

Construction Industry Quit Rates

Quits, defined as voluntary separations from a company initiated by employees, varies across industries. Despite the common notion that the construction industry has a high quit rate, data from the U.S. Bureau of Labor Statistics Job Openings and Labor Turnover Survey (JOLTS) demonstrates otherwise.¹ As seen in Figure 1, the construction industry has lower monthly quit rates than many other common industries.

Figure 1. Average monthly quit rates per year across various industries, 2016 - 2025.
