

CONSTRUCTION COMPANY SIZE AND EMPLOYMENT

The U.S. construction industry employs 7,040,788 people across 745,205 companies¹. Figure 1 shows 99.7% of companies employ fewer than 250 people. Drilling down further, Figure 1 also demonstrates that 81.48% of companies have fewer than 10 employees. However, Figure 2 shows only 21.75% of employees work at construction companies with fewer than 10 employees.

While small firms represent most of the construction companies overall, many employees, roughly 4.3 million, are employed by construction firms with between 10 and 249 total employees.
