices.

Electrical Test Equipment (5 Hours)
(Module ID 26112-20) Covers the applications of various types of electrical test equipment. Describes meter safety precautions and category ratings.

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

MODULES

Alternating Current (17.5 Hours)
(Module ID 26201-20) Describes AC circuits and explains how to apply Ohm’s law to solve for unknown circuit values.

Motors: Theory and Application (20 Hours)
(Module ID 26202-20) Covers AC and DC motors, including the main components, circuits, and connections.

Electric Lighting (15 Hours)
(Module ID 26203-20) Introduces the principles of human vision and the characteristics of light. Covers different types of light sources and the operating characteristics and installation requirements of various lighting fixtures.

Continued on following page
Electrical Level 2 (continued)

Cable Tray (7.5 Hours)
(Module ID 26207-20) Discusses various types of cable tray, supports, and associated fittings. Explains how to determine the loads on a cable tray and calculate fill per NEC® requirements.

Conductor Terminations and Splices (7.5 Hours)
(Module ID 26208-20) Explains how to prepare cable ends for terminations and splices. Describes how to train cable at termination points and describes crimping techniques.

Grounding and Bonding (15 Hours)
ISBN 978-0-13-689735-4
(Module ID 26209-20) Explains the grounding and bonding requirements of NEC Article 250. Covers how to size the main and system bonding jumpers and the grounding electrode conductor for various AC systems.

Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26210-20) Describes the operating principles of circuit breakers and fuses, and explains how to select and install overcurrent devices.

Control Systems and Fundamental Concepts
(12.5 Hours)
ISBN 978-0-13-689762-0
(Module ID 26211-20) Describes the operating principles of contactors and relays, including both mechanical and solid-state devices. Explains how to select and install relays and troubleshoot control circuits.

Conductor Selection and Calculations (15 Hours)
(Module ID 26302-20) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.

Practical Applications of Lighting (12.5 Hours)
(Module ID 26303-20) Discusses various luminaries and the types of luminaries suited for various applications. Covers dimming, lighting controls, and energy management systems.

Hazardous Locations (15 Hours)
(Module ID 26304-20) Presents the NEC® requirements for equipment installed in hazardous locations.

Overcurrent Protection (25 Hours)
(Module ID 26305-20) Explains how to size and select circuit breakers and fuses for various applications. Covers short circuit calculations and troubleshooting.

Distribution Equipment (12.5 Hours)
(Module ID 26306-20) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. Covers ground fault relay testing.

Transformers (12.5 Hours)
(Module ID 26307-20) Describes the construction, operation, and applications of various transformers. Covers transformer connections and grounding requirements.

Commercial Electrical Services (10 Hours)
(Module ID 26308-20) Covers the components, installation considerations, and NEC® requirements for commercial services.

Motor Calculations (12.5 Hours)
(Module ID 26309-20) Covers the calculations required to size the conductors and overcurrent protection required for motor applications.

Voice, Data, & Video (10 Hours)
(Module ID 26310-20) Covers the installation, termination, and testing of these systems.

Motor Controls (12.5 Hours)
(Module ID 26311-20) Provides information on selecting, sizing, and installing motor controllers, as well as control circuit pilot devices and basic relay logic.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Load Calculations — Branch and Feeder Circuits (17.5 Hours)
(Module ID 26301-20) Explains how to calculate branch circuit and feeder loads for residential and commercial applications. Covers various derating factors.

Conductor Calculation and Calculations (15 Hours)
(Module ID 26302-20) Explains how to make conductor calculations. Covers other factors involved in conductor selection, including insulation types, current-carrying capacity, temperature ratings, and voltage drop.

Practical Applications of Lighting (12.5 Hours)
(Module ID 26303-20) Discusses various luminaries and the types of luminaries suited for various applications. Covers dimming, lighting controls, and energy management systems.

Hazardous Locations (15 Hours)
(Module ID 26304-20) Presents the NEC® requirements for equipment installed in hazardous locations.

Overcurrent Protection (25 Hours)
(Module ID 26305-20) Explains how to size and select circuit breakers and fuses for various applications. Covers short circuit calculations and troubleshooting.

Distribution Equipment (12.5 Hours)
(Module ID 26306-20) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. Covers ground fault relay testing.

Transformers (12.5 Hours)
(Module ID 26307-20) Describes the construction, operation, and applications of various transformers. Covers transformer connections and grounding requirements.

Commercial Electrical Services (10 Hours)
(Module ID 26308-20) Covers the components, installation considerations, and NEC® requirements for commercial services.

Motor Calculations (12.5 Hours)
(Module ID 26309-20) Covers the calculations required to size the conductors and overcurrent protection required for motor applications.

Voice, Data, & Video (10 Hours)
(Module ID 26310-20) Covers the installation, termination, and testing of these systems.

Motor Controls (12.5 Hours)
(Module ID 26311-20) Provides information on selecting, sizing, and installing motor controllers, as well as control circuit pilot devices and basic relay logic.

Basic Electronic Theory (10 Hours)
(Module ID 26404-20) Explains the function and operation of basic electronic devices, including semiconductors, diodes, rectifiers, and transistors.

Fire Alarm Systems (15 Hours)
(Module ID 26405-20) Explains the technologies, codes, and wiring approaches used to assemble a fire alarm system. Examines installation and troubleshooting techniques.

Specialty Transformers (10 Hours)
(Module ID 26406-20) Covers various types of transformers, and provides information on selecting, sizing, and installing them.

Contd on following page
Electrical Level 4 (continued)

**Advanced Controls (20 Hours)**
(Module ID 26407-20) Discusses applications and operating principles of various control system components, such as solid-state relays, reduced-voltage starters, and adjustable-frequency drives. Covers basic troubleshooting procedures.

**HVAC Controls (15 Hours)**
(Module ID 26408-20) Provides a basic overview of HVAC systems and their controls. Also covers electrical troubleshooting and NEC® requirements.

**Heat Tracing and Freeze Protection (10 Hours)**
ISBN 978-0-13-691095-4
(Module ID 26409-20) Presents heat-tracing and freeze-protection systems along with various applications and installation requirements.

**Motor Operation and Maintenance (10 Hours)**
ISBN 978-0-13-691121-0
(Module ID 26410-20) Covers motor care procedures, including cleaning, testing, and preventive maintenance. Describes basic troubleshooting procedures.

**Medium-Voltage Terminations/Splices (10 Hours)**
(Module ID 26411-20) Identifies types of medium-voltage cable and describes how to make various splices and terminations. Covers hi-pot testing.

**Special Locations (20 Hours)**
ISBN 978-0-13-691118-0
(Module ID 26412-20) Describes the NEC® requirements for selecting and installing equipment, enclosures, and devices for special locations that require unique attention. Locations include places of public assembly, theaters, carnivals, agricultural and livestock facilities, marinas, swimming pools, and temporary facilities.

**Fundamentals of Crew Leadership (22.5 Hours)**
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

PAPERBACK ISBN
DIGITAL

Universal Limited-Energy Cabling (20 Hours)
(Module ID 33108) Covers the make-up, identification, and applications of conductors and cables used in limited-energy applications. Describes the tools, materials, and procedures for pulling limited-energy cabling through conduit and raceways.

Limited-Energy Cable Selection (10 Hours)
(Module ID 33208) Provides an overview of the types of cable used for limited-energy installations. Also covers methods used to select the proper size and type of cable for a typical low-voltage installation.

Limited-Energy Cable Termination (25 Hours)
ISBN 978-0-13-690834-0
(Module ID 33209) Provides information and instructions for selecting, installing, and testing connectors and other terminating devices on cables used in limited-energy work, including telecommunications, video, audio, and fiber optic installations.

Limited-Energy Network Installations (25 Hours)
(Module ID 33301) Details procedures for connecting computers and other devices using both wired and wireless network connections. Describes components and architecture of Ethernet, LAN, and powerline carrier networks.

Fiber Optics (25 Hours)
ISBN 978-0-13-681292-0
(Module ID 33302) Introduces the types of equipment and methods used in fiber optic cable installation.

Wireless Communication (15 Hours)
(Module ID 33303) Introduces wireless communications and discusses current technologies transforming the market to include 5G, various residential and wireless networks, and a variety of mobile devices. Covers updated technologies and their implications. Emphasizes growing relevance of network security.

System Commissioning and User Training (20 Hours)
ISBN 978-0-13-684446-4
(Module ID 33306) Covers basic steps in the commission process including development of the plan and user-required training approach. Describes customer satisfaction levels and meeting expectations during the cut-over phase of a project.

Limited-Energy Network Installations (25 Hours)
ISBN 978-0-13-690834-0
(Module ID 33208) Provides an overview of the types of cable used for limited-energy installations. Also covers methods used to select the proper size and type of cable for a typical low-voltage installation.

Limited-Energy Cable Termination (25 Hours)
ISBN 978-0-13-690834-0
(Module ID 33209) Provides information and instructions for selecting, installing, and testing connectors and other terminating devices on cables used in limited-energy work, including telecommunications, video, audio, and fiber optic installations.

Limited-Energy Network Installations (25 Hours)
(Module ID 33301) Details procedures for connecting computers and other devices using both wired and wireless network connections. Describes components and architecture of Ethernet, LAN, and powerline carrier networks.

Fiber Optics (25 Hours)
ISBN 978-0-13-681292-0
(Module ID 33302) Introduces the types of equipment and methods used in fiber optic cable installation.

Electronic Systems Technician (EST) has been combined with NCCER’s Electrical series to provide additional career pathways. After completing Electrical Levels 1 and 2, trainees can choose to advance into Electrical Levels 3-4 or EST Levels 3-4.

L4 ELECTRONIC SYSTEMS TECHNICIAN

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

PAPERBACK ISBN
DIGITAL

Audio Systems (30 Hours)
(Module ID 33401) Introduces and explains audio system components, including input sources, amplifiers, signal processing equipment, and output equipment. Describes power requirements, cabling options, system configuration, and basic design considerations. Reviews common test equipment used for installation and troubleshooting.

Video Systems (40 Hours)
ISBN 978-0-13-684402-0
(Module ID 33402) Describes the types of equipment used in various video systems and equipment, including both analog and digital video, video signaling, display devices, HDTV, reality technologies, and videoprocessing and distribution.

Broadband (25 Hours)
ISBN 978-0-13-684350-4
(Module ID 33403) Explains the history of broadband and explores the primary delivery methods, including telephone lines, DSL, ADSL, BPL, cable and fiber optics, satellite, cellular, Wi-Fi®, and emerging technologies such as low earth orbit satellites.

Media Management Systems (25 Hours)
(Module ID 33404) Introduces the basic principles behind shared media resources and their access via computer networks, wireless systems, and hardwired applications. Describes media types for both analog and digital platforms. Explores cabling options including fiber optic interfaces.

Telecommunications Systems (20 Hours)
(Module ID 33405) Describes the history and updates of basic subscriber systems. Identifies types of telephone technologies, compares multiplexing and modulation, and covers Voice over Internet Protocol (VoIP).

Residential and Commercial Networks (15 Hours)
(Module ID 33406) Explains the integration of current and diverse low-voltage systems and the trend toward their singular hub control (or start topology connectivity). Covers implications of user-interfacing technologies. Updated to 2020 NEC codes as well as future outlook of building networks.

Intrusion Detection Systems (30 Hours)
(Module ID 33407) Describes devices such as sensors, notification, control panels, and programming used in intrusion detection security systems. Covers system design and installation guidelines, wiring, testing, and troubleshooting. Emphasizes codes and standards.

Continued on following page
To Order Call: 1-800-922-0579

Electronic Systems Technician Level 4 (continued)

**Fire Alarm Systems** (40 Hours)
(Module ID 33408) Covers the basics of fire alarm systems, including devices, circuits, system design and installation guidelines, power requirements, control unit programming, testing, and troubleshooting. Explores integration of fire alarms with other systems. Examines both residential and commercial fire alarm applications, emphasizing NEC® requirements and those found in NFPA 72.

**Nurse Call and Signaling Systems** (15 Hours)
(Module ID 33409) Presents an overview of nurse call and signaling systems as found in hospitals and other healthcare facilities. Covers basic emergency call and duress system requirements based on facility type. Identifies installation requirements based on UL and other building code specifications.

**Closed Circuit Television (CCTV)** (30 Hours)
(Module ID 33410) Describes the installation and configuration of closed circuit TV systems for small, medium, and large facilities. Explains various equipment and concepts, including cameras, lenses, remote positioning, video recording, cloud storage, and transmission. Covers the roles of the internet and digital technologies. Introduces test and troubleshooting equipment.

**Access Control Systems** (35 Hours)
(Module ID 33411) Introduces access control systems and applications including, door security and locking devices, card and biometric readers, and current ingress/egress technologies. Emphasizes installation practices as well as building and electrical codes.

**EST and Internet of Things (IoT)** (10 Hours)
(Module ID 33412) Introduces the history, development, and application of integrated Internet of Things (IoT) technologies as well as their influences on contemporary electronics. Addresses the increased need for component integration and introduces basic IoT devices involved today’s systems. Presents an outlook on the future of IoT and its increased demand for ESTs.
Heavy Equipment Operations

Orientation to the Trade (5 Hours)
(Module ID 22101) Provides an overview of heavy equipment terminology, operations, operator responsibilities, career opportunities, and basic principles of safety.

Heavy Equipment Safety (10 Hours)
(Module ID 22102) Provides a comprehensive overview of safety requirements on job sites with emphasis on OSHA, MSHA, and NIOSH requirements. Presents basic requirements for personal protection, safety equipment operations and maintenance, and HAZCOM.

Identification of Heavy Equipment (5 Hours)
(Module ID 22103) Teaches the names of various types of loads, as well as safety, operation, and maintenance procedures.

On-Road Dump Trucks (20 Hours)
ISBN 978-0-13-340319-0
(Module ID 22201-1) Covers the uses of forklifts on construction sites. Includes instructions for lifting, transporting, and placing various types of loads, as well as safety, operation, and maintenance procedures.

Utility Tractors (17.5 Hours)
(Module ID 22105) Covers operation of general utility tractors in the construction industry. Describes duties and responsibilities of the operator, safety rules for operation, the attachment of implements, and basic preventive maintenance practices.

Introduction to Earthmoving (12.5 Hours)
ISBN 978-0-13-663924-4
(Module ID 22101) Provides a broad introduction to the process of planning and executing earthmoving activities on various types of construction projects. The use of heavy equipment such as bulldozers, scrapers, excavators, and loaders is explained.

Grades (15 Hours)
(Module ID 22106) Describes the concept of preparing graded surfaces using heavy equipment. Covers identification of construction stakes and interpretation of marks on each type of stake. Discusses the process for grading slopes.

Vertical-Mast Sit-Down Counterbalance Forklifts (7.5 Hours)
(Module ID 22107) Covers operation of vertical-mast Sit-Down Counterbalance (SDCB) forklifts, commonly known as conventional forklifts. Describes duties and responsibilities of the operator, safety rules for operation, and distinguishing features. Includes operation for both indoor and outdoor environments.

Soils (10 Hours)
(Module ID 22308-13) Describes soil classification systems and explains how shrink and swell factors affect equipment selection. Discusses how soil conditions affect equipment performance and explains techniques for working with various types of soils.

Skid Steers (22.5 Hours)
(Module ID 22212-13) Describes the many uses of skid steers and the attachments available for these machines. Covers safety practices, as well as inspection, startup, shutdown, and operation of skid steers.

Loaders (17.5 Hours)
(Module ID 22202-13) Covers the uses of wheel and track loaders, as well as operator maintenance, loader safety, and operating procedures. Includes procedures for using loaders in excavation, grading, and demolition work.

Scrapers (17.5 Hours)
(Module ID 22204-13) Describes the types of scrapers used in site preparation, as well as the safe practices associated with the operation of scrapers. Covers operator inspection and maintenance requirements, along with startup, shutdown, and operating techniques.
Heavy Equipment Operations Level 3

**L3 HEAVY EQUIPMENT OPERATIONS**

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Finishing and Grading (25 Hours)**  
(Module ID 22307-14) Provides training on common types of equipment and instruments used for finish grading; materials and methods used to stabilize soils and control soil erosion; and finishing and grading methods used for various applications.

**Compaction Equipment (25 Hours)**  
(Module ID 22203-14) Provides training on common types of compaction equipment; the primary instruments, controls, and attachments of a roller; safety guidelines associated with compaction equipment; and prestart inspections, preventive maintenance, and proper operating procedures. Presents factors involved in work activities associated with a roller.

**Backhoes (30 Hours)**  
(Module ID 22303-14) Identifies and describes the common uses, types, components, instruments, controls, and attachments of backhoes. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with backhoes.

**Off-Road Dump Trucks (30 Hours)**  
(Module ID 22310-14) Identifies and describes the common types, uses, and components of off-road dump trucks. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Covers basic startup, driving maneuvers, loading, and dumping procedures for off-road dump trucks.

**Dozers (30 Hours)**  
ISBN 978-0-13-382759-0  
(Module ID 22302-14) Identifies and describes the common uses, types, and components of dozers. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with dozers.

**Excavators (35 Hours)**  
(Module ID 22304-14) Identifies and describes the common types, uses, and components of excavators. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with excavators.

**Motor Graders (40 Hours)**  
(Module ID 22305-14) Identifies and describes the common uses and types of motor graders. Presents safety guidelines, prestart inspection procedures, and preventive maintenance requirements. Describes basic startup and operation, and covers common work activities associated with motor graders.
Heavy Highway Construction

Heavy Highway Construction Safety (5 Hours)
(Module ID 36110-17) Reviews the safety hazards and precautions associated with construction of highways and bridges. It also emphasizes the importance of following safety procedures in order to prevent accidents and injuries associated with working in hazardous places/conditions.

Work-Zone Safety (5 Hours)
(Module ID 75104-13; from Field Safety) Introduces the signs, signals, and barricades found on various job sites, and covers highway work-zone safety requirements.

Soils (10 Hours)
(Module ID 22308-13; from Heavy Equipment Operations Level Two) Describes soil classification systems and explains how shrink and swell factors affect equipment selection. Discusses how soil conditions affect equipment performance and explains techniques for working with various types of soils.

Site Work (20 Hours)
(Module ID 22210-13; from Heavy Equipment Operations Level Two) Expands on information covered in Level 1 in relation to setting and interpreting grade stakes. Also provides information and instructions on controlling surface water and ground water on a job site, as well as the layout of foundations and laying of pipe.

Excavation Math (17.5 Hours)
(Module ID 22207-13; from Heavy Equipment Operations Level Two) Covers basic math skills required for site excavation work. Includes methods and practice in calculating the areas and volumes of various geometric shapes, as well as formulas and methods used to calculate cut and fill requirements on a job.

Interpreting Civil Drawings (20 Hours)
(Module ID 22209-13; from Heavy Equipment Operations Level Two) Explains how to read site plans to calculate cut and fill requirements. Provides instruction and practice in interpreting both roadway and construction site drawings used for excavation and grading work.

Rigging Practices (15 Hours)
(Module ID 38102; from Basic Rigging) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

Crate Safety and Emergency Procedures (25 Hours)
ISBN 978-0-13-498818-0
(Module ID 21106; from Mobile Crane Operations, Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

Crane Communications (10 Hours)
(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Modules

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (75 Hours)
(Module ID 36101-17) Introduces the trainees to careers, equipment, and processes used in the construction of highways and bridges.

Identification of Equipment Used in Heavy Highway Construction (10 Hours)
(Module ID 36111-17) Describes the types of heavy equipment, utility equipment, and cranes used in the construction of bridges and highways. Trainees will be expected to recognize the equipment and describe its use.

Carpentry Level Three (207.5 Hours)
(Module ID 27306-14; from Carpentry Level Three) Provides an introduction to working in and around excavations, particularly in preparing building foundations. Describes types and bearing capacities of soils; procedures used in shoring, shielding, and sloping trenches and excavations; trenching safety requirements; including recognition of unsafe conditions; and mitigation of groundwater and rock when excavating foundations.

Plant Operations (75 Hours)
(Module ID 36107-17) Explains the operation of plants used to manufacture concrete and asphalt paving and describes the different types aggregates.

Continued on following page
Paving (12.5 Hours)
(Module ID 36108-17) Describes paving operations, paving equipment, recycling processes, and quality control requirements for both concrete and hot-mix asphalt paving.

Horizontal Formwork (15 Hours)
(Module ID 27309-14; from Carpentry Level Three) Describes elevated decks and formwork systems and methods used in their construction. Covers joist, pan, beam and slab, flat slab, composite slab, and specialty form systems and provides instructions for the use of flying decks, as well as shoeing and reshoring systems.

Vertical Formwork (22.5 Hours)
(Module ID 27308-14; from Carpentry Level Three) Covers the applications and construction methods for types of forming and form hardware systems for walls, columns, and stairs, as well as slip and climbing forms. Provides an overview of the assembly, erection, and stripping of gang forms.

Reinforcing Concrete (15 Hours)
(Module ID 27304-14; from Carpentry Level Three) Explains the selection and uses of different types of reinforcing materials. Describes requirements for bending, cutting, splicing, and tying reinforcing steel and the placement of steel in footings and foundations, walls, columns, and beams and girders.

Working with Concrete (15 Hours)
(Module ID 36112-17) Introduces the trainees to the safety concerns associated with concrete, as well as concrete testing, concrete admixtures, and the proper procedure for placing concrete.

Trade Drawings One (12.5 Hours)
(Module ID 30108-11; from Ironworking Level One) Identifies the materials used in steel-framed buildings. Explains how to read basic structural blueprints.

Structural Ironworking One (7.5 Hours)
(Module ID 30109-11; from Ironworking Level One) Identifies the types of construction that utilize structural steel, the components of the structures, and the process involved in erecting a steel structure. Explains the principles of structural stresses and the requirements of bolted connections.

Bridge Construction (20 Hours)
(Module ID 36201-17) Describes the common types of bridges, along with the components that make up the substructure and superstructure of a bridge. The module also discusses the types of materials used in bridge construction, presents basic surveying equipment and practices, and explains how to interpret bridge drawings.

Bridge Foundations (10 Hours)
(Module ID 36202-17) Describes the types of footings used to support bridges, as well as various types of piles and pile-driving methods. Safety practices associated with pile driving on land and in marine environments are also covered, along with environmental protection issues.

Bridge Formwork (22.5 Hours)
(Module ID 36203-17) Describes the forms used to fabricate concrete walls, columns, footings, pile caps, and other bridge structures. This module covers site-built and manufactured forming systems and includes instructions for cleaning and storing forms.

Hydroblasting

PAPERBACK
ISBN
Trainee Guide: $29.99
978-0-13-294870-8
- Downloadable instructor resources are available.
Includes the newest waterjet safety technologies, methods, and equipment. Also provides expanded information on shrouds, shielding, checking, and grounding.

To Order Call: 1-800-922-0579
NCCER National Center for Construction Education and Research ©NCCER
Trade Mathematics (10 Hours)  
(Module ID 03102) Explains how to solve HVACR trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

Basic Electricity (15 Hours)  
(Module ID 03106) Introduces the concept of power generation and distribution, common electrical components, AC and DC circuits, electrical safety as it relates to the HVACR field, and reading and interpreting wiring diagrams.

Introduction to Heating (15 Hours)  
(Module ID 03108) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service. Introduces temperature measurement calculations.

Introduction to Cooling (30 Hours)  
(Module ID 03107) Explains the fundamental operating concepts of the refrigeration cycle and introduces common refrigerants. Discusses the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Discusses major components of cooling systems as well as their controls, including temperature switches.

Air Distribution Systems (15 Hours)  
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Basic Copper and Plastic Piping Practices (12.5 Hours)  
(Module ID 03103) Explains how to identify types of copper tubing and fittings used in the HVACR industry and how they are mechanically joined. Introduces push-to-connect and press-to-connect fittings. Also presents the identification and application of various types of plastic piping including PEX tubing, along with their common assembly and installation practices. Introduces pressure testing refrigerant lines.

Soldering and Brazing (10 Hours)  

Basic Carbon Steel Piping Practices (10 Hours)  
Fasteners and Hardware (10 Hours)  
(Module ID 03313) Covers a variety of fasteners, hardware, and wiring terminations used in HVAC systems, including the installation of these components.

Alternating Current (12.5 Hours)  
(Module ID 03206) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components. Also reviews electrical safety.

Compressors (12.5 Hours)  
(Module ID 03302) Explains operating principles of compressors used in comfort air conditioning and refrigeration systems. Includes installation, service, and repair procedures.

Metering Devices (12.5 Hours)  
(Module ID 03303) Covers the operating principles, applications, installation, and adjustment of fixed and adjustable expansion devices used in air conditioning equipment.

Refrigerants and Oils (15 Hours)  
(Module ID 03301) Covers characteristics and applications of pure and blended refrigerants, and provides extensive coverage of lubricating oils used in refrigeration systems.

Leak Detection, Evacuation, Recovery, and Charging (30 Hours)  
(Module ID 03205) Covers refrigerant handling and equipment servicing procedures for HVAC systems in an environmentally safe manner.

Heat Pumps (20 Hours)  
(Module ID 03211) Covers the principles of reverse cycle heating. Describes the operation of heat pumps and explains how to analyze heat pump control circuits. Includes heat pump installation and service procedures.

Indoor Air Quality (12.5 Hours)  
(Module ID 03403) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

Air Quality Equipment (5 Hours)  
(Module ID 03304) Covers principles, processes, and devices used to control humidity and air cleanliness, as well as devices used to conserve energy in HVAC systems.

Chimneys, Vents, and Flues (5 Hours)  
(Module ID 03202) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.
Introduction to HVAC (7.5 Hours)
(Module ID 03101) Covers the basic principles of heating, ventilating, and air conditioning, career opportunities in HVAC, and how apprenticeship programs are constructed. Basic safety principles, as well as trade licensure and EPA guidelines, are also introduced.

Introduction to Heat Pump Systems (7.5 Hours)
(Module ID 03206) Covers the fundamentals of heat pump systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

Introduction to Cooling (12.5 Hours)
(Module ID 03105) Explains the relationship of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC systems. Also introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Introduces basic control concepts for simple systems.

Introduction to Air Distribution Systems (15 Hours)
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Trade Mathematics (10 Hours)
(Module ID 03102) Explains how to solve HVAC trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

Basic Electricity (12.5 Hours)
(Module ID 03106) Introduces the concept of power generation and distribution, common electrical components, AC and DC circuits, and electrical safety as it relates to the HVAC field. Introduces reading and interpreting wiring diagrams.

Introduction to Heating (15 Hours)
(Module ID 03108) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

Introduction to Cooling (30 Hours)
(Module ID 03107) Explains the fundamental operating concepts of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC systems. Also introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Introduces basic control concepts for simple systems.

Introduction to Air Distribution Systems (15 Hours)
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Leak Detection, Evacuation, Recovery, and Charging (30 Hours)
(Module ID 03206) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components. Also reviews electrical safety.

Compressors (12.5 Hours)
(Module ID 03302) Explains operating principles of compressors used in comfort air conditioning and refrigeration systems. Includes installation, service, and repair procedures.

Refrigerants and Oils (15 Hours)
(Module ID 03301) Covers characteristics and applications of pure and blended refrigerants, and provides extensive coverage of lubricating oils used in refrigeration systems.

NATE Certification
NCCER is an officially recognized training provider for North American Technician Excellence (NATE), an independent, third-party certification body for HVAC technicians. NATE-certified technicians can use module completions through NCCER-accredited training providers for the continuing education hours required for recertification through NATE. For details and lists of available NATE-recognized training, visit www.natex.org. For more information regarding NATE recertification, please contact NCCER Customer Service at 1-888-622-3720.

Basic Copper and Plastic Piping Practices (10 Hours)
(Module ID 03103) Explains how to identify types of copper tubing and fittings used in the HVAC industry and how they are mechanically joined. Also presents the identification and application of various types of plastic piping, along with their common assembly and installation practices.

Soldering and Brazing (10 Hours)
(Module ID 03104) Introduces the equipment, techniques, and materials used to safely join copper tubing through both soldering and brazing. Covers the required personal protective equipment, preparation, and work processes in detail. Also provides the procedures for brazing copper to dissimilar materials.

Basic Carbon Steel Piping Practices (10 Hours)
ISBN 978-0-13-545828-0
(Module ID 03105) Explains how to identify various carbon steel piping materials and fittings. Covers the joining and installation of threaded and grooved carbon steel piping systems, including detailed descriptions of threading and grooving techniques.

continued on following page
HVAC Level 2 (continued)

Basic Maintenance (20 Hours)
(Module ID 03215) Covers information related to maintenance-oriented materials, as well as guidelines for the inspection and periodic maintenance of various systems and accessories. Also covers the application of gaskets and seals, as well as the adjustment of different types of belt drives. Includes information on inspection and maintenance requirements for selected equipment.

Sheet Metal Duct Systems (10 Hours)
(Module ID 03213) Covers layout, fabrication, installation, and insulation of sheet metal ductwork. Also includes selection and installation of registers, diffusers, dampers, and other duct accessories.

Fiberglass and Flexible Duct Systems (7.5 Hours)
(Module ID 03214) Covers the layout, fabrication, installation, and joining of fiberglass ductwork and fittings. Describes the proper methods for attaching and supporting flex duct.

Commercial Airside Systems (12.5 Hours)
(Module ID 03201) Describes the systems, equipment, and operating sequences commercial airside system configurations such as constant volume single-zone and multi-zone, WTV, and dual-duct WTV.

Chimneys, Vents, and Flues (5 Hours)
(Module ID 03202) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

Troubleshooting Heating (10 Hours)
(Module ID 03304) Covers the applications, principles, and troubleshooting of retail refrigeration systems.

Air Quality Equipment (5 Hours)
(Module ID 03204) Covers principles, processes, and devices used to control humidity and air cleanliness, as well as devices used to conserve energy in HVAC systems.

Introduction to Hydronic Systems (15 Hours)
(Module ID 03203) Introduces hot water heating systems, focusing on safe operation of the low-pressure boilers and piping systems in residential applications.

Troubleshooting Cooling (20 Hours)
(Module ID 03310) Provides guidance related to troubleshooting cooling systems.

Troubleshooting Heat Pumps (12.5 Hours)
ISBN 978-0-13-546186-0
(Module ID 03311) Provides a thorough review of the heat pump operating cycle, and presents troubleshooting procedures for components.

Commercial Hydronic Systems (12.5 Hours)
(Module ID 03305) Reviews basic properties of water and describes how water pressure is related to the movement of water through piping systems. Describes various types and components of commercial hot-water heating and chilled-water cooling systems, and examines how those systems function.

Commercial Airside Systems (12.5 Hours)
(Module ID 03306) Focusses on the use of steam for storing and moving energy in HVAC systems. Reviews the fundamentals of water that relate to steam and describes the basic steam system cycle. Discusses a steam system’s operational components—steam boilers and their accessories and controls; steam system loads, including heat exchangers/converters; and terminal devices. Steam system valves and piping are covered in detail, including common types of piping arrangements; the components of a condensate return/feedwater system; steam and condensate pipe sizing; and pressure-reducing valves and thermostat valves.

Steam Systems (10 Hours)
(Module ID 03307) Provides information and skills needed to troubleshoot various air treatment accessories used with heating and cooling equipment.

Zoning, Ductless, and Variable Refrigerant Flow Systems (15 Hours)
(Module ID 03315) Introduces the information and skills needed to troubleshoot and repair zoned, ductless, and variable refrigerant flow systems.

Troubleshooting Accessories (7.5 Hours)
(Module ID 03312) Delivers information and skills needed to troubleshoot various air treatment accessories used with heating and cooling equipment.

Retail Refrigeration System (15 Hours)
(Module ID 03304) Covers the applications, principles, and troubleshooting of retail refrigeration systems.

Customer Relations (5 Hours)
(Module ID 03316) Presents the importance of establishing good relations with customers and provides guidance on how to achieve that goal. Focuses on ways for a technician to make a good first impression and describes how to communicate in a positive manner with customers. The elements of a service call and dealing with different types of problem customers are also covered.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Water Treatment** (10 Hours)
  ISBN 978-0-13-546229-4
  (Module ID 03308) Explains water problems encountered in heating and cooling systems and identifies water treatment methods and equipment. Covers basic water testing procedures and chemistry.

- **Indoor Air Quality** (12.5 Hours)
  (Module ID 03403) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

- **Energy Conservation Equipment** (7.5 Hours)
  ISBN 978-0-13-546214-0
  (Module ID 03404) Covers heat recovery/reclaim devices, as well as other energy recovery equipment used to reduce energy consumption in HVAC systems.

- **Building Management Systems** (12.5 Hours)
  (Module ID 03405) Explains how computers and microprocessors are used to manage zoned HVAC systems. Provides coverage of various network protocols and systems controllers, and introduces trainees to the various means of connection and system interface.

- **System Air Balancing** (15 Hours)
  (Module ID 03402) Covers air properties and gas laws, as well as the use of psychrometric charts. Describes the tools, instruments, and procedures used to balance an air distribution system.

- **System Startup and Shutdown** (15 Hours)
  (Module ID 03406) Presents the procedures for the startup and shutdown of hot water, steam heating, chilled water, and air handling systems. Also covers the start-up and shutdown of typical cooling towers and packaged HVAC units. The procedures for both short- and long-term shutdowns are included.

- **Construction Drawings and Specifications** (12.5 Hours)
  (Module ID 03401) Teaches how to interpret drawings used in commercial construction, including mechanical drawings, specifications, shop drawings, and as-builts. Explains how to perform takeoff procedures for equipment, fittings, ductwork, and other components.

- **Heating and Cooling System Design** (22.5 Hours)
  (Module ID 03407) Identifies factors that affect heating and cooling loads. Explains the process by which heating and cooling loads are calculated, and how load calculations are used in the selection of heating and cooling equipment. Covers basic types of duct systems and their selection, sizing, and installation requirements.

- **Commercial/Industrial Refrigeration Systems** (20 Hours)
  (Module ID 03408) Expands on the study of product and process refrigeration equipment by describing systems used in cold storage and food processing applications, as well as transportation refrigeration. Various types of defrost systems are covered in detail.

- **Alternative and Specialized Heating and Cooling Systems** (10 Hours)
  (Module ID 03409) Describes alternative devices used to reduce energy consumption, including wood, coal, and pellet-fired systems, waste-oil heaters, geothermal heat pumps, solar heating, in-floor radiant heating, and direct-fired makeup units. Also introduces application-specific computer room environmental and air turnover systems.

- **Fundamentals of Crew Leadership** (22.5 Hours)
  (Module ID 46101) While this module has been designed to assist the recently promoted crew leader, it is beneficial for anyone in management. The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
Industrial Coating and Lining Application Specialist

NCER and NACE International, two leading providers of industry education, training, and certification, have joined forces to deliver a comprehensive industrial coating applicator training and certification program. The NCER/NACE Industrial Coating Applicator Training and Certification Program follows the standard on Industrial Coating and Lining Application Specialist Qualification available from NACE International.

Basic Safety (15 Hours)
ISBN 978-0-13-604816-9 (Module ID 69101-09) Provides an introduction to the coatings industry, including career opportunities and an introduction to coatings safety.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Coating Application (105 Hours)
ISBN 978-0-13-604820-6 (Module ID 69103-09) Describes types of coatings, their advantages and disadvantages, applications, and specific preparations required.

Industrial Coatings (15 Hours)

Coatings Safety (30 Hours)

Corrosion Protection (5 Hours)

Industrial Coatings Two (20 Hours)
ISBN 978-0-13-604799-5 (Module ID 69207-10) Covers the setup, maintenance, and disassembly of conventional air spray, airless spray, air-assisted airless spray, and HVLP spraying equipment, including testing and documentation. Also covers overcoating and explains how to use wet and dry film thickness gauges.

Surface Preparation Two (80 Hours)

Industrial Coatings Two (20 Hours)
ISBN 978-0-13-604798-1 (Module ID 69206-10) Discusses the physical properties of various coatings, including curable and noncurable types. Also covers basic curing mechanisms and methods of film formation.

Containment, and Ventilation (47.5 Hours)

Coating Applications Two (100 Hours)
ISBN 978-0-13-604799-5 (Module ID 69207-10) Covers the setup, maintenance, and disassembly of conventional air spray, airless spray, air-assisted airless spray, and HVLP spraying equipment, including testing and documentation. Also covers overcoating and explains how to use wet and dry film thickness gauges.

Surface Preparation Two (80 Hours)

Industrial Coating Safety (30 Hours)

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.

Surface Preparation (100 Hours)
ISBN 978-0-13-604821-3 (Module ID 69104-09) Covers the application of various coatings, including equipment setup, mixing, and preparation of coatings.
MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (2.5 Hours)
ISBN 978-0-13-614612-4
(Module ID 40101-07) Covers the history of the trade, and provides an overview of the industrial maintenance craft. Describes apprenticeship and training programs, as well as career opportunities. Also describes the responsibilities and characteristics of successful workers.

Fasteners and Anchors (5 Hours)
(Module ID 40103-07) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

Oxyfuel Cutting (17.5 Hours)
(Module ID 40104-07) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 40105-07) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Construction Drawings (12.5 Hours)
(Module ID 40107-07) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Craft-Related Mathematics (15 Hours)
(Module ID 40106-07) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Pumps and Drivers (5 Hours)
(Module ID 40108-07) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Valves (5 Hours)
(Module ID 40109-07) Identifies different types of valves and describes their installation, storage, and handling.

Introduction to Test Instruments (7.5 Hours)
(Module ID 40110-07) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, stroboscopes, multimeters, and automated diagnostic tools.

Material Handling and Hand Rigging (15 Hours)
(Module ID 40111-07) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Mobile and Support Equipment (10 Hours)
ISBN 978-0-13-614623-0
(Module ID 40112-07) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

Lubrication (12.5 Hours)
(Module ID 40113-07) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

Industrial Safety for E&I Technicians (12.5 Hours)
(Module ID 40201-08) Covers safety rules and regulations for electrical workers, precautions for electrical hazards on the job, and the OSHA-mandated lockout/tagout procedure.

Introduction to the National Electrical Code® (5 Hours)
(Module ID 40202-08) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an NEC code book. Allows trainees to practice finding information using an NEC code book.

Electrical Theory (15 Hours)
(Module ID 40203-08) Introduces electrical concepts used in Ohm’s law as applied to DC series circuits. Includes atomic theory, electromotive force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Alternating Current (20 Hours)
(Module ID 40204-08) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Test Equipment (10 Hours)
(Module ID 40205-08) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Flow, Pressure, Level, and Temperature (15 Hours)
(Module ID 40206-08) Presents devices used to measure flow, pressure, level, and temperature, along with their principles of operation.

Continued on following page
Industrial Maintenance Electrical & Instrumentation Technician Level 2 (continued)

**Process Mathematics (15 Hours)**
(Module ID 40207-08) Covers measurement of mass, weight, pressure, temperature, and flow, conversion of units, and their application to industrial maintenance.

**Hand Bending (10 Hours)**
(Module ID 40208-08) Introduces conduit bending and installation. Covers the techniques for using hand-operated and step conduit benders, as well as cutting, reaming, and threading conduit.

**Tubing (15 Hours)**
ISBN 978-0-13-604710-0
(Module ID 40209-08) Introduces a variety of tubing, tubing materials, tools, and work practices. Covers proper storage and handling, cutting, deburring, reaming, bending, and flaring of tubing.

**Conductors and Cables (10 Hours)**
(Module ID 40303-09) Explains how to read and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

**Motor Controls (15 Hours)**
(Module ID 40304-09) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

**Distribution Equipment (17.5 Hours)**
(Module ID 40305-09) Explains distribution equipment, including grounding, switchboard and ground fault maintenance, transformers, and electrical drawing identification.

**Transformer Applications (25 Hours)**
(Module ID 40306-09) Discusses transformer types, construction, connections, protection, and grounding along with capacitors and rectifiers.

**Conductor Selection and Calculation (15 Hours)**
(Module ID 40307-09) Covers the types of conductors used in wiring systems, including insulation, current-carrying capacity, and temperature ratings.

**Temporary Grounding (15 Hours)**
ISBN 978-0-13-604738-4
(Module ID 40308-09) Covers the methods used to eliminate or reduce electrical shock hazards to personnel working on electrical equipment.

**Motor-Operated Valves (15 Hours)**
ISBN 978-0-13-604739-1
(Module ID 40312-09) Covers motor-driven valves, ranging from small, servo-mechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

**E & I Drawings (10 Hours)**
(Module ID 40303-09) Explains control circuit handbook for drawing isometric views, including electrical, pneumatic, and hydraulic operators.

**Clean, Purge, and Test Tubing and Piping Systems (7.5 Hours)**
(Module ID 40310-08) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in industrial maintenance.

**Instrument Drawings and Documents, Part One (15 Hours)**
(Module ID 40311-08) Introduces instrument symbols, abbreviations, and drawings and documents, including instrument indexes, installation detail drawings, location drawings, and control loops.

**Clean, Purge, and Test Tubing and Piping Systems (7.5 Hours)**
(Module ID 40310-08) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in industrial maintenance.

**Instrument Drawings and Documents, Part One (15 Hours)**
(Module ID 40311-08) Introduces instrument symbols, abbreviations, and drawings and documents, including instrument indexes, installation detail drawings, location drawings, and control loops.

**L3 **

**INDUSTRIAL MAINTENANCE ELECTRICAL & INSTRUMENTATION TECHNICIAN**

**LEVEL 3**

**Curriculum Notes**
- 182.5 Hours
- Revised: 2009, Third Edition
- Downloadable instructor resources are available.

**PAPERBACK**

**ISBN**

**MODULES**

**The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.**

**Hazardous Locations (10 Hours)**
(Module ID 40301-09) Covers all classes of hazardous locations, including seals, components, and equipment approved for use in various hazardous locations.

**Electronic Components (10 Hours)**
(Module ID 40302-09) Introduces the principles of electronics and semiconductor theory, components, and applications.

**Conductors and Cables (10 Hours)**
(Module ID 40212-08) Focuses on the types and applications of conductors and electrical cabling and covers proper wiring techniques. Stresses the applicable NEC® requirements.

**Conductor Terminations and Splices (10 Hours)**
(Module ID 40213-08) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.
Industrial Maintenance Electrical & Instrumentation Technician Level 4

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Standby and Emergency Systems** (12.5 Hours)
(Module ID 40401-09) Explains the installation, utilization, and maintenance requirements for standby and emergency electrical systems.

**Basic Process Control Elements, Transducers, and Transmitters** (15 Hours)
(Module ID 40402-09) Discusses sensing and transmitting devices used in an instrumentation loop, along with the process variables measured by the detectors or sensors. Gives examples of technical manuals and specification sheets. Explains how control devices are selected, and how to draw basic control loop diagrams that include a measuring element, a transducer, and a transmitter.

**Instrumentation Calibration and Configuration** (10 Hours)
(Module ID 40403-09) Introduces methods of instrumentation calibration, including the three- and five-point methods. Covers components that require calibration in pneumatic, analog, and smart loops, as well as methods used to calibrate these components.

**Pneumatic Control Valves, Actuators, and Positioners** (40 Hours)
(Module ID 40404-09) Covers the construction, operation, and uses of control valves, actuators, and positioners that are driven, and in some cases controlled by, compressed air. Explains the installation and maintenance of these devices, and includes alignment and troubleshooting procedures.

**Performing Loop Checks** (7.5 Hours)
(Module ID 40405-09) Covers loop check steps, including verifying mechanical installation, validating that the loop has correct tag numbers, performing loop checks, and proving the loop.

**Troubleshooting and Commissioning a Loop** (10 Hours)
(Module ID 40406-09) Teaches troubleshooting techniques used to locate problems in control loops, and how to isolate a loop in order to troubleshoot it. Covers commissioning of a loop once it is repaired, loop checked, and calibrated.

**Process Control Loops and Tuning** (20 Hours)
(Module ID 40407-09) Describes control loops, devices, and terms. Introduces formulas and their applications to PID control. Offers a theory-based approach to PID control and its application in industrial process control. Addresses open, closed, and visual loop tuning.

**Data Networks** (15 Hours)
(Module ID 40408-09) Introduces terms associated with data network devices and computers used in industrial facilities. Explains how data network devices and computers are interconnected for communication purposes. Describes how open connectivity is used in industrial data networks, and explores the hardware devices used in a data highway system.

**Programmable Logic Controllers** (17.5 Hours)
(Module ID 40409-09) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

**Distributed Control Systems** (17.5 Hours)
ISBN 978-0-13-609137-0
(Module ID 40410-09) Describes how DCS was developed by combining the technologies of single loop control, direct digital control, and supervisory control. Covers DCS hardware requirements, how control loops are implemented into a DCS, types of data transmission used in DCS, communication protocols, and human interfaces.

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Industrial Maintenance** (5 Hours)  
(Module ID 32101) This module reviews career choices available to skilled industrial craftworkers. Industrial maintenance mechanics who perform their tasks safely, communicate effectively, and behave responsibly earn respect within the industry, and pave the way for career growth, increased pay, and better advancement opportunities.

**Pumping Systems** (5 Hours)  
ISBN 978-0-13-581129-0  
(Module ID 08201) Introduces chemical, compressed air, fuel oil, steam, and water systems. Explains how to identify piping systems according to color codes, the effects of thermal expansion, and the purpose of pipe insulation.

**Valve Operations** (5 Hours)  
(Module ID 08202) Introduces and identifies common valves found in commercial and industrial settings and explains how they work to effectively move fluids. It also covers the types of valves that drive the pumps, including basic installation methods.

**Identification and Installing Valves** (20 Hours)  
(Module ID 08203) Identifies different types of valves, including those that start and stop flow, regulate flow, regulate flow direction, and relieve pressure, and describes their installation as well as proper storage and handling procedures. Covers common valve operators and actuators.

**Electrical Test Equipment** (5 Hours)  
ISBN 978-0-13-817475-0  
(Module ID 26112-23) Covers the applications of various types of electrical test equipment. Describes meter safety precautions and category ratings.

**Rigging Practices** (15 Hours)  
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Teaches use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches.

**Motorized Equipment** (10 Hours)  
ISBN 978-0-13-580999-0  
(Module ID 08106) Explains the safety factors, operator maintenance, and operating procedures associated with motorized equipment used on job sites. Covers electrical generators, air compressors, aerial lifts, forklifts, trenchers, backhoes, mobile cranes, and portable equipment including welding machines, pumps, and compactors.

**Lubrication** (15 Hours)  
(Module ID 15208) Explains how to safely select and use lubricants. Describes types of lubricants and lubrication devices.

**LEVEL 2**

**INDUSTRIAL MAINTENANCE MECHANIC**

Curriculum Notes

- 192.5 Hours

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Basic Layout** (20 Hours)  
(Module ID 15104) Discusses the tools used in layout. Explains how to lay out baselines using the arc method and 3-4-5 method.

**Millwright Hand Tools** (17.5 Hours)  
(Module ID 15102) Introduces hand tools used by millwrights. Explains hand tool safety and covers the methods for selecting, inspecting, using, and maintaining these tools.

**Millwright Power Tools** (22.5 Hours)  
(Module ID 15205) Introduces power tools used by millwrights and procedures for using, caring for, and maintaining these tools.

**Fasteners and Anchors** (12.5 Hours)  
(Module ID 15103) Identifies fasteners and anchors used by millwrights, including their applications and installation procedures.

**Oxyfuel Cutting** (17.5 Hours)  
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment.

**Gaskets and Packing** (15 Hours)  
(Module ID 15107) Describes gaskets and packing and their applications, while also providing instructions for laying out, cutting, and installing gaskets.

**Craft-Related Mathematics** (20 Hours)  
(Module ID 15201) This module introduces the use of equivalents and conversion tables, figure ratios, and proportions. Explains basic use of trigonometry in calculating takeouts, volumes, and weights of objects, and performing right-angle trigonometry.

**Reading Mechanical Drawings** (20 Hours)  
(Module ID 15203) Explains orthographic projection, isometric, and schematic drawings used to show piping, hydraulic, and pneumatic systems.

**Pumps and Drivers** (5 Hours)  
(Module ID 32108) This module introduces common pumps found in commercial and industrial settings and explains how they work to effectively move fluids. It also covers the types of engines that drive the pumps, including basic installation methods.

**Maintaining Valves** (10 Hours)  
(Module ID 08408) Explains how to replace packing and O-rings, and how to open and close a valve’s bonnet. Discusses how to safely troubleshoot and maintain several types of valves.

**Testing Piping Systems and Equipment** (20 Hours)  
(Module ID 08309) Discusses the importance of safety and following procedures with testing and inspections. Topics include pretest requirements, visual weld inspections, service flow tests, hard pressure tests, hydrostatic tests, and steam blow tests.

**Introduction to Bearings** (15 Hours)  
(Module ID 15209) Describes the types and applications of bearings, including plain, roller, ball, thrust, and guide bearings, as well as pillow block, flanged, and takeup bearings. Also explains bearing designation systems.

**Introduction to Conveyors** (10 Hours)  
(Module ID 15401) Describes conveyor systems and their principles of operation. Introduces several approaches to belt conveyor drive options. Introduces drum motors and servomotors for belt and roller conveyor systems.

Continued on following page
Industrial Maintenance Mechanic Level 2 (continued)

Low-Pressure Steam Systems (10 Hours)
(Module ID 32208) This module introduces the properties of water and fundamentals of steam, followed by a detailed review of low-pressure steam systems and components. Maintaining these systems includes the repair, monitoring and troubleshooting all the components of these systems, such as boilers, control valves, heat exchangers, condensate traps, and vacuum pumps.

High-Pressure Steam Generation Systems
(20 Hours)
(Module ID 32209) This module explains the functioning of high-pressure steam systems used in industry. To support a boiler operation, maintenance craftworkers must be proficient in the use, repair, and maintenance of the auxiliary equipment needed to generate and manage high pressure steam, such as pulverizers, evaporators, soot blowers, and precipitators.

Distillation Towers and Vessels (20 Hours)
(Module ID 32210) Introduces the various types and functioning of distillation towers and vessels, including recovery vessels and condenser processing. The operation, maintenance, and repair of distillation towers and vessels is described in this module. Various types of towers and their components are discussed, as well as an overview of refinery processes.

Industrial Heat Transfer Equipment (30 Hours)
(Module ID 32211) This module reviews the fundamental principles behind heat transfer. It explores uses of heat transfer within numerous industries and outlines the different types of heat exchanger and furnace tubing and tube sheets. By employing a detailed boiler inspection program and applying the proper tools and techniques, forced outages and downtime can be reduced and boiler efficiency can be restored.

Removing and Installing Bearings (22.5 Hours)
(Module ID 15306) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

Couplings and Alignment Fundamentals (15 Hours)
(Module ID 15307) Identifies types of couplings and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

Setting Baseplates and Soleplates (20 Hours)
(Module ID 15207) Describes how to set a machine baseplate and soleplate while guaranteeing alignment with other equipment.

Precalibration and Shim Fabrication (20 Hours)
(Module ID 15313) Covers procedures for fabricating shims. Explains how to level equipment using jack bolts, wedges and shims. Guides the checking for soft foot and other coupling stresses addressed during rough alignment.

Dial Indicator Alignment (45 Hours)
(Module ID 15314) Explains the procedures involved in aligning shafts, first with a straightedge and feeler gauges, then with dial indicators. Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment, based on reverse dial indicator measurements.

Installing Belt and Chain Drives (15 Hours)
(Module ID 15311) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Mechanical Seals (15 Hours)
(Module ID 15305) Covers the function and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting, and installing mechanical seals.

Troubleshooting and Repairing Conveyors
(12.5 Hours)
(Module ID 15402) Describes maintaining and repairing belt, roller, chain, screw, and pneumatic conveyers. Covers conveyor belt tracking problems and correction methods.

Continued on following page
Advanced Mechanical Drawings (17.5 Hours)
(Module ID 15503) Describes the use of drawing sets to obtain information about a system. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

Basic Pneumatic Systems (7.5 Hours)
(Module ID 15407) Explains pneumatic system components and compressed-air treatment. Introduces equipment auxiliary and special-application equipment used with compressors and with tools.

Compressors and Compressor Maintenance
(20 Hours)
(Module ID 15406) Introduces compressors and the troubleshooting and maintenance procedures associated with compressors.

Laser Alignment (25 Hours)

Introduction to Leadership (22.5 Hours)
(Module ID 46100) Introduces leadership skills and different leadership styles, as well as communication and problem solving techniques. Jobsite safety and safety leadership are also discussed. Introduces business topics that are important to understand for construction projects.

Troubleshooting and Repairing Pumps
(17.5 Hours)
(Module ID 15405) Describes inspecting, troubleshooting, assembling, and disassembling pumps. Explains installing pumps, and preparing them for startup. Discusses shutdown, repair, and removal of pumps from the system.

Troubleshooting and Repairing Gearboxes
(15 Hours)
(Module ID 15411) Explains how to troubleshoot, remove, and disassemble gearboxes; how to identify gear wear patterns; and how to install and maintain gearboxes.

Advanced Towers and Vessels
(17 Hours)
(Module ID 32501) This module addresses different types of distillation towers and the components found inside them, including the different types of trays and packing used in the distillation process. On the maintenance side, it covers removing, replacing, and troubleshooting tower components, torquing and tensioning, as well as safety when working on distillation towers.
Instrumentation

**L1 INSTRUMENTATION**

**LEVEL 1**

**Curriculum Notes**
- 190 Hours (includes Core)
- Downloadable instructor resources are available.

**PAPERBACK**
- ISBN
  - Trainee Guide: 574.99 978-0-13-383080-4

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

1. **Instrumentation Safety Practices (72.5 Hours)**
   - Module ID 12115-14: Covers precautions for electrical hazards found on the job and teaches the OSHA-mandated lockout/
tagout procedure. Identifies safety practices related to potentially hazardous tools and materials.

2. **Hand and Power Tools for Instrumentation (12.5 Hours)**
   - ISBN 978-0-13-378834-1
   - Module ID 12114-14: Explains how to identify, inspect, use, and maintain the various hand and power tools used by instrument
   fitters and technicians.

3. **Craft-Related Mathematics (10 Hours)**
   - Module ID 12119-14: Covers basic concepts of the metric system and the conversion of English units to metric units. Also reviews
   basic algebra, geometric figures, and calculations associated with triangles.

4. **Instrument Drawings and Documents Part One (7.5 Hours)**
   - Module ID 12107-14: Examines the characteristics of temperature, pressure, level, and flow, and describes the units of measure for
   temperature, pressure, level, and flow, and describes the units of measure for
   process variables and the basic principles of operation for each variable. Introduces common devices used to measure these
   process variables and the basic principles of operation for each device.

5. **Inspect, Handle, and Store Instrumentation Materials (2.5 Hours)**
   - Module ID 12108-14: Teaches how to recognize, select, and properly install gaskets, packing, and O-rings. Covers the various
   materials used in gaskets and O-rings, along with their applications and limitations.

6. **Tubing (7.5 Hours)**
   - Module ID 12109-14: Covers the proper use, storage, handling, and safety practices associated with various lubricants, cutting
   fluids, seals, and cleaners. Includes coverage of the tools and materials used in applying lubricants and cleaning products.

7. **Steel Piping Practices (10 Hours)**
   - Module ID 12111-14: Introduces types of tubing, tubing materials, and fittings, and tools. Covers proper storage and handling, cutting,
   deburring, reaming, bending, and joining of tubing.

8. **Hoses (12.5 Hours)**
   - Module ID 12113-14: Describes different types of hoses and related fittings, along with proper storage and handling. Includes
   instructions for cutting hoses and installing standard reusable fittings.

9. **Fasteners (7.5 Hours)**
   - Module ID 12106-14: Explains how to properly identify, select, and install threaded and non-threaded fasteners and anchors used in
   instrumentation work.

10. **Lubricants, Sealants, and Cleaners (7.5 Hours)**
    - Module ID 12108-14: Teaches how to recognize, select, and properly install gaskets, packing, and O-rings. Covers the various
    materials used in gaskets and O-rings, along with their applications and limitations.

11. **Temperature, Pressure, Level, and Flow (15 Hours)**
    - Module ID 12110-15: Examines the characteristics of temperature, pressure, level, and flow, and describes the units of measure for
    each variable. Introduces common devices used to measure these
    process variables and the basic principles of operation for each device.

12. **Instrument Fitter’s Math (15 Hours)**
    - Module ID 12301-15: Discusses the application of right triangles in bending and installing tubing and conduit as it applies to
    instrumentation. Shows how to use a scientific calculator in applying instrumentation piping and fitting math.

13. **Instrument Drawings and Documents, Part Two (17.5 Hours)**
    - Module ID 12202-15: Covers reading and interpreting piping and instrumentation drawings, loop sheets, flow diagrams, isometrics,
    and orthographics to enable the identification of types of instrumentation and the specifications for installation.

14. **Installing Field-Mounted Instruments (25 Hours)**
    - Module ID 12213-15: Covers selection and mounting of instruments at locations other than panels, including stand
    mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

15. **Test Equipment (10 Hours)**
    - Module ID 33205-10; from Electronic Systems Technician Level Two: Covers the selection, inspection, use, and maintenance
    of basic test equipment used in low-voltage work. Also covers
    specialized test equipment such as signal generators, wattmeters, cable
    testers, and RF analyzers.

16. **Panel-Mounted Instruments (10 Hours)**
    - Module ID 12212-15: Explains the selection of instruments to be panel-mounted, locating the instruments using drawings, and
    procedures for installing the instruments in the panels.

Continued on following page
Instrumentation Level 2 (continued)

**Raceways for Instrumentation** (17.5 Hours)
(Module ID 12214-15) Introduces raceways. Also covers identification and selection of conduit, raceways, wireways, cable trays, fittings, and NEC requirements for installation.

**Clean, Purge, and Test Tubing and Piping Systems** (10 Hours)
(Module ID 12303-15) Presents safe methods for cleaning, purging, blowing down, pressure testing, and leak testing tubing, piping, and hoses used in instrumentation.

**Protective Measures for Instrumentation** (20 Hours)
(Module ID 12308-15) Covers protective measures applied in instrumentation installations, including heat treatment, chemical treatment, and insulation.

**Layout and Installation of Tubing and Piping Systems** (35 Hours)
(Module ID 12302-15) Introduces piping and tubing layout procedures. Explains the steps in creating a hand-sketched isometric drawing that can be applied in the piping and tubing installation. Introduces methods and procedures used to measure, cut, and bend and support piping and tubing.

**Detectors, Secondary Elements, Transducers, and Transmitters** (25 Hours)
(Module ID 12205-16) Introduces instrumentation devices that detect different process variables, devices that change the variable into a transmittable form, and devices that transmit the information to another device for control or informational purposes. Covers devices that sense flow, level, temperature, and pressure, along with various types of transducers and transmitters.

**Instrumentation Electrical Circuitry** (25 Hours)
(Module ID 12305-16) Describes various types of series and parallel circuits; resistance, inductance, and capacitance in AC circuits; DC power supplies; analog and digital signals; and common applications of electrical and electronic circuitry.

**Relays and Timers** (10 Hours)
(Module ID 12208-16) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

**Switches and Photoelectric Devices** (10 Hours)
(Module ID 12209-16) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

**Terminating Conductors** (20 Hours)
(Module ID 12307-16) Explains the methods, procedures, and standards used to terminate and test common types of conductors utilized in electrical and electronic wiring applications.

**Grounding and Shielding of Instrumentation Wiring** (10 Hours)
ISBN 978-0-13-448291-0
(Module ID 12206-16) Teaches the basic concepts of grounding and shielding, including wire and cable identification. Defines various types of noise that can be induce into instrumentation wiring and describes the methods used to reduce or eliminate it.

**Process Control Theory** (25 Hours)
(Module ID 12204-16) Discusses the principles of process control and how various types of control loops are applied. Discusses ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

**Controllers** (10 Hours)
(Module ID 12205-16) Covers the theory of operation and the application of common process controllers, including both pneumatic and electronic devices.

**Tuning Loops** (15 hours)
(ISBN 978-0-13-448303-0)
(Module ID 12405-16) Introduces the techniques used in tuning loops employing PID control. Includes basic tuning theory and formulas. Examines open, closed, and visual loop tuning methods.

**Proving, Commissioning, and Troubleshooting a Loop** (17.5 Hours)
(Module ID 12404-16) Explains the three stages in readying a loop for operation: checking, proving, and commissioning. Examines the key ideas behind each step and stresses the differences. Explores troubleshooting techniques and methodologies, with an emphasis on their use during the three stages of readying a loop.

**Tuning Loops** (15 hours)
ISBN 978-0-13-448303-0
(Module ID 12405-16) Introduces the techniques used in tuning loops employing PID control. Includes basic tuning theory and formulas. Examines open, closed, and visual loop tuning methods.

---

**LEVEL 3 INSTRUMENTATION**

**Curriculum Notes**
- 150 Hours
- Revised: 2016, Third Edition
- Downloadable instructor resources are available.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Control Valves, Actuators, and Positioners** (15 Hours)
(Module ID 12207-16) Covers the construction and operation of various piping-system valves and actuators. Discusses the application and operation of valve positioners. Presents valve selection criteria and explains how to interpret valve and actuator markings and nameplate information.

**Detectors, Secondary Elements, Transducers, and Transmitters** (25 Hours)
(Module ID 12205-16) Introduces instrumentation devices that detect different process variables, devices that change the variable into a transmittable form, and devices that transmit the information to another device for control or informational purposes. Covers devices that sense flow, level, temperature, and pressure, along with various types of transducers and transmitters.

**Instrumentation Electrical Circuitry** (25 Hours)
(Module ID 12305-16) Describes various types of series and parallel circuits; resistance, inductance, and capacitance in AC circuits; DC power supplies; analog and digital signals; and common applications of electrical and electronic circuitry.

**Relays and Timers** (10 Hours)
(Module ID 12208-16) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

**Switches and Photoelectric Devices** (10 Hours)
(Module ID 12209-16) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

**Terminating Conductors** (20 Hours)
(Module ID 12307-16) Explains the methods, procedures, and standards used to terminate and test common types of conductors utilized in electrical and electronic wiring applications.

**Grounding and Shielding of Instrumentation Wiring** (10 Hours)
ISBN 978-0-13-448291-0
(Module ID 12206-16) Teaches the basic concepts of grounding and shielding, including wire and cable identification. Defines various types of noise that can be induce into instrumentation wiring and describes the methods used to reduce or eliminate it.

**Process Control Theory** (25 Hours)
(Module ID 12204-16) Discusses the principles of process control and how various types of control loops are applied. Discusses ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

**Controllers** (10 Hours)
(Module ID 12205-16) Covers the theory of operation and the application of common process controllers, including both pneumatic and electronic devices.

**LEVEL 4 INSTRUMENTATION**

**Curriculum Notes**
- 165 Hours
- Revised: 2016, Third Edition
- Downloadable instructor resources are available.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Instrument Calibration and Configuration** (60 Hours)
(Module ID 12402-16) Introduces the basic concepts of calibration, including the three- and five-point methods. Addresses pneumatic, analog, and smart instrumentation calibration methods. Also covers other process control devices that require calibration.

**Proving, Commissioning, and Troubleshooting a Loop** (17.5 Hours)
(Module ID 12404-16) Explains the three stages in readying a loop for operation: checking, proving, and commissioning. Examines the key ideas behind each step and stresses the differences. Explores troubleshooting techniques and methodologies, with an emphasis on their use during the three stages of readying a loop.

**Tuning Loops** (15 hours)
ISBN 978-0-13-448303-0
(Module ID 12405-16) Introduces the techniques used in tuning loops employing PID control. Includes basic tuning theory and formulas. Examines open, closed, and visual loop tuning methods.

---

Continued on following page
Digital Logic Circuits (15 Hours)
ISBN 978-0-13-448305-4
(Module ID 12401-16) Introduces the basic ideas of digital electronics. Presents gates, combination logic, and truth tables. Addresses memory devices, counters, and arithmetic circuits as well as the numbering systems commonly used in digital systems.

Programmable Logic Controllers (12.5 Hours)
(Module ID 12406-16) Introduces PLCs and their uses in industrial control. Includes hardware components, applications, communications, number systems, and programming methods.

Distributed Control Systems (15 Hours)
(Module ID 12407-16) Surveys DCS technologies, including an overview of their development. Discusses key components, fieldbuses, servers, and human-machine interfaces. Also introduces maintenance and the increasingly important aspect of DCS security.

Analyzers and Monitors (30 Hours)
(Module ID 12409-16) Introduces the key concepts of chemistry, with an emphasis on their application in instrumentation. Explains crucial physical and chemical properties of matter. Discusses the different analytical methods used in industry to assess processes. Includes pH, conductivity, ORP, gas analysis, and particulate counts. Explores specific instruments and techniques.
**Tools and Equipment of the Trade (10 Hours)**
(Module ID 30103-11) Identifies safety tools and equipment. Describes the proper use of handheld power tools. Identifies power sources for ironworking tools.

**Fastening (5 Hours)**
(Module ID 30104-11) Explains how to recognize A-325 and A-490 bolts, washers, and nuts. Describes how to correctly tension bolts and explains procedures for calibrated wrench and turn-of-nut tightening methods.

**Mobile Construction Cranes (10 Hours)**
(Module ID 30105-11) Identifies common lifting equipment and construction cranes. Describes how to use crane manuals, perform record keeping, and follow safety requirements. Provides procedures for assembling construction cranes.

**Rigging Equipment (10 Hours)**
(Module ID 30106-11) Describes the use and inspection of equipment and hardware used in rigging. Describes slings and explains how to determine sling capacities and angles. Covers the selection and inspection of rigging equipment, including block and tackles, chain hoists, come-alongs, jacks, and tuggers.

**Rigging Practices (15 Hours)**
(Module ID 30107-11) Identifies the site and environmental hazards associated with rigging. Explains how to attach rigging hardware for routine lifts and identify the components of a lift plan. Describes how to perform sling tension calculations and determine the weight of beams and basic weight estimation.

**Trade Drawings One (12.5 Hours)**
ISBN 978-0-13-215103-0
(Module ID 30108-11) Identifies the materials used in steel-framed buildings. Explains how to read basic structural blueprints.

**Structural Ironworking One (7.5 Hours)**
(Module ID 30109-11) Identifies the types of construction that utilize structural steel, the components of the structures, and the process involved in erecting a steel structure. Explains the principles of structural stresses and the requirements of bolted connections.

**Plumbing, Aligning, and Guying (5 Hours)**
(Module ID 30110-11) Describes the purpose and function of aligning and plumbing steel structures, the tools that are used, and the procedures for performing the plumbing and aligning. Identifies and explains column base and baseplate components and foundation failures.

**Oxyfuel Cutting (17.5 Hours)**
(Module ID 29102-09; from Welding Level One, Fourth Edition) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevelling, washing, and gouging.

**Introduction to Arc Welding (22.5 Hours)**
(Module ID 30111-11) Identifies welding equipment and processes. Describes safety precautions associated with arc welding. Explains how to identify weld joints, their dimensions, and applications from welding symbols and drawings. Describes how to set up and use SMAW equipment and explains the governing welding codes.

**Weld Quality**
(Module ID 30112-11) Identifies common welding equipment and processes. Describes safety precautions associated with arc welding. Explains how to identify weld joints, their dimensions, and applications from welding symbols and drawings. Describes how to set up and use SMAW equipment and explains the governing welding codes.

**Position Arc Welding (20 Hours)**
(Module ID 30202-11) Identifies and explains weld joints, weld positions, and open V-butt welds. Describes how to prepare arc welding equipment and how to make flat welds, horizontal welds, vertical welds, and overhead welds.

**Forklifts (17.5 Hours)**
(Module ID 30203-11) Identifies the components of forklifts and the corresponding hand signals. Explains safe practices and how to perform inspections. Covers how to read load charts and how to operate fork lifts.
Intermediate Rigging (10 Hours)
(Module ID 38201-11; from Intermediate Rigging, First Edition)
Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

Steel Joists and Joist Girders (15 Hours)
(Module ID 30206-11) Identifies the types of joists, methods of end support, and the types of bridging available. Explains how to locate the inworking information on framing plans and describes steel joist installation procedures. Describes the conditions necessary and the benefits of panelizing bar joist.

Survey Equipment Use and Care Two (15 Hours)
(Module ID 30204-11) Introduces types of structural plans and describes the information included on each type. Presents the sequences of erection plans for each step of construction and identifies the symbols and abbreviations used on drawings.

Steel Joists and Joist Girders (15 Hours)
(Module ID 30205-11) Describes pre-erection activities for structural steel. Provides procedures for erecting bearing devices, columns, beams, girders, joists, bracing, and bridging.

Structural Ironworking Two (30 Hours)
ISBN 978-0-13-266453-0
(Module ID 30203-11) Introduces the stud welding process, stud and reinforcing bar. Provides step-by-step instructions for performing air-carbon arc welding and gouging activities.

Demolition (10 Hours)
(Module ID 30310-12) Identifies the tools used to remove rivets and explains the demolition skills required to safely remove structural steel beams, steel columns, and steel reinforced concrete columns.

Miscellaneous/Ornamental Ironworking (5 Hours)
ISBN 978-0-13-292289-0
(Module ID 30303-12) Describes the fabrication and uses of precast concrete elements and cast-in-place tilt-up wall systems. Focuses on rigging practices associated with these two distinct construction methods and the role of ironworkers in their installation.

Advanced Rigging (10 Hours)
(Module ID 30301-11; from Advanced Rigging, First Edition) Explains how load weight and center of gravity affect lifting and crane stability. Load calculations for multi-crane lifts are presented, along with the application of equalizer beams. The movement of loads up an inclined plane and the line pull required are examined in detail. The module concludes with guidance in the rigging and handling of rabor bundles.

Pre-Engineered Systems (5 Hours)
(Module ID 30312-12) Provides general information and procedures for the installation and attachment of gratings and checkered plate. Describes the rigging methods associated with grating and checked plate.

Structural Ironworking Three (10 Hours)
(Module ID 30312-12) Describes the equipment and uses used in structural steel beams, steel columns, and steel reinforced concrete columns. Provides procedures for erecting bearing devices, columns, beams, girders, joists, bracing, and bridging.

Tower Cranes (15 Hours)
ISBN 978-0-13-266446-0
(Module ID 30207-11) Describes safe practices when erecting steel using tower cranes. Explains the difference between erecting steel with a mobile crane versus a tower crane. Describes tower crane hand and verbal signals.

Trainee Guide: $99.99
(Module ID 30204-11) Introduces types of structural plans and describes the information included on each type. Presents the sequences of erection plans for each step of construction and identifies the symbols and abbreviations used on drawings.

Intermediate Rigging (10 Hours)
(Module ID 38201-11; from Intermediate Rigging, First Edition)
Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

Steel Joists and Joist Girders (15 Hours)
(Module ID 30206-11) Identifies the types of joists, methods of end support, and the types of bridging available. Explains how to locate the inworking information on framing plans and describes steel joist installation procedures. Describes the conditions necessary and the benefits of panelizing bar joist.

Survey Equipment Use and Care Two (15 Hours)
(Module ID 30204-11) Introduces types of structural plans and describes the information included on each type. Presents the sequences of erection plans for each step of construction and identifies the symbols and abbreviations used on drawings.
Masonry

L1 MASONRY

Curriculum Notes

• 197.5 Hours (includes Core)
• Revised: 2013, Fourth Edition
• Downloadable instructor resources are available.
• A Spanish translation of the third edition is available.

Please see NCCER’s online catalog for more information.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Masonry (12.5 Hours)
(Module ID 28101-13) Covers basic masonry materials, tools, techniques, and safety precautions. Explains how to mix mortar by hand and lay masonry units. Also describes the skills, attitudes, and abilities of successful masons.

Masonry Safety (15 Hours)
(Module ID 28106-13) Describes how to identify the common causes of accidents and the hazards associated with masonry tools, equipment, mortar, and concrete. Focuses on using personal protective equipment, working safely from elevated surfaces, properly using masonry tools and equipment, and handling masonry materials safely.

Masonry Tools & Equipment (15 Hours)
(Module ID 28102-13) Describes a variety of hand tools, measuring tools, mortar equipment, power tools and equipment, and lifting equipment that masons use on the job, and explains how to use these tools correctly and safely. Provides instructions for assembling and disassembling scaffolds.

Mortar (10 Hours)
(Module ID 28104-13) Explains the types and properties of mortar and the materials used in the mixture, including admixtures; provides instructions for mixing mortar by machine; and describes how to properly apply and store mortar.

Masonry Units and Installation Techniques (60 Hours)
(Module ID 28105-13) Covers characteristics of block and brick; how to set up, lay out, and bond block and brick; how to cut block and brick; how to lay and tool block and brick; and how to clean block and brick once they have been laid. Describes masonry reinforcements and accessories used to lay block and brick professionally and safely.

Residential Plans and Drawing Interpretation (12.5 Hours)
(Module ID 28201-14) Explains how to work with residential plans and construction drawings and convert that information into action on the job. Describes the organization and format of plans, dimensioning and scaling, and estimating materials quantities from information on the plans.

Residential Masonry (25 Hours)
(Module ID 28202-14) Covers the construction techniques for residential and small structure foundations, steps, patios, decks, chimneys, and fireplaces. Describes work activities that the mason must perform, as well as those that tie into the masonry work.

Reinforced Masonry (20 Hours)
(Module ID 28203-14) Focuses on the use of grout and other types of reinforcement, such as reinforcing steel, to strengthen and support masonry structures. Describes the locations where grout can be used and the techniques for placement. Discusses the use and application of various types of reinforced masonry elements, such as rebar and bond beam lintels.

Masonry Openings and Metalwork (20 Hours)
(Module ID 28204-14) Introduces types of metal components, including metal rods, joint reinforcements, plates, anchors, fasteners, and hollow metal frames for doors and windows, and explains how they are installed.

Advanced Laying Techniques (40 Hours)
(Module ID 28205-14) Describes the construction of masonry wall systems, weep vents, and joints. Includes safety requirements and interaction with structural components.

Effects of Climate on Masonry (20 Hours)
(Module ID 28206-14) Describes materials and techniques used to apply insulation and methods of moisture control as they relate to the mason’s trade. Includes hot- and cold-weather considerations.

Construction Inspection and Quality Control (15 Hours)
(Module ID 28207-14) Introduces the quality control requirements for masonry construction. Presents procedures for inspection and testing of masonry materials and finished masonry construction.

Level 3 Masonry

Curriculum Notes

- 200 Hours
- Downloadable instructor resources are available.

PAPERBACK ISBN

DIGITAL ISBN
NCCERconnect Access Card: $99.99 978-0-13-684941-4
NCCERconnect + Trainee Guide $129.99: 978-0-13-787914-4

Modules
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Elevated Masonry (15 Hours)
(Module ID 28301-14) Describes how to work safely and efficiently on elevated structures. Explains how to maintain a safe work environment, ensure protection from falls, how to brace walls from outside forces, and how to identify common types of elevated walls. Stresses safety around equipment such as cranes and hoists.

Specialized Materials and Techniques (60 Hours)
(Module ID 28302-14) Introduces unique types of masonry situations that won’t be encountered on every job, including sound-barrier walls, arches, and the use of acid brick, refractory brick, and glass block. Describes the handling and construction of these materials, and introduces the intricacies of each.

Repair and Restoration (20 Hours)
(Module ID 28303-14) Details techniques for identifying and repairing common masonry problems of weathering, settling, stain, etc. Explains tuckpointing, the removal of efflorescence and stains, and crack repair. Includes sections on how to repair foundation walls, water intrusion, and localized problems, as well as fireplace and chimney repair.

Stone Masonry (15 Hours)
(Module ID 28308-14) Focuses on the application of natural stone in masonry construction. Describes types of stone and how stone is cut, finished, and stored. Discusses equipment and tools for handling stone. Details how to estimate and install stone using anchors and mortars and explains how to install stone veneers.

Fundamentals of Crew Leadership (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Discusses the role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Commercial Drawings (25 Hours)
(Module ID 28304-14) Explains how to read and identify drawings for commercial structures using previous experience from structural drawings as a baseline. Describes requirements for these drawings, as well as how to interpret and create plans for architectural, structural, and shop drawings.

Estimating (25 Hours)
(Module ID 28305-14) Describes how to estimate building materials, such as brick, block, grout, mortar, joint reinforcement, and masonry ties. Details multiple methods for estimating, as well as how to estimate for masonry elements such as openings and lintels.

Site Layout — Distance Measurement and Leveling (20 Hours)
(Module ID 28306-14) Covers the techniques needed to produce and read site plans and topographic maps. Describes the use of measuring devices such as tapes, range poles, plumb bobs, total stations, leveling instruments, and field notes. Also discusses the construction of batter boards and how to ensure correct measurements.

Repair and Restoration (20 Hours)
(Module ID 28303-14) Details techniques for identifying and repairing common masonry problems of weathering, settling, stain, etc. Explains tuckpointing, the removal of efflorescence and stains, and crack repair. Includes sections on how to repair foundation walls, water intrusion, and localized problems, as well as fireplace and chimney repair.

Specialized Materials and Techniques (60 Hours)
(Module ID 28302-14) Introduces unique types of masonry situations that won’t be encountered on every job, including sound-barrier walls, arches, and the use of acid brick, refractory brick, and glass block. Describes the handling and construction of these materials, and introduces the intricacies of each.

Commercial Drawings (25 Hours)
(Module ID 28304-14) Explains how to read and identify drawings for commercial structures using previous experience from structural drawings as a baseline. Describes requirements for these drawings, as well as how to interpret and create plans for architectural, structural, and shop drawings.

Estimating (25 Hours)
(Module ID 28305-14) Describes how to estimate building materials, such as brick, block, grout, mortar, joint reinforcement, and masonry ties. Details multiple methods for estimating, as well as how to estimate for masonry elements such as openings and lintels.
## L1 MECHANICAL INSULATING

### Orientation to the Trade (5 Hours)
(Module ID 19101-18) Provides an overview of the insulation industry, including how and why insulation is used, safety factors related to insulation, and common insulation-specific tools.

### Material Handling, Storage, and Distribution (2.5 Hours)
(Module ID 19104-18) Covers receiving, stacking, and storage of insulation materials, as well as material movement on the jobsite.

### Characteristics of Pipe (5 Hours)
ISBN 978-0-13-448318-4
(Module ID 19105-18) Provides an overview of different pipe types and their uses, pipe sizing methodology, and the relationship between pipe sizes and insulation sizes.

### Plumbing Systems (7.5 Hours)
ISBN 978-0-13-448319-1
(Module ID 19209-18) Covers cold and hot water plumbing systems and insulation requirements for different types of plumbing systems.

### Rigid Foam and Cellular Glass Insulation (10 Hours)
(Module ID 19210-18) Covers cold and hot water plumbing systems and insulation requirements for different types of plumbing systems.

### Vapor Retarders and Insulation Coatings (10 Hours)
(Module ID 19104-18) Discusses vapor-sealed blanket insulation and the characteristics of ASJ jacketing.

### Insulating Pipe Fittings, Valves, and Flanges (10 Hours)
(Module ID 19207-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.

### Calcium Silicate/Expanded Perlite Pipe Insulation (20 Hours)
(Module ID 19305) Covers the identification of steam and condensate piping and describes steam and process water systems and their components.

### Rigid Foam and Cellular Glass Insulation (25 Hours)
(Module ID 19206) Covers the proper use of tools; handling and installation of rigid foam insulation; measuring, cutting, installing, and sealing rigid foam plastic and cellular glass insulation; cryogenic installation; expansion joints; contraction joints; and vapor stops.

### Chilled and Hot Water Heating Systems (30 Hours)
(Module ID 19106-18) Addresses the need to avoid the intrusion of water vapor into porous insulation and vapor retardant materials available to mechanical insulators. Trainees will also learn how to apply vapor-retardant mastics and membranes for common insulating scenarios.

### Insulating Pipe Fittings, Valves, and Flanges (30 Hours)
(Module ID 19207-18) Explains insulation requirements for fittings, valves, and flanges. Provides tips for professional and economical installation.

### Calcium Silicate/Expanded Perlite Pipe Insulation (35 Hours)
(Module ID 19305) Covers the identification of steam and condensate piping and describes steam and process water systems and their components.

### Rigid Foam and Cellular Glass Insulation (40 Hours)
(Module ID 19206) Covers the proper use of tools; handling and installation of rigid foam insulation; measuring, cutting, installing, and sealing rigid foam plastic and cellular glass insulation; cryogenic installation; expansion joints; contraction joints; and vapor stops.

### Chilled and Hot Water Heating Systems (45 Hours)
(Module ID 19210-18) Covers chilled and hot water heating and dual temperature systems, including the types of pipe and equipment common to each type of system. Explains the types of insulation required by each type of system.
Mechanical Insulating Level 2 (continued)

**Industrial Boiler Systems** (7.5 Hours)
(Module ID 19306) Describes boilers and related equipment, and their insulation requirements.

**Mineral Wool Insulation** (12.5 Hours)
(Module ID 19205) Describes how to measure, cut, and score mineral wool insulation. Discusses attachments used on mineral wool, installation methods, sealing requirements, and how to use pin welding equipment.

---

**Jacketing Systems** (12.5 Hours)
(Module ID 19313) Describes the purposes and the types of insulation jacketing available for mechanical systems. This module also explains how to work with various kinds of organic, polymeric, and other types of jacket not made from rigid sheet metal.

**Jacketing Fabrication — Pipe and Fittings**
(42.5 Hours)
(Module ID 19310) Covers the identification and applications of pipes and pipe fittings and describes types of pipe and fitting jacketing, along with layout installation procedures and securements.

**Jacketing Fabrication — Vessels and Equipment**
(25 Hours)
(Module ID 19311) Covers the identification of vessel and equipment jacketing, along with layout, fabrication, installation procedures, and securements.

**Removable and Reusable Flexible Insulation Covers** (12.5 Hours)
(Module ID 19314) Provides a detailed introduction to removable and reusable flexible insulation covers, and explains the construction and installation of commercially-fabricated and kit insulation covers.

**Specialized Insulation Systems** (5 Hours)
(Module ID 19308) Describes special-application insulation systems, including low-temperature and prefabricated panels; refractory insulation; soft pads and pre-shaped removable covers; preinsulated systems; spray, foam, and pour-in-place insulation; fire stops; noise and sound control systems; and cryogenic applications.

**Fundamentals of Crew Leadership** (22.5 Hours)
(Module ID 46101) The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating.

---

**L3 MECHANICAL INSULATING**

**Curriculum Notes**
- 152.5 Hours
- Updated in 2018.

**PAPERBACK**
ISBN

---

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Board and Block Insulation** (17.5 Hours)
(Module ID 19207) Covers the measuring requirements of board and block insulation; scoring, beveling, and cutting methods; and how to install board and block insulation on flat or curved surfaces and on large diameter tanks.

**Sheet-Metal Lagging** (15 Hours)
(Module ID 19312) Describes the identification and application of common sheet metal tools, discusses fabrication and installation methods, and covers flashing and sealing techniques.
Millwright

L1 MILLWRIGHT

Curriculum Notes

- 162.5 Hours (includes Core)
- Revised: 2021, Fourth Edition
- Downloadable instructor resources are available.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to the Millwright Craft (5 Hours)
(Module ID 15101) Presents the history of the trade and discusses career paths for millwrights. Describes environments and types of work associated with the millwright trade.

Millwright Hand Tools (17.5 Hours)
(Module ID 15102) Introduces hand tools used by millwrights. Explains hand tool safety and covers the methods for selecting, inspecting, using, and maintaining these tools.

Fasteners and Anchors (12.5 Hours)
(Module ID 15103) Identifies fasteners and anchors used by millwrights, including their applications and installation procedures.

Millwright Power Tools (22.5 Hours)
(Module ID 15205) Introduces power tools used by millwrights and procedures for using, caring for, and maintaining these tools.

Setting Baseplates and Soleplates (20 Hours)
(Module ID 15207) Describes how to set a machine baseplate and soleplate while guaranteeing alignment with other equipment.

Rigging Practices (15 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Teaches use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches.

Field Sketching (10 Hours)
ISBN 978-0-13-765400-0
(Module ID 15202) Elective - Teaches the basic skills needed to make a good field sketch to convey information about how parts should be made or assembled.

To Order Call: 1-800-922-0579 ©NCCER
Continued on following page
Compressors and Compressor Maintenance (20 Hours)
(Module ID 15406) Introduces compressors and the troubleshooting and maintenance procedures associated with compressors.

Introduction to Pumps (20 Hours)
(Module ID 15404) Describes common pumps and their principles of operation. Explains centrifugal, rotary, reciprocating and metering pumps. Describes net positive suction head and cavitation.

Troubleshooting and Repairing Pumps (17.5 Hours)
(Module ID 15403) Describes inspecting, troubleshooting, assembling, and disassembling pumps. Explains installing pumps, and preparing them for startup. Discusses shutdown, repair, and removal of pumps from the system.

Couplings and Alignment Fundamentals (15 Hours)
(Module ID 15307) Identifies types of couplings and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

Troubleshooting and Repairing Gearboxes (15 Hours)
(Module ID 15408) Explains repair and maintenance of pneumatics system components. Describes troubleshooting processes and methods, including pressure sensors and flow sensors.

Advanced Mechanical Drawings (17.5 Hours)
(Module ID 15503) Describes the use of drawing sets to obtain information about a system. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

Vibration Analysis (10 Hours)
(Module ID 15509) Explains the causes of vibration and the procedures and types of equipment used in vibration analysis. Describes the equipment used for vibration testing and monitoring. Describes field machine balancing.

L4 MILLWRIGHT
LEVEL 4

Curriculum Notes
• 160 Hours (required); 47.5 Hours (elective)

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Basic Pneumatic Systems (7.5 Hours)
(Module ID 15407) Explains pneumatic system components and compressed-air treatment. Introduces equipment auxiliary and special-application equipment used with compressors and with tools.

Compressors and Compressor Maintenance (20 Hours)
(Module ID 15406) Introduces compressors and the troubleshooting and maintenance procedures associated with compressors.

Introduction to Pumps (20 Hours)
(Module ID 15404) Describes common pumps and their principles of operation. Explains centrifugal, rotary, reciprocating and metering pumps. Describes net positive suction head and cavitation.

Troubleshooting and Repairing Pumps (17.5 Hours)
(Module ID 15403) Describes inspecting, troubleshooting, assembling, and disassembling pumps. Explains installing pumps, and preparing them for startup. Discusses shutdown, repair, and removal of pumps from the system.

Couplings and Alignment Fundamentals (15 Hours)
(Module ID 15307) Identifies types of couplings and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

Troubleshooting and Repairing Gearboxes (15 Hours)
(Module ID 15408) Explains repair and maintenance of pneumatics system components. Describes troubleshooting processes and methods, including pressure sensors and flow sensors.

Advanced Mechanical Drawings (17.5 Hours)
(Module ID 15503) Describes the use of drawing sets to obtain information about a system. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.

Vibration Analysis (10 Hours)
(Module ID 15509) Explains the causes of vibration and the procedures and types of equipment used in vibration analysis. Describes the equipment used for vibration testing and monitoring. Describes field machine balancing.

Optical Layout and Alignment (15 Hours)
(Module ID 15505) Describes types of turbines and their components. Describes the operation and common applications of particular types, including gas, steam, and water turbines.

Preventive and Predictive Maintenance (10 Hours)
(Module ID 15508) Explains preventive and predictive maintenance programs. Provides information on nondestructive testing, and introduces the basic techniques for nondestructive evaluation. Describes lubricant analysis, and acoustic, infrared, and vibration testing.

Continued on following page
Maintaining and Repairing Turbine Components
(12.5 Elective Hours)
(Module ID 15506) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.

Crane Safety and Emergency Procedures
(25 Elective Hours)
(Module ID 21106) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Communications (10 Elective Hours)
(Module ID 53101) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.
Painting

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Careers in the Painting Trade (5 Hours)
(Module ID 07101) Presents a brief history of the painting trade. Covers career opportunities, from apprenticeship/helper to managerial/business-related work. Describes the characteristics of the successful tradesperson, including productivity, appearance, personal hygiene, and dependability.

Safety (10 Hours)
(Module ID 07102) Provides an overview of construction site hazards and safety precautions for those in the painting trade. Covers methods of rigging and care of ladders, scaffolds, swing devices, and other equipment.

Ladders, Scaffolds, Lifts, and Fall Protection (10 Hours)
(Module ID 07103) Covers methods of erecting, using and maintaining ladders, scaffolds, and lifts. Discusses fall protection equipment and safety practices used when working on ladders, scaffolds, and lifts.

Identifying Surface/Substrate Materials and Conditions (5 Hours)
(Module ID 07104) Explains how to identify types of surfaces used in construction including wood, metal, masonry/concrete, plaster/drywall and synthetic substrates. Also discusses how to identify new, aged, or previously coated surface conditions of substrates and coatings.

Protecting Adjacent Surfaces (5 Hours)
(Module ID 07105) Describes the tools, materials, and methods used for protecting adjacent surfaces and areas prior to surface preparation, paint spraying, etc.

Basic Surface Preparation (15 Hours)
(Module ID 07106) Covers the tools, materials, and methods used for cleaning, repairing, and penetrating surfaces/substrates in preparation for coating. Describes basic methods used for surface preparation of wood, metal, plaster/drywall, cementitious, and synthetic surfaces/substrates.

Coatings Two (22.5 Hours)
(Module ID 07210) Introduces the unique properties of high-performance coatings. Includes safety and health considerations, surface preparation, application, testing, and inspection.

Spray Painting (Conventional, Airless and HVLP) (32.5 Hours)
(Module ID 07211) Covers the design and function of conventional, airless, and HVLP spraying equipment, including procedures for the safe operation and maintenance of typical equipment.

Introduction to Paints and Coatings (10 Hours)
(Module ID 07108) Describes the basic ingredients and film-forming processes common to all paints and coatings. Covers paint systems and functional categories of paints and coatings. Focuses on water-based alkyd paints and coatings.

Brushing and Rolling Paints and Coatings (15 Hours)
(Module ID 07109) Covers the types and selection of brushes, rollers, pads, mitts, and related accessories used for applying paints and coatings. Includes techniques used for brushing and rolling paints and coatings on interior and exterior surfaces. Also recommends maintenance and storage methods.

Chemical Cleaning and Stripping (7.5 Hours)
(Module ID 07203) Describes chemical cleaners and strippers and how they are used to clean and/or remove unwanted material from substrates.

Low-Pressure Water Cleaning (7.5 Hours)
(Module ID 07204) Covers the design and function of low-pressure washing equipment, including procedures for the safe operation and maintenance of typical equipment.

Abrasive Blasting (7.5 Hours)
(Module ID 07205) Covers the basic design and function of abrasive blasting equipment, including general procedures for its use, related industry standards, and safety and health considerations.

Drywall Finishing and Patching (25 Hours)
(Module ID 07206) Covers the materials and procedures used for drywall finishing and patching. Emphasizes techniques for finishing and patching drywall, including the use and care of tools, equipment and supplies, and safety.

Stains (7.5 Hours)
(Module ID 07207) Describes the different classes and/or kinds of stains, including their composition, selection for use, and application considerations.

Sealants and Repair/Fillers (5 Hours)
(Module ID 07107) Describes the characteristics of common sealants and fillers. Covers guidelines for selecting sealants/fillers and the tools and methods used to apply them to substrates.

Clear Finishes (7.5 Hours)
(Module ID 07208) Introduces the composition, uses, and application of clear finishes, including varnishes, lacquers, shellacs, and urethanes.

Wood Finishing (22.5 Hours)
(Module ID 07209) Presents the science and technology of wood and wood products. Provides procedures and techniques for wood surface preparation and the application of clear finishes to various kinds of wood.

Coating Types (5 Hours)
(Module ID 07210) Introduces the unique properties of high-performance coatings. Includes safety and health considerations, surface preparation, application, testing, and inspection.

Spray Painting (Conventional, Airless and HVLP) (32.5 Hours)
(Module ID 07211) Covers the design and function of conventional, airless, and HVLP spraying equipment, including procedures for the safe operation and maintenance of typical equipment.

Continued on following page
Painting Level 3

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Painting Failures and Remedies Two (7.5 Hours)**
(Module ID 07301) Explains how to recognize and remedy paint/coating failures caused by improper preparation and application of coatings, as well as coating discoloration.

**Surface Preparation One (15 Hours)**
(Module ID 07404) Covers the tools, materials, and methods used for cleaning and preparing surfaces/substrates by solvent cleaning, hand tool cleaning, and power tool cleaning methods. Bases content on the methods and procedures specified by the following SSPC/NACE standards: SSPC-SP1, SSPC-SP2, SSPC-SP3, SSPC-SP11, and SSPC-SP13/NACE 6.

**Surface Preparation Two (20 Hours)**
(Module ID 07405) Covers the tools, materials, and methods used for cleaning and preparing surfaces/substrates using various types of abrasive blasting equipment. Bases content on the methods and procedures specified by the following SSPC/NACE standards: SSPC-SP5/NACE 1, SSPC-SP10/NACE 2, SSPC-SP6/NACE 3, SSPC-SP7/NACE 4.

**Surface Preparation Three (7.5 Hours)**
(Module ID 07406) Covers the tools, materials, and methods used for cleaning and preparing surfaces/substrates by chemical stripping, pickling, high-pressure water-jetting, and ultra high-pressure water jetting. Bases content on the methods and procedures specified by the following SSPC/NACE standards: SSPC-SP8 and SSPC-SP12/NACE 5.

**Industrial Coatings (12.5 Hours)**
(Module ID 07407) Covers the basic ingredients and film-forming processes common to all paints and coatings and describes paint systems and the different functional categories of paints and coatings. Introduces the unique properties, safety and health considerations, and surface preparation and application of high-performance coatings used to protect substrates for industrial applications.

**Coatings Three (15 Hours)**
(Module ID 07303) Describes unique properties, safety and health considerations, surface preparation, application, and testing, and inspection of high-performance coatings used primarily to protect substrates for commercial or light industrial applications.

**Color and Tinting (10 Hours)**
(Module ID 07304) Presents the theory and definition of color. Describes procedures for mixing, tinting, and matching colors. The use of the color wheel and the Munsell, Federal Standard 595B, and other color systems are also explained.

**Decorative (Faux) Finishes (22.5 Hours)**
(Module ID 07305) Describes unique properties, safety and health considerations, surface preparation, application, and testing, and their remedies. Focuses on the nature of the materials covered, along with the tools and methods used for applying them on steel, concrete, and other construction substrates.

**Spraying with Special Devices (20 Hours)**
(Module ID 07309) Covers the design and function of texture, cold roof coating, electrostatic, and plural component spraying equipment. Includes procedures for the safe operation and maintenance of typical equipment.

**Job Supervision, Planning, and Control (15 Hours)**
(Module ID 07302) Covers skills and leadership traits associated with the successful supervisor, including how to supervise and motivate employees, how to estimate a job, the use of contract documents, and methods for controlling materials and tools/equipment.

**Coatings Three (15 Hours)**
(Module ID 07303) Describes unique properties, safety and health considerations, surface preparation, application, and testing, and inspection of high-performance coatings used primarily to protect substrates for commercial or light industrial applications.

**Color and Tinting (10 Hours)**
(Module ID 07304) Presents the theory and definition of color. Describes procedures for mixing, tinting, and matching colors. The use of the color wheel and the Munsell, Federal Standard 595B, and other color systems are also explained.

**Decorative (Faux) Finishes (22.5 Hours)**
(Module ID 07305) Describes unique properties, safety and health considerations, surface preparation, application, and testing, and their remedies. Focuses on the nature of the materials covered, along with the tools and methods used for applying them on steel, concrete, and other construction substrates.

**Surface Preparation One (15 Hours)**
(Module ID 07404) Covers the tools, materials, and methods used for cleaning and preparing surfaces/substrates by solvent cleaning, hand tool cleaning, and power tool cleaning methods. Bases content on the methods and procedures specified by the following SSPC/NACE standards: SSPC-SP1, SSPC-SP2, SSPC-SP3, SSPC-SP11, and SSPC-SP13/NACE 6.

**Surface Preparation Two (20 Hours)**
(Module ID 07405) Covers the tools, materials, and methods used for cleaning and preparing surfaces/substrates using various types of abrasive blasting equipment. Bases content on the methods and procedures specified by the following SSPC/NACE standards: SSPC-SP5/NACE 1, SSPC-SP10/NACE 2, SSPC-SP6/NACE 3, SSPC-SP7/NACE 4.

**Surface Preparation Three (7.5 Hours)**
(Module ID 07406) Covers the tools, materials, and methods used for cleaning and preparing surfaces/substrates by chemical stripping, pickling, high-pressure water-jetting, and ultra high-pressure water jetting. Bases content on the methods and procedures specified by the following SSPC/NACE standards: SSPC-SP8 and SSPC-SP12/NACE 5.

**Industrial Coatings (12.5 Hours)**
(Module ID 07407) Covers the basic ingredients and film-forming processes common to all paints and coatings and describes paint systems and the different functional categories of paints and coatings. Introduces the unique properties, safety and health considerations, and surface preparation and application of high-performance coatings used to protect substrates for industrial applications.

**Coatings Application and Equipment (25 Hours)**
(Module ID 07408) Covers equipment and methods used to apply coatings by the following methods: brushes and rollers, conventional sprayers, airless and air-assisted sprayers, high-volume low pressure (HVLP) sprayers, electrostatic sprayers, plural component proportioning equipment, wire flame and wire arc sprayers, and dry powder coating application process.

**Quality Inspections (15 Hours)**
(Module ID 07409) Introduces formal quality control tasks and procedures used to govern the quality and acceptance of work performed by those in the industrial painting industry. Also describes the methods, equipment, and test instruments used to perform tasks in accordance with the requirements of ASTM and SSPC/NACE standards governing quality control and quality assurance.

**Coatings Failures and Analysis (2.5 Hours)**
(Module ID 07410) Explains how to recognize failures of paints/coatings on exterior and interior substrates, causes of these failures, and their remedies. Focuses on the nature of the substrates, application procedures, and surface preparation.

**Specialty Materials (7.5 Hours)**
(Module ID 07411) Describes the characteristics and types of sealants and fillers commonly used in industrial application. Covers sealers and putties used in conjunction with tank and vessel reinforced lining systems, as well as fire resistant and fire retardant sealing materials. Gives guidelines for selecting the materials covered, along with the tools and methods used for applying them on steel, concrete, and other construction substrates.
Pipefitting

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Pipefitting Craft (5 Hours)
(Module ID 08101) Provides an overview of work performed by the pipefitter, as well as the responsibilities, career opportunities, safety principles associated with the pipefitting trade, and the types of pipes and tools pipefitters will encounter.

Pipefitting Hand Tools (20 Hours)
(Module ID 08102) Covers hand tool safety as well as procedures for selecting, inspecting, using, and maintaining hand tools used by pipefitters. Introduces the most common hand tools used in pipefitting, including pipe wrenches, pipe stands, pipe vises, levels, pipe fabrication tools, pipe bending tools, and pipe joining tools.

Pipefitting Power Tools (15 Hours)
(Module ID 08201) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, spool drawings, detail sheets, and orthographic drawings. Explains how to read and interpret various types of drawings as well as the symbology used to convey information.

Identifying and Installing Valves (20 Hours)
(Module ID 08203) Identifies different types of valves, including those that start and stop flow, regulate flow, regulate flow direction, and relieve pressure, and describes their installation as well as proper storage and handling procedures. Covers common valve operators and actuators.

Pipefitting Trade Math (15 Hours)
(Module ID 08204) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Threaded Pipe Fabrication (15 Hours)
(Module ID 08205) Describes the materials used in threaded piping systems. Explains how to determine pipe lengths between threaded pipe fittings, prepare the pipe and fittings for fit-up, and assemble the piping system. Includes how to calculate simple and rolling offsets.

Socket-Weld Pipe Fabrication (25 Hours)
(Module ID 08206) Describes the fittings and materials involved in socket-welds, interpreting drawings, determining pipe lengths between fittings, aligning pipe and fittings, and cutting out a socket weld to save the structure.

Butt-Weld Pipe Fabrication (37.5 Hours)
(Module ID 08207) Describes materials, fittings, drawings, calculating takeoffs, determining pipe lengths between fittings, beveling pipe, aligning components for welding, performing alignments, and cutting a butt weld to save the structure.

Oxyfuel Cutting (17.5 Hours)
(Module ID 29102) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, beveling, washing, and gouging.

Ladders and Scaffolds (12.5 Hours)
(Module ID 08105) Describes hazards and safety procedures governing the use of stepladders, extension ladders, fixed scaffolds, and rolling scaffolds. Includes general procedures for scaffold assembly and use.

Motorized Equipment One (10 Hours)
ISBN 978-0-13-580999-0
(Module ID 08106) Explains the safety factors, operator maintenance, and operating procedures associated with motorized equipment used on job sites. Covers electrical generators, air compressors, aerial lifts, forklifts, trenchers, backhoes, mobile cranes, and portable equipment including welding machines, pumps, and compactors.

Excavations (10 Hours)
(Module ID 08208) Explains soil and trenching hazards involved in excavations, as well as the use of shoring and shielding systems per OSHA standards, sloping requirements by soil type, and combined systems for trench reinforcement. Covers how to determine grade and elevation, how to use a laser level, and how to backfill.

Underground Pipe Installation (20 Hours)
(Module ID 08209) Explains pipe installation procedures and guidelines, including the procedures for cast iron, ductile iron, concrete, carbon steel, fiberglass, and thermoplastic pipe. Includes an introduction to horizontal directional drilling for pipe installation, and the use of a weak link for plastic pipe.

Pipefitting Level 3

L3 PIPEFITTING

Curriculum Notes
• 152.5 Hours
• Revised: 2021, Fourth Edition
• Downloadable instructor resources are available.

PAPERBACK

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Basic Rigging (7.5 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Discusses symbols, coordinates, control points, elevations, general arrangement drawings, and spool rigging operation, and the related Emergency Stop hand signal.

Rigging Practices (15 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Discusses symbols, coordinates, control points, elevations, general arrangement drawings, and spool rigging operation, and the related Emergency Stop hand signal.

Stress Relieving and Aligning (10 Hours)
(Module ID 08303) Discusses the purpose of stress relieving and covers thermal expansion in piping, temperature and metal structure, and stress relief for aligning pipe to rotating equipment.

Advanced Pipe Fabrication (50 Hours)
(Module ID 08402) Explains the use of ordinate tables and trigonometry in creating fittings and pipe assemblies for process applications. Details are provided on calculating piping offsets, fabricating miter turns, laying out and fabricating saddles and supports made out of pipe, and laying out laterals, y-tees, ninety-degree intersections, and supports without using references.

Advanced Trade Math (25 Hours)
(Module ID 08304) Covers the role of trigonometry in pipefitting, including the use of trigonometric functions, triangle calculations, determining angles, interpolation, and calculating takeouts and odd angles.

Motorized Equipment Two (70 Hours)
(Module ID 08305) Discusses the safe and proper use of scissors lifts, telescoping boom lifts, cable lifts, chain lifts, drawbored, and hydraulic torque tools.

Introduction to Aboveground Pipe Installation (25 Hours)
(Module ID 08306) Identifies various types of pipe, flanges, gaskets, and bolts. Covers the fabrication of gaskets, assembling and installing flanged and grooved pipe, fabricating and installing pipe spools, and installing pipe sleeves and floor penetrations.

Field Routing and Vessel Trim (15 Hours)
ISBN 978-0-13-748742-4
(Module ID 08307) Explains how to secure the work area and determine field run specifications, load weights for erection equipment, and support needs. Provides details on evaluating the run, assembling the field run, installing test blinds, working with instruments, and how to erect vessel trim.

Pipe Hangers and Supports (25 Hours)
(Module ID 08308) Explains the role of pipe hangers and supports, with details on clevises, saddles, U-bolts, clamps, turnbuckles, rods, welded beam attachments, spring can supports, travel stops, and snubbers.

Testing Piping Systems and Equipment (20 Hours)
(Module ID 08309) Discusses the importance of safety and following procedures with testing and inspections. Topics include pretest requirements, visual weld inspections, service flow tests, hard pressure tests, hydrostatic tests, and steam blow tests.

L4 PIPEFITTING

Curriculum Notes
• 175 Hours (required); 197.5 Hours (with Fundamentals of Crew Leadership elective)
• Revised: 2021, Fourth Edition
• Downloadable instructor resources are available.

PAPERBACK

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Advanced Blueprint Reading (50 Hours)
(Module ID 08401) Introduces drawings used by pipefitters in the shop and in the field. Explains how to read and interpret P&IDs, general arrangement drawings, isometric drawings, and spool sheets. Discusses symbols, coordinates, control points, elevations, and step-by-step instructions for following a line of pipe through a set of drawings.

Advanced Rigging and Pipefitting Practices (50 Hours)
(Module ID 08402) Explains the use of ordinate tables and trigonometry in creating fittings and pipe assemblies for process applications. Details are provided on calculating piping offsets, fabricating miter turns, laying out and fabricating saddles and supports made out of pipe, and laying out laterals, y-tees, ninety-degree intersections, and supports without using references.

Stress Relieving and Aligning (10 Hours)
(Module ID 08303) Discusses the purpose of stress relieving and covers thermal expansion in piping, temperature and metal structure, and stress relief for aligning pipe to rotating equipment.

In-Line Specialties (20 Hours)
(Module ID 08405) Presents methods of safely working with specialty devices used in pipelines, including: snubbers, ball joints, bleed rings, drop legs, steam traps, expansion joints, filters, strainers, flowmeters, level measurement devices, flow pressure switches, rupture discs, thermowells, and desuperheaters.

Special Piping (25 Hours)
(Module ID 08406) Discusses methods of assembling copper tubing with flared and compression joints. Introduces brazing and soldering and explains the differences between these two procedures. Also describes bending pipe, working with glass-lined piping, handling hydraulic compression joints, and managing grooved piping systems.

Hot Taps (10 Hours)
(Module ID 08407) Provides details on environmental and other concerns associated with hot tapping. Discusses the installation of fittings, the operation of hot tap machines, working with line stop plugs, and identifying and mitigating known and potential hazards.

Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

To Order Call: 1-800-922-0579
©NCCER
Pipelayer

Tools and Equipment (22.5 Hours)
ISBN 978-0-13-015305-0
(Module ID 24102) Discusses the safe use, care, and maintenance of pipelayer hand and power tools. Discusses methods for operating and maintaining dewatering equipment, generators, and compressors. Contains an introduction to drilling and tapping machines.

Rigging and Delivering Pipe and Associated Structures (7.5 Hours)
(Module ID 24103) Describes methods for receipt inspection, storage, and delivery to the trench of PVC, ductile iron, corrugated steel, and concrete pipe. Identifies the hand signals used by pipelayers when rigging pipe, and piping components, including manholes and appurtenances.

Cutting Pipe (12.5 Hours)
(Module ID 24104) Discusses practical methods for safely cutting common pipe materials. Describes pipe materials and standard sizes for thermoplastic, concrete, ductile iron, and corrugated steel pipe.

Gaskets, Joints, and Fittings (20 Hours)
(Module ID 24105) Describes methods for joining PVC, ductile iron, and concrete pipe, including O-ring pipe, slip joints, mechanical joints, and restraint joints. Discusses methods for joining pipe to pipe, pipe to appurtenances, and pipe to manhole connections, including transition couplings.

Introduction to Elevations (5 Hours)
(Module ID 24106) Discusses the use, care, and maintenance of the optical level, transit, and the pipe laser. Contains a brief introduction to elevations as it relates to the setup of these instruments. Describes common causes and solutions to laser problems in the field.

Trench Safety (7.5 Hours)
(Module ID 24107) Discusses soil behavior as it relates to trench failures, including common indications of an unstable trench. Introduces typical shoring, shielding, and sloping methods. Identifies characteristics that may make a trench a confined space and describes the safety measures needed to work in the trench.

Foundation Stabilization, Bedding, and Dewatering (7.5 Hours)
ISBN 978-0-13-015312-8
(Module ID 24108) Discusses methods for preparing the trench for pipe installation, including stabilization, bedding, and initial backfill. Describes effective methods for dewatering a trench and includes a section on troubleshooting dewatering equipment.

Testing Pipe (12.5 Hours)
(Module ID 24109) Discusses methods for preparing pressure and gravity systems for testing, including cleaning and inspecting pipe systems. Describes methods for testing pressure and gravity systems, including vacuum testing of concrete manholes.
Tools of the Plumbing Trade (10 Hours)
(Module ID 02103) This module describes hand and power tools used by plumbers to measure, lay out, level, cut, drill, and join different pipe. Along with teaching trainees how to select the appropriate tools for the task, this module teaches them how to avoid some of the most dangerous hazards associated with power tools. Trainees are also instructed in the proper care of different types of hand and power tools.

Introduction to Plumbing Math (12.5 Hours)
(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrates how they apply to on-the-job situations. Teaches trainees how to recognize the type of math necessary for each job, and illustrates methods for measuring pipe length using a variety of tables and illustrations.

Introduction to Plumbing Drawings (17.5 Hours)
(Module ID 02105) Introduces trainees to the types of plumbing drawings they will encounter, and teaches them how to interpret and apply the information when laying out and installing plumbing systems. Reviews symbols used in plumbing and mechanical drawings and provides examples of isometric, oblique, orthographic, and schematic drawings. Requires trainees to interpret plumbing drawings and to understand the relationship between code requirements and plumbing drawings.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106) Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to manufacturer’s instructions and applicable codes. Also discusses pressure testing of plastic pipe after it is installed.

Copper Tube and Fittings (12.5 Hours)
(Module ID 02107) Explains sizing, labeling, and applications related to copper tube and fittings. Reviews valves used with copper tube systems, and describes methods for cutting, joining, and installing copper tube. Insulation, pressure testing, seismic codes, and handling and storage requirements are also addressed.

Cast Iron Pipe and Fittings (12.5 Hours)
ISBN 978-0-13-79427-0
(Module ID 02108) Describes how hub-and-spigot and no-hub cast iron pipe and fittings are used in DWV systems. Reviews related sizing and labeling standards, types of fittings, and techniques for measuring and cutting cast iron pipe. Also provides instructions for joining, hanging, and testing pipe installations.

Steel Pipe and Fittings (12.5 Hours)
(Module ID 02109) Presents concepts related to threading, labeling, and sizing of steel pipe and fittings. Different types of elbows, couplings, and valves are described. Provides instructions for measuring, cutting, threading, joining, and hanging steel pipe, and reviews corrugated stainless steel tubing.

Introduction to Plumbing Fixtures (7.5 Hours)
(Module ID 02110) Introduces trainees to the primary types of plumbing fixtures, the materials from which they are made, and how they function in typical applications. Also reviews the functionality of specific bathroom and kitchen fixtures, including compression and non-compression faucets, shower and bath fixtures, and exterior utility faucets.

Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)
(Module ID 02112) Identifies the major features and functions of components used in water distribution systems, including pipe and fittings, valves, and water heating and treatment equipment. Reviews private and public water sources, and describes how plumbers connect service lines to both types of systems.

Plumbing Math Two (15 Hours)
ISBN 978-0-13-819444-4
(Module ID 02201) Explains the Pythagorean theorem and reviews methods for laying out square corners. Discusses the techniques used to calculate simple and rolling offsets, as well as offsets on parallel runs of pipe.

Reading Commercial Drawings (25 Hours)
(Module ID 02202) Explains how to identify and interpret civil, architectural, structural, BIM/AEC/Building, plumbing, and electrical drawings. Discusses how to ensure accurate dimensions, generate RFIs, and locate plumbing entry points, as well as how to establish piping routes and fixture locations. Isometric drawings, material takeoffs, approved submittal data, and Building Information Management (BIM), are also covered.

Structural Penetrations, Insulation, and Fire-Stopping (15 Hours)
(Module ID 02203) Introduces methods for addressing structural members, insulating pipe, and installing fire-stopping. Covers reinforcement techniques for modified structural members; how to measure, cut, and install fiberglass and flexible foam insulation; and how to identify walls, floors, and ceilings that require fire-stopping.

Installing and Testing DWV Piping (30 Hours)
(Module ID 02204-13) Explains how to locate, install, connect, and test a complete drain, waste, and vent (DWV) system. Discusses how to develop material takeoffs, set up and use levels, locate building sewers and building drains, locate fixtures, and test a DWV system.

Continued on following page
Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205) Covers the proper techniques for locating, installing, and connecting roof, floor, and area drains and floor sinks according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.

Installing and Testing Water Supply Piping (20 Hours)
(Module ID 02206) Explores the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and house bibbs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, hose bibbs, and supports.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-819468-0
(Module ID 02207) Reviews types of valves, their components, and applications. Also covers valve servicing.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-819468-0
(Module ID 02207) Reviews types of valves, their components, and applications. Also covers valve servicing.

Installing Water Heaters (10 Hours)
(Module ID 02209) Discusses gas-fired, electric, tankless, heat pump, solar thermal, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205) Covers the proper techniques for locating, installing, and connecting roof, floor, and area drains and floor sinks according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.

Installing and Testing Water Supply Piping (20 Hours)
(Module ID 02206) Explores the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and house bibbs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, hose bibbs, and supports.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-819468-0
(Module ID 02207) Reviews types of valves, their components, and applications. Also covers valve servicing.

Installing and Testing Water Supply Piping (20 Hours)
(Module ID 02206) Explores the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and house bibbs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, hose bibbs, and supports.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-819468-0
(Module ID 02207) Reviews types of valves, their components, and applications. Also covers valve servicing.

Installing Water Heaters (10 Hours)
(Module ID 02209) Discusses gas-fired, electric, tankless, heat pump, solar thermal, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-819468-0
(Module ID 02207) Reviews types of valves, their components, and applications. Also covers valve servicing.

Installing Water Heaters (10 Hours)
(Module ID 02209) Discusses gas-fired, electric, tankless, heat pump, solar thermal, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Sizing DWV and Storm Systems (20 Hours)
(Module ID 02304) Explains how to calculate drainage fixture units for waste systems. Reviews how to size drain, waste, and vent (DWV) systems; storm drainage systems; and roof storage and drainage systems.

Sewage Pumps and Sump Pumps (12.5 Hours)
(Module ID 02307) Discusses the installation, diagnosis, and repair of pumps, controls, and sumps in sewage and storm water removal systems.

Corrosive-Resistant Waste Piping (7.5 Hours)
(Module ID 02308) Discusses corrosive wastes and reviews related safety issues and hazard communications. Explains how to determine when corrosive-resistant waste piping needs to be installed, as well as how to correctly select and properly connect different types of piping.

Compressed Air (10 Hours)
(Module ID 02309) Explains the principles of compressed air systems and describes their components and accessories. Reviews installation and periodic servicing of air compressor systems.
To Order Call: 1-800-922-0579 ©NCCER
Continued on following page

Tools of the Plumbing Trade (10 Hours)
(Module ID 02103) Introduces trainees to the care and use of the different types of hand and power tools they will use on the job. Gives trainees the information they need to select the appropriate tools for different tasks, and reviews tool maintenance and safety issues.

Introduction to Plumbing Math (12.5 Hours)
(Module ID 02104) Reviews basic math concepts, such as whole numbers, fractions, decimals, and squares, and demonstrates how they apply to on-the-job situations. Teaches trainees how to measure pipe using fitting tables and framing squares and how to calculate 45-degree offsets.

Introduction to Plumbing Drawings (17.5 Hours)
(Module ID 02105) Introduces trainees to the different types of plumbing drawings they will encounter on the job and discusses how to interpret and apply them when laying out and installing plumbing systems. Discusses the symbols used in plumbing and mechanical drawings and reviews isometric, oblique, orthographic, as well as schematic drawings. Requires trainees to render plumbing drawings and to recognize how code requirements apply to plumbing drawings.

Plastic Pipe and Fittings (12.5 Hours)
(Module ID 02106) Introduces trainees to the different types of plastic pipe and fittings used in plumbing applications, including ABS, PVC, CPVC, PE, PEX, and PB. Describes how to measure, cut, join, and support plastic pipe according to manufacturer’s instructions and applicable codes. Also discusses pressure testing of plastic pipe once installed.

Copper Tube and Fittings (12.5 Hours)
(Module ID 02107) Discusses sizing, labeling, and applications of copper tube and fittings and reviews the types of valves that can be used on copper tube systems. Explains proper methods for cutting, joining, and installing copper tube. Also addresses insulation, pressure testing, seismic codes, and handling and storage requirements.

Cast-Iron Pipe and Fittings (12.5 Hours)
(Module ID 02108) Introduces trainees to hub-and-spigot and no-hubcast-iron pipe and fittings and their applications in DWV systems. Reviews material properties, storage and handling requirements, and fittings and valves. Covers joining methods, installation, and testing.

Steel Pipe and Fittings (12.5 Hours)
(Module ID 02109) Discusses threading, labeling, and sizing of steel pipe and reviews the differences between domestic and imported pipe. Covers the proper techniques for measuring, cutting, threading, joining, and hanging steel pipe. Also reviews corrugated stainless steel tubing.

Introduction to Plumbing Fixtures (7.5 Hours)
(Module ID 02110) Discusses the proper applications of code-approved fixtures in plumbing installations. Reviews the different types of fixtures and the materials used in them. Also covers storage, handling, and code requirements.

Introduction to Drain, Waste, and Vent (DWV) Systems (10 Hours)
(Module ID 02111) Explains how DWV systems remove waste safely and effectively. Discusses how system components, such as pipe, drains, traps, and vents work. Reviews drain and vent sizing, grade, and waste treatment. Also discusses how building sewers and sewer drains connect the DWV system to the public sewer system.

Introduction to Water Distribution Systems (10 Hours)
(Module ID 02112) Identifies the major components of water distribution systems and describes their functions. Reviews water sources and treatment methods and covers supply and distribution for the different types of systems that trainees will install on the job.

Structural Penetrations, Insulation, and Fire-stopping (15 Hours)
(Module ID 02203-13) Introduces methods for adjusting structural members, insulating pipe, and installing fire-stopping. Covers reinforcement techniques for modified structural members; how to measure, cut, and install fiberglass and flexible foam insulation; and how to identify walls, floors, and ceilings that require fire-stopping.

Installing and Testing DWV Piping (30 Hours)
ISBN 978-0-13-340278-0
(Module ID 02204-13) Explains how to locate, install, connect, and test a complete drain, waste, and vent (DWV) system. Discusses how to develop material takeoffs, set up and use levels, locate building sewers and building drains, locate fixtures, and test a DWV system.

Continued on following page
Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205-13) Covers the proper techniques for locating, installing, and testing complete roof service systems, including installing and testing roof, floor, and area drain and floor sink systems according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.

Installing and Testing Water Supply Piping (20 Hours)
(Module ID 02206-13) Explores the proper techniques for locating, installing, and testing complete water service and distribution systems, including meters, water heaters, water softeners, and hose bibs. Introduces basic backflow and water hammer prevention, and discusses the installation of shower and tub valves, ice maker and washing machine boxes, and pipe stubouts and supports.

Types of Valves (5 Hours)
ISBN 978-0-13-340281-0
(Module ID 02207-13) Reviews types of valves, their components, and applications. Also covers valve servicing.

Installing Fixtures and Valves (20 Hours)
ISBN 978-0-13-340283-4
(Module ID 02208-13) Covers the installation of basic plumbing fixtures, including bathtub, shower stalls, lavatories, sinks, water closets, and animals. Reviews the installation of associated valves, faucets, and components. Explains how to connect appliances such as dishwashers, food-waste disposers, refrigerators and ice makers, and washing machines.

Installing Water Heaters (10 Hours)
(Module ID 02209-13) Discusses gas-fired, electric, tankless, heat pump, and indirect water heaters, components, and applications. Reviews proper installation and testing techniques and covers the latest code requirements for water heaters.

Sizing and Protecting the Water Supply System (30 Hours)
(Module ID 02312-14) Teaches techniques for sizing water supply systems, including calculating system requirements and demand, developed lengths, and pressure drops. Reviews the factors that can reduce efficiency of water supply piping. Introduces different backflow prevention devices and explains how they work, where they are used, and how they are installed in water supply systems.

Potable Water Supply Treatment (15 Hours)
(Module ID 02303-14) Explains how to disinfect, filter, and soften water supply systems. Discusses how to troubleshoot water supply problems, flush out visible contaminants from a plumbing system, and disinfect a potable water plumbing system.

Types of Venting (20 Hours)
(Module ID 02305-14) Reviews the different types of vents that can be installed in a DWV system and explains how they work. Teaches design and installation techniques.

Sewage Pumps and Sump Pumps (12.5 Hours)
(Module ID 02307-14) Discusses the installation, diagnosis, and repair of pumps, controls, and sumps in sewage and storm water removal systems.

Corrosive-Resistant Waste Piping (7.5 Hours)
(Module ID 02308-14) Discusses corrosive wastes and reviews related safety issues and hazard communications. Explains how to determine when corrosive-resistant waste piping needs to be installed, as well as how to correctly select and properly connect different types of piping.

Compressed Air (10 Hours)
(Module ID 02309-14) Explains the principles of compressed air systems and describes their components and accessories. Reviews installation and periodic servicing of air compressor systems.

Service Plumbing (27.5 Hours)
ISBN 978-0-13-378279-0
(Module ID 02311-14) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.

Corrosive-Resistant Waste Piping (7.5 Hours)
ISBN 978-0-13-378279-0
(Module ID 02311-14) Introduces techniques for safe handling of natural gas, liquefied petroleum gas, and fuel oil. Reviews fuel gas and fuel oil safety precautions and potential hazards, applications, systems installation, and testing.

Fuel Gas and Fuel Oil Systems (20 Hours)
(Module ID 02210-13) Introduces electrical safety and the principles of electricity including voltage, current, resistance, and power. Includes important electrical formulas, circuitry, and common plumbing-related electrical applications.

Curriculum Notes
• 160 Hours
• Revised: 2014, Fourth Edition
• Downloadable instructor resources are available.

PAPERBACK

TRAINEE GUIDE: $99.99

DIGITAL

NCCERconnect Access Card: $99.99

NCCERconnect +
Trainee Guide: $129.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Applied Math (17.5 Hours)
(Module ID 02301-14) Reviews math concepts, including weights and measures, area and volume, temperature, pressure, and force. Describes the six simple machines: inclined planes, levers, pulleys, wedges, screws, and wheels and axles.

Basic Electricity (10 Hours)
(Module ID 02210-13) Introduces electrical safety and the principles of electricity including voltage, current, resistance, and power. Includes important electrical formulas, circuitry, and common plumbing-related electrical applications.

Installing Roof, Floor, and Area Drains (5 Hours)
(Module ID 02205-13) Covers the proper techniques for locating, installing, and connecting roof, floor, and area drains and floor sinks according to code. Discusses waterproof membranes and flashing, drain components, shower pans, trap primers, and proper drain applications.
Plumbing Level 4 (continued)

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Business Principles for Plumbers** (15 Hours)
(Module ID 02403-14) Introduces concepts and practices that are essential for competitive, successful plumbing businesses. Also covers basic business accounting and project estimating, as well as techniques for cost control and task organization.

**Fundamentals of Crew Leadership** (20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

**Water Pressure Booster and Recirculation Systems** (12.5 Hours)
(Module ID 02403-14) Builds on trainees’ previous experience with pumps, storage tanks, controls, and pipes and fittings by teaching how to assemble those components into systems that boost water pressure and provide hot water.

**Indirect and Special Waste** (17.5 Hours)
(Module ID 02404-14) Describes the code requirements and installation procedures for systems that protect against contamination from indirect and special waste.

**Hydronic and Solar Heating Systems** (17.5 Hours)
(Module ID 02405-14) Introduces the basic types of hydronic and solar heating systems and their components. Reviews hydronic and solar heating system layout, installation, testing, and balancing, and also discusses methods that inhibit corrosion in hydronic or solar heating systems.

**Codes** (12.5 Hours)
(Module ID 02406-14) Discusses the different codes used by plumbers across the country and explains how those codes are written, adopted, modified, and implemented.

**Private Water Supply Well Systems** (10 Hours)
(Module ID 02408-14) Describes the operation of pumps and well components. Reviews the qualities of good wells and how to assemble and disassemble pumps and components.

**Private Waste-Disposal Systems** (10 Hours)
(Module ID 02409-14) Describes the types of private waste-disposal systems, discusses the maintenance and installation of these systems, and explains how to determine the local code requirements for these systems. Covers percolation tests and sewage system planning and layout.

**Swimming Pools and Hot Tubs** (7.5 Hours)
(Module ID 02410-14) Introduces trainees to plumbing systems in swimming pools, hot tubs, and spas.

**Plumbing for Mobile Homes and Travel Trailer Parks** (7.5 Hours)
(Module ID 02411-14) Describes the location and layout of plumbing systems for mobile home and travel trailer parks. Reviews how to design and lay out a system, how to connect water and sewer lines to a mobile home, and how to estimate materials for the park.

**Introduction to Medical Gas and Vacuum Systems** (15 Hours)
(Module ID 02412-14) Introduces the various types of medical gas and vacuum systems used in health care facilities. Covers the system requirements and professional qualifications required by code, describes common types of medical gas and vacuum systems, and introduces the safety requirements for installing, testing, and servicing these systems.
## Reinforcing Ironwork

### LEVEL 1

**Curriculum Notes**
- 192.5 Hours (includes Core)
- Published: 2005
- Downloadable instructor resources are available.
- A Spanish translation is available. Please see NCCER's online catalog for more information.

**PAPERBACK**
- Trainee Guide: $74.99

**MODULES**

- **Concrete Reinforcement** (40 Hours)
  - ISBN 978-0-13-228987-0
  - (Module ID 39101-05) Describes the selection and use of rebar, bar supports, and welded-wire fabric. Presents general procedures for cutting, bending, splicing, and tying rebar, and placement of steel in various types of footings, columns, walls, and slabs.

- **Concrete Reinforcement Safety** (15 Hours)
  - (Module ID 39102-05) Focuses on safety topics of particular concern to the reinforcing ironworker, including rebar-related hazards, fall protection, use of positioning devices, PPE, excavations, and lifting/carrying techniques.

- **Rigging Equipment** (10 Hours)
  - (Module ID 39103-05) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, and attaching hardware such as shackles, eyebolts, and hooks, as well as rigging knots.

### LEVEL 2

**Curriculum Notes**
- 118.5 Hours
- Published: 2005
- Downloadable instructor resources are available.

**PAPERBACK**
- ISBN: 978-0-13-227294-0

**MODULES**

- **Foundations and Flatwork** (15 Hours)
  - (Module ID 27204-01) Covers the construction of forms for continuous, stepped continuous, pier and grade beam concrete footings. Describes the edge forms used for on-grade concrete slabs and similar structures. Forming terms, parts of forms and procedures for constructing basic footing and edge forms are included.

- **Concrete Forms** (32.5 Hours)
  - (Module ID 27205-01) Covers the applications and construction methods for various types of job-built forms, including wall, column, slab-and-beam, and stair forms. Instructor’s Guide includes instruction sheets for construction of various forms.

- **Handling and Placing Concrete** (22.5 Hours)
  - (Module ID 27207-01) Covers the tools, equipment and procedures required for handling, placing, and finishing concrete at the job site. Describes joints made in concrete structures, the use of joint sealants, and form removal procedures. Safety procedures for handling, placing, and finishing concrete are emphasized.

- **Manufactured Forms** (22.5 Hours)
  - (Module ID 27208-01) Covers the types of manufactured forms and form hardware systems used in the construction of walls, columns, deck and roof slabs, beams and girders, culverts, and highways. Includes information on flying forms, slipforms, shoring, and architectural finishes.

- **Metal Decking** (10 Hours)
  - (Module ID 30116) Identifies decking types and profiles and how decking is packaged, shipped, and stored. Describes erecting decking and placing concrete safely. Explains the effects of deck penetrations and damage.

- **Introductory Skills for the Crew Leader** (16 Hours)
  - (Module ID MT101) Teaches leadership skills required to supervise personnel. Discusses principles of project planning, scheduling, estimating, and management. Presents several case studies for student participation.
Roofing

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Roofing (2.5 Hours)
(Module ID 16101) Introduces the roofing craft and describes types of roofs and roof systems. Overviews basic concepts of safety, describes apprenticeship programs, and lists skills, responsibilities, and characteristics a worker should possess.

Roofing Safety (7.5 Hours)
ISBN 978-0-13-749109-4
(Module ID 16102) Discusses the best safety practices for roofing and educates about potential dangers on the job. Reviews risk mitigation, hazard control, safety-related resources, fall protection, and ladder safety.

Fall Protection Orientation (8 Hours)
(Module ID 75901) Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Roofing Service and Repair (10 Hours)
(Module ID 16103) Describes types of construction documents and explains how to navigate a drawing set to find roofing information. Explains the role of the project manual and specifications. Introduces the concept of building information modeling (BIM).

Introduction to Steep-Slope Roofing (12.5 Hours)
(Module ID 16105) Introduces steep-slope roof systems and discusses common types of decks and underlayments. Describes types and styles of steep-slope roof systems. Explains the purpose of various types of flashings.

Wood Roof Systems (12.5 Hours)
(Module ID 16203) Outlines the components, tools, and installation methods used for wood roof systems. Distinguishes between wood shingles and wood shakes. Identifies common mistakes in the installation of wood roof systems and introduces basic repair methods.

Slate Roof Systems (12.5 Hours)
(Module ID 16204) Describes slate roof system components, styles, tools, and safety considerations. Details appropriate procedures for the installation and repair of these systems.

Metal Roof Systems (15 Hours)
(Module ID 16205) Describes the various types of metal roofs, including architectural, structural, and metal shingle systems. Discusses the seam types, methods, and tools used in metal roof installation. Details the proper tools and techniques used for the installation of these features.

Thermoplastic Roof Systems (10 Hours)
(Module ID 16206) Discusses types of thermoplastic roof systems and outlines their installation and repair. Identifies types of field membranes, pre-manufactured flashing accessories, attachment components, and related tools.

Liquid-Applied Roofing (12.5 Hours)
(Module ID 16210) Discusses liquid-applied roofing products and explains the difference between roof coatings and liquid-applied roof membranes. Outlines procedures and tools used to install and repair liquid-applied roofing.

Built-Up Roof Systems (15 Hours)
ISBN 978-0-13-749152-0
(Module ID 16208) Introduces types of built-up roof (BUR) systems and their components. Outlines basic installation and repair methods associated with BUR system, as well as related tools.

EPDM Roof Systems (10 Hours)
(Module ID 16207) Describes types of EPDM roof systems and their components. Identifies field membrane types, pre-manufactured flashing accessories, attachment methods, and components of EPDM roof systems. Discusses installation and repair of these systems.

Substrates, Decks, and Roof Insulation (12.5 Hours)
(Module ID 16104) Overviews common types of roof decks and insulation and related considerations. Explains basic principles of heat transfer, vapor movement, and deck movement and how roofs are designed to accommodate them. Describes general procedures for installing vapor retarders, insulation, cover boards, and tapered insulation.

Sheet Metal in Roofing (25 Hours)
(Module ID 16107) Describes the properties of different types of sheet metal that impact the way sheet metal is used in construction. Overviews the tools used to measure, layout, and install sheet-metal components in roof systems. Outlines commonly used sheet-metal roofing components and basic procedures used to prepare and install them.

Sheet Metal in Roofing (10 Hours)
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting materials.

Rigging Practices (15 Hours)
(Module ID 16106) Introduces important concepts about low-slope roof systems and their components. Identifies field membrane types, pre-manufactured flashing accessories, attachment components, and related tools.

Substrates, Decks, and Roof Insulation (12.5 Hours)
(Module ID 16104) Overviews common types of roof decks and insulation and related considerations. Explains basic principles of heat transfer, vapor movement, and deck movement and how roofs are designed to accommodate them. Describes general procedures for installing vapor retarders, insulation, cover boards, and tapered insulation.

Roofing Service and Repair (15 Hours)
(Module ID 16212) Introduces service and repair in the roofing industry and related career opportunities for roofers. Describes the general process of repair as well as specific repairs for specific steep- and low-slope roof systems.
Scaffolding

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Introduction to the Trade (7.5 Hours)**
  (Module ID 31101-15) Introduces the scaffolding program, describes the duties of a scaffolder, and identifies scaffold types and scaffolding terms.

- **Trade Safety (7.5 Hours)**
  (Module ID 31102-15) Provides a comprehensive overview of the safety regulations and guidelines in the scaffolding industry.

- **Trade Tools and Equipment (7.5 Hours)**
  (Module ID 31103-15) Covers the safe use and applications of hand and power tools used in the trade.

- **Trade Math (7.5 Hours)**
  (Module ID 31104-15) Explains and gives examples of math calculations of scaffold loads, including area loads, concentrated loads, live loads, cantilevered loads, and wind loads.

- **Supported Scaffolds (32.5 Hours)**
  ISBN 978-0-13-378899-0
  (Module ID 31105-15) Identifies the equipment used with supported scaffolds. Describes the procedures for erecting supported scaffolds.

- **Mobile Scaffolds (10 Hours)**
  (Module ID 31106-15) Identifies the different types of powered and manually propelled mobile scaffolds and describes their erection and operation.

- **Suspension Scaffolds (7.5 Hours)**
  (Module ID 31107-15) Identifies the types of equipment used with suspension scaffolds. Describes the rigging of suspension scaffolds.

**Curriculum Notes**
- 155 Hours (includes Core)
- Revised: 2015, Second Edition
- Downloadable instructor resources are available.
- A Spanish translation is available. Please see NCCER’s online catalog for more information.

**PAPERBACK**  ISBN
Trainee Guide: $74.99  978-0-13-383081-1
NATE CERTIFICATION

NCCER is an officially recognized training provider for North American Technician Excellence (NATE), an independent, third-party certification body for HVAC/R technicians. NATE-certified technicians can use module completions through NCCER-accredited training providers for the continuing education hours required for recertification through NATE. For details and lists of available NATE-recognized training, visit www.natex.org. For more information regarding NATE recertification, please contact NCCER Customer Service at 1-888-622-3720.

Sheet Metal Tools and Equipment (10 Hours)
(Module ID 04102) Describes the hand and power tools used in the sheet metal craft, including layout tools and cutting, bending, and forming machines. Includes safety and maintenance guidelines.

Plasma Arc Cutting (7.5 Hours)
(Module ID 04104) Covers plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Sheet Metal Math and Measurements (20 Hours)
(Module ID 04104) Covers calculations using denominate numbers, area and volume calculations, English-metric system conversions, basic geometry, percentages, and calculation of stretchouts.

Sheet Metal Layout and Processes (17.5 Hours)
(Module ID 04103) Introduces parallel line development, radial line development, and triangulation. Covers the selection and use of layout, hand, and machine tools. Discusses how to transfer patterns, and how to cut, form, and assemble parts.

Parallel Line Development (27.5 Hours)
(Module ID 04105) Covers the steps involved in using the parallel line development method to lay out fittings. Includes step-by-step procedures for selected fittings.

Installation of Ductwork (15 Hours)
(Module ID 04106) Addresses ductwork assembly, use of different types of sealants, using lifts, and installation of ductwork. Describes the types of fasteners (screws, nuts, bolts, and rivets), and supports used in an air distribution system. Discusses proper spacing of hangers, load ratings, and installation of hangers and support systems.

Installation of Air Distribution Accessories (12.5 Hours)
(Module ID 04107) Describes how air distribution accessories such as louvers, dampers, and access doors function as part of an air distribution system. Includes installation guidelines and checklists.

Construction and Sheet Metal Drawings (17.5 Hours)
ISBN 978-0-13-663047-0
(Module ID 04202) Reviews how to read and interpret section, elevation, and detail drawings. Also covers the drawing used by a variety of crafts. Includes practice using drawings with a large drawing package.

Radial Line Development (20 Hours)
(Module ID 04203) Introduces radial line development principles used to determine layout for sheet metal fittings. Includes practice layout and fabrication tasks that allow trainees to develop and demonstrate their skills.

Triangulation (40 Hours)
(Module ID 04306) Describes the principles of triangulation and how it can be used to measure ductrun fittings. Provides a variety of tasks to practice developing, laying out, and fabricating selected ductrun fittings.

Sheet Metal Duct Fabrication Standards (7.5 Hours)
(Module ID 04204) Explains how to determine the requirements for a duct system, including operating pressures, metal gauges, connectors, reinforcements, tie rods, and seams. Also reviews how to use standards, codes, and ordinances to design a duct system.

Bend Allowances (7.5 Hours)
(Module ID 04206) Provides instruction and practice in determining proper bend allowances in sheet metal. Also reviews the interplay of different factors that affect the amount of bend allowance needed and the methods for calculating allowance.

Soldering (15 Hours)
(Module ID 04207) Identifies soldering tools, materials, and techniques. Also provides a wide range of soldering tasks for practice.

Air Distribution Systems (15 Hours)
(Module ID 03109) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

Sheet Metal Duct Fabrication Standards (7.5 Hours)
(Module ID 04204) Explains how to determine the requirements for a duct system, including operating pressures, metal gauges, connectors, reinforcements, tie rods, and seams. Also reviews how to use standards, codes, and ordinances to design a duct system.

To Order Call: 1-800-922-0579
©NCCER
Fume and Exhaust System Design (25 Hours)
(Module ID 04400) Reviews the codes and specifications pertaining to fume and exhaust system design for safe workplaces. Provides instruction in selecting the appropriate materials for fume or exhaust system components and to identify the different types of hoods and applications for each.

Architectural Sheet Metal (25 Hours)
(Module ID 04307) Teaches how to lay out and fabricate sheet metal components of a roof drainage system, including flashing, gutters, and downspouts.

Shop Production and Organization (25 Hours)
(Module ID 04401) Introduces the production, organization, planning, and control functions that occur in a sheet metal shop. Emphasizes optimization of processes and accurate estimating for competitive bidding. Discusses project planning techniques, principles of efficient shop layout and materials flow, as well as the roles and relationships of shop personnel.

Sheet Metal Business and Technology (7.5 Hours)
(Module ID 04407) Covers advancements in software and technology as they pertain to sheet metal workflow. Covers tools to enhance design, estimation, fabrication, installation, and project documentation.

Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Discusses the role of safety and the crew leader’s role in safety training.
MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Introduction to Site Layout (10 Hours)
(Module ID 78101-04) Provides an overview of the site layout trade and related tasks. Covers the use of the builder’s level and leveling rods, as well as the equipment and procedures for making distance measurements by taping (chaining). Also covers the elements of professional conduct, safety, and communications. Briefly describes the aspects of an apprenticeship program and the career path and professional opportunities related to the site layout trade.

Surveying Math (30 Hours)
(Module ID 78102-04) Expands on the Core module, Introduction to Construction Math, with emphasis on the metric system, including how to convert between English and metric system units. Covers basic concepts for working with formulas and equations, as well as basic geometry and right-angle trigonometry.

Survey Equipment Use and Care One, EDMIs and Total Stations (30 Hours)
(Module ID 78202-04) Covers the setup, use, calibration, and care of electronic distance measuring instruments and total stations.

Survey Equipment Use and Care Two, EDMIs and Total Stations (10 Hours)
(Module ID 78203-04) Contains information and instructions for setting up, running, recording, and closing a horizontal traverse and a level loop. Also covers primary and secondary control plans, as well as vertical control for multilevel structures.

Boundary and Topography Surveys (10 Hours)
(Module ID 78204-04) Contains information and instructions for gathering, recording, and plotting profile and cross-section leveling data. Includes plot and site plans to identify rights-of-way, utilities, setbacks, boundaries, and tie-in locations.

Survey Equipment Use and Care and Quality Control (15 Hours)
(Module ID 78205-04) Covers the use of integrated total station systems and GPS surveying systems. Explains the use of integrated field and office software to collect and manage data.

Concrete Properties and Quality Control (15 Hours)
(Module ID 78206-04) Covers the chemical and physical properties of concrete and the components, such as cement, aggregates, and admixtures, that make up the concrete mixture. Explains the various methods and equipment used to sample, test, and inspect concrete.

Means and Methods (40 Hours)
ISBN 978-0-13-160027-0
(Module ID 78207-04) Provides extensive coverage of soils and their classifications and explains how various soils behave in excavations. Covers the safety procedures and equipment used when working in or near trenches. Provides layout procedures for footings, piers, building corners, columns, walls, embedments, and stairs.
Sprinkler Fitting

L1  SPRINKLER FITTING  

Occupational Overview: The Sprinkler Industry  (5 Hours)
(Module ID 18101) Describes the basic types of sprinkler systems, the tools used to install them, and the codes and standards that apply to these systems. Covers the apprenticeship requirements for sprinkler fitters, employer and employee responsibilities, and career paths in the sprinkler industry.

Introduction to Components and Systems  (10 Hours)
(Module ID 18102) Provides an overview of the four main types of sprinkler systems. Describes testing laboratories and Listing requirements. Covers sprinkler characteristics, including thermal response, spray pattern and coverage area, orientation, K-factors, and temperature ratings. Describes various types of piping, valves, and pumps.

Steel Pipe and Fittings  (20 Hours)
(Module ID 18103) Describes the steel pipe used in sprinkler systems, including pipe types, schedules, and sizes. Covers common methods of end preparation, including cutting, reaming, grooving, and threading pipe. Describes various types of grooved, threaded, flanged, and plain-end fittings, along with the installation methods and applications of each type.

CPVC Pipe and Fittings  (12.5 Hours)
(Module ID 18104) Covers the special type of chlorinated polyvinyl chloride (CPVC) pipe and fittings used in sprinkler systems. Describes the procedures for cutting, beveling, cleaning, and joining CPVC pipe and fittings. Provides an overview of how to test the installed sprinkler system.

Copper Tubing and Fittings  (10 Hours)
(Module ID 18105) Covers copper tubing and fittings and the installation of wet pipe systems. Also covers trench safety requirements, backfilling, and testing.

Underground Pipe  (12.5 Hours)
(Module ID 18106) Describes the installation of underground piping systems. Covers ductile iron and PVC piping and components, including risers, backflow preventer assemblies, hydrants, and restraints. Also covers grooved couplings and compression connections.

Wet Pipe Sprinkler Systems  (25 Hours)
(Module ID 18205) This module describes the operation and installation of wet pipe sprinkler systems. Includes information on risers, backflow preventer assemblies, hydrants, and restraints. Also provides an overview of basic system troubleshooting procedures.

Dry Pipe Sprinkler Systems  (25 Hours)
(Module ID 18207) This module describes the operation and installation of dry pipe sprinkler systems. Includes information on mechanical dry pipe valves and trim, including switches, gauges, air sources, accelerators, and drains. Also provides an overview of basic system troubleshooting and acceptance testing procedures, including the completion of a Contractor’s Material and Test Certificate for Aboveground Piping for a dry pipe sprinkler system.

General Purpose Valves  (15 Hours)
(Module ID 18202) This module explains the valves used to start, stop, direct, and regulate water flow in sprinkler systems. Covers the operation, applications, and basic maintenance of various valves. Includes discussions on control valves, trim valves, check valves, pressure control valves, and air venting valves.

Math for Sprinkler Fitters  (20 Hours)
(Module ID 18203) This module reviews basic mathematical principles and explains how to apply them to various sprinkler fitting calculations, including floor areas, pitch, offsets, sprinkler spacing, pressure, and volume.

Shop Drawings  (30 Hours)
(Module ID 18204) This module covers the shop drawings used in sprinkler fitting. It describes the symbols used for various sprinkler system components and explains how to use a shop drawing to identify the types and locations of piping and components. Also provides an overview of Building Information Modeling (BIM).

Standard Spray Sprinklers  (20 Hours)
(Module ID 18205) This module describes the characteristics of standard spray sprinklers. Includes information on NFPA 13 light and ordinary hazard occupancy classifications, and installation considerations.

Curriculum Notes

• 155 Hours (includes Core)
• Revised: 2021, Fourth Edition to reflect NFPA 13
• Downloadable instructor resources are available.

PAPERBACK  
Trainee Guide: $74.99  
978-0-13-747549-0

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Hangers, Supports, and Restraints  (17.5 Hours)
(Module ID 18201) This module identifies strength/spacing requirements, types, and installation of pipe hangers, supports, and restraints. It also covers the installation of firestopping.

Sprinkler Fitting Level 3

**L3 SPRINKLER FITTING**

**LEVEL 3**

**Curriculum Notes**
- 150 Hours
- Revised: 2022, Fourth Edition to reflect NFPA 13
- Downloadable instructor resources are available.

**PAPERBACK**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Water Supplies (15 Hours)**
(Module ID 18303) Identifies the chemical and physical properties of water. Covers the water supplies available for sprinkler systems, including tanks and municipal water supply systems. Describes the procedures and NFPA requirements for waterflow testing.

**Fire Pump Systems (35 Hours)**
(Module ID 18304) Identifies various types of fire pump systems and their components, including pumps, drivers, controllers, and sensing lines. Describes fire pump system pre-checks and start-up/acceptance testing.

**Standpipes (25 Hours)**
(Module ID 18302) Identifies different types and classifications of standpipe systems. Covers hose valves and adapters used with these systems. Describes procedures and NFPA requirements for acceptance testing.

**Deluge and Preaction Sprinkler Systems (35 Hours)**
(Module ID 18301) Describes the operation, installation, and NFPA 13 requirements for deluge and preaction sprinkler systems. Covers initiating and notification devices. Provides an overview of acceptance testing, including completing a Contractor’s Material and Test Certificate for Aboveground Piping for these systems.

**Application-Specific and Special Sprinklers (40 Hours)**
(Module ID 18305) Covers application-specific sprinklers, including extended coverage sprinklers, residential sprinklers, control mode specific application (CMSA) sprinklers, and early suppression fast-response (ESFR) sprinklers. Describes the area of coverage, positioning, and obstruction requirements for each type. Covers special sprinklers and their uses.

**L4 SPRINKLER FITTING**

**LEVEL 4**

**Curriculum Notes**
- 145 Hours
- Revised: 2023, Fourth Edition to reflect NFPA 13
- Downloadable instructor resources are available.

**PAPERBACK**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**System Layout (27.5 Hours)**
(Module ID 18401) Identifies three types of system configurations and a variety of occupancy and storage classifications. Covers the basics of sprinkler system layout and design methods. Describes flow characteristics and pressure loss.

**Inspection, Testing, and Maintenance (37.5 Hours)**
(Module ID 18402) Covers inspection, testing, and maintenance requirements for sprinkler systems, standpipes and hose systems, fire pumps, and other systems.

**Special Extinguishing Systems (27.5 Hours)**
(Module ID 18403) Describes water spray, water mist, foam, carbon dioxide, and clean agent extinguishing systems. Covers all of the appropriate system components, including pipe and fittings, nozzles, alarms, detectors, and control equipment.

**Fundamentals of Crew Leadership (22.5 Hours)**
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are also discussed. Explains details and procedures for project planning, scheduling, and estimating.

**Procedures and Documentation (30 Hours)**
ISBN 978-0-13-817417-0
(Module ID 18405) Explains the various ways sprinkler projects are documented. Reviews daily reports, materials documentation, and documentation of safety policies and incidents. Covers responses to water damage, including documentation and investigation.
Plasma Arc Cutting (7.5 Hours)  
(Module ID 29103) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slotting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

Air-Carbon Arc Cutting and Gouging (10 Hours)  
(Module ID 29104) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc cutting and gouging activities.

Base Metal Preparation (12.5 Hours)  
(Module ID 29105) Describes how to clean and prepare all types of base metals for cutting or welding, including marine welds. Identifies and explains welding imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

Weld Quality (10 Hours)  
(Module ID 29106) Describes how to clean and prepare all types of base metals for cutting or welding, including marine welds. Identifies and explains welding imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

SMAW Electrodes (2.5 Hours)  
ISBN 978-0-13-792468-4  
(Module ID 29108) Describes how to clean and prepare all types of base metals for cutting or welding, including marine welds. Identifies and explains welding imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

Joint Fit-Up and Alignment (5 Hours)  
(Module ID 29109) Describes job code specifications. Explains how to use fit-up gauges and measuring devices to check fit-up and alignment and use plate and pipe fit-up and alignment tools to properly prepare joints. Explains how to check for joint misalignment and poor fit.

SMAW — Groove Welds with Backing (50 Hours)  
(Module ID 29110) Introduces groove welds and explains how to set up welding equipment for making groove welds. Describes how to make groove welds with backing. Provides procedures for making flat, horizontal, vertical, and overhead groove welds.

SMAW — Open-Root Groove Welds — Plate (60 Hours)  
(Module ID 29112) Introduces various types of groove welds and describes how to prepare for groove welding. Describes the techniques required to produce various open V-groove welds.

Welding (continued)

Curriculum Notes

• 227.5 Hours
• Revised: 2024, Sixth Edition
• Sequenced in accordance with the American Welding Society’s (AWS) S.E.N.S.E school requirements. When combined with NCCER Welding Level 1, the content aligns with the key indicators specified in AWS EG2.0:2008 Level 1-Entry Welder.
• Downloadable instructor resources are available.

PAPERBACK  
Trainee Guide: $99.99  
ISBN 978-0-13-821616-0

DIGITAL  
NCCERconnect Access Card: $99.99  
NCCERconnect + Trainee Guide: $129.99  

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Welding Symbols  (5 Hours)
(Module ID 29201) Identifies and explains the different types of fillet weld, groove weld, and non-destructive examination symbols. Explains how to read welding symbols on drawings, specifications, and Welding Procedure Specifications (WPS).

Reading Welding Detail Drawings  (10 Hours)
(Module ID 29202) Identifies and explains welding detail drawings. Describes lines, fills, object views, and dimensioning on drawings. Explains how to use notes on drawings and the bill of materials. Explains how to sketch and draw basic welding drawings.

Physical Characteristics and Mechanical Properties of Metals  (7.5 Hours)
ISBN 978-0-13-836579-0  
(Module ID 29203) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

Preheating and Postheating of Metals  (5 Hours)
(Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

GMAW and FCAW – Equipment and Filler Metals  (10 Hours)
(Module ID 29205) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

GMAW – Plate  (60 Hours)
(Module ID 29209) Explains how to set up and use GMAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

GMAW and FCAW – Equipment and Filler Metals  (10 Hours)
(Module ID 29207) Explains GTAW safety. Identifies and explains the use of GTAW equipment, filler metals, and shielding gases. Covers the setup of GTAW equipment.

GTAW – Plate  (60 Hours)
ISBN 978-0-13836593-6  
(Module ID 29208) Describes how to build pads on carbon steel plate using GTAW and carbon steel filler metal. Also explains how to make multiple-pass GTAW fillet welds on carbon steel plate coupons in the 1F, 2F, 3F, and 4F positions, and how to make GTAW V-groove welds in the 1G, 2G, 3G, and 4G positions.

FCAW – Plate  (60 Hours)
(Module ID 29210) Explains how to set up and use FCAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

GTAW – Equipment and Filler Metals  (10 Hours)
(Module ID 29207) Explains GTAW safety. Identifies and explains the use of GTAW equipment, filler metals, and shielding gases. Covers the setup of GTAW equipment.

GTAW – Plate  (60 Hours)
ISBN 978-0-13836593-6  
(Module ID 29208) Describes how to build pads on carbon steel plate using GTAW and carbon steel filler metal. Also explains how to make multiple-pass GTAW fillet welds on carbon steel plate coupons in the 1F, 2F, 3F, and 4F positions, and how to make GTAW V-groove welds in the 1G, 2G, 3G, and 4G positions.

Physical Characteristics and Mechanical Properties of Metals  (7.5 Hours)
ISBN 978-0-13836579-0  
(Module ID 29203) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

Preheating and Postheating of Metals  (5 Hours)
ISBN 978-0-13836583-7  
(Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

GMAW and FCAW – Equipment and Filler Metals  (10 Hours)
ISBN 978-0-13836584-4  
(Module ID 29205) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

GMAW – Plate  (60 Hours)
(Module ID 29209) Explains how to set up and use GMAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

FCAW – Plate  (60 Hours)
(Module ID 29210) Explains how to set up and use FCAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.
Welding Level 1

**Oxyfuel Cutting (17.5 Hours)**
(Module ID 29102-15) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, beveling, welding, and gouging.

**Plasma Arc Cutting (7.5 Hours)**
(Module ID 29103-15) Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

**Air-Carbon Arc Cutting and Gouging (10 Hours)**
(Module ID 29104-15) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc washing and gouging activities.

**Base Metal Preparation (12.5 Hours)**
(Module ID 29105-15) Describes how to clean and prepare all types of base metals for cutting or welding. Identifies and explains joint design and base metal preparation for all welding tasks.

**Weld Quality (10 Hours)**
(Module ID 29106-15) Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

**SMAW – Equipment and Setup (5 Hours)**
(Module ID 29107-15) Describes SMAW welding equipment and welding setup. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

**SMAW Electrodes (2.5 Hours)**
(Module ID 29108-15) Describes electrode characteristics and different types of filler metals. Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Explains proper storage and control of filler metals and identifies the use of codes.

---

**Welding Safety (5 Hours)**
(Module ID 29101-15) Covers safety equipment, protective clothing, and procedures applicable to the cutting and welding of metals.
Welding Level 2

L2 WELDING

**Curriculum Notes**
- 277.5 Hours
- Revised: 2015, Fifth Edition
- Sequenced in accordance with the American Welding Society's (AWS) S.E.N.S.E school requirements. When combined with NCCER Welding Level 1, the content aligns with the key indicators specified in AWS E62.0:2008 Level 1-Entry Welder.
- Downloadable instructor resources are available.

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Hardcover**

**Paperback**

**Digital**

**SMAW – Open-Root Pipe Welds (100 Hours)**
(Module ID 29301-16) Explains how to set up SMAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. Provides procedures for making open-root V-groove welds with SMAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

**GMAW – Pipe (60 Hours)**
(Module ID 29302-16) Explains how to set up GMAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. Provides procedures for making open-root V-groove welds with GMAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

**GMAW and FCAW – Equipment and Filler Metals (10 Hours)**
(Module ID 29205-15) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the fillers and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

**GTAW – Carbon Steel Pipe (60 Hours)**
(Module ID 29304-16) Explains how to set up GTAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. Provides procedures for making open-root V-groove welds with GTAW equipment on pipe in the 2G, 5G, and 6G positions.

**GTAW – Low Alloy and Stainless Steel Pipe (70 Hours)**
(Module ID 29305-16) Explains how to set up GTAW equipment for open-root V-groove welds on low-alloy and stainless steel pipe, and explains how to prepare for and make open-root V-groove welds on low-alloy and stainless steel pipe. Provides procedures for making open-root V-groove welds with GTAW equipment on low-alloy and stainless steel pipe in the 2G, 5G, and 6G positions.

---

To Order Call: 1-800-922-0579 ©NCCER

Content continued on following page...
SMAW – Stainless Steel Plate and Pipe
Groove Welds (100 Elective Hours)
(Module ID 29306-16) Explains stainless steel metallurgy; how to select SMAW electrodes for stainless steel welds; and how to weld different types of stainless steels. Covers safety issues associated with welding on stainless steels; how to prepare weld coupons; and how to set up SMAW equipment for welding stainless steel. Provides procedures for making open-root V-groove welds with SMAW equipment on stainless steel plate in the 1G, 2G, 3G, and 4G positions. Includes procedures for making open-root V-groove welds with SMAW equipment on stainless steel pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

GMAW – Aluminum Pipe (50 Hours)
(Module ID 29403-16) Covers the setup of GTAW equipment for welding aluminum pipe. Explains how to clean and prepare aluminum pipe coupons for welding. Addresses GTAW techniques used to make V-groove welds on aluminum pipe with and without backing. Provides GTAW procedures on how to make V-groove or modified U-groove welds on aluminum pipe in the 2G, 5G, and 6G positions.

GTAW – Aluminum Pipe (50 Hours)
(Module ID 29404-16) Covers the setup of GMAW equipment for welding aluminum pipe. Addresses GMAW techniques used to make V-groove welds on aluminum pipe with and without backing. Provides procedures on how to make V-groove welds on aluminum pipe in the 2G, 5G, and 6G positions.

Soldering and Brazing (12.5 Hours)
(Module ID 29405-16) Introduces the equipment, techniques, and materials used to safely join copper tubing through both brazing and soldering processes. Covers the required PPE, preparation, and work processes in detail. Also presents procedures for brazing copper to dissimilar materials such as steel.
Mobile Crane Operations

PAPERBACK
Trainee Guide: $74.99

MOBILE CRANE OPERATIONS
L1

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Trade (5 Hours)
(Module ID 21101) Provides an overview of the entire course and highlights the duties and responsibilities of a mobile crane operator. Discusses ASME B30.5 and 29 CFR 1926, Subpart CC, as well as crane operator certification.

Basic Principles of Cranes (15 Hours)
(Module ID 21102) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

Rigging Practices (15 Hours)
(Module ID 38102; from Basic Rigger) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

Crane Communications (10 Hours)
(Module ID 53101; from Signal Person) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

Crane Safety and Emergency Procedures (25 Hours)
(Module ID 21106) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

Operating a Crane (25 Hours)
(Module ID 21105) Describes preparations and considerations prior to lifting operations. Provides an opportunity to become familiar with the operation of a crane and the functions of its controls.

Computer Aids/Operator Aids (20 Hours)
(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

Wire Rope (25 Hours)
(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Load Dynamics (17.5 Hours)
(Module ID 21206) Covers leverage, forward and backward stability, operational quadrants, submerged lifts, non-centered lifts, and other forces that affect stability.

Transporting Requirements (17.5 Hours)
(Module ID 21308) Discusses the proper handling, loading and unloading, and securing procedures for mobile cranes and their components. Presents information on driver requirements and procedures for securing the mobile crane for transporting.

On-Site Equipment Movement (25 Hours)
(Module ID 21207) Covers site hazards and restrictions that could hinder on-site crane movement; safety considerations involved in crane movement over uneven ground; pick-and-carry operations; and power line contact. Also addresses flotation capacity.

L2 MOBILE CRANE OPERATIONS
LEVEL 2

Curriculum Notes
• 145 Hours
• Updated in 2018.
• Downloadable instructor resources are available.

PAPERBACK
Trainee Guide: $99.99

MOBILE CRANE OPERATIONS
L2

Machine Power Flow (15 Hours)
(Module ID 21202) Discusses the power systems that enable cranes to perform. Discusses diesel and gasoline/propane engines and electrical/motor generator, as well as mechanical, electrical, pneumatic, and hydraulic power systems.

Computer Aids/Operator Aids (20 Hours)
(Module ID 21205) Provides information on load moment indicators, anti-two-block devices, load indicators, and other operator aids that are installed in cranes. Describes input devices associated with these operator aids and the information they provide.

Wire Rope (25 Hours)
(Module ID 21204) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

Load Dynamics (17.5 Hours)
(Module ID 21206) Covers leverage, forward and backward stability, operational quadrants, submerged lifts, non-centered lifts, and other forces that affect stability.

PAPERBACK
Trainee Guide: $99.99

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Load Charts (35 Hours)
(Module ID 21301) Discusses the importance of load charts and charts that apply to different configurations. Includes on-rubber, on-outrigger, jib, and deduction charts, as well as range diagrams and operational notes. Covers parts of line and capacity calculations.

Lift Planning (30 Hours)
(Module ID 21304) Discusses lift plan implementation, including reference information, calculations, single- and multiple-crane lifting, critical lifts, and engineering considerations.

Telescopic Boom Attachment Setup and Assembly (20 Hours)
(Module ID 21302) Covers the setup and stowing of swing-away extensions and various jibs, as well as the assembly of intermediate boom sections, on telescopic cranes. Includes the description and operating characteristics of manual and power luffing jibs.

Lattice Boom Assembly and Disassembly (20 Hours)
(Module ID 21306) Identifies lattice-boom components and provides pre-/post-assembly considerations. Provides step-by-step guidance in the assembly and disassembly of lattice booms.

Hoisting Personnel (20 Hours)
(Module ID 21305) Examines ASME B30.23 and 29 CFR 1926.550(g) requirements while presenting advanced operation techniques for hoisting personnel.

Advanced Operational Techniques (20 Hours)
(Module ID 21303) Covers multi-crane lifts, critical lifts, blind lifts, and demolition. Includes sections on how to use magnet and vacuum lifting devices and how to operate a mobile crane in cold weather.
Rigger/Signal Person

**Basic Rigger**

Curriculum Notes
- 140 Hours (includes Core)
- Updated in 2018.
- Downloadable instructor resources are available.
- A Spanish translation of Rigging Fundamentals is available. Please see NCCER’s online catalog for more information.

**PAPERBACK**
**ISBN**
Trainee Guide: $74.99
978-0-13-518508-7

**Basic Rigger**

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Rigging Practices (15 Hours)**
(Module ID 38102) Describes basic rigging and safety practices related to rigging activities. Describes the use and inspection of equipment and hardware used in rigging. Explains how to apply common hitches. Covers jacks and hoisting equipment.

**Crane Safety and Emergency Procedures (25 Hours)**
(Module ID 21106, from Mobile Crane Operations Level One) Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.

**Basic Principles of Cranes (15 Hours)**
(Module ID 21102, from Mobile Crane Operations Level One) Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

**Intermediate Rigger**

**Curriculum Notes**
- 105 Hours
- Updated in 2018.
- Downloadable instructor resources are available.

**PAPERBACK**
**ISBN**
Trainee Guide: $99.99
978-0-13-518320-5

**Intermediate Rigger**

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Intermediate Rigging (17.5 Hours)**
(Module ID 38202) Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trains learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

**Load Dynamics (17.5 Hours)**
(Module ID 21206, from Mobile Crane Operations Level Two) Covers leverage, forward and backward stability, operational quadrants, submerged lifts, non-centered lifts, and other forces that affect stability.

**Wire Rope (25 Hours)**
(Module ID 21204, from Mobile Crane Operations Level Two) Covers the components of wire rope and inspection requirements and procedures for wire rope, load blocks, and sheaves. Explains proper installation of wire rope, maintenance guidelines, and end terminations and preparations.

**Crane Communications (10 Hours)**
(Module ID 53101) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

**Telescopic Boom Attachment Setup and Assembly (20 Hours)**
(Module ID 21302, from Mobile Crane Operations Level Three) Covers the setup and stowing of swing-away extensions and various jibs, as well as the assembly of intermediate boom sections, on telescopic cranes. Includes the description and operating characteristics of manual and power luffing jibs.

**Lattice Boom Assembly and Disassembly (25 Hours)**
(Module ID 21306, from Mobile Crane Operations Level Three) Identifies lattice-boom components and provides pre-/post-assembly considerations. Provides step-by-step guidance in the assembly and disassembly of lattice booms.
## Advanced Rigger

### Curriculum Notes
- 95 Hours
- Updated in 2018.

### Lift Planning (20 Hours)

(Module ID 21304; from Mobile Crane Operations Level 3)  
Discusses lift plan implementation, including reference information, calculations, single- and multiple-crane lifting, critical lifts, and engineering considerations.

### Hoisting Personnel (20 Hours)

(Module ID 21305; from Mobile Crane Operations Level Three)  
Examines ASME B30.23 and 29 CFR 1926.550(g) requirements while presenting advanced operation techniques for hoisting personnel.

### MODULES

#### Advanced Rigging (20 Hours)

(Module ID 38301) Explains how load weight and center of gravity affect lifting and crane stability. Load calculations for multi-crane lifts are presented, along with the application of equalizer beams. The movement of loads up an inclined plane and the line pull required are examined in detail. The module concludes with guidance in the rigging and handling of rebar bundles.

#### Load Charts (35 Hours)

(Module ID 21301; from Mobile Crane Operations Level Three)  
Discusses the importance of load charts and charts that apply to different configurations. Includes on-rubber, on-outrigger, jib, and deduction charts, as well as range diagrams and operational notes. Covers parts of line and capacity calculations.

### MODULES

#### Crane Communications (10 Hours)

(Module ID 53101) Describes the communication process between the signal person and the crane operator. Covers electronic communications as well as the standard hand signals in 29 CFR 1926.

#### Basic Principles of Cranes (15 Hours)

(Module ID 21102; from Mobile Crane Operations Level One)  
Introduces mobile crane equipment with an in-depth discussion of terminology and nomenclature. Explains the basic scientific principles associated with mobile crane operation.

### Crane Safety and Emergency Procedures (25 Hours)

(Module ID 21106; from Mobile Crane Operations Level One)  
Covers safety standards and best safety practices relevant to the operation of cranes. Describes safety considerations related to power lines, weather conditions, and specific crane functions.
Tower Crane Operator

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Orientation to the Trade (5 Hours)**
(Module ID 48101-10) Provides an overview of the tower crane industry and highlights the duties and responsibilities of a tower crane operator. Discusses ASME and OSHA standards, as well as career opportunities and operator requirements.

**Basic Principles of Tower Cranes (20 Hours)**
(Module ID 48102-10) Identifies the three main types of tower cranes and their components, including operator aids and base support systems. Explains the basic scientific principles associated with tower crane operation. Discusses the factors that affect lifting capacities.

**Tower Crane Safety (15 Hours)**
(Module ID 48103-10) Introduces various safety aspects of tower crane operation, including equipment inspection, rigging, swing paths, and site hazard identification.

**Rigging Practices (15 Hours)**
(Module ID 48104-10) Describes the use and inspection of basic equipment and hardware used in rigging, including slings, wire rope, chains, lifting beams, and attaching hardware such as shackles, eyebolts, and hooks. Explains sling capacities and sling angles.

**Load Charts (15 Hours)**
(Module ID 48105-10) Explains how to use load charts to calculate safe lifting capacities for self-erecting, luffing boom, and hammerhead tower cranes. Also covers parts of line and counterweight configurations.

**Communications (10 Hours)**
(Module ID 48106-10) Covers the fundamentals of the communication process, including verbal and nonverbal methods of communication. Also presents the ASME B30.3 hand signals, including the appropriate operator action when the signal is given.

**Operating a Tower Crane (25 Hours)**
ISBN 978-0-13-213826-0
(Module ID 48107-10) Describes the basic functions of a tower crane, as well as standard procedures for starting up and shutting down self-erecting, luffing boom, and hammerhead tower cranes. Provides an opportunity for trainees to become familiar with the actual operation of a tower crane and the functions of its controls.
**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Alternative Energy (25 Hours)**
(Module ID 74101-11) Identifies the need for alternative energy development. Describes the contributions and potential of individual alternative energy sources. Also covers the present U.S. electrical grid and issues affecting specific alternative energy source tie-in and reliability.

**Biomass and Biofuels (22.5 Hours)**
(Module ID 74102-11) Defines potential sources of biomass and biofuels and discusses their advantages and disadvantages for energy production. Discusses the future of biomass as well as biomass energy applications.

**Nuclear Power (25 Hours)**
(Module ID 74103-11) Describes nuclear power and its sources. Discusses the advantages and disadvantages of nuclear power, the future of nuclear energy, and nuclear power generation.

**Solar Power (25 Hours)**
(Module ID 74104-11) Describes solar photovoltaic (PV) power and how it is harnessed. Identifies the advantages and disadvantages of solar energy. Discusses the past, present, and future of solar energy, as well as solar PV applications.

**Wind Power (22.5 Hours)**
ISBN 978-0-13-272939-0
(Module ID 74105-11) Describes wind power and how it is harnessed. Identifies the advantages and disadvantages of wind energy. Discusses the past, present, and future of wind energy, as well as wind energy applications.
Introduction to Solar Photovoltaics

- Downloadable instructor resources are available.

Solar photovoltaic (PV) modules transform solar energy, sunlight, into electrical energy that powers an electrical load, such as your computer or refrigerator.

Using PV modules, the United States and other nations around the world can harness solar energy. Solar energy is being used to reach 2030 and 2050 global climate change initiatives to reduce carbon emissions and decrease the reliance on fossil fuels. Completion of this module helps prepare solar PV trainees for the North American Board of Certified Energy Practitioners (NABCEP) PV Associate Exam and an exciting career in the solar PV industry.

Solar Photovoltaics

System Design (25 Hours)
(Module ID 57103) Effective solar PV system designers work closely with owners to determine the appropriate configuration of a PV system. An experienced designer will recommend a particular approach based on site assessment data, the electrical load, budget, and other relevant conditions. It is the duty of the designer to fully discuss all aspects of the possible configurations to help the owner make an informed choice. A successful solar PV system design and installation must meet the owner’s expectations. This module focuses on component selection and wiring for stand-alone and grid-tied solar PV systems.

System Installation and Inspection (60 Hours)
(Module ID 57104) After the job site has been assessed and a system designed, it’s time to install solar PV components. Prior to installation, it’s important to understand job site hazards, the appropriate PPE, and proper tool safety. This module reviews these topics, along with summaries of basic installation requirements, ground- and roof-mounted systems, a variety of solar PV components, and system commissioning activities.

Maintenance and Troubleshooting (10 Hours)
(Module ID 57105) PV equipment requires regular inspection and maintenance. PV system maintenance begins by locating and reviewing the system records and the manufacturer’s instructions for the equipment. Next, the system is inspected, and all required maintenance performed. If the system is not producing the expected output, a systematic process of troubleshooting must be followed. Finally, records must be prepared of all system maintenance activities, test results, and repairs. This module explains how to make operational checks, maintain, and troubleshoot PV equipment to help it last longer and operate more efficiently. It also examines how to prepare the system before a natural disaster and how best to recover after storm damage occurs.

Roof-Mounted Solar PV Installation (20 Hours)
(Module ID 57107) After having mastered fundamental concepts in roofing, you will be ready to tackle solar PV installations on various types of roofs. Installing a solar PV system on both steep- and low-slope roofs is a very involved process that requires coordination of multiple crew members. In this module, you will learn how to install a solar PV system on both steep- and low-slope roofs. The material covers the mechanical installation of the mounting hardware and the electrical installation of the wiring. PV modules, and auxiliary electrical equipment. Jobsite safety is also addressed, as is the process of reviewing a job packet to gather important manufacturer-specific information.

Ground-Mounted Solar PV Installation (20 Hours)
(Module ID 57108) As with roof-mounted solar installations, the goal of ground-mounted solar PV systems is to generate as much electricity as possible by maximizing module Sun exposure. Ground-mounted solar PV systems can be constructed almost anywhere, so engineers can select sites that aren’t obstructed by surrounding buildings and shade to maximize a system’s electrical output. Additionally, they can be designed with tracking capabilities that allow the modules to rotate and follow the Sun. This module lists investigative steps, such as soil sampling to help determine the best foundation type and site surveying to develop the best layout and tracking system. It also examines how certain factors influence the design of a ground-mounted PV system, such as use of heavy equipment to prepare the site, laying the conduit, and setting the foundation.

Safety and Awareness: Utility-Scale PV Projects (175 Hours)
(Module ID 57109) Utility-scale solar PV projects pose many risks to workers. Serious injury may result from electrocution, falls, pinch points, lacerations, and burns. Given that solar modules are energized when exposed to light, electrical safety is particularly important in solar PV projects. This module introduces general safety concepts, hazard communication, and standards set by the US Occupational Safety and Health Administration (OSHA). It explores site awareness topics including signage, barricades and barriers, working safely from elevations and near heavy equipment, lockout/tagout procedures, and concludes with a thorough review of electrical safety.
Solar Photovoltaics

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Solar Photovoltaics** (40 Hours)
(Module ID 57101) Solar photovoltaic (PV) modules transform solar energy, sunlight, into electrical energy that powers an electrical load, such as your computer or refrigerator. Using PV modules, the United States and other nations around the world can harness solar energy. Solar energy is being used to reach 2030 and 2050 global climate change initiatives to reduce carbon emissions and decrease the reliance on fossil fuels. Completion of this module helps prepare solar PV trainees for the North American Board of Certified Energy Practitioners (NABCEP) PV Associates Exam and an exciting career in the solar PV industry.

**Site Assessment** (10 Hours)
ISBN 978-0-13-266202-4
(Module ID 57102-11) Explains how to determine customer needs, assess site-specific safety hazards, conduct a site survey, and identify a suitable location for the PV array and other system components. Also explains how to acquire and interpret site solar radiation and temperature data.

**System Design** (25 Hours)
(Module ID 57103-11) Describes system design considerations, including array configurations, component selection, and wire sizing. Covers bonding, grounding, and the selection of overcurrent protection and disconnects.

**System Installation and Inspection** (60 Hours)
(Module ID 57104-11) Explains how to use the information from the site assessment and system design documents to safely install a photovoltaic array and other system components.

**Maintenance and Troubleshooting** (10 Hours)
(Module ID 57105-11) Covers basic system performance monitoring and troubleshooting procedures, including record-keeping requirements.

- 220 Hours (includes Core)
- Published: 2011, First Edition
- Developed using NABCEP’s PV Task Analysis and aligned with NABCEP’s PV Installer Certification.
- Downloadable instructor resources are available.
- Introduction to Solar Photovoltaics (Module ID 57101) has been approved for 40 general continuing education hours under GBCI’s Credential Maintenance Program.
- NCCER is a recognized accrediting body for institutions to become providers of the NABCEP Entry Level Exam.
- This craft requires additional instructor qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720 or visit the craft page at nccer.org.

Sustainable Construction

Sustainable Construction Supervisor

Sustainable Construction Supervisor provides front-line supervisors with sustainable construction management techniques as they relate to targeted construction-phase LEED points for their projects. Topics include project sustainability goals, Green building materials and technologies, Green building methods and processes, and more. This module has been endorsed and approved by GBCI for 20 general and LEED-specific continuing education hours for credential maintenance.

A related assessment certification exam, developed by NCCER and endorsed by GBCI, is available. For more information, contact NCCER Customer Service at 1-888-622-3720.

Your Role in the Green Environment

Provides pertinent information concerning the green environment, construction practices, and building rating systems. Updated to reflect LEED v4.1 with emphasis on standards for building design and construction.
As energy efficiency is becoming a priority for homeowners across America, many are turning to the weatherization industry to assist in their efforts. NCCER’s Weatherization program offers training that exceeds the existing standards for weatherization technicians, crew chiefs, and building auditors. This program combines existing NCCER curricula with new building science modules that address the specific needs of this industry. Dual credentials are available within this program. Note: Instructors wishing to teach NCCER’s Weatherization program must meet specific qualifications. For more information, contact NCCER Customer Service at 1-888-622-3720.

Introduction to Weatherization

17.5 Hours  
Published: 2010  
Module ID 59101-10

PAPERBACK  

Trainee Guide: $24.99

Introduces the purpose and benefits of the weatherization program. Explains how weatherization goals are met by reducing heating and cooling losses and how infiltration points are located. Approved for 17.5 continuing education hours under GBCI’s credential maintenance program.

• Downloadable instructor resources are available.

FUNDAMENTALS OF WEATHERIZATION

Curriculum Notes

• 95 Hours  
• Published: 2010  
• Introduction to Weatherization, combined with NCCER’s Core, makes up Fundamentals of Weatherization and is intended to introduce trainees to the concepts and skills they will need to successfully complete Weatherization Technician Level One.

PAPERBACK  
ISBN 978-0-13-535751-4

Weatherization Level 1

**L1 WEATHERIZATION TECHNICIAN**

**LEVEL 1**

**Curriculum Notes**

- 150 Hours
- Includes 95 hours of Fundamentals of Weatherization which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources are available.

**PAPERBACK  ISBN**

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Wood and Masonry Construction Methods** (12.5 Hours)
(Module ID 33102-10; from Electronic Systems Technician Level One) Reviews the materials and techniques used in constructing and finishing residential and commercial buildings, including wood frame, brick and block, and post and beam. Covers common drills, bits, and techniques used to drill through wood and masonry. Also describes types of fasteners used with these materials.

**Thermal & Moisture Protection** (7.5 Hours)
(Module ID 27203-07; from Carpentry Level Two, Fourth Edition) Covers the selection and installation of various types of insulating materials in walls, floors, and attics. Also covers the uses and installation practices for vapor barriers and waterproofing materials.

**Concrete and Steel Construction Methods** (12.5 Hours)
ISBN 978-0-13-266284-0
(Module ID 33103-10; from Electronic Systems Technician Level One) Describes the materials and techniques used in constructing and finishing residential and commercial buildings, including poured and prefabricated concrete and structural steel. Covers common drills, bits, and techniques used to drill through concrete and steel. Also describes types of fasteners used with these materials.

**Commercial Drawings** (25 Hours)
(Module ID 27201-07; from Carpentry Level Two, Fourth Edition) Describes how to read and interpret a set of commercial drawings and specifications.

**Introduction to Supervisory Skills** (15 Hours)
(Module ID 03410-09; from HVAC Level Four, Third Edition) Describes the skills that must be learned for the craftsman who plans to move into leadership roles. Introduces human resource criteria and concepts for the first time in the series.

**Introduction to Heating** (15 Hours)
(Module ID 03108-07; from HVAC Level One, Third Edition) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

**Chimneys, Vents, and Flues** (5 Hours)
(Module ID 03202-07; from HVAC Level Two, Third Edition) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

**Sealing the Building Envelope** (25 Hours)
(Module ID 59102-10) Describes how to correct heat losses and gains by applying insulating materials to uninsulated areas of the building envelope. Describes how to reduce air infiltration by applying caulks and other materials. Also explains how to patch drywall and install weatherstripping.

**Insulating Pipes, Ducts, and Water Heaters** (10 Hours)
(Module ID 59103-10) Describes how to insulate water pipes and water heaters, and explains how to make simple duct system repairs, seal air leaks in a duct system, and insulate ducts to reduce heat loss.

**Introduction to Supervisory Skills** (15 Hours)
(Module ID 03109-07; from HVAC Level One, Third Edition) Describes the factors related to air movement and its measurement in common air distribution systems. Presents the required mechanical equipment and materials used to create air distribution systems. Introduces basic system design principles for both hot and cold climates.

**Air Quality Equipment** (5 Hours)
(Module ID 03204-07; from HVAC Level Two, Third Edition) Covers principles, processes, and devices used to control humidity and air cleanliness, as well as devices used to conserve energy in HVAC systems.

**Air Distribution Systems** (10 Hours)
(Module ID 03403-07; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

**Indoor Air Quality** (15 Hours)
(Module ID 03403-09; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

**Introduction to Cooling** (30 Hours)
(Module ID 03107-07; from HVAC Level One, Third Edition) Explains the fundamental operating concepts of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC/R systems. Also introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Introduces basic control concepts for simplifying systems.

**Diagnoses and Management Practices** (30 Hours)
(Module ID 59201-10) Explains how to interpret energy audit reports and how to prioritize and schedule air sealing. Describes how to perform the following tests: blower door, pressure pan, burner efficiency, carbon monoxide, draft, and spillage. Also covers lead-safe work practices and how to perform quality inspections on completed work.

**Sealing the Building Envelope** (25 Hours)
(Module ID 59102-10) Describes how to correct heat losses and gains by applying insulating materials to uninsulated areas of the building envelope. Describes how to reduce air infiltration by applying caulks and other materials. Also explains how to patch drywall and install weatherstripping.

**Insulating Pipes, Ducts, and Water Heaters** (10 Hours)
(Module ID 59103-10) Describes how to insulate water pipes and water heaters, and explains how to make simple duct system repairs, seal air leaks in a duct system, and insulate ducts to reduce heat loss.
Weatherization Level 2

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Trade Mathematics (10 Hours)**
(Module ID 03102-07; from HVAC Level One, Third Edition) Explains how to solve HVAC/R trade-related problems involving the measurement of lines, area, volume, weights, angles, pressure, vacuum, and temperature. Also includes a review of scientific notation, powers, roots, and basic algebra and geometry.

**Introduction to Cooling (30 Hours)**
(Module ID 03107-07; from HVAC Level One, Third Edition) Explains the fundamental operating concepts of the refrigeration cycle and identifies both primary and secondary components found in typical HVAC/R systems. Also introduces common refrigerants. Describes the principles of heat transfer and the essential pressure-temperature relationships of refrigerants. Introduces basic control concepts for simple systems.

**Introduction to Heating (15 Hours)**
(Module ID 03108-07; from HVAC Level One, Third Edition) Covers the fundamentals of heating systems and the combustion process. Provides the different types and designs of gas furnaces and their components, as well as basic procedures for their installation and service.

**Chimneys, Vents, and Flues (5 Hours)**
(Module ID 03202-07; from HVAC Level Two, Third Edition) Covers the principles of venting fossil fuel furnaces and methods for selecting and installing vent systems for gas-fired heating equipment.

**Introduction to Hydronic Systems (10 Hours)**
ISBN 978-0-13-266312-0
(Module ID 03203-07; from HVAC Level Two, Third Edition) Introduces hot water heating systems, focusing on safe operation of the low-pressure boilers and piping systems in residential applications.

**Heating and Cooling System Design (25 Hours)**
(Module ID 03407-09; from HVAC Level Four, Third Edition) Identifies factors that affect heating and cooling loads. Explains the process by which heating and cooling loads are calculated, and how load calculations are used in the selection of heating and cooling equipment. Covers basic types of duct systems and their selection, sizing, and installation requirements.

**Energy Conservation Equipment (10 Hours)**
(Module ID 03404-09; from HVAC Level Four, Third Edition) Covers heat recovery/reclaim devices, as well as other energy recovery equipment used to reduce energy consumption in HVAC systems.

**Indoor Air Quality (15 Hours)**
(Module ID 03403-09; from HVAC Level Four, Third Edition) Defines the issues associated with indoor air quality and its effect on the health and comfort of building occupants. Provides guidelines for performing an IAQ survey and covers the equipment and methods used to monitor and control indoor air quality.

**Alternative Heating and Cooling Systems (10 Hours)**
(Module ID 03409-09; from HVAC Level Four, Third Edition) Describes alternative devices used to reduce energy consumption, including wood, coal, and pellet-fired systems, waste-oil heaters, geothermal heat pumps, solar heating, in-floor radiant heating, and direct-fired makeup units. Also introduces application-specific computer room environmental and air turnover systems.

**Performing a Building Audit (42.5 hours)**
(Module ID 59202-10) Explains how to interview homeowners and educate them about saving energy in their homes. Explains how to inspect and evaluate the building envelope and HVAC systems. Describes how to perform the following tests: blower door, pressure pan, burner efficiency, carbon monoxide, draft, and spillage. Also covers lead-safe work practices, baseline energy use, and the purpose of the forms and reports a building auditor is responsible for completing.
Introduction to Electrical Circuits (7.5 Hours)
(Module ID 26103-11; from Electrical Level One, Seventh Edition)
Introduces electrical concepts used in Ohm’s law applied to DC series circuits. Covers atomic theory, electromagnetic force, resistance, and electric power equations.

Electrical Theory (7.5 Hours)
ISBN 978-0-13-257811-0
(Module ID 26104-11; from Electrical Level One, Seventh Edition)
Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Electrical Test Equipment (5 Hours)
(Module ID 26112-11; from Electrical Level One, Seventh Edition)
Covers proper selection, inspection, and use of common electrical test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment. Also covers safety precautions and meter category ratings.

Electrical Wiring (10 Hours)
(Module ID 58104-11) Describes types and applications of conductors as well as their installation techniques. Also describes the technique and components used for terminating and splicing conductors.

Circuit Breakers and Fuses (10 Hours)
(Module ID 58105-11) Explains the necessity of overcurrent protection and the way it is applied in the wind turbine environment. Explores the operation of common circuit breakers and the differences in various fuse types. Overcurrent device terminology is presented, along with a review of the information found on such devices.

Switching Devices (7.5 Hours)
(Module ID 58106-11) Provides coverage of switching devices related to the power distribution and control of wind turbines. Mechanical and solid-state relay types are presented, as well as typical wind turbine control wiring diagrams. Explains various time delay schemes and how they can be applied.

Wind Turbine Power Distribution Systems (12.5 Hours)
(Module ID 58107-11) Discusses the basics of power generation and the generators used in wind turbines. Reviews how power is distributed and controlled during various modes of wind turbine operation. Simple one-line diagrams are also covered.

Fasteners and Torquing (20 Hours)
(Module ID 58108-11) Presents comprehensive coverage of wind turbine fasteners and their required characteristics. Covers torque theory, torquing, tensioning, and hydraulic torquing equipment. Presents the use and care of all significant torquing and tensioning tools. The use of taps and dies is also introduced.

Introduction to Bearings (15 Hours)
(Module ID 32207-07; from Industrial Maintenance Mechanic Level Two) Introduces plain, ball, thrust, guide, flanged, pillow block, and uptake bearings. Discusses bearing materials and designations.

Lubrication (12.5 Hours)
(Module ID 58109-11) Explains basic lubrication theory and related equipment. Includes the different applications and types of lubricants used in the wind turbine environment. Reviews OSHA’s hazard communication program and the EPA’s hazardous waste control program. Includes in-depth coverage of material safety data sheets.

Introduction to Hydraulic Systems (10 Hours)
(Module ID 58110-11) Covers all aspects of common hydraulic systems, including fluids, system components, and pumps. Presents the principles of hydraulic system operation and the related components. Simple hydraulic system maintenance is also introduced.
Management Learning Series
The Management Learning Series provides companies with the tools to develop qualified management personnel. From Fundamentals of Crew Leadership to Project Supervision to Project Management, these programs provide an answer to the management shortage crisis impacting companies today and expected to continue for the foreseeable future.

Fundamentals of Crew Leadership

While this module has been designed to assist the recently promoted crew leader, it is beneficial for anyone in management. The course covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

PAPERBACK   ISBN
Trainee Guide: $49.99  978-0-13-803097-1
MODULES

The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Introduction to Project Management (2.5 Hours)
ISBN 978-0-13-580436-0
(Module ID 44101) Introduces the role and responsibilities of project management, including technical and management skills. Presents an overview of the phases in a construction project and describes alternate project delivery methods.

Safety (15 Hours)
(Module ID 44102) Stresses the importance of job-site safety and identifies the project manager’s duties and responsibilities regarding safety. Covers loss prevention and creating a zero-accident work environment. Presents several checklists as references.

Interpersonal Skills (12.5 Hours)
(Module ID 44103) Discusses the values and expectations of the workforce, building relationships, and satisfying stakeholders. Describes the principles of effective communication, applying the management grid, and using relationship skills to create a leadership environment. Discusses behavioral and non-discriminatory interviewing, and professional development of personnel. Covers issues surrounding disabled workers, sexual harassment, gender and minority discrimination, child labor laws, antitrust laws, and copyright infringement.

Issues and Resolutions (15 Hours)
(Module ID 44104) Describes the key elements of successful negotiations and negotiating techniques. Explains how to recognize nonverbal signals, use negotiating tools, and apply conflict resolution strategies. Identifies symptoms and barriers to solving project-related problems and applying problem-solving techniques, brainstorming, and identifying root cause consequences.

Construction Documents (10 Hours)
(Module ID 44105) Emphasizes the importance of documentation and explains the types of documents, drawings, and specifications used on a project, and the best practices regarding revisions, obsolete drawings, and safeguarding drawing sets. Explains methods of obtaining work in the industry and types of contracts and insurance requirements. Describes the change order process and the documents required to close out a project.

Construction Planning (10 Hours)
(Module ID 44106) Discusses the importance of formal job planning and creating a performance-based work environment. Discusses the Work Breakdown Structure (WBS) as the foundation that identifies deliverables, tasks, and time. Introduces the basics of quality control and defines the roles and responsibilities of an effective team and how to allocate resources.

Estimating and Cost Control (15 Hours)
(Module ID 44107) Emphasizes the importance of accurate estimating and summarizes the estimating process and the steps in developing an estimate, and the difference between parametric estimating and analogous estimating. Defines the purpose of a cost control methodology, explains how to perform simple cost analysis, and covers the project manager’s role in controlling cost and tracking rework cost.

Scheduling (15 Hours)
(Module ID 44108) Explains the basics of scheduling from simple to-do lists through bar charts, network diagrams, and methods of managing resources. Discusses the importance of formal schedules, job planning, and establishing priorities. Describes alternative scheduling methods.

Resource Control (10 Hours)
(Module ID 44109) Identifies resources that must be controlled, factors that affect production control, and production control standards. Explains the project manager’s role in the process. Defines production and productivity, and describes how to evaluate and improve production control and productivity.

Quality Control (5 Hours)
(Module ID 44110) Defines quality control and quality assurance, and stresses management’s concerns about quality. Explains project quality management and how to develop an effective quality control plan. Discusses how to identify, assess, and measure weaknesses to avoid rework.

Continuous Improvement (5 Hours)
(Module ID 44111) Describes the project manager’s role in creating a culture of continuous improvement. Explains the fundamentals of a continuous improvement program and how to identify the critical problems and processes that require improvement, implement a continuous improvement process, and measure results. Emphasizes the importance of satisfying internal and external stakeholders.
MODULES
The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Job (5 Hours)
(Module ID MT201-01) Introduces the history of the construction industry and construction organization. Covers the phases of a construction project and the role and duties of the supervisor.

Human Relations and Problem Solving (20 Hours)
(Module ID MT202-01) Focuses on the communication process and developing effective communication and leadership skills. Compares problem solving to decision making. Discusses potential human relations difficulties and how to resolve them.

Quality Control (5 Hours)
(Module ID MT204-01) Defines different types of quality control. Explains how to incorporate quality and safety through effective communication, document control, and inspections.

Contract and Construction Documents (5 Hours)
(Module ID MT205-01) Teaches how to understand and interpret construction drawings, technical specifications, and as-built drawings. Includes different types of bidding, contracts, change orders, closeout documents, and more.

Planning and Scheduling (17.5 Hours)
(Module ID MT207-01) Introduces stages of planning, how to implement a plan, and how to coordinate with other contractors. Includes planning resources, materials, equipment, tools, and labor. Discusses short- and long-term schedules.

Resource Control and Cost Awareness (15 Hours)
(Module ID MT208-01) Explains how to measure job-site productivity and how to increase it. Discusses resources, materials, tools, equipment, labor, quality, and cost and resource control. Introduces cost awareness and types of reports.

Sustainable Construction Supervisor
Sustainable Construction Supervisor has been developed to instruct construction managers on sustainable construction management, the LEED rating system as it would apply to oversight of their projects and crews, and how to supervise and train their subcontractors and crews so that LEED points aren’t unintentionally sacrificed. This module is published in full color and is competency-based. An assessment is also available.
Introduction to the Pipeline Industry (15 Hours)
(Module ID 66101-02) Introduces the pipeline industry, including pipeline products and flow paths, maps and drawings used in the industry, and basic pipeline operations. Also covers hydraulics, pipeline equipment, electrical power systems, and corrosion control. Regulations, documentation, and pipeline industry occupations are also described.

Tools of the Trade (7.5 Hours)
(Module ID 62104-02) Explains use and care of hand and power tools used in the pipeline industry. Describes the use of welding equipment and meters and testers. Also discusses nondestructive testing and the uses of hydraulic cranes and heavy excavating equipment.

Pipeline Documentation (5 Hours)
ISBN 978-0-13-415138-0
(Module ID 62105-02) Identifies alignment sheets used in the pipeline industry including maps, P&IDs, and electrical drawings. Also describes the types of documentation and document management required in the industry.

Basic Pipeline Pneumatics and Equipment (10 Hours)
(Module ID 67102-02) Introduces the basics of pneumatic equipment. Topics include pneumatic safety and the physical characteristics of gas. A discussion of compressors, valves, meters, and other pipeline equipment and an overview on pipeline design also are included.

Basic Pipeline Hydraulics and Equipment (10 Hours)
(Module ID 66102-02) Explains pipeline hydraulics safety, basic principles of hydraulic systems, hydraulic properties of petroleum products, pipeline design factors, and basic pipeline equipment.

Pipeline Communications (7.5 Hours)
(Module ID 60103-02) Introduces channels of communications that must exist in pipeline operations, including internal communications with scheduling, operations, and maintenance; and external communications with contractors, the general public, regulatory agencies, and local, state, and federal government.

Pipeline Operations (40 Hours)
(Module ID 64106-02) Describes pipeline system hydraulics and ASME ratings and standards. Discusses station control systems and recognizing and responding to AOCs. Also covers pigging operations and proving process meters.

Release Identification and Response (5 Hours)
ISBN 978-0-13-038138-0
(Module ID 64103-02) Describes company environmental manuals and the DNR and EPA regulations. Explains the NRC and Coast Guard responsibilities and spill prevention. Covers soil contamination, release reporting and containment, hydrostatic testing, flaring/venting, and trash handling.
Abnormal Operating Conditions

Abnormal Operating Conditions Field and Gas

5 Hours
Revised: 2017, Third Edition
Module ID AOCFG-17

Trainee
ISBN 978-0-13-472784-4
Print: $24.99
Digital also available through VitalSource:

• For information on how to order through VitalSource, visit www.nccer.org/pipeline-program.

Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Abnormal Operating Conditions Control Center

5 Hours
Revised: 2017, Third Edition
Module ID AOCCC-17

Trainee
ISBN 978-0-13-472782-0
Print: $24.99
Digital also available through VitalSource:

• For information on how to order through VitalSource, visit www.nccer.org/pipeline-program.

Introduces the abnormal operating conditions that can occur on a pipeline or in a pipeline facility. Explains how to recognize and react to abnormal operating conditions from the control center and the necessary documentation and notifications that must be completed when responding to these conditions.
### Pipeline Electrical and Instrumentation

**LEVEL 1**

**PAPERBACK ISBN**

- **VOLUME 1**
  - Trainee Guide: $104.99
  - **ISBN 978-0-13-480564-1**

- **VOLUME 2**
  - Trainee Guide: $104.99

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

#### VOLUME 1

**Pipeline E&I Safety** *(15 Hours)*

(Module ID 64102-02) Describes the types and uses of personal protective equipment and covers hazard communications. Covers lockout/tagout and MSDS requirements; safety rules, regulations, and tools; and worksite hazards.

**Trade Math** *(40 Hours)*

(Module ID 64103-02) Presents instrumentation formulas and equations. Explains how to calculate load and ampacity, and perform pipeline-specific E&I calculations. Also provides a description of conductors.

**Electrical Theory** *(40 Hours)*

(Module ID 64104-02) Introduces the electrical concepts used in Ohm’s law as applied to DC series circuits. Discusses atomic theory, electromagnetic force, resistance, and electric power equations. Also introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

**Tools of the Trade** *(15 Hours)*

(Module ID 64105-02) Identifies hand tools used in the pipeline E&I trade. Also explains trade-specific power tools, test equipment, and communication equipment.

#### VOLUME 2

**Process Control Theory** *(40 Hours)*

(Module ID 64204-02) Explains process characteristics and control systems. Describes control loop components and control loops and modes. Discusses types of control applications, including temperature, pressure, flow, and level control.

**Supervisory Control Systems** *(15 Hours)*

(Module ID 64205-02) Explains pipeline supervisory control systems, PLCs, HMIs, and RTUs. Describes data highways and protocols, including data transfer methods, and SCADA-related communications, including transfer media, wireless radios, and Ethernet, and transmission and interface methods.

**Transformers** *(25 Hours)*

(Module ID 64301-02) Describes power systems and explains transformer construction, taps, installation requirements, and connections. Describes power distribution, instruments, control, and isolation transformer types. Also covers transformer maintenance and testing.

**Switchgear and MCCs** *(25 Hours)*

(Module ID 64302-02) Explains power factor and medium versus low-voltage cable and MCCs. Describes types of switchgear and cables, feeders, fusing, and braking. Includes testing and maintenance on switchgear and MCCs and associated components.

**Low-Voltage and Standby Power** *(25 Hours)*

(Module ID 64303-02) Explains pipeline system standby generators, batteries, chargers, inverters, converters, and rotary and static UPSs. Also addresses the maintenance and testing of each.

**Power Quality** *(25 Hours)*

(Module ID 64304-02) Explains power quality and types of defects, power systems, protection, and conditioning equipment. Discusses types of electrical noise and related problems, and possible solutions. Describes static electricity and its effect, system verification testing, and equipment maintenance.

**Prime Movers** *(32.5 Hours)*

(Module ID 64305-02) Describes various electric motors and drives and their components. Discusses their maintenance and testing. Explains engine types, cooling and lubrication systems, turbine operation, fuel sources, and controls.

**Facility Auxiliary Systems** *(22.5 Hours)*

(Module ID 64306-02) Includes information on pipeline facility buildings and related systems, including fire, security, vapor recovery, injection, water treatment, cathodic protection, and blending systems.

**SCADA** *(30 Hours)*

ISBN 978-0-13-103147-0

(Module ID 64307-02) Explains pipeline operations systems, including control, communications, SCADA, and PLCs. Explains redundant systems and control system troubleshooting.

Level 2 Pipeline Electrical and Instrumentation

Curriculum Notes
- 122.5 Hours
- Revised: 2017, Third Edition
- Downloadable instructor resources are available.
- Available as print on demand
- To purchase individual covered task modules, please visit www.nccer.org/pipeline-program

PAPERBACK ISBN

Modules
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Abnormal Operating Conditions - Field and Gas
(5 Hours)
ISBN 978-0-13-472784-4
(Module ID AOCFG-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Inspect, Test and Calibrate Pressure Switches
(7.5 Hours)
(Module ID CT25_1-17)

Inspect, Test and Calibrate Pressure Transmitters
(7.5 Hours)
(Module ID CT25_2-17)

Verify or Set Protection Parameters for Programmable Controllers and/or Other Instrumentation Control Loops
(15 Hours)
ISBN 978-0-13-470632-0
(Module ID CT26_0-17)

Test Overfill Protective Devices
(5 Hours)
(Module ID CT30_0-17)

Inspect and Calibrate Overfill Protective Devices
(7.5 Hours)
(Module ID CT31_0-17)

Inspect, Test, and Maintain Flow Computer for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_3-17)

Inspect, Test, and Maintain Gravitometers/Densitometers for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_7-17)

Inspect, Test, and Maintain Temperature Transmitters for Hazardous Liquid Leak Detection
(7.5 Hours)
(Module ID CT44_8-17)

Maintain Fixed Gas Detection Equipment
(25 Hours)
(Module ID CT55_0-17)
Pipeline Maintenance and Mechanical

**VOLUME 1**

**Pipeline Mechanic Hand and Power Tools**
(10 Hours)
(Module ID 63103-02) Introduces hand and power tools used to maintain and install pipeline equipment. Discusses tool safety and procedures for selecting, inspecting, using, and maintaining the tools.

**Piping and Mechanical Blueprint Reading**
(15 Hours)
(Module ID 63104-02) Explains how to read plot plans, P&IDs, piping isometric drawings, detail sheets, and machine drawings. Describes common components and symbols used in various drawings.

**Tubing, Threaded Pipe, and Hoses**
(30 Hours)
(Module ID 63105-02) Introduces a variety of tubing, tubing materials, tools, and work practices used in the pipeline industry. Identifies the materials used in threaded piping systems. Describes the types and uses of screwed fittings.

**Fasteners**
(10 Hours)
(Module ID 63106-02) Covers installation procedures for threaded, nonthreaded, and insulation fasteners used in the pipeline industry.

**Installing Seals and Gaskets**
(10 Hours)
(Module ID 63109-02) Covers the applications, removal procedures, and installation procedures for dynamic and static seals and O-rings. Also identifies gaskets and gasket materials and explains the procedures for laying out, cutting, and installing gaskets.

**Introduction to Hydraulic Systems**
(10 Hours)
(Module ID 63202-02) Discusses hydraulic system safety and the basic principles of hydraulics, including Pascal's law and Bernoulli's principle. Explains the function of fluids, parts, pumps, and motors.

**Introduction to Pumps**
(10 Hours)
(Module ID 63203-02) Identifies main-line and feeder line pumps including centrifugal, rotary, reciprocating, and metering pumps. Explains net positive suction head and cavitation. Outlines general procedures for pump installation.

**Introduction to Gas Compressors**
(10 Hours)
(Module ID 63208-02) Identifies gas compressors used in the transmission of gas through pipelines. Also explains the function and operation of compressors and identifies the auxiliary equipment used with compressors.

**Introduction to Metering Devices and Provers**
(10 Hours)
ISBN 978-0-13-038357-0
(Module ID 63206-02) Identifies and explains the use of pipeline meters including positive displacement, turbine, ultrasonic, mass-flow, vortex, and orifice. Identifies and explains the use of provers including tank provers, traditional pipe provers, and small volume pipe provers.

**Introduction to Hydraulic Systems**
(10 Hours)
(Module ID 63202-02) Discusses hydraulic system safety and the basic principles of hydraulics, including Pascal's law and Bernoulli's principle. Explains the function of fluids, parts, pumps, and motors.

**Installing Seals and Gaskets**
(10 Hours)
(Module ID 63109-02) Covers the applications, removal procedures, and installation procedures for dynamic and static seals and O-rings. Also identifies gaskets and gasket materials and explains the procedures for laying out, cutting, and installing gaskets.

**Introduction to Pumps**
(10 Hours)
(Module ID 63203-02) Identifies main-line and feeder line pumps including centrifugal, rotary, reciprocating, and metering pumps. Explains net positive suction head and cavitation. Outlines general procedures for pump installation.

**Introduction to Gas Compressors**
(10 Hours)
(Module ID 63208-02) Identifies gas compressors used in the transmission of gas through pipelines. Also explains the function and operation of compressors and identifies the auxiliary equipment used with compressors.

**General Maintenance and Winterizing Pipeline Equipment**
(7.5 Hours)
(Module ID 62301-02) Explains preventive and predictive maintenance and general maintenance on rotating machinery. Discusses gas compressors and maintaining pumps and prime movers.

**VOLUME 2**

**Install and Maintain Bearings**
(15 Hours)
(Module ID 63209-02) Identifies friction and antifriction bearings, bearing materials, and bearing designation. Gives procedures to remove, troubleshoot, and install bearings.

**Install Mechanical Seals**
(20 Hours)
(Module ID 63210-02) Explains the function and advantages of mechanical seals. Identifies parts and types of mechanical seals. Includes procedures for removing, inspecting, and installing mechanical seals.

**Identify Types of Valve Actuators/Operators**
(15 Hours)
(Module ID 63108-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handing, installation, and preventive maintenance procedures for these actuators.

**Identify Types of Valve Actuators/Operators**
(15 Hours)
(Module ID 63108-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handing, installation, and preventive maintenance procedures for these actuators.

**Maintain and Repair Drivers**
(15 Hours)
(Module ID 63211-02) Identifies types of drivers that provide power to rotating equipment on pipelines. Explains how to inspect and replace drivers, replace bearings and seals, and perform preventive maintenance.

**Establish and Maintain Equipment**
(25 Hours)
(Module ID 63301-02) Explains preventive and predictive maintenance and general maintenance on rotating machinery. Discusses gas compressors and maintaining pumps and prime movers.

**Maintain and Repair Drivers**
(15 Hours)
(Module ID 63211-02) Identifies types of drivers that provide power to rotating equipment on pipelines. Explains how to inspect and replace drivers, replace bearings and seals, and perform preventive maintenance.

**Identify Types of Valve Actuators/Operators**
(15 Hours)
(Module ID 63108-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handing, installation, and preventive maintenance procedures for these actuators.

**Identify Types of Valve Actuators/Operators**
(15 Hours)
(Module ID 63108-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handing, installation, and preventive maintenance procedures for these actuators.

**Identify Types of Valve Actuators/Operators**
(15 Hours)
(Module ID 63108-02) Identifies types of manual, electric, hydraulic, and pneumatic valve actuators used in the pipeline industry. Covers storage and handing, installation, and preventive maintenance procedures for these actuators.

**Maintain and Repair Drivers**
(15 Hours)
(Module ID 63211-02) Identifies types of drivers that provide power to rotating equipment on pipelines. Explains how to inspect and replace drivers, replace bearings and seals, and perform preventive maintenance.

**Install Rotating Equipment**
(25 Hours)
ISBN 978-0-13-038378-4
(Module ID 63301-02) Identifies inspection requirements for an equipment pad, requirements for equipment base preparation, and procedures for inspecting equipment prior to installation. Also explains how to prepare equipment prior to installation, the installation process for rotating equipment, and the procedures used to relieve pipe stress from rotating equipment.

**Unit Alignment**
(40 Hours)
(Module ID 63302-02) Describes types of equipment misalignment and how to identify and correct them. Explains how to perform conventional, rim and face indicator, reverse dial indicator, and laser alignments. Also identifies other laser alignment procedures that may be completed on the machinery trains depending on equipment needs.

Continued on following page
Pipeline Maintenance and Mechanical (continued)

**Vibration Analysis** (5 Hours)
(Module ID 63303-02) Covers common causes of vibration and how to minimize them. Includes vibration monitoring techniques, vibration analysis techniques, vibration test equipment, and how to field balance machines.

**Maintain, Troubleshoot, and Repair Pumps** (10 Hours)
(Module ID 63304-02) Identifies the preventive maintenance requirements, inspection requirements, and common troubleshooting techniques for pumps used in the pipeline industry. Also gives general guidelines for preparing a pump for shutdown, removing a pump from a pipeline system, disassembling a pump, installing the pump after the pump has been reassembled, and preparing the pump for startup and operational check after maintenance or repair has been completed.

**Maintain, Troubleshoot, and Repair Gas Compressors** (15 Hours)
(Module ID 63305-02) Identifies the typical lubrication system components, preventive maintenance requirements, and common troubleshooting techniques for a gas compressor. Also gives general guidelines for preparing a gas compressor for shutdown and repair, isolating a gas compressor from a pipeline system, repairing rotary and reciprocating gas compressors, and preparing a gas compressor for startup and operational check after maintenance has been completed.

**Maintain, Troubleshoot, and Repair Metering Devices and Provers** (20 Hours)
(Module ID 63309-02) Explains how to inspect, maintain, and repair metering devices and prover systems. Also describes the waterdraw calibration procedures used to calibrate and verify the reliability of prover systems.
Pipeline Field and Control Center Operations

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Abnormal Operating Conditions - Field and Gas
(5 Hours)
ISBN 978-0-13-472784-4
(Module ID AOCCF-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

Purge Gas from a Pipeline
(5 Hours)
(Module ID CT50_0-17)

Purge Air from a Gas Pipeline
(5 Hours)
(Module ID CT51_0-17)

Test Remotely Controlled Shutdown Devices
(5 Hours)
(Module ID CT54_0-17)

Abnormal Operating Conditions - Control Center
(5 Hours)
ISBN 978-0-13-472782-0
(Module ID AOCCC-17) Introduces the abnormal operating conditions that can occur on a pipeline or in a pipeline facility. Explains how to recognize and react to abnormal operating conditions from the control center and the necessary documentation and notifications that must be completed when responding to these conditions.

Purge Odorant Equipment
(5 Hours)
(Module ID CT57_0-17)

Monitor Odorant Level
(5 Hours)
(Module ID CT58_0-17)

Start-up of a Liquid Pipeline (Field)
(5 Hours)
ISBN 978-0-13-472800-1
(Module ID CT63_1-17)

Shutdown of a Liquid Pipeline (Field)
(5 Hours)
(Module ID CT63_2-17)

Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them Within Allowable Limits on a Liquid Pipeline System (Field)
(15 Hours)
(Module ID CT63_3-17)

Locally Operate Valves on a Liquid Pipeline System
(5 Hours)
(Module ID CT63_4-17)

Start-up of a Liquid Pipeline (Control Center)
(5 Hours)
(Module ID CT64_1-17)

Shutdown of a Liquid Pipeline (Control Center)
(5 Hours)
(Module ID CT64_2-17)

Monitor Pressures, Flows, Communications, and Line Integrity and Maintain Them Within Allowable Limits on a Liquid Pipeline System (Control Center)
(5 Hours)
(Module ID CT64_3-17)

Remotely Operate Valves on a Liquid Pipeline System
(5 Hours)
(Module ID CT64_4-17)

Field Measurement
(20 Hours)
ISBN 978-0-13-038232-0
(Module ID 60708-02) Introduces techniques used in field measurement of products in the pipeline, including measurement components, types of meters, measurement of custody transfers and receipts, verification of meter accuracy, waterdraw calibration techniques, and utilization of tank strappings.

Liquid Pipeline Measurement and Quality Control
(20 Hours)
(Module ID 65107-02) Explains how to activate tank mixing devices, perform product testing, and perform pipeline grade changes and tank capacity operations. Also explains how to use and inject appropriate additives, identify types of meters, maintain accurate measurement on all custody receipts, and the processes and techniques used to prove meters.

SCADA
(30 Hours)
ISBN 978-0-13-103147-0
(Module ID 64307-02) Explains pipeline operations systems, including control, communications, SCADA, and PLCs. Explains redundant systems and control system troubleshooting.

To Order Call: 1-800-922-0579
Pipeline Operations (Control Center/Gas/Liquid) (continued)

Start-up of a Gas Pipeline (5 Hours)
(Module ID CT65_1-17)

Shutdown of a Gas Pipeline (5 Hours)
(Module ID CT65_2-17)

Monitor Pressures, Flows, Communications and Line Integrity and Maintain Them Within Allowable Limits (Gas) (5 Hours)
(Module ID CT65_3-17)

Manually or Remotely Open or Close Valves or Other Equipment (5 Hours)
ISBN 978-0-13-472825-4
(Module ID CT65_4-17)
Pipeline Corrosion Control

**MODULES**

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Abnormal Operating Conditions - Control Center**
(5 Hours)
ISBN 978-0-13-472782-0
(Module ID AOCCC-17) Introduces the abnormal operating conditions that can occur on a pipeline or in a pipeline facility. Explains how to recognize and react to abnormal operating conditions from the control center and the necessary documentation and notifications that must be completed when responding to these conditions.

**Abnormal Operating Conditions - Field and Gas**
(5 Hours)
ISBN 978-0-13-472784-4
(Module ID AOCFG-17) Provides an overview of the types of abnormal operating conditions (AOCs) that may occur on the pipeline or in company facilities. Appropriate responses to AOCs are covered with a focus on following company policy to protect lives and pipeline equipment. Also covered are the reports required by federal law.

**Verify Test Lead Continuity**
(5 Hours)
(Module ID CT2_1-17)

**Repair Damaged Test Leads**
(5 Hours)
(Module ID CT2_2-17)

**Install Test Leads by Non-Exothermic Welding Methods**
(5 Hours)
ISBN 978-0-13-472089-0
(Module ID CT2_3-17)

**Install Test Leads by Exothermic Welding Methods**
(5 Hours)
(Module ID CT2_4-17)

**Obtain a Voltage and Current Output Reading from a Rectifier to Verify Proper Performance**
(5 Hours)
(Module ID CT3_0-17)

**Troubleshoot Rectifier**
(5 Hours)
(Module ID CT4_1-17)

**Repair or Replace Defective Rectifier Components**
(5 Hours)
(Module ID CT4_2-17)

**Adjustment of Rectifier**
(5 Hours)
(Module ID CT4_3-17)

**Examine for Mechanical Damage on Buried or Submerged Pipe**
(5 Hours)
ISBN 978-0-13-472076-0
(Module ID CT5_1-17)

**Examine for External Corrosion on Buried or Submerged Pipe**
(5 Hours)
(Module ID CT5_2-17)

**Inspect the Condition of External Coating on Buried or Submerged Pipe**
(5 Hours)
(Module ID CT5_3-17)

**Visual Inspection of Atmospheric Coatings**
(5 Hours)
(Module ID CT7_1-17)

**Prepare Surface for Atmospheric Coating Using Hand and Power Tools**
(5 Hours)
(Module ID CT7_2-17)

**Prepare Surface for Coating by Abrasive Water Blasting**
(5 Hours)
(Module ID CT7_3-17)

**Prepare Surface for Coating by Abrasive Blasting Media Other Than Water**
(5 Hours)
ISBN 978-0-13-472063-0
(Module ID CT7_4-17)

**Apply Coating Using Hand Application Methods**
(5 Hours)
(Module ID CT7_5-17)

**Apply Coating Using Spray Application**
(5 Hours)
(Module ID CT7_6-17)

**Perform Coating Inspection**
(5 Hours)
(Module ID CT7_7-17)

**Visually Inspect Internal Pipe Surface**
(5 Hours)
(Module ID CT12_0-17)

**Test and Detect Interference**
(5 Hours)
(Module ID CT1_3-17)

**Inspect and Perform Electrical Test of Bonds**
(5 Hours)
ISBN 978-0-13-471028-0
(Module ID CT1_4-17)

**Inspect and Test Electrical Isolation**
(5 Hours)
(Module ID CT1_5-17)

**Measure Pit Depth with Pit Gauge**
(5 Hours)
(Module ID CT8_1-17)
Pipeline Corrosion Control Level 2 (continued)

Measure Wall Thickness with Ultrasonic Meter
(5 Hours)
(Module ID CT8_2-17)

Measure Corroded Area (5 Hours)
ISBN 978-0-13-471044-0
(Module ID CT8_3-17)

Install Bonds (5 Hours)
(Module ID CT9_1-17)

Install Galvanic Anodes (5 Hours)
(Module ID CT9_2-17)

Install Rectifiers (5 Hours)
(Module ID CT9_3-17)

Install Impressed Current Groundbeds (5 Hours)
(Module ID CT9_4-17)

Repair Shorted Casings (5 Hours)
(Module ID CT9_5-17)

Install Electrical Insulating Device (5 Hours)
ISBN 978-0-13-472117-0
(Module ID CT9_6-17)

Insert and Remove Coupons (5 Hours)
(Module ID CT10_1-17)

Monitor Probes (Online) (5 Hours)
(Module ID CT10_2-17)

Monitoring and Controlling the Injection Rate of the Corrosion Inhibitor (5 Hours)
(Module ID CT11_0-17)
Introduction to the Power Industry

- Downloadable instructor resources are available.
- This module sets the stage for trainees entering the electrical energy production and distribution field. It describes the many ways in which electricity can be produced, from burning fossil fuels such as coal and natural gas, to harnessing nuclear energy, and using renewable energy sources such as wind, geothermal, and solar energy.

PAPERBACK
Trainee Guide: $24.99
ISBN 978-0-13-215413-0

Curriculum Notes

- 97.5 Hours
- Published: 2010
- The Trainee Guide is shrinkwrapped with Core and the Introduction to the Power Industry module.
- Prerequisites for Power Generation, Power Line Worker, and Wind Turbine Maintenance Technician programs.
- Basic Rigging (Module ID 00106-09 or 00106-15) is required to complete Power Industry Fundamentals.
- Either 2009 or 2015 Core can be used for the Power Industry Fundamentals package.

PAPERBACK
Trainee Guide: $79.99
Power Generation Maintenance Electrician

**L1 POWER GENERATION MAINTENANCE ELECTRICIAN**

**Curriculum Notes**
- 232.5 Hours
- Includes 97.5 hours of Power Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources are available.

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Tools of the Trade (5 Hours)**
(Module ID 40102-07; from Industrial Maintenance E&I Technician Level One) Introduces the hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

**Fasteners and Anchors (5 Hours)**
(Module ID 40103-07; from Industrial Maintenance E&I Technician Level One) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

**Gaskets and Packing (10 Hours)**
(Module ID 40105-07; from Industrial Maintenance E&I Technician Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

**Craft-Related Mathematics (15 Hours)**
(Module ID 40106-07; from Industrial Maintenance E&I Technician Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

**Construction Drawings (12.5 Hours)**
(Module ID 40107-07, from Industrial Maintenance E&I Technician Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

**Pumps and Drivers (5 Hours)**
(Module ID 40108-07, from Industrial Maintenance E&I Technician Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

**Oxyfuel Cutting (17.5 Hours)**
(Module ID 40104-07; from Industrial Maintenance E&I Technician Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

**Mobile and Support Equipment (10 Hours)**
(Module ID 40109-07; from Industrial Maintenance E&I Technician Level One) Identifies different types of valves and describes their installation, storage, and handling.

**Introduction to Test Instruments (7.5 Hours)**
(Module ID 40110-07; from Industrial Maintenance E&I Technician Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobe meters, voltage testers, and automated diagnostic tools.

**Material Handling and Hand Rigging (15 Hours)**
(Module ID 40111-07; from Industrial Maintenance E&I Technician Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

**Lubrication (12.5 Hours)**
(Module ID 40112-07; from Industrial Maintenance E&I Technician Level One) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, manlifts, compressors, and generators.

**Mobile and Support Equipment (10 Hours)**
(Module ID 40112-07; from Industrial Maintenance E&I Technician Level One) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

**SMAW Equipment and Setup (5 Hours)**
(Module ID 29107-09; from Welding Level One, Fourth Edition) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

**L2 POWER GENERATION MAINTENANCE ELECTRICIAN**

**Curriculum Notes**
- 167.5 Hours
- Published: 2010
- Downloadable instructor resources are available.

**Modules**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Industrial Safety for E&I Technicians (12.5 Hours)**
(Module ID 40201-08; from Industrial Maintenance E&I Technician Level Two) Covers safety rules and regulations for electrical workers, precautions for electrical hazards on the job, and the OSHA-mandated lockout/tagout procedure.

**Managing Electrical Hazards (12.5 Hours)**
(Module ID 26501-09; from Electrical, First Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

**Introduction to the National Electrical Code® (5 Hours)**
(Module ID 40202-08; from Industrial Maintenance E&I Technician Level Two) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an easy-to-follow procedure.

**Electrical Theory (15 Hours)**
(Module ID 40203-08; from Industrial Maintenance E&I Technician Level Two) Introduces electrical concepts used in Ohm’s law as applied to DC series circuits. Includes atomic theory, electromagnetic force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.
Alternating Current (20 Hours)
(Module ID 40204-08; from Industrial Maintenance E&I Technician Level Two) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Drawings (10 Hours)
(Module ID 40303-09; from Industrial Maintenance E&I Technician Level Three) Explains how to read and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

E&I Test Equipment (10 Hours)
(Module ID 40205-08; from Industrial Maintenance E&I Technician Level Two) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Conductors and Cables (10 Hours)
(Module ID 40212-08; from Industrial Maintenance E&I Technician Level Two) Focuses on the types and applications of conductors and electrical cabling and covers proper wiring techniques. Stresses the applicable NEC® requirements.

Conductor Terminations and Splices (10 Hours)
(Module ID 40213-08; from Industrial Maintenance E&I Technician Level Two) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and tapping conductors.

Motor Controls (15 Hours)
(Module ID 40304-09; from Industrial Maintenance E&I Technician Level Three) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Hydraulic Controls (15 Hours)
(Module ID 40311-09; from Industrial Maintenance E&I Technician Level Three) Introduces hydraulic principles and fluids, functions and controls of system devices, hydraulic symbols, and drawings. Covers safety considerations for hydraulic systems, as well as troubleshooting.

Grounding and Bonding (15 Hours)
(Module ID 26209-08; from Electrical Level Two, Sixth Edition) Focuses on the purpose of grounding and bonding electrical systems. Thoroughly covers NEC® requirements.

Hand Bending (10 Hours)
(Module ID 40208-08; from Industrial Maintenance E&I Technician Level Two) Introduces conduit bending and installation. Covers the techniques for using hand-operated and step conduit benders, as well as cutting, reaming, and threading conduit.

Machine Bending of Conduit (15 Hours)
(Module ID 40310-09; from Industrial Maintenance E&I Technician Level Three) Covers bends in conduit up to six inches. Focuses on mechanical, hydraulic, and electrical benders.

Electric Lighting (15 Hours)
(Module ID 26203-08; from Electrical Level Two, Sixth Edition) Introduces principles of human vision and the characteristics of light. Focuses on the handling and installation of various types of lamps and lighting fixtures.

Practical Applications of Lighting (12.5 Hours)
(Module ID 26303-08; from Electrical Level Three, Sixth Edition) Describes specific types of incandescent, fluorescent, and HID lamps, as well as ballasts. Also covers troubleshooting and various types of lighting controls.

Pneumatic Controls (15 Hours)
ISBN 978-0-13-604739-1
(Module ID 40312-09; from Industrial Maintenance E&I Technician Level Three) Describes principles of atmospheric and compressed air gases, and how compressors transmit and treat compressed (pneumatic) air. Covers pneumatic system symbols, drawings, and system safety. Addresses the functions and control of pneumatic system components and provides guidelines for troubleshooting.

Programmable Logic Controllers (17.5 Hours)
(Module ID 40409-09; from Industrial Maintenance E&I Technician Level Four) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

Hazardous Locations (10 Hours)
(Module ID 40301-09; from Industrial Maintenance E&I Technician Level Three) Covers all classes of hazardous locations, including seals, components, and equipment approved for use in various hazardous locations.

Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26210-08; from Electrical Level Two, Sixth Edition) Describes fuses and circuit breakers along with their practical applications. Also covers sizing.

Transformer Applications (7.5 Hours)
(Module ID 40306-09; from Industrial Maintenance E&I Technician Level Three) Discusses transformer types, construction, connections, protection, and grounding along with capacitors and rectifiers.

Distribution Equipment (17.5 Hours)
(Module ID 40305-09; from Industrial Maintenance E&I Technician Level Three) Explains distribution equipment, including grounding, switchboard and ground fault maintenance, transformers, and electrical drawing identification.

To Order Call: 1-800-922-0579

Continued on following page
### Power Plant Electrical Systems (12.5 Hours)
(Module ID 50301-11) Describes how the electrical power to operate a power station is developed and distributed in normal, shutdown, and emergency situations. Covers equipment used in power stations, including circuit breakers, switchgear, and motor control centers.

### Conductor Selection and Calculations (15 Hours)
(Module ID 40307-09; from Industrial Maintenance & Technician Level Three) Covers the types of conductors used in wiring systems, including insulation, current-carrying capacity, and temperature ratings.

### Motors: Theory and Application (20 Hours)
(Module ID 26202-08; from Electrical Level Two, Sixth Edition) Covers AC and DC motors, including the main components, circuits, and connections.

### Motor-Operated Valves (15 Hours)
ISBN 978-0-13-604728-4
(Module ID 40313-09; from Industrial Maintenance & Technician Level Three) Covers motor-driven valves, ranging from small, servo-mechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

### Specialty Transformers (10 Hours)
ISBN 978-0-13-609319-0
(Module ID 26406-08; from Electrical Level Four, Sixth Edition) Covers various types of transformers and their applications. Also provides information on selecting, sizing, and installing these devices.

### Advanced Controls (20 Hours)
(Module ID 26407-08; from Electrical Level Four, Sixth Edition) Discusses applications and operating principles of solid-state controls, reduced-voltage starters, and adjustable frequency drives. Also covers basic troubleshooting procedures.

### Motor Operation and Maintenance (10 Hours)
(Module ID 26410-08; from Electrical Level Four, Sixth Edition) Covers motor cleaning, testing, and preventive maintenance. Also describes basic troubleshooting procedures.

### Generator Maintenance (20 Hours)
(Module ID 50401-10) Covers the operating characteristics and major components of AC and DC generators. Topics include generator connection methods; voltage regulators; auxiliary systems; and maintenance procedures.

### Switchgear and Breaker Maintenance (25 Hours)
(Module ID 50402-11) Reviews the safety practices associated with power station electrical work. Explains how medium-voltage and low-voltage sources are developed and used in the power station, and how the station power system functions in a black out or shutdown situation. Also describes the circuit breakers, switchgear, and motor control centers used in power stations, and provides instructions for maintenance of these devices.

### Control Systems and Fundamental Concepts (12.5 Hours)
(Module ID 26211-08; from Electrical Level Two, Sixth Edition) Gives basic descriptions of various types of contactors and relays along with their practical applications.

### Preventive and Predictive Maintenance (10 Hours)
(Module ID 32401-09; from Industrial Maintenance Mechanic Level Four) Explains preventive and predictive maintenance and non-destructive testing, and introduces the basic techniques for testing. Also describes lubricant analysis, and acoustic, infrared, and vibration testing.

### Medium Voltage Terminations/Splices (10 Hours)
(Module ID 26411-08; from Electrical Level Four, Sixth Edition) Offers an overview of the NEC® and cable manufacturers’ requirements for medium-voltage terminations and splices.

### Fire Alarm Systems (15 Hours)
(Module ID 26405-08; from Electrical Level Four, Sixth Edition) Covers fire alarm control units, Digital Alarm Communicator Systems (DACS), wiring for alarm initiating and notification devices, and alarm system maintenance.

### Heat Tracing and Freeze Protection (10 Hours)
(Module ID 26409-08; from Electrical Level Four, Sixth Edition) Covers heat tracing systems along with their applications and installation requirements.

### Standby and Emergency Systems (12.5 Hours)
(Module ID 40401-09; from Industrial Maintenance & Technician Level Four) Explains the installation, utilization, and maintenance requirements for standby and emergency electrical systems.
Power Generation & E&I Maintenance Technician

L1 POWER GENERATION I&C MAINTENANCE TECHNICIAN

LEVEL 1

Curriculum Notes

- 222.5 Hours
- Includes 97.5 hours of Power Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2010
- Downloadable instructor resources are available.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Tools of the Trade (5 Hours)
(Module ID 40102-07; from Industrial Maintenance E&I Technician Level One) Introduces the hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

Fasteners and Anchors (5 Hours)
(Module ID 40103-07; from Industrial Maintenance E&I Technician Level One) Covers hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

Gaskets and Packing (10 Hours)
(Module ID 40105-07; from Industrial Maintenance E&I Technician Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 40106-07; from Industrial Maintenance E&I Technician Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 40107-07; from Industrial Maintenance E&I Technician Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Pumps and Drivers (5 Hours)
(Module ID 40108-07; from Industrial Maintenance E&I Technician Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Material Handling and Hand Rigging (12.5 Hours)
ISBN 978-0-13-614623-0
(Module ID 40109-07; from Industrial Maintenance E&I Technician Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Mobile and Support Equipment (10 Hours)
(Module ID 40110-07; from Industrial Maintenance E&I Technician Level One) Introduces equipment and techniques of operation for motorized support equipment, including fork lifts, manlifts, compressors, and generators.

SMAW Equipment and Setup (5 Hours)
(Module ID 29107-09; from Welding Level One, Fourth Edition) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

Oxyfuel Cutting (17.5 Hours)
(Module ID 40104-07; from Industrial Maintenance E&I Technician Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Valves (5 Hours)
(Module ID 40109-07; from Industrial Maintenance E&I Technician Level One) Identifies different types of valves and describes their installation, storage, and handling.

Introduction to Test Instruments (7.5 Hours)
(Module ID 40110-07; from Industrial Maintenance E&I Technician Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobometers, voltage testers, and automated diagnostic tools.

Material Handling and Hand Rigging (15 Hours)

LEVEL 2

Curriculum Notes

- 167.5 Hours
- Published: 2010
- Downloadable instructor resources are available.

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Industrial Safety for E&I Technicians (12.5 Hours)
(Module ID 40201-08; from Industrial Maintenance E&I Technician Level Two) Covers safety rules and regulations for electrical workers, precautions for electrical hazards on the job, and the OSHA-mandated lockout/tagout procedure.

Managing Electrical Hazards (12.5 Hours)
(Module ID 26501-09; from Electrical, First Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

Introduction to the National Electrical Code® (5 Hours)
(Module ID 40202-08; from Industrial Maintenance E&I Technician Level Two) Provides a road map for using the NEC®. Introduces the layout and types of information found within the code book. Allows trainees to practice finding information using an easy-to-follow procedure.

Electrical Theory (15 Hours)
(Module ID 40203-08; from Industrial Maintenance E&I Technician Level Two) Introduces electrical concepts used in Ohio’s law as applied to DC series circuits. Includes atomic theory, electromotive force, resistance, and electric power equations. Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

Continued on following page
Alternating Current (20 Hours)
(Module ID 40204-08; from Industrial Maintenance &I Technician Level Two) Covers transformers, single-phase and three-phase power distribution, capacitors, the theory and operation of induction motors, and the instruments and techniques used in testing AC circuits and components.

E&I Drawings (10 Hours)
(Module ID 40303-09; from Industrial Maintenance &I Technician Level Three) Explains how to read and interpret piping and instrumentation drawings, loop sheets, flow diagrams, isometrics, and orthographics, in order to identify types of instrumentation and the specifications for installation.

E&I Test Equipment (10 Hours)
(Module ID 40205-08; from Industrial Maintenance &I Technician Level Two) Focuses on proper selection, inspection, and use of common electrical and instrumentation test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, data recording equipment, field communicators, pressure testers, and dead weight testers. Also covers safety precautions and meter category ratings.

Conductors and Cables (10 Hours)
(Module ID 40212-08; from Industrial Maintenance &I Technician Level Two) Focuses on the types and applications of conductors and electrical cable and covers proper wiring techniques. Stresses the applicable NEC® requirements.

Conductor Terminations and Splices (10 Hours)
(Module ID 40213-08; from Industrial Maintenance &I Technician Level Two) Describes methods of terminating and splicing conductors of all types and sizes, including preparing and taping conductors.

Motor Controls (15 Hours)
(Module ID 40304-09; from Industrial Maintenance &I Technician Level Three) Describes selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Flow, Pressure, Level and Temperature
(15 Hours)
(Module ID 40206-08; from Industrial Maintenance &I Technician Level Two) Presents devices used to measure flow, pressure, level, and temperature, along with their principles of operation.

Instrument Drawings and Documents, Part One (15 Hours)
(Module ID 40211-08; from Industrial Maintenance &I Technician Level Two) Introduces instrument symbols, abbreviations, and drawings and documents, including instrument indexes, installation detail drawings, location drawings, and control loops.

Electrical Systems for Instrumentation
(22.5 Hours)
(Module ID 12104-01; from Instrumentation Level One, Second Edition) Covers basic electrical concepts and terms, DC circuit calculations, electrical measuring instruments, and electrical wiring.

Relays and Timers (7.5 Hours)
(Module ID 12208-03; from Instrumentation Level Two, Second Edition) Presents the principles of operation and applications of various relays and timers. Also reviews the selection process for these devices.

Switches and Photoelectric Devices (5 Hours)
(Module ID 12209-03; from Instrumentation Level Two, Second Edition) Covers the principles of operation and applications of switches and photoelectric devices in the instrumentation environment.

Hydraulic Controls (15 Hours)
(Module ID 40311-09; from Industrial Maintenance &I Technician Level Three) Introduces hydraulic principles and fluids, functions and controls of system devices, hydraulic symbols, and drawings. Covers safety considerations for hydraulic systems, as well as troubleshooting.

Pneumatic Controls (15 Hours)
ISBN 978-0-13-604739-1
(Module ID 40312-09; from Industrial Maintenance &I Technician Level Three) Describes principles of atmospheric and compressed air gases, and how compressors transmit and treat compressed (pneumatic) air. Covers pneumatic system symbols, drawings, and system safety. Addresses the functions and control of pneumatic system components and provides guidelines for troubleshooting.

Programmable Logic Controllers (17.5 Hours)
(Module ID 40409-09; from Industrial Maintenance &I Technician Level Four) Introduces the application of PLCs in industrial process control, as well as the binary numbering system used in computer-based control. Covers components of PLCs, including power supplies, I/O modules, processor modules, types of communication bus, and memory.

Clean, Purge, and Test Tubing and Piping Systems (7.5 Hours)
(Module ID 40210-08; from Industrial Maintenance &I Technician Level Two) Introduces piping and tubing layout procedures. Explains the steps for creating a hand-drawn isometric drawing that can be applied to piping and tubing installation. Introduces methods and procedures used to measure, cut, bend, and support piping and tubing.

Tubing (15 Hours)
ISBN 978-0-13-604710-0
(Module ID 40209-08; from Industrial Maintenance &I Technician Level Two) Introduces a variety of tubing, tubing materials, tools, and work practices. Covers proper storage and handling, cutting, deburring, reaming, bending, and flaring of tubing.

Clean, Purge, and Test Tubing and Piping Systems (17.5 Hours)
(Module ID 40309-09; from Industrial Maintenance &I Technician Level Three) Introduces piping and tubing layout procedures. Explains the steps for creating a hand-drawn isometric drawing that can be applied to piping and tubing installation. Introduces methods and procedures used to measure, cut, bend, and support piping and tubing.

Clean, Purge, and Test Tubing and Piping Systems (22.5 Hours)
ISBN 978-0-13-604747-0
(Module ID 40312-09; from Industrial Maintenance &I Technician Level Three) Introduces piping and tubing layout procedures. Explains the steps for creating a hand-drawn isometric drawing that can be applied to piping and tubing installation. Introduces methods and procedures used to measure, cut, bend, and support piping and tubing.

Electronics Components (10 Hours)
(Module ID 40302-09; from Industrial Maintenance &I Technician Level Three) Introduces the principles of electronics and semiconductor theory, components, and applications.

Panel-Mounted Instruments (7.5 Hours)
(Module ID 12212-03; from Instrumentation Level Two, Second Edition) Explains the selection of instruments to be panel-mounted, locating the instruments using drawings, and procedures for installing the instruments in the panels.

Continued on following page
Installing Field-Mounted Instruments (25 Hours)
(Module ID 12213-03; from Instrumentation Level Two, Second Edition) Covers selection and mounting of instruments at locations other than panels, including stand mounting, in-line mounting, structure mounting, strap mounting, and insertion mounting.

Grounding and Shielding of Instrumentation Wiring (10 Hours)
(Module ID 12306-03; from Instrumentation Level Three, Second Edition) Teaches the basic concepts of grounding and shielding, including wire and cable identification. Defines various types of noise that can be induced into instrumentation wiring and describes the methods used to reduce or eliminate it.

Pneumatic Control Valves, Actuators and Positioners (40 Hours)
(Module ID 40404-09; from Industrial Maintenance E&I Technician Level Four) Covers the construction, operation, and uses of control valves, actuators, and positioners that are driven, and in some cases controlled by, compressed air. Explains the installation and maintenance of these devices, and includes alignment and troubleshooting procedures.

Troubleshooting and Commissioning a Loop (10 Hours)
(Module ID 40406-09; from Industrial Maintenance E&I Technician Level Four) Covers troubleshooting techniques used to locate problems in control loops, and how to isolate a loop in order to troubleshoot it. Covers commissioning of a loop once it is repaired, loop checked, and calibrated.

Process Control Theory (20 Hours)
(Module ID 12204-03; from Instrumentation Level Two, Second Edition) Describes the principles of process control and how various types of control loops are applied. Discusses ON-OFF and modulating control schemes. Explains how process control principles are applied to flow, level, temperature, and pressure control loops.

Process Control Loops and Tuning (20 Hours)
(Module ID 40407-09; from Industrial Maintenance E&I Technician Level Four) Describes control loops, devices, and terms. Introduces formulae and their applications to PID control. Offers a theory-based approach to PID control and its application in industrial process control. Addresses open, closed, and visual loop tuning.

Data Networks (15 Hours)
(Module ID 40408-09; from Industrial Maintenance E&I Technician Level Four) Introduces terms associated with data network devices and computers used in industrial facilities. Explains how data network devices and computers are interconnected for communication purposes. Describes how open connectivity is used in industrial data networks, and explores the hardware devices used in a data highway system.

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Tools of the Trade (5 Hours)
ISBN 978-0-13-614584-4
(Module ID 32102-07; from Industrial Maintenance Mechanic Level One) Introduces hand and power tools used in industrial maintenance. Covers safety procedures and proper use of these tools.

Fasteners and Anchors (5 Hours)
(Module ID 32103-07; from Industrial Maintenance Mechanic Level One) Covers the hardware and systems used in industrial maintenance. Describes anchors and supports, their applications, and how to install them safely.

Oxyfuel Cutting (17.5 Hours)
(Module ID 32104-07; from Industrial Maintenance Mechanic Level One) Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and provides instructions for setting up, lighting, and using the equipment. Explains how to perform straight line cutting, piercing, beveling, washing, and gouging.

Gaskets and Packing (10 Hours)
(Module ID 32105-07; from Industrial Maintenance Mechanic Level One) Introduces gaskets and gasket material, packing and packing material, and types of O-ring material. Explains the use of gaskets, packing, and O-rings, and how to fabricate a gasket.

Craft-Related Mathematics (15 Hours)
(Module ID 32106-07; from Industrial Maintenance Mechanic Level One) Explains how to use ratios and proportions, solve basic algebra, area, volume, and circumference problems, and solve for right triangles using the Pythagorean theorem.

Construction Drawings (12.5 Hours)
(Module ID 32107-07; from Industrial Maintenance Mechanic Level One) Introduces plot plans, structural drawings, elevation drawings, as-built drawings, equipment arrangement drawings, P&IDs, isometric drawings, basic circuit diagrams, and detail sheets.

Pumps and Drivers (5 Hours)
(Module ID 32108-07; from Industrial Maintenance Mechanic Level One) Explains centrifugal, rotary, reciprocating, metering, and vacuum pump operation and installation methods, as well as types of drivers. Describes net positive suction head and cavitation.

Valves (5 Hours)
(Module ID 32109-07; from Industrial Maintenance Mechanic Level One) Identifies different types of valves and describes their installation as well as valve storage and handling.

Introduction to Test Instruments (7.5 Hours)
(Module ID 32110-07; from Industrial Maintenance Mechanic Level One) Introduces test equipment for industrial maintenance, including tachometers, pyrometers, strobos, voltage testers, and automated diagnostic tools.

Material Handling and Hand Rigging (15 Hours)
(Module ID 32111-07; from Industrial Maintenance Mechanic Level One) Introduces the equipment and techniques of material handling, and describes the procedures for rigging and communicating with riggers.

Mobile and Support Equipment (10 Hours)
(Module ID 32112-07; from Industrial Maintenance Mechanic Level One) Introduces the safety procedures and methods of operation for motorized support equipment, including forklifts, personnel lifts, compressors, and generators.

Lubrication (12.5 Hours)
(Module ID 32113-07; from Industrial Maintenance Mechanic Level One) Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts. Explains lubrication safety, storage, and classifications. Also explains selecting lubricants, additives, lubrication equipment, and lubricating charts.

SMAW Equipment and Setup (5 Hours)
(Module ID 29107-09; from Welding Level One, Fourth Edition) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

PAPERBACK
ISBN
Trainee Guide: $99.99
978-0-13-215441-3

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Basic Layout (20 Hours)
(Module ID 32201-07; from Industrial Maintenance Mechanic Level Two) Discusses the tools used in layout. Explains how to lay out baselines using the arc method and 3-4-5 method.

Advanced Trade Math (30 Hours)
(Module ID 32301-08; from Industrial Maintenance Mechanic Level Three) Explains right triangle trigonometry and its use in the trade. Also covers interpolation, equilateral and isosceles triangles and the laws of acute triangles.

Precision Measuring Tools (20 Hours)
(Module ID 32302-08; from Industrial Maintenance Mechanic Level Three) Explains how to select, inspect, use and care for levels, feeler gauges, calipers, micrometers, height gauges and surface plates, dial indicators, protractors, parallels and gauge blocks, trammels, and pyrometers.

Introduction to Bearings (15 Hours)
(Module ID 32207-07; from Industrial Maintenance Mechanic Level Two) Introduces plain, ball, roller, thrust, guide, flanged, pillow block, and takeup bearings. Discusses bearing materials and designations.

Installing Bearings (20 Hours)
(Module ID 32303-08; from Industrial Maintenance Mechanic Level Three) Explains how to remove, troubleshoot, and install tapered, thrust, spherical roller, pillow block, and angular contact ball bearings.

Installing Couplings (15 Hours)
(Module ID 32304-08; from Industrial Maintenance Mechanic Level Three) Identifies various types of couplings, and covers installation procedures using the press-fit method and the interference-fit method. Also covers coupling removal procedures.

Continued on following page
Installing Mechanical Seals (20 Hours)
(Module ID 32208-08; from Industrial Maintenance Mechanic Level Three) Covers the function and advantages of mechanical seals, identifies parts and types of seals, and includes procedures for removing, inspecting and installing mechanical seals.

Conventional Alignment (30 Hours)
(Module ID 32306-08; from Industrial Maintenance Mechanic Level Three) Covers types of misalignment, aligning couplings using a straightedge and feeler gauge, adjusting parallel and angular alignment, using a dial indicator, and eliminating coupling stress.

Reverse Alignment (30 Hours)
(Module ID 32404-08; from Industrial Maintenance Mechanic Level Four) Describes preparation for dial indicator reverse alignment, and explains the procedures for setting up reverse alignment jigs. Explains graphic and mathematical techniques for aligning equipment based on reverse dial indicator measurements.

Laser Alignment (25 Hours)
ISBN 978-0-13-610449-0
(Module ID 32405-09; from Industrial Maintenance Mechanic Level Four) Using one example system, describes the principles of using laser alignment systems to perform alignments.

Installing Belt and Chain Drives (10 Hours)
(Module ID 32307-08; from Industrial Maintenance Mechanic Level Three) Covers the sizes, uses, and installation procedures of six types of drive belts and two types of chain drives.

Introduction to Piping Components (5 Hours)
(Module ID 32202-07; from Industrial Maintenance Mechanic Level Two) Introduces chemical, compressed air, fuel oil, steam, and water systems. Explains how to identify piping systems according to color codes.

Copper and Plastic Piping Practices (5 Hours)
(Module ID 32203-07; from Industrial Maintenance Mechanic Level Two) Covers the selection, preparation, joining, and support of copper and plastic piping and fittings.

Introduction to Ferrous Metal Piping Practices (5 Hours)
ISBN 978-0-13-604624-0
(Module ID 32204-07; from Industrial Maintenance Mechanic Level Two) Covers iron and steel pipe and fittings and provides step-by-step instructions for cutting, threading, and joining ferrous piping.

Identify, Install and Maintain Valves (10 Hours)
(Module ID 32205-07; from Industrial Maintenance Mechanic Level Two) Explains how to remove and install threaded and flanged valves, how to replace valve stem O-ring and bonnet gaskets, and how to re-pack a valve stuffing box. Also discusses the purpose of valve packing.

Heaters, Furnaces, Heat Exchangers, Cooling Towers and Fin Fans (30 Hours)
(Module ID 32211-07; from Industrial Maintenance Mechanic Level Two) Introduces equipment used to transfer and remove heat from systems in process.

Hydrostatic and Pneumatic Testing (10 Hours)
(Module ID 32306-07; from Industrial Maintenance Mechanic Level Two) Describes non-destructive and pressure testing of systems and equipment.

Installing Fans and Blowers (10 Hours)
(Module ID 15312-08; from Millwright Level Three) Explains how to install axial-flow fans, centrifugal fans, and roots-type and screw-type blowers.

Conveyors (5 Hours)
(Module ID 15401-08; from Millwright Level Four) Describes conveyor systems and their principles of operation.

Troubleshooting and Repairing Conveyors (12.5 Hours)
(Module ID 15402-08; from Millwright Level Four) Describes maintaining and repairing belt, roller, chain, screw, and pneumatic conveyors.

Basic Hydraulic Systems (10 Hours)
(Module ID 15409-08; from Millwright Level Four) Describes principles and types of hydraulic equipment and related safety procedures. Describes applications of hydraulic equipment.

Motor-Operated Valves (15 Hours)
(Module ID 40313-09; from Industrial Maintenance E&I Technician Level Three) Covers motor-driven valves, ranging from small, servo-mechanical actuators to large valves that could only be operated by several people if they were not motor driven. Includes electrical, pneumatic, and hydraulic operators.

Advanced Blueprint Reading (25 Hours)
(Module ID 32409-09; from Industrial Maintenance Mechanic Level Four) Describes the use of drawing sets to obtain system information. Explains the process of identifying a part of a machine for repair or replacement from a set of drawings.
POWER GENERATION MAINTENANCE MECHANIC

LEVEL 4

Curriculum Notes

• 187.5 Hours
• Published: 2010
• Downloadable instructor resources are available.

PAPERBACK  ISBN

 MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Vibration and Balancing (12.5 Hours)
(Module ID 52401-10) Reviews machine basics and explains the causes of machine vibrations. Reviews the basics of vibration analysis and covers the devices used to detect and analyze vibration signatures. Explains how and why vibration analysis is used as part of predictive maintenance programs. Describes field machine balancing.

Preventive and Predictive Maintenance (10 Hours)
(Module ID 32401-09; from Industrial Maintenance Mechanic Level Four) Explains preventive and predictive maintenance and non-destructive testing, and introduces the basic techniques for testing. Also describes lubricant analysis, and acoustic, infrared, and vibration testing.

Fuel Preparation and Delivery Equipment (25 Hours)
(Module ID 52402-10) Explains the basic operations of a coal-fired boiler system. Describes the delivery processes from the storage yard into the coal preparation equipment, and from the equipment into the furnace. Addresses the maintenance checks that need to be made on coal delivery and preparation equipment and explains how solid fuel wastes are disposed of in coal-burning furnace systems. Describes how other solid-fuel furnaces, such as biomass furnaces, are used with boilers.

Introduction to Tube Work (10 Hours)
(Module ID 32212-07; from Industrial Maintenance Mechanic Level Two) Covers the basics of working with heat exchanger and furnace tubing and tube sheets.

Compressors and Pneumatic Systems (35 Hours)
(Module ID 32403-09; from Industrial Maintenance Mechanic Level Four) Describes the theory and practice of compressing and transporting gases. Explains the types and principles of compressors and compressed air treatment equipment, as well as compressed air use and safety.

Troubleshooting and Repairing Pumps (10 Hours)
ISBN 978-0-13-610452-0
(Module ID 32407-09; from Industrial Maintenance Mechanic Level Four) Explains how to inspect, troubleshoot, disassemble, assemble, and install a pump. Also describes the process of preparing for startup.

Troubleshooting and Repairing Gearboxes (20 Hours)
(Module ID 32408-09; from Industrial Maintenance Mechanic Level Four) Describes types and operation of gearboxes, and gearbox diagnostics. Explains how to troubleshoot, remove, and disassemble gearboxes, how to identify gear wear patterns, and how to install and maintain gearboxes.

Setting Baseplates and Prealignment (30 Hours)
(Module ID 32305-08; from Industrial Maintenance Mechanic Level Three) Explains how to lay out and install baseplates and soleplates. Describes how to field-verify a plate installation. Covers precision leveling procedures and performing clearance installation. Also describes basic steps for setting motors and pumps.

Turbines (20 Hours)
ISBN 978-0-13-610496-4
(Module ID 15505-09; from Millwright Level Five) Describes types of turbines and their components. Describes the operation and common applications of particular types, including gas, steam, and water turbines.

Maintaining and Repairing Turbine Components (15 Hours)
(Module ID 15506-09; from Millwright Level Five) Describes the process of inspecting and repairing key components of turbines. Explains the guidelines for maintaining large steam turbines.
To address the need for one standardized and nationally recognized Power Line Worker curriculum, NCCER has developed Power Line Worker Level One. Common to transmission, distribution, and substation, Power Line Worker Level One addresses the fundamental aspects of power line work to include safety, electrical theory, climbing techniques, aerial framing and rigging, and operating utility service equipment. After Level One, the training program diverges into the three specialty areas (transmission, distribution, and substation) for two additional years of skills training.

Climbing Wooden Poles (80 Hours)
(Module ID 49105-11) Describes how to safely climb a wooden utility pole. Covers climbing equipment, inspection of equipment, pole inspection, climbing techniques, and pole-top rescue.

Climbing Structures Other Than Wood
(Module ID 49106-11) Explains the equipment, safety practices, and climbing techniques required to climb towers. Hazards associated with the environment, such as snakes, birds, insects, and weather hazards, are also covered.

Tools of the Trade (10 Hours)
(Module ID 49107-11) Covers the specialized tools used by line workers, including hot sticks, as well as universal tool accessories. Also covers ladders and work platforms; crimpers; cable cutters; pneumatic tools; and powder-actuated tools.

Aerial Framing and Associated Hardware
(Module ID 49108-11) Explains how to install guys to support a utility pole, as well as how to install the equipment on the pole to support conductors. Includes procedures for the installation of cross-arms, transformers, and conductors.

Utility Service Equipment
(Module ID 49109-11) Provides descriptions and operations instructions for use of the digger derrick, bucket truck, crane truck, and aerial lift. Also covers safety requirements; inspection and maintenance; driving and setup operations; and emergency procedures.

Rigging
(Module ID 49110-11) Explains how to select and use rigging equipment. Covers common rigging equipment and rigging methods that are likely to be used by power line workers. Also covers hand signals and other methods of communication between the rigger and the crane operator.

Setting and Pulling Poles
(Module ID 49111-11) Provides instructions for the storage, loading, and transport of wooden utility poles. Includes use of the digger derrick to dig the hole and install the pole. Also covers pole removal using a hydraulic jacking device.

Trenching, Excavating, and Boring Equipment
(Module ID 49112-11) Covers the use and maintenance of trenching equipment, backhoe/loaders, and horizontal directional drilling equipment for the installation of direct-buried power lines. Includes a review of safety guidelines related to buried utilities.

Introduction to Electrical Test Equipment
ISBN 978-0-13-266338-0
(Module ID 49113-11) Introduces the basic test equipment used by electrical workers to test and troubleshoot electrical circuits. Also covers specialized line worker test equipment, including the high-voltage detector, phase rotation tester, megohmmeter, phasing stick, and hi-pot tester.

PAPERBACK

ISBN

Trainee Guide: $99.99
978-0-13-273034-1

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Alternating Current and Three-Phase Systems
(17.5 Hours)
(Module ID 80201-11) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Aerial Distribution Equipment
(25 Hours)
(Module ID 80202-11) Identifies the various equipment components found on overhead distribution system poles and describes the function of each, including transformers, reclosers, fuses, sectionalizers, capacitor banks, and voltage regulators.

Cable and Conductor Installation and Removal
(20 Hours)
ISBN 978-0-13-274261-0
(Module ID 80203-11) Describes the types of conductors and cables used in overhead and underground residential distribution systems and the equipment and procedures used to install and remove them. Includes methods used to splice conductors.

Live-Line Work
(40 Hours)
ISBN 978-0-13-296759-4
(Module ID 80301-12) Covers tools such as hot sticks, shotgun sticks, and wire tongs, along with the PPE and safe work practices that are critical elements of live line and bare hand work. Includes coverage of various live-line tasks such as different methods of moving conductors and replacing insulators, cross-arms, and poles.

Three-Phase URD Systems
(25 Hours)
ISBN 978-0-13-296760-0
(Module ID 80302-12) Covers safety practices associated with three-phase URD systems; describes vault and manhole applications; and explains different transformer configurations and sectionalizing equipment used in three-phase URD systems. Also covers three-phase cables and how cable is pulled through conduit.

Fundamentals of Crew Leadership
(20 Hours)
(Module ID 46101-11, Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Job site safety and the crew leader's role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.

Troubleshooting
(40 Hours)
(Module ID 80304-12) Focuses on the methods used to safely locate and correct faults in aerial and URD systems. Includes troubleshooting methods as well as work site preparation.

Introduction to Smart Grids
(2.5 Hours)
(Module ID 80305-12) Describes the network of transmission and distribution lines that delivers electricity between generating sources and consumers, and explains how the smart grid overlays this network to maintain a balance between power availability and demand.

Introduction to Substations
(10 Hours)
(Module ID 82201-12; from Power Line Worker: Substation Level Two) Provides an overview of the different types and functions of substations. Identifies the various voltage classes and introduces the primary equipment and components found in substations. Safe work practices and access issues related to substations are presented, as well as an introduction to one-line diagrams.

System Protection and Monitoring
(7.5 Hours)
(Module ID 80303-12) Presents an overview of monitoring and protection systems and reviews the key components that make them work. Describes feeder diagrams and their use in locating and identifying components.

**180 Hours**

- Published: 2012
- Downloadable instructor resources are available.

**Modules**

- The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Substations (10 Hours)**

(Module ID 82201-12) Provides an overview of the different types and functions of substations. Identifies the various voltage classes and introduces the primary equipment and components found in substations. Safe work practices and access issues related to substations are presented, as well as an introduction to one-line diagrams.

**Managing Electrical Hazards (12.5 Hours)**

(Module ID 26201-12; from Electrical, Second Edition) Introduces electrical hazards in the workplace and describes how to avoid them. Explains how to analyze and document shock and arc flash hazards, and how to plan and conduct work around them. Includes examples of how to complete an energized electrical work permit, and how to select the specialized personal protective equipment required for electrical work.

**Alternating Current and Three-Phase Systems (17.5 Hours)**

(Module ID 80201-12; from Power Line Worker: Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

**Conductors and Cables (10 Hours)**

(Module ID 82202-12; from Power Line Worker: Distribution Level Two) Identifies the many types, sizes, and applications of conductors and cables. Fiber-optic cable is also introduced. Reviews the use of cable drawings and schedules. Provides coverage of the methods of routing cables underground in the substation environment.

**Cable Tray (7.5 Hours)**

(Module ID 26207-11; from Electrical Level Two, Seventh Edition) Focuses on NEC® installation requirements for cable tray, including cable installations.

**Conduit Bending (15 Hours)**

(Module ID 26204-11; from Electrical Level Two, Seventh Edition) Covers bends in conduit up to 6 inches. Focuses on mechanical, hydraulic, and electrical benders.

**Conductor Installations (10 Hours)**

(Module ID 26206-11; from Electrical Level Two, Seventh Edition) Covers the transportation, storage, and setup of cable reels; methods of rigging; and procedures for complete cable pulls in raceways and cable trays.

**Conductor Terminations and Splicing (17.5 Hours)**

(Module ID 26208-11; from Electrical Level Two, Seventh Edition) Describes methods of terminating and splicing conductors, including preparing and tapping conductors.

**Grounding Systems (12.5 Hours)**

(Module ID 82203-12) Describes the purpose and arrangement of grounding systems installed beneath a substation. Covers the materials of construction and the approaches to reliable ground system connections. Introduces safety concerns and precautions associated with substation and grounding grid expansion.

**Grades (15 Hours)**

(Module ID 22106-12; from Heavy Equipment Operations Level One) Introduces the concept of preparing graded surfaces using heavy equipment. Covers identification of construction stakes and interpretation of marks on each type of stake. Describes the process for grading slopes.

**Concrete Work (35 Hours)**

(Module ID 82204-12) Provides comprehensive coverage of concrete pouring and finishing techniques. Includes detailed information on concrete types and their uses. Form layout and construction, along with basic surveying skills, is presented. Also provides detailed coverage of rebar types and their common geometric forms.

**Mechanical Construction Methods and Materials (17.5 Hours)**

(Module ID 82205-12) Covers the diverse types of substation structures and their composition. Identifies components commonly supported by structures and the various bus forms and materials of construction. Includes thorough coverage of threaded fasteners along with mechanical torqueing tools and procedures.

**Intermediate Rigging (70 Hours)**

(Module ID 38201-11; from Intermediate Rigger, Second Edition) Describes basic procedures for using various slings in hitches and calculating sling stress. Introduces tools and equipment used for the lateral movement of loads without a crane. Trainees learn how to reeve block and tackle, invert loads with hoists, and drift a load between two hoists.

**Modules**

- The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

**Temporary Grounding (15 Hours)**

ISBN 978-0-13-604738-4

(Module ID 40308-09; from Industrial Maintenance & Level Three) Covers the methods used to eliminate or reduce electrical shock hazards to personnel working an electrical equipment.

**Advanced Drawing Reading (20 Hours)**

(Module ID 82301-12) Covers the drawings typically associated with substations and the skills needed for their interpretation. Provides detailed instruction on elementary, schematic, and general component arrangement drawings. Wiring diagrams and drawing schedules are also covered.

**Medium- and High-Voltage Equipment Installation (25 Hours)**

ISBN 978-0-13-296792-1

(Module ID 82302-12) Presents the typical installation procedures for primary substation components. Identifies the common and unique factors related to the proper installation of transformers, circuit breakers, capacitors, reactors, bus systems, and insulators. A discussion of corona and how proper installation techniques can prevent it is also included.

**Control House (20 Hours)**

(Module ID 82303-12) Provides an overview of the substation control house and its function in the substation. The components and protective systems generally contained within a control house are examined, including the essential DC power systems and emergency power supplies. Coverage of racking systems and their layout is also included.

Continued on following page
Connectors, Conductor Terminations, and Splicing (25 Hours)
(Module ID 82304-12) Describes the procedures and materials required to prepare and complete terminations and splices on insulated and non-insulated conductors and cables. Coverage is provided for both medium- and high-voltage circuits. Hydraulic presses and crimpers are introduced, along with hi-pot testing procedures for terminations and splices.

Equipment Testing and Maintenance (30 Hours)
(Module ID 82305-12) Identifies the testing procedures required and explains how to properly maintain substation components. Coverage of testing and maintenance procedures is provided for power transformers, potential devices, various circuit breakers, disconnects and switches, capacitors, and reactors.

System Protection and Control (12.5 Hours)
(Module ID 82306-12) Describes the protective functions required in the substation environment to defend against overloads, fault currents, and other incidents that can disrupt service or damage the system. Offers coverage of the components used to provide both protection and system control. An introduction to the various protective relay schemes used in today's substations is included.

Alternating Current and Three-Phase Systems (17.5 Hours)
(Module ID 80201-11; from Power Line Worker: Distribution Level Two) Introduces the development of both single- and three-phase alternating current. Analyzes the relationship of AC phases and introduces key components used to refine AC power. Discusses the operation of transformers and introduces advanced AC concepts such as reactive power and the power factor.

Transmission Structure Rigging (17.5 Hours)
(Module ID 81201-11) Covers rigging equipment and practices specific to transmission structures. Coverage includes slings, crane stability, and the safe use of personnel platforms.

Transmission Structure Erection (50 Hours)
(Module ID 81202-11) Focuses on the safe installation of insulators, towers, and poles. Discusses live-line tasks such as replacing insulators, cross-arms, and spacers.

System Protection and Control (12.5 Hours)
(Module ID 82306-12) Describes the protective functions required in the substation environment to defend against overloads, fault currents, and other incidents that can disrupt service or damage the system. Offers coverage of the components used to provide both protection and system control. An introduction to the various protective relay schemes used in today's substations is included.

Transmission Equipment Installation (50 Hours)
(Module ID 81203-11) Focuses on the safe installation of insulators and conductors. Coverage includes stringing and splicing of conductors, conductor terminations, conductor sagging, clipping in, and the installation of accessories such as vibration dampers, spacers, warning lights, and day markers.

Transmission System Maintenance (40 Hours)
(Module ID 81204-11) Covers safety practices related to working with helicopters, as well as inspection of insulators, towers, and poles. Discusses clearance procedures and environmental concerns such as protection of wetlands, waterways, and wildlife.

Construction, Maintenance, and Repair — Hot Stick (80 Hours)
(Module ID 81303-12) Covers tools such as hot sticks, shotgun sticks, and wire ropes, along with the PPE and safe work practices that are critical elements of live-line and bare-hand work. Includes coverage of live-line tasks such as replacing insulators, cross-arms, and spacers.

Lift Planning (40 Hours)
(Module ID 38302-11; from Advanced Rigger, First Edition) Discusses lift plan implementation, including reference information, calculations, single- and multiple-cranes lifting, critical lifts, and engineering considerations.
Field Safety

Continued on following page

Curriculum Notes

• 45 Hours
• Revised: 2013, Second Edition
• Provides the necessary safety task training to all field personnel. This manual is designed for individuals involved with completing or overseeing a specific task, from the craftsperson, crew leader, and safety supervisor to superintendent.
• Downloadable instructor resources are available.
• A Spanish translation of the first edition is available. Please see NCCER's online catalog for more information.

PAPERBACK
Participant Guide: $99.99
978-0-13-340245-2

MODULES
The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

Introduction to Safety (10 hours)
(Module ID 75101-13) Presents basic safety concepts and explains the difference between regulatory compliance and best practices. Introduces OSHA and explains how accidents affect everyone on a job site. Provides an overview of common jobsite hazards, including walking and working surfaces, temperature extremes, fire prevention, and tool safety. Identifies the elements of a hazard communication system and describes the types of information found on a product’s safety data sheet (SDS).

Confined Spaces and Excavations (5 hours)
(Module ID 75120-13) Covers safety precautions related to work in confined spaces, including the responsibilities and duties of each member of the confined-space entry team. It also covers the safety hazards and safeguards required when working in an excavation, including an explanation of various trenching supports and soil types.

Work-Zone Safety (5 hours)
(Module ID 75104-13) Introduces the signs, signals, and barricades found on various job sites, and covers highway work-zone safety requirements.

Electrical Safety (5 hours)
(Module ID 75121-13) Describes the basic precautions necessary to avoid electrical shock, arc, and blast hazards. It also describes the lockout/tagout procedure.

Working from Elevations (5 hours)
(Module ID 75122-13) Explains the use of fall-protection equipment. Covers safety precautions related to elevated work surfaces, including ladders, scaffolding, and aerial lifts.

Steel Erection (2.5 hours)
ISBN 978-0-13-340364-0
(Module ID 75110-13) Covers common safety precautions related to steel-erection work, including controlled decking zones, hazardous materials and equipment precautions, tool safety, and appropriate personal protective equipment.

Heavy Equipment, Forklift, and Crane Safety (5 hours)
(Module ID 75123-13) Covers the safety hazards and precautions necessary when working near heavy equipment. Presents general safety requirements for the use of forklifts and cranes.

Concrete and Masonry (2.5 hours)
(Module ID 75119-13) Describes the personal protective equipment that must be used when working with concrete and masonry as well as the common jobsite and health hazards associated with this type of work.

Introduction to Materials Handling (5 hours)
(Module ID 75124-13) Explains the safety precautions required when transporting, handling, rigging, stacking, and storing various types of loads. It also covers safe lifting procedures.
Basic Safety

Construction Site Safety Orientation

12.5 Hours
Revised: 2021
Module ID 00101
PAPERBACK
Trainee Guide: $24.99

This module, from Core, replaces the Safety Orientation book. See the module description above for more information.

Fall Protection Orientation

8 Hours
Module ID 75901
PAPERBACK
Trainee Guide: $34.99

Covers fundamental safety and hazard recognition concepts. Introduces the role of OSHA in regulating elevated work on the jobsite and the causes, costs, and consequences of falls. Presents proper use of fall protection equipment; safe use of stairs, ladders, and scaffolds; and guidelines for use of aerial lifts.

Managing Electrical Hazards

12.5 Hours
Revised: 2024, Sixth Edition
Module ID 26501-24
PAPERBACK

A copy of NFPA 70E®, Standard for Electrical Safety in the Workplace, 2024 Edition, is required material for this course. To order, contact NFPA at www.nfpa.org or 1-800-344-3555.

Describes how to assess and eliminate shock, arc blast, and arc flash hazards using the practical safe working requirements detailed in NFPA 70E: Standard for Electrical Safety in the Workplace®. Where it is not possible to eliminate a hazard, an energized electrical work permit must be completed, and workers must be protected by appropriate safety procedures and personal protective equipment.

Curriculum Notes

- 45 Hours
- Updated in 2018.
- Provides instruction on how to implement and administer a company safety program. This manual is designed for field managers, safety directors, safety committee members, owner safety representatives, and insurance/loss control representatives.
- Downloadable instructor resources are available.

PAPERBACK
ISBN
Participant Guide: $89
978-0-13-444636-3

Modules

The modules listed below are included in the Participant Guide. The following ISBNs are for ordering individual modules only.

**Introduction to Safety Technology** (2.5 hours)
(Module ID 75201) Describes the responsibilities of a safety technician and identifies the basic components of a safety program. It also provides an overview of regulatory requirements.

**Positive Safety Communication** (2.5 hours)
(Module ID 75205) Explains how to support an effective safety culture on the job site, including communication techniques, motivation, and responding to behavioral issues.

**Hazard Recognition, Environmental Awareness, and Occupational Health** (5 hours)
(Module ID 75219) Covers environmental and safety hazards. It explains how to evaluate risks and identify appropriate methods of hazard control. It also discusses environmental regulations for hazardous materials and describes the elements of a medical surveillance program.

**Job Safety Analysis and Pre-Task Planning** (5 hours)
(Module ID 75220) Provides guidance on safety performance analysis and employee coaching. It also explains how to complete job and task safety planning.

**Safety Data Tracking and Trending** (5 hours)
(Module ID 75221) Covers how to conduct safety inspections, audits, and employee safety observations. It discusses both traditional and predictive methods of performance measurement, and explains how to analyze safety data in order to prevent future incidents.

**Site-Specific Safety Plans** (5 hours)
(Module ID 75222) Explains how to use pre-bid checklists to identify hazards and develop a site safety plan. It also describes how to develop an emergency action plan.

**Safety Orientation and Safety Meetings** (5 hours)
(Module ID 75223) Describes how to prepare and deliver effective training using both formal safety meetings and tailgate talks.

**Permits and Policies** (5 hours)
(Module ID 75224) Provides an overview of the various work permits required on a construction site. It also provides detailed procedures for completing a hot work permit, lockout/tagout, and confined-space entry permit.

**Incident Investigations, Policies, and Analysis** (5 hours)
(Module ID 75225) Describes how to conduct an incident investigation, including employee interviews and reporting requirements. It also explains how to analyze an incident to determine the root cause and prevent future incidents.

**OSHA Inspections and Recordkeeping** (5 hours)
(Module ID 75226) Discusses the OSHA requirements for recordkeeping and explains how to manage the safety and health records for a job site. It also covers the two main types of OSHA inspections.
250,000. That’s not just a number needed to fill the jobs created by workers leaving the building and plant construction industry. It’s the number of men and women leaving jobs in shipbuilding, shipyards, ship repair facilities, and offshore rigs – the maritime industry. This industry is facing a skilled workforce crisis due to an aging workforce and dwindling pool of workers from which to draw. In partnership with the NMEC (National Maritime Education Council), NCCER has developed the first ever standardized and nationally recognized Maritime curricula. This program includes training material in Maritime ‘Core’ and Pipefitter, and Structural Fitter, and will soon be followed by assessments to certify journey-level skills.

### Introduction to the Maritime Industry

**12.5 Hours**  
**Published: 2013**  
**Module ID 84101-13**

**PAPERBACK**  
**ISBN**  
Trainee Guide: $24.99  
978-0-13-295443-3

- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

Introduces the facilities, methods, and processes used in the shipbuilding and repair industry. Describes the impact the industry has on the U.S. economy and explores the various craft opportunities available to workers. Provides an overview of the safety practices specific to the industry.

### Curriculum Notes

- **97.5 Hours**  
- **Published: 2013**  
- The Trainee Guide is shrinkwrapped with Core and the Introduction to the Maritime Industry module.
- Either 2009 or 2015 Core can be used for the Maritime Industry Fundamentals package.
- These hours are a prerequisite for Level One completion of the Maritime programs.
- Basic Rigging (Module ID 00106-09) or Introduction to Basic Rigging (Module ID 00106) is required to complete Maritime Industry Fundamentals.
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

Maritime Aluminum Welding

Joint Fit-up and Alignment (5 hours)
(Module ID 29110) Describes job code specifications. Explains how to use fit-up gauges and measuring devices to check fit-up and alignment and use plate and pipe fit-up and alignment tools to properly prepare joints. Explains how to check for joint misalignment and poor fit.

Welding Symbols (5 hours)
(Module ID 29201) Identifies and explains the different types of fillet weld, groove weld, and non-destructive examination symbols. Explains how to read welding symbols on drawings, specifications and Welding Procedure Specifications (WPS).

Reading Welding Detail Drawings (10 hours)
(Module ID 29202) Identifies and explains welding detail drawings. Describes lines, fills, object views, and dimensioning on drawings. Explains how to use notes on drawings and the bill of materials. Explains how to sketch and draw basic welding drawings.

Physical Characteristics/Mechanical Properties of Metal (7.5 hours)
(Module ID 29203) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

Preheating and Postheating of Metals (5 hours)
(Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

GMAW & FCAW - Equipment and Filler Metals (10 hours)
(Module ID 29205) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

GTAW - Equipment and Filler Metals (10 hours)
(Module ID 29207) Explains GTAW safety. Identifies and explains the use of GTAW equipment, filler metals, and shielding gases. Covers the setup of GTAW equipment.

GMAW - Aluminum Plate (30 hours)
(Module ID 29401) Covers the setup of GMAW equipment for welding aluminum plate. Explains aluminum metallurgy and the characteristics of aluminum welding; how to clean and prepare aluminum plate coupons for welding; and problems often encountered in aluminum welds. Explains GMAW techniques used in aluminum welding. Provides GMAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

GTAW - Aluminum Plate (30 hours)
(Module ID 29402) Covers the setup of GTAW equipment for welding aluminum plate. Explains how to clean and prepare aluminum plate coupons for welding, and how to select the aluminum filler metals and shielding gases used in the GTAW process. Explains GTAW techniques used in aluminum welding. Provides GTAW procedures on how to build weld pads on aluminum plate; how to make fillet welds on aluminum plate in the 1F, 2F, 3F, and 4F positions; and how to make V-groove welds on aluminum plate with backing in the 1G, 2G, 3G, and 4G positions.

GMAW - Aluminum Pipe (50 hours)
(Module ID 29403) Covers the setup of GMAW equipment for welding aluminum pipe. Explains how to clean and prepare aluminum pipe coupons for welding. Addresses GMAW techniques used to make V-groove and modified U-groove welds on aluminum pipe with and without backing. Provides GMAW procedures on how to make V-groove or modified U-groove welds on aluminum pipe in the 2G, 3G, and 4G positions.

GTAW - Aluminum Pipe (50 hours)
(Module ID 29404) Covers the setup of GTAW equipment for welding aluminum pipe. Explains how to clean and prepare aluminum pipe coupons for welding. Addresses GTAW techniques used to make V-groove welds on aluminum pipe with and without backing. Explains how to clean and prepare aluminum pipe coupons for welding. Provides GTAW procedures on how to make V-groove welds on aluminum pipe in the 2G, 3G, and 4G positions.
## Maritime Electrical

### Curriculum Notes

- **L1** MARITIME ELECTRICAL

  **LEVEL 1**

  **Maritime Electrical**

  **Orientation to the Electrical Trade** (2.5 Hours)
  (Module ID 26101-17) Provides an overview of the electrical trade and discusses the career paths available to electricians.

  **Electrical Safety** (10 Hours)
  (Module ID 26102-17) Covers safety rules and regulations for electricians. Teaches the necessary precautions to take for various electrical hazards found on the job. Also covers the OSHA-mandated lockout/tagout procedure.

  **Electrical Theory** (7.5 Hours)
  (Module ID 26104-17) Introduces series, parallel, and series-parallel circuits. Covers resistive circuits, Kirchhoff’s voltage and current laws, and circuit analysis.

  **Introduction to Electrical Circuits** (7.5 Hours)
  (Module ID 26103-17) Offers a general introduction to the electrical concepts used in Ohm’s law applied to DC circuits. Includes atomic theory, electromotive force, resistance, and electric power equations.

  **Basic Electrical Construction Drawings** (7.5 Hours)
  (Module ID 26110-17) Focuses on electrical prints, drawings, and symbols. Teaches the types of information that can be found on schematics, one-lines, and wiring diagrams.

### MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

### Electric Lighting (15 Hours)
(Module ID 26203-17) Focuses on the types of lamps and lighting fixtures. Discusses lighting safety and the characteristics of light. Focuses on the handling and installation of various types of lamps and lighting fixtures.

### Electrical Test Equipment (5 Hours)
ISBN 978-0-13-478339-0
(Module ID 26112-17) Focuses on proper selection, inspection, and use of common electrical test equipment, including voltage testers, clamp-on ammeters, ohmmeters, multimeters, phase/motor rotation testers, and data recording equipment. Also covers safety precautions and meter category ratings.

### Raceways & Fittings (20 Hours)
ISBN 978-0-13-480488-0
(Module ID 26108-17) Introduces the types and applications of raceways, wireways, and ducts. Stresses the appropriate NEC® requirements.

### Device Boxes (10 Hours)
ISBN 978-0-13-480491-0
(Module ID 26106-17) Covers the hardware and systems used by electricians to mount and support boxes, receptacles, and other electrical components. Covers NEC® fill and pull requirements for device, pull, and junction boxes under 100 cubic inches.

### Pull and Junction Boxes (12.5 Hours)
(Module ID 26210-17) Describes fuses and circuit breakers along with their practical applications. Also covers sizing.

### Conductor Terminations and Splices (7.5 Hours)
(Module ID 26206-17) Focuses on the types and sizes of conductors and cables, including preparing and splicing conductors.

### Circuit Breakers and Fuses (12.5 Hours)
(Module ID 26205-17) Driven by the NEC®, explains how to size pull boxes, junction boxes, and handholes.

### Conductor Installations (10 Hours)
(Module ID 26206-17) Covers the transportation, storage, and setup of cable reels; methods of rigging; and procedures for complete cable pulls in raceways and cable trays.

### Alternating Current (17.5 Hours)
(Module ID 26201-17) Focuses on forces that are characteristic of alternating-current systems and the application of Ohm’s law to AC circuits.

### Grounding and Bonding (15 Hours)
(Module ID 26209-17) Focuses on the purpose of grounding and bonding electrical systems. Thoroughly covers NEC® requirements.

### Conductors and Cables (10 Hours)
(Module ID 26209-17) Focuses on the types and applications of conductors and cables. Details proper wiring techniques. Stresses the appropriate NEC® requirements.

L3  MARITIME ELECTRICAL

LEVEL 3

Curriculum Notes
- 97.5 Hours
- Published: 2019
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK                ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Rigging Practices (15 Hours)
(Module ID 38102) Presents basic rigging, which refers to the preparation of a load for movement, as well as the preparation of hardware and other components used to connect the load to the crane. Rigging must be completed safely and effectively, resulting in a reliable connection to the load. An understanding of rigging fundamentals is essential to safely operate cranes and move/position heavy equipment, components, and structures.

Distribution Equipment (12.5 Hours)
(Module ID 26306-17) Discusses switchboards and switchgear, including installation, grounding, and maintenance requirements. This module also includes electrical drawings of distribution equipment.

Motors: Theory and Application (20 Hours)
(Module ID 26202-17) Covers AC and DC motors, including the main components, circuits, and connections.

L4  MARITIME ELECTRICAL

LEVEL 4

Curriculum Notes
- 90 Hours
- Published: 2019
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK                ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Control Systems and Fundamental Concepts (12.5 Hours)
(Module ID 26211-17) Gives basic descriptions of various types of contactors and relays along with their practical applications.

Advanced Controls (20 Hours)
(Module ID 26407-17) Discusses applications and operating principles of solid-state controls, reduced-voltage starters, and adjustable frequency drives. Also covers basic troubleshooting procedures.

Basic Electronic Theory (10 Hours)
(Module ID 26404-17) Explains the function and operation of basic electronic devices, including semiconductors, diodes, rectifiers, and transistors.

Motor Controls (12.5 Hours)
(Module ID 26311-17) Provides information on selecting, sizing, and installing motor controllers. Also covers control circuit pilot devices and basic relay logic.

Transformers (12.5 Hours)
ISBN 978-0-13-480527-6
(Module ID 26307-17) Discusses transformer types, construction, connections, protection, and grounding.

Specialty Transformers (10 Hours)
(Module ID 26406-17) Covers various types of transformers and their applications. Also provides information on selecting, sizing, and installing these devices.

Hazardous Locations (15 Hours)
(Module ID 26304-17) Covers the NEC® requirements for equipment installed in various hazardous locations.

Fire Alarm Systems (15 Hours)
ISBN 978-0-13-480547-4
(Module ID 26405-17) Covers fire alarm control units, Digital Alarm Communicator Systems (DACS), wiring for alarm initiating and notification devices, and alarm system maintenance.

Standby and Emergency Systems (10 Hours)
(Module ID 26402-17) Explains the NEC® requirements for electric generators and storage batteries.

Fundamentals of Crew Leadership (22.5 Hours)
(Module ID 46101) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Job-site safety and the crew leader’s role in safety are also discussed. Explains details and procedures for project planning, scheduling, and estimating.
L1 MARITIME PIPEFITTING

Curriculum Notes

- 182.5 Hours
- Includes 97.5 hours of Maritime Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.

PAPERBACK ISBN

MODULES
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Orientation to the Maritime Pipefitting Trade (5 Hours)
(Module ID 85101-13) Provides an overview of the maritime pipefitting trade and its career opportunities. Trade safety principles are introduced, as well as the responsibilities and characteristics of a good pipefitter.

Maritime Pipefitting Trade Math (15 Hours)
ISBN 978-0-13-340591-0
(Module ID 85102-13) Explains how to solve a wide variety of maritime pipefitting math problems, including those related to common geometrical figures. The process of determining lengths in pipe offsets for general and rolling offsets is also presented.

Pipefitting Hand Tools (20 Hours)
(Module ID 85103-13) Covers hand tool safety, as well as procedures for selecting, inspecting, using, and maintaining pipefitting hand tools. Includes pipe wrenches, pipe stands, pipe vises, levels, and pipe fabrication tools and aids.

Piping Systems (5 Hours)
(Module ID 85201-13) Identifies and explains basic types of piping systems found in the maritime environment and the materials used for various applications. Explains how thermal expansion in piping systems can be accommodated. Includes coverage of common insulation types and installation practices.

Butt Weld Pipe Fabrication (37.5 Hours)
(Module ID 85202-13) Describes the pipe fittings used for maritime butt welded piping systems and how to determine the lengths of pipe between points of connection. Explains how to prepare and fit both pipe and fittings, and how to select backing rings when required.

Socket Weld Pipe Fabrication (25 Hours)
(Module ID 85203-13) Describes the pipe fittings used for maritime socket welded piping systems and how to determine the lengths of pipe between points of connection. Explains how to prepare and fit both pipe and fittings.

Brazing (12.5 Hours)
(Module ID 85204-13) Describes the procedures for preparing various types of pipe and tubing for brazing, as well as the brazing process. Discusses the selection of brazing filler metals for various applications.

Threaded Pipe Fabrication (15 Hours)
(Module ID 85205-13) Describes the pipe fittings used for maritime threaded piping systems and how to determine the lengths of pipe between points of connection. Explains how to prepare and fit both pipe and fittings, and how to assemble threaded pipe components.

Pipefitting Power Tools (15 Hours)
(Module ID 85104-13) Covers power tool safety and procedures for selecting, inspecting, using, and maintaining power tools that are common in the maritime environment. Procedures for threading pipe are provided in a step-by-step format. Guidelines for both electrical and pneumatic tools are provided.

Oxyfuel Cutting (17.5 Hours)
(Module ID 85105-13) Describes the procedures and safety requirements related to oxyfuel cutting. Detailed instructions for setting up, lighting, and using oxyfuel cutting torches is provided. Common techniques, such as straight line cutting, beveling, washing, and gouging are reviewed. Oxyfuel gas supply arrangements from both cylinders and manifolds are also presented.

Ladders and Scaffolds (12.5 Hours)
(Module ID 85106-13) Explains how to identify various types of ladder and scaffold systems and describes their safe use. The pre-use inspection requirements for both ladders and scaffolds are presented.

L2 MARITIME PIPEFITTING

Drawings and Detail Sheets (20 Hours)
ISBN 978-0-13-340603-0
(Module ID 85107-13) Describes and identifies various types of valves, flanges, and gaskets used in the maritime environment. Factors related to valve selection as well as their storage, handling, and installation are presented. The various flange styles and related gasket materials are described, as well as their common installation procedures.

Oxyfuel Cutting (17.5 Hours)
(Module ID 85105-13) Describes the procedures and safety requirements related to oxyfuel cutting. Detailed instructions for setting up, lighting, and using oxyfuel cutting torches is provided. **Maritime Structural Fitter**

**L1 MARITIME STRUCTURAL FITTER LEVEL 1**

**Curriculum Notes**
- 237.5 Hours
- Includes 97.5 hours of Maritime Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2014
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**
**ISBN**
Trainee Guide: $74.99
978-0-13-294864-7

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Welding Safety** (2.5 Hours)
  (Module ID 29101-09; from Welding Level One, Fourth Edition)
  Covers safety equipment, protective clothing, and procedures applicable to the cutting and welding of metals.

- **Oxyfuel Cutting** (17.5 Hours)
  (Module ID 29102-09; from Welding Level One, Fourth Edition)
  Explains the safety requirements for oxyfuel cutting. Identifies oxyfuel cutting equipment and setup requirements. Explains how to light, adjust, and shut down oxyfuel equipment. Trainees will perform cutting techniques that include straight line, piercing, bevels, washing, and gouging.

- **Base Metal Preparation** (12.5 Hours)
  (Module ID 29105-09; from Welding Level One, Fourth Edition)
  Explains proper storage and control of filler metals and identifies the safety requirements for base metal preparation for all welding tasks.

- **Shielded Metal Arc Welding – Electrodes** (2.5 Hours)
  (Module ID 29108-09; from Welding Level One, Fourth Edition)
  Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

- **Weld Quality** (10 Hours)
  (Module ID 29106-09; from Welding Level One, Fourth Edition)
  Identifies the codes that govern welding, including marine welds. Identifies and explains weld imperfections and causes. Describes non-destructive testing, visual inspection criteria, welder qualification tests, and the importance of quality workmanship.

- **Intermediate Structural Print Reading** (40 Hours)
  (Module ID 29103-09; from Welding Level One, Fourth Edition)
  Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

**L2 MARITIME STRUCTURAL FITTER LEVEL 2**

**Curriculum Notes**
- 227.5 Hours
- Includes 103 hours of Maritime Industry Fundamentals, which is a prerequisite for Level One completion and must be purchased separately.
- Published: 2014
- Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

**PAPERBACK**

Trainee Guide: $99.99
978-0-13-383066-8

**MODULES**
The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

- **Cutting and Burning Processes** (40 Hours)
  (Module ID 86201-14) Expands on flame cutting methods covered in Level 1, including laying out and cutting bevels, chamfers, and circles. Also covers the methods used to cut or split common structural components such as beams and bars.

- **Plasma Arc Cutting** (7.5 Hours)
  (Module ID 29103-09; from Welding Level One, Fourth Edition)
  Introduces plasma arc cutting equipment and safe work area preparation. Identifies correct amperage, gas pressures, and flow rates. Covers plasma-arc cutting methods for piercing, slitting, squaring, and beveling metals. Explains how to store equipment and clean the work area.

- **Fire Watch** (5 Hours)
  (Module ID 86103-14) Covers fundamental skills needed to read fabrication drawings that are commonly used by structural fitters. Focuses on basic drawing elements such as title blocks, revision blocks, and drawing lines and introduces plan, elevation, and detail drawings.

- **Introduction to Structural Fitter Drawings** (40 Hours)
  (Module ID 86104-14) Introduces layout tools, fitting tools, and fitting aids used to fit up and align plate joints. Incorporates hands-on tasks through which the beginning fitter will learn how to perform basic layout, alignment, and fit-up tasks.

ISBN

MODULES

The modules listed below are included in the Trainee Guide. The following ISBNs are for ordering individual modules only.

Advanced Structural Print Reading (40 Hours)
ISBN 978-0-13-414487-0
(Module ID 86301-15) Focuses on learning to interpret ship construction drawings, ranging from the highest level general arrangement drawing to the lowest level piece-part drawing. Includes a set of drawings.

Fitting Three (80 Hours)
(Module ID 86302-15) Provides an overview of the ship construction process, from the lowest subassembly to the erection of the vessel itself. Illustrates laying out the locations of equipment and structural members, installing the equipment and structural members, and the use of leveling and alignment equipment.

GMAW and FCAW – Equipment and Filler Metals (10 Hours)
(Module ID 29205-09; from Welding Level Two, Fourth Edition) Describes general safety procedures for GMAW and FCAW. Identifies GMAW and FCAW equipment and explains the filler metals and shielding gases used to perform GMAW and FCAW. Explains how to set up and use GMAW and FCAW equipment and how to clean GMAW and FCAW welds.

GMAW and FCAW – Plate (80 Hours)
(Module ID 29206-09; from Welding Level Two, Fourth Edition) Explains how to set up and use FCAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

Physical Characteristics and Mechanical Properties of Metals (7.5 Hours)
(Module ID 29203-09; from Welding Level Two, Fourth Edition) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

Fundamentals of Crew Leadership (20 Hours)
ISBN 978-0-13-414493-1
(Module ID 46101-11; Second Edition) Covers basic leadership skills and explains different leadership styles, communication, delegating, and problem solving. Jobsite safety and the crew leader’s role in safety are discussed, as well as project planning, scheduling, and estimating. Includes performance tasks to assist the learning process.
Maritime Welding

Oxyfuel Cutting (17.5 Hours)
(Module ID 29202) Identifies and explains oxyfuel cutting equipment and the process of striking an arc. Explains how to connect welding current and set up arc welding equipment. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

Air Carbon Arc Cutting and Gouging (10 Hours)
(Module ID 29104) Introduces air-carbon arc cutting equipment and processes. Identifies the electrodes and safe operation of the equipment. Provides step-by-step instructions for performing air-carbon arc cutting and gouging activities.

SMAW - Equipment and Setup (5 Hours)
(Module ID 29107) Describes SMAW welding and welding safety. Explains how to connect welding current and set up arc welding equipment. Also explains how to use tools for cleaning welds.

SMAW Electrodes (2.5 Hours)
(Module ID 29108) Describes electrode characteristics and different types of filler metals. Reviews the role of the American Welding Society (AWS) and the American Society of Mechanical Engineers (ASME). Explains proper storage and control of filler metals and identifies the use of codes.

SMAW - Beads and Fillet Welds (100 Hours)
ISBN 978-0-13-418025-0
(Module ID 29109) Describes the preparation and setup of arc welding equipment and the process of striking an arc. Explains how to detect and correct arc blow. Describes how to make stringer, weave, overlapping beads, and fillet welds.

Joint Fit-up and Alignment (5 Hours)
(Module ID 29110) Describes job code specifications. Explains how to use fit-up gauges and measuring devices to check fit-up and alignment and use plate and pipe fit-up and alignment tools to properly prepare joints. Explains how to check for joint misalignment and poor fit.

GMAW - Plate (60 Hours)
(Module ID 29209) Explains how to set up and use GMAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

FCAW - Plate (60 Hours)
(Module ID 29210) Explains how to set up and use FCAW equipment and how to select and use different filler metals and shielding gases. Describes how to make multiple-pass fillet and V-groove welds on carbon steel plate in various positions.

GTAW - Equipment and Filler Metals (10 Hours)
ISBN 9780134779698
(Module ID 29207) Explains GTAW safety. Identifies and explains the use of GTAW equipment, filler metals, and shielding gases. Covers the setup of GTAW equipment.

GTAW - Plate (60 Hours)
(Module ID 29208) Describes how to build pads on carbon steel plate using GTAW and carbon steel filler metal. Also explains how to make multiple-pass GTAW welds on carbon steel plate coupons in the TF, 2F, 3F, and 4F positions, and how to make GTAW V-groove welds in the 1G, 2G, 3G, and 4G positions.

Maritime Welding Level 2 (continued)

Physical Characteristics/Mechanical Properties of Metal (7.5 Hours)
(Module ID 29203) Explains physical characteristics, mechanical properties, composition, and classification of common ferrous and nonferrous metals. Identifies the various standard metal forms and structural shapes. Shows how to extract metal information from Welding Procedure Specification (WPS) sheets and Procedure Qualification Records (PQRs). Covers visual inspection, magnetic testing, and X-ray fluorescent spectrometry methods used to identify metals.

Preheating and Postheating of Metals (5 Hours)
(Module ID 29204) Explains preheating, interpass temperature control, and postheating procedures that sometimes need to be done to preserve weldment strength, ductility, and weld quality. Covers the equipment used for heat treating metals.

L3 MARITIME WELDING
LEVEL 3

Curriculum Notes
• 470 Hours
• Published: 2019
• Downloadable instructor resources that include module tests, PowerPoints®, and performance profile sheets are available at www.nccer.org/irc.

PAPERBACK ISBN

Maritime Welding Level 2
Physical Characteristics/Mechanical Properties of Metal

GMAW - Pipe (60 Hours)
(Module ID 29302) This module explains how to set up GMAW equipment for open-root V-groove welds, and how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with GMAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

FCAW - Pipe (60 Hours)
(Module ID 29303) This module explains how to set up FCAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with FCAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

GTAW - Carbon Steel Pipe (80 Hours)
(Module ID 29304) This module explains how to set up GTAW equipment for open-root V-groove welds, and explains how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with GTAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.

GTAW - Low Alloy and Stainless Steel Pipe (70 Hours)
(Module ID 29305) This module explains how to set up GTAW equipment for open-root V-groove welds on low-alloy and stainless steel pipe, and how to prepare for and make open-root V-groove welds on low-alloy and stainless steel pipe. It provides procedures for making open-root V-groove welds with GTAW equipment on low-alloy and stainless steel pipe in the 2G, 5G, and 6G positions.

SMAW - Stainless Steel Plate and Pipe Groove Welds (100 Hours)
(Module ID 29306) This module explains how to set up SMAW equipment for open-root V-groove welds on carbon steel pipe, and how to prepare for and make open-root V-groove welds on carbon steel pipe. It provides procedures for making open-root V-groove welds with SMAW equipment on pipe in the 1G-ROTATED, 2G, 5G, and 6G positions.
